HOUSE OF REPRESENTATIVES—*Wednesday, March 30, 1977*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

We know that in everything God works for good with those who love Him.—Romans 8: 28.

Almighty and Eternal God, make us ready for the duties of this new day by bringing us closer to Thee. Renew our faith, restore our hope, replenish our love that we may do great things for our great people in this great Nation demonstrating the fact that a government of the people, by the people, and for the people is at work in this House of Representatives. Fill our minds with wisdom, our hearts with compassion that we may think clearly, choose wisely, and act nobly for the good of our Republic and the good of all mankind. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 351. Joint resolution making further continuing appropriations for the fiscal year 1977, and for other purposes.

PERMISSION FOR COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS TO HAVE UNTIL MIDNIGHT, THURSDAY, MARCH 31, 1977, TO FILE REPORT ON H.R. 5262

Mr. REUSS. Mr. Speaker, I ask unanimous consent that the Committee on Banking, Finance and Urban Affairs may have until midnight, Thursday, March 31, 1977, to file a committee report on H.R. 5262, to provide for increased participation by the United States in the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Asian Development Bank, and the Asian Development Fund, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

REPORT OF U.S. CIVIL SERVICE COMMISSION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–114)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Post Office and Civil Service and ordered to be printed with illustrations:

To the Congress of the United States:

I am transmitting herewith a copy of the United States Civil Service Commission's Annual Report for the fiscal year ended June 30, 1975. This Report was prepared and received prior to the beginning of my Administration.

JIMMY CARTER.

THE WHITE HOUSE, *March 30, 1977.*

PERMISSION FOR SUBCOMMITTEE ON GENERAL OVERSIGHT AND RENEGOTIATION OF THE COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS, TO SIT TODAY AND TOMORROW DURING 5-MINUTE RULE

Mr. SHARP. Mr. Speaker, I ask unanimous consent that the Subcommittee on General Oversight and Renegotiation of the Committee on Banking, Finance and Urban Affairs may be permitted to sit on today and tomorrow during the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR THE CONSIDERATION OF H.R. 4976 TO AMEND THE PUBLIC HEALTH SERVICE ACT

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 95–140) on the resolution (H. Res. 448) providing for consideration of H.R. 4976 to amend the Public Health Service Act, the Community Mental Health Centers Act, title V of the Social Security Act, and the program of assistance for home health services to authorize appropriations for fiscal year 1978 for health services programs, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR THE CONSIDERATION OF H.R. 4975 TO AMEND THE PUBLIC HEALTH SERVICE ACT

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 95–141) on the resolution (H. Res. 449), providing for consideration of the bill (H.R. 4975) to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for biomedical research and related programs, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR THE CONSIDERATION OF H.R. 4974 TO AMEND THE PUBLIC HEALTH SERVICE ACT

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 95–142) on the resolution (H. Res. 450), providing for the consideration of the bill (H.R. 4974) to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for health planning and related programs, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR THE CONSIDERATION OF H.R. 4895 TO AMEND THE STRATEGIC AND CRITICAL MATERIALS STOCKPILING ACT

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 95–143) on the resolution (H. Res. 451) providing for consideration of the bill (H.R. 4895) to amend the Strategic and Critical Materials Stockpiling Act, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PROVIDING FOR CONSIDERATION OF HOUSE RESOLUTION 433, CONTINUATION OF THE SELECT COMMITTEE ON ASSASSINATIONS

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 445 and ask for its immediate consideration.

The Clerk read the resolution. as follows:

H. RES. 445

Resolved, That upon the adoption of this resolution it shall be in order to consider the resolution (H. Res. 433) to provide for the continuation of the Select Committee on Assassinations, in the House as in the Committee of the Whole.

The SPEAKER. The gentleman from Missouri (Mr. BOLLING) is recognized for 1 hour.

Mr. PICKLE. Mr. Speaker, I make the point of order that a quorum is not present. I move a call of the House.

The SPEAKER. The gentleman's point of order is not in order at this particular time.

Mr. PICKLE. Mr. Speaker, I renew my point of order that a quorum is not present.

The SPEAKER. The Chair recognizes the gentleman from Missouri (Mr. BOLLING) to move a call of the House.

CALL OF THE HOUSE

Mr. BOLLING. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 108]

Alexander	Florio	Pepper
Allen	Foley	Poage
Ambro	Fountain	Quie
Andrews, N.C.	Gibbons	Rangel
Archer	Harsha	Roe
Ashley	Heckler	Runnels
Brown, Mich.	Horton	Scheuer
Burton, John	Leggett	Sebelius
Cavanaugh	Long, La.	Staggers
Chisholm	Luken	Stark
Clay	Lundine	Stockman
Conyers	Marlenee	Symms
Cornwell	Mathis	Teague
Dellums	Mikulski	Thompson
Diggs	Milford	Udall
Dingell	Miller, Calif.	Wilson, C. H.
Drinan	Moorhead, Pa.	Wilson, Tex.
Evans, Del.	Murphy, N.Y.	

The SPEAKER. On this rollcall, 379 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PROVIDING FOR THE CONSIDERATION OF HOUSE RESOLUTION 433, CONTINUATION OF SELECT COMMITTEE ON ASSASSINATIONS

Mr. BOLLING. Mr. Speaker, I yield 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

The SPEAKER. The Chair recognizes the gentleman from Missouri (Mr. BOLLING).

Mr. BOLLING. Mr. Speaker, I do not propose to take a great deal of time myself on this resolution. I intend to yield a good block of time to the chairman of the Select Committee on Assassinations, the gentleman from Ohio (Mr. STOKES); but this resolution is the same type of rule that we used the last time the matter was brought up.

When it is adopted, it provides for the

consideration of the matter in the House as in the Committee of the Whole, which means, as the Members will remember, that the Speaker will remain in the chair and that the matter will be open for amendment. It also means that the manager of the resolution, and that is me, will have the opportunity to move the previous question at any point. However, I made it clear in the Committee on Rules, as I made clear during the previous consideration of this matter, I remember, on the House floor, that I do not intend to exercise that right to move the previous question until I feel that the House is in a mood to move ahead. In other words, I have no intention of preventing any amendments that Members wish to offer or anything broader than an amendment that a Member might wish to offer.

Therefore, Mr. Speaker, it seems to me that we are proceeding as we proceeded before and that we have an opportunity to proceed from the rule to the consideration of the matter without too much difficulty.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. BOLLING. I yield to the gentleman from Texas.

Mr. KAZEN. This is the point which I wanted to clarify: We have 1 hour on the rule itself; is that correct?

Mr. BOLLING. That is correct.

Mr. KAZEN. Then we go ahead on the resolution; and of course, that runs its normal course?

Mr. BOLLING. We go ahead on the resolution under the 5-minute rule, and it runs its normal course.

Mr. KAZEN. There is no time limitation on the consideration of the resolution itself, is there?

Mr. BOLLING. There is no time limitation except when the House decides to order the previous question, which I may move.

Mr. KAZEN. And, as the gentleman already stated, every Member will have an opportunity to express his wishes?

Mr. BOLLING. That is exactly correct.

Mr. KAZEN. Mr. Speaker, I thank the gentleman.

Mr. BOLLING. Mr. Speaker, I reserve the balance of my time.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the able gentleman from Missouri (Mr. BOLLING) has explained the provisions of the resolution.

I stood in the well of the floor of this House some time ago when the committee was restructured, opposing the restructuring of the committee; and I stand here today opposing the funding and the continuation of the Select Committee on Assassinations.

I do so because I do not feel that the results of the investigation will justify the expense. Furthermore, I think that the pattern which this committee has followed since it was created and its stormy existence itself do not create a sufficient justification to continue its operations.

Mr. Speaker, I know that there are Members of this body who disagree, since they feel that if anything can come out of the investigations to either agree with the Warren Commission report or the trials, including the trial and conviction of James Earl Ray, which would substantiate what has happened in the past, that will justify the existence and the restructuring of this committee.

Mr. Speaker, I do not buy that. As a matter of fact, I have before me here a news article which appeared in the Washington Post Tuesday, March 22, 1977.

I beg the indulgence of this body, if the Members will please listen:

King, Sr.—Martin Luther King, Sr.—does not expect any results from inquiry.

And I quote:

"They are not going to get anywhere," King told an audience at Coffee High School in this North Alabama city. "They don't want to, they are just going to waste a bunch of the taxpayers' money," he said.

And that is a direct quote.

He goes on to say that there was obviously more than one man involved and there was a conspiracy. But even in saying that, Martin Luther King, Sr., said it was a waste of the taxpayers' money.

And I have not learned of any significant development in the investigation of the death of Dr. Martin Luther King, Jr., nor have I learned of any significant development in the investigation of the assassination of President Kennedy.

Mr. FAUNTROY. Mr. Speaker, will the gentleman yield?

Mr. QUILLEN. I will be happy to yield to the Delegate from the District of Columbia.

Mr. FAUNTROY. I thank the gentleman for yielding. I should like to inform the gentleman of Dr. Martin Luther King, Sr.'s latest position on the continuation of this committee's work. I have, in fact, talked with him. And it is true that Dr. King, Sr., the father of Dr. Martin Luther King, Jr., does believe that there was a conspiracy to kill his son. In his own words he said that "there was more than one finger on the trigger." Dr. King, Sr., made the statement with respect to what he believed to be the reluctance of the Congress to do a thorough investigation. He said it on the basis of what information he received through the media about the procedure being followed by the committee. He was laboring under the assumption that the committee was in disarray. And he interpreted that apparent disarray as an indication of an intention not to be serious about the investigation.

I shared with Dr. King, Sr., what now the committee has shared with the members of the Committee on Rules and the Members of the Congress in the report on the progress we have made in pursuit of these two investigations. I assure the gentleman that Dr. King, Sr., now has joined with the 12 members of the committee in urging the House on this date to reconstitute this committee to pursue the investigations and with the resources which the committee is now requesting of the Congress.

Mr. QUILLEN. Mr. Speaker, I thank the gentleman for his statement.

Yesterday I understood that Mrs. Martin Luther King, Jr., was in town. I told a proponent of the legislation that I would be happy to talk with her. I have not received any call or communication. Since the article appeared on March 22 and there has been no contrary information in the paper, I join with Martin Luther King Sr., in saying it is a waste of the taxpayers' money.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. QUILLEN. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, I think it is interesting, that we now have the latest word from the father of the slain Dr. King, but that most recent word was brought to us by the committee's partisans in an atmosphere of desperation. They had to get him to reverse the statement he had made earlier.

I would suggest that the statement the gentleman from Tennessee (Mr. QUILLEN) has quoted is far more representative of the beliefs the senior Mr. King expressed in the published statement.

Mr. King, Sr., also was concerned about the disarray of the committee. While the committee remains in disarray up to this moment. They dropped their former chairman, and today they dropped the chief counsel for the committee. I hope the House will drop the committee and end the disarray.

Mr. QUILLEN. I thank the gentleman from Maryland.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. QUILLEN. I will yield shortly to the gentlewoman from New Jersey.

Mr. Speaker, the committee is in disarray. The chairman of the committee, the fine gentleman from Ohio (Mr. STOKES), came before our Committee on Rules Monday and in a briefing before the members of that committee, repeatedly said that if Sprague resigned or if Sprague were fired, more than half of the members of that committee would quit, would not stay on, because of their dedication to Sprague. It was obvious that Sprague was calling the shots.

Now that Sprague has resigned, I wonder what will happen this morning to the constitution of that committee?

Mr. STOKES. Mr. Speaker, will the gentleman yield?

Mr. QUILLEN. I yield to the gentleman from Ohio.

Mr. STOKES. I thank the distinguished gentleman in the well for yielding.

At 10 a.m. this morning the Assassinations Select Committee met and officially accepted the resignation of Mr. Richard Sprague. He is no longer counsel or in any manner associated with this select committee. Not one single person from that staff has taken any action to resign that staff. That staff is intact.

Mr. QUILLEN. Will the gentleman from Ohio be kind enough to answer this question.

Mr. STOKES. I certainly will.

Mr. QUILLEN. Did I quote the gentleman correctly when he made the statement that he thought that at least 50

percent of the committee would leave if Mr. Sprague were fired?

Mr. STOKES. If the gentleman will yield, I would say to the gentleman that I have never used the figure that at least 50 percent would have gone. What I think I said to the gentleman in response to his question was that at the time I assumed the chairmanship, there was no real sentiment for the dismissal of Mr. Sprague. Consequently, we were also faced with the problem that many of the persons who had been assembled around the country by Mr. Sprague felt a great deal of loyalty to him, and at that point in time, that is, on March 8 when I assumed the chair, I felt that we would have lost a large number of that staff.

Mr. QUILLEN. I thank the gentleman. I think some of the statements did reflect 50 percent. I am sure that what the gentleman says is correct as coming from him, but in the hearing before the Committee on Rules the 50-percent figure was used.

Mrs. FENWICK. Mr. Speaker, will the gentelman yield?

Mr. QUILLEN. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank the gentleman for yielding.

I have been of two minds about this committee. I think the whole House has. I am persuaded to vote for the continuation of this committee because I think some of the finest Members of Congress sit on that committee, and we can have confidence in their judgment and in the way they will proceed. But further than that, I think we are beginning to understand that there are a great many things here that have not been properly investigated, for whatever reason I and the rest of the general public cannot seem to find out. I think they need to be aired. We know the quality and character of the Members who are charged with the responsibility of investigating. As Members of the House, they will convince me, because I know them. If they say "this is all there is to it," I will believe that. I believe that is what most of the people in this country would agree to, also.

Mr. QUILLEN. Let me continue my statement on the rule. I know there are those who favor the continuation of the committee, but we are going to have debate under the 5-minute rule later. My position is to defeat the rule, to take up for the taxpayers, the people who pay the bill, the people who pay the high electric bills, the high prices and high taxes. I do not think we should go out on a witch hunt and spend $2,700,000 in 1977 and then possibly more in 1978, all to no avail.

Yes, this morning it is reported in the press that a person who was connected with Oswald has killed himself, and that he has been interviewed or was expected to be interviewed by the counsel of this committee. But he no longer lives.

I do not know why the committee has had so many ill omens to begin with. This House took up for Mr. Sprague over a fine Member of this Congress, of this body, the gentleman from Texas (Mr. GONZALEZ). They supported Mr. Sprague over this fine gentleman from Texas, and now Mr. Sprague has resigned. That is what the chairman of the committee, the gentleman from Texas (Mr. GONZALEZ) wanted when he fired him—to get rid of him—and now the same committee that backed Mr. Sprague met this morning and accepted his resignation.

How far can we go one way and then turn another way and say we are right both ways?

Mr. FITHIAN. Mr. Speaker, will the gentleman yield for just a moment?

Mr. QUILLEN. I yield to the gentleman from Indiana.

Mr. FITHIAN. I thank the gentleman very much.

Was the gentleman from Texas aware that in the initial altercation between the former chairman and the chief counsel, there were those of us who objected solely on the grounds that the rules of the House of Representatives, which my colleague, the gentleman from Tennessee, has been so stalwart in upholding, were being violated, that a general counsel had been elected by the committee and by the rules of the House, and that he could only be unelected or fired by the committee?

Mr. QUILLEN. I am familiar with that, but by the same token, the committee had a right to meet and uphold the chairman, the gentleman from Texas (Mr. GONZALEZ), as they did this morning when they accepted the resignation of the counsel.

Mr. FITHIAN. I am glad the gentleman raised the point that the committee had the right to meet. That was my argument too. However, the chairman did not call us to a meeting and then he became ill for some 2½ weeks and so we were unable to meet.

Mr. QUILLEN. The gentleman knows if he read the RECORD of yesterday and again today what the chairman, the gentleman from Texas (Mr. GONZALEZ), has said, what he has done, and what he has tried to do, but the chief counsel got in touch with the members of the committee over and above the chairman's head. But we are not here this morning arguing Sprague. Sprague is no longer here.

Mr. McKINNEY. Mr. Speaker, will the gentleman yield for a question?

Mr. QUILLEN. I yield to the gentleman from Connecticut.

Mr. McKINNEY. Was the gentleman aware of the fact that not only did the committee not have a chance to meet about the firing of the general counsel but that we were already on our way out of town when we were informed of this late in the evening and that we were not even consulted on the appointment of a new acting counsel 2 days later after we were all in unison in rejecting and disapproving of the previous action?

Mr. McCLORY. Mr. Speaker, will the gentleman yield to me?

Mr. QUILLEN. Let me finish here. Rather than yield all my time, I would prefer that some of these statements be made under the 5-minute rule, but I will be very happy to yield to my friend, the gentleman from Illinois.

Mr. McCLORY. I thank my friend for yielding.

I want to concur in and support the gentleman's opposition to the rule. It seems to me that with the important business now pending before this House we are getting very, very far afield with the reinstatement of this select committee. I have had the opportunity, as other Members have had, to see movies and to listen to statements and to get certain promises that certain evidence could be or might be or would be made available, and so on. It seems to me we are invading the judicial and executive branches of Government by attempting to resurrect this select committee. The committee's proposed activities legitimately belong to the Department of Justice and to the judicial branch and to the prosecutorial agencies of Government. It seems to me this resolution takes us far afield from our legislative responsibilities, and gets us into activities where we do not belong, perhaps because of the natural attraction which the media might have in the assassinations of Martin Luther King, Jr., and John F. Kennedy.

It would seem to me a most unfortunate waste of time and of the taxpayers' money, and I hope indeed that the rule will be turned down.

I thank the gentleman for yielding.

Mr. QUILLEN. I thank the gentleman for his contribution.

But if the Members have not done so, I plead with them today before the final vote if the rule is adopted—and I hope it will not be—to read the RECORD and the statements of the gentleman from Texas (Mr. GONZALEZ). I think it will open the eyes of the Members.

But here we are today. We plowed this ground over and over when the committee was constituted late last year, when the Congress knew that we were going to adjourn and the committee was going to be a lameduck committee with a lameduck chairman and with a committee staff that was oversized. The general counsel said that he needed $6.5 million in order to do the work for 1 year, and it would be a 2-year investigation, for a total of $13 million.

Many things took place, it is rumored, and it was in the newspaper columnist's article in the Dallas paper that the chief counsel sent some people down there to make an investigation and found where they were supposed to go, the building had been torn down and what they had been sent to investigate was absolutely past history; nothing current, up to date.

I realize that the gentleman from Ohio said Monday in the Committee on Rules that CBS had said that was an error; but I find that the newspaper columnist in Dallas has not reported that it was an error.

Mr. STOKES. Mr. Speaker, will the gentleman yield?

Mr. QUILLEN. I would be happy to yield to the gentleman from Ohio for a statement.

Mr. STOKES. Mr. Speaker, I would like to once again say to the gentleman that when the question was posed to me in the Rules Committee, that I did respond to the gentleman that CBS has completely refuted that particular account and has reported that that account was in error.

Mr. QUILLEN. Is the gentleman familiar with the newspaper article to which I refer?

Mr. STOKES. I am not familiar with the newspaper article, just the report we had that was put out by CBS, which I assume is the same identical information that appeared in the newspaper article which has now been refuted.

Mr. QUILLEN. I have personally not seen the article—I must level with the gentleman, but I am told that the columnist has not retracted his statement; but I would like the chairman, if the committee is extended, to find out, in fact, if that did occur, and if it did, to take the necessary action, and if it did not, of course, there is no action to be taken.

Mr. STOKES. I am sure the gentleman will do that.

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. QUILLEN. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. The gentleman in the well has correctly suggested that we review the CONGRESSIONAL RECORD of the last 2 days. I have taken the time to read carefully each of the documented charges against Mr. Sprague. I am curious that in the CONGRESSIONAL RECORD on page 9373 of yesterday the gentleman from Texas (Mr. GONZALEZ) said:

> The fact reflected in those vouchers was that the biggest single expense in the $9,900-plus—just for expenses; that was not salaries—was in long distance calls, and in those long distance calls enumerated, his long distance calls to Philadelphia were the biggest item.

I would just suggest to the gentleman that in doing some further research I found that the vouchers total $11,488.40. Of that figure, only $826.85 were telephone calls, and of that figure only $114.28 were calls made to the city of Philadelphia, and of that figure the gentleman, Mr. Sprague, had given a check to cover the cost of this $114.28 expenditure.

It seems to me it reflects on the quality of the accusations if, in fact, the research that I have been able to do with the Committee on Rules indicates that, in fact, the voucher was not for telephone expenses entirely and, in fact, the item mentioned was only for $114.

I just have a great deal of difficulty with a number of these charges that seem to me, as a naive, young Congressman, to be unfounded.

Mr. QUILLEN. Does the gentleman support the restructuring of the committee?

Mr. EDGAR. What is that?

Mr. QUILLEN. Does the gentleman support the restructuring of the committee?

Mr. EDGAR. I support the restructuring of the committee, because I have taken the time to read the charges and accusations.

Mr. QUILLEN. If the rule is not defeated, and I hope it will be defeated, I think the gentleman from Texas (Mr. GONZALEZ) is entitled to reply to what the gentleman has said.

Mr. EDGAR. I would appreciate it if the gentleman would do that.

Mr. QUILLEN. If we take a paragraph or a statement out of context, and work it any way that we want to, the meaning can be twisted. I, for one, supported Mr. GONZALEZ, my colleague, the gentleman from Texas, over Mr. Sprague. I will not ask the gentleman from Pennsylvania what the gentleman did, but I am not going to get into an argument.

Let me go to this mental illness of George de Mohrenschildt, the man who killed himself. The committee well knew that he had mental illness; that the pursuit of the charges against this man could lead to his death. When the investigators went down to Dallas, they were told that he had a mental health record.

Now, it said in this morning's paper that the man has killed himself. Oh, yes, the committee can go out and get the mental incompetent; it can get the rumors; it can go on a witch hunt and spend the money, but in the end, what do we have? President Kennedy is dead. Martin Luther King, Jr., is dead.

I understand they have been down interviewing Earl Ray in prison, but I am sure that under the confidentiality requirements of this committee, we cannot reveal on the floor of the House what has been said. But, what about this? On Earl Ray, the Department of Justice says that there is no new evidence.

But I say, let us not spend the taxpayers' money. Let us put an end to the committee. Let us do it now. Vote down the rule.

Mr. Speaker, the entire texts of the newspaper articles from which I have previously quoted are as follows:

KING, SR., DOESN'T EXPECT ANY RESULTS FROM INQUIRY

FLORENCE, ALA., March 21.—The Rev. Martin Luther King Sr., father of the slain civil rights leader, said Sunday he does not expect any results from an investigation into his son's death by a congressional subcommittee studying assassinations.

"They are not going to get anywhere," King told an audience at Coffee High School in this north Alabama city. "They don't want to. They are just going to waste a bunch of the taxpayers' money," he added.

But King said he was convinced there was a conspiracy to kill his son. "There was obviously more than one man involved. There were many fingers on the trigger of that gun," he said.

[From the Washington Star]

FIGURE IN JFK PROBE FOUND DEAD, A "SUICIDE"

PALM BEACH, FLA.—A Russian-born petroleum geologist and language professor, described as "intimately involved" with Lee Harvey Oswald and a "crucial witness" in the congressional investigation of the Kennedy assassination, was found dead yesterday in an apparent suicide.

Palm Beach County Sheriff Richard Wille identified the victim as George de Mohrenschildt, 65, a professor of French at Dallas' Bishop College.

Wille said de Mohrenschildt, a guest at the historic oceanfront mansion in suburban Manalapan, Fla., of Mrs. Charles Tilton III, apparently placed the muzzle of a 20 gauge shotgun to his mouth and pulled the trigger.

The sheriff said de Mohrenschildt had vanished from Dallas shortly after a Dutch newspaper report about three weeks ago claimed he had prior knowledge of the assassination.

De Mohrenschildt was traced by a House Assassinations Committee investigator to the Florida address, the sheriff said, and he returned to the Tilton home about 2:45 p.m. yesterday to learn that the investigator, believed to be Gaeton J. Fonzi, had been trying to reach him.

The dramatic development yesterday, together with sudden support of a continued investigation by Dr. Martin Luther King Sr., may serve to win the committee a new lease on life. Under continuous attack, the assassinations panel will go out of business at midnight tonight unless the full House votes an extension.

Informed late last night of the death, Rep. Richardson Preyer, D-N.C., a key member of the committee, said, "He was a crucial witness for us, based on the new information he had. He was intimately involved with Oswald.

When the Warren Commission issued its report in 1964, concluding that President Kennedy was killed by Oswald acting alone, it said it had conducted an extensive investigation into de Mohrenschildt and his wife, Jeanne, because they had known the Oswalds through mutual Russian-speaking friends in the Dallas-Fort Worth area. The commission concluded that there was no evidence linking them to the tragic event in Dallas.

In his account quoting de Mohrenschildt as saying he had prior knowledge of the Kennedy assassination, Dutch journalist William Oltmans reported, "He (de Mohrenschildt) asked me 'How do you think the media would react if I came out and said I feel responsible for Oswald's behavior?'"

After vanishing from Dallas, De Mohrenschildt showed up in Oltmans' office in Holland. Then he disappeared again and was traced by government investigators from Brussels to Florida.

Sheriff Wille said only a maid and the Tilton family chauffeur were at home at the time and the shooting went undiscovered until the body was found by de Mohrenschildt's daughter in a second floor drawing room. Both had been guests at the Tilton home for about a week.

The sheriff said the call to the home was believed to have been placed from Miami by House investigator Fronzi.

About an hour later, Wille said, de Mohrenschildt apparently shot himself. "We're 99 percent certain he killed himself," the sheriff said.

Wille and Palm Beach State Atty. David Bludworth questioned witnesses about the shooting until shortly before midnight.

Among the witnesses quizzed was free lance writer Ed Epstein, who had told the West Palm Beach Post Monday night that he had been interviewing de Mohrenschildt in connection with a book he was doing about Lee Harvey Oswald.

After his questioning last night, Epstein said, "I don't mean to be evasive but the police told me not to talk about de Mohrenschildt's death to anybody."

The Tilton home remained sealed off by sheriff's deputies last night.

According to the Warren Commission report, de Mohrenschildt was born in the Ukraine in 1911 and fled Russia in 1921 following the civil disorders that broke out after the Bolshevik revolution.

He became an American citizen in 1949, having earlier received a graduate degree from the University of Texas in petroleum geology and petroleum engineering.

In 1960, the report states, he traveled for eight months through Mexico and Panama over primitive jungle trails, and by happenstance he and his wife were in Guatemala City when the Bay of Pigs invasion was launched. He prepared a lengthy film clip and a complete written log on the trip and a report was made to the U.S. government, the commission reported.

De Mohrenschildt death was third involving witnesses or potential witness before congressional panels investigating assassinations.

Underworld figure Sam Giancana was murdered before, and John Rosselli was killed after, testimony before the Senate

Intelligence Committee investigating allegations that the assassination of Kennedy was in retaliation for CIA efforts to assassinate Cuban Premier Fidel Castro.

[From the Dallas Morning News, Mar. 20, 1977]

MENTAL ILLS OF OSWALD CONFIDENT TOLD

(By Earl Golz)

George de Mohrenschildt was having mental problems shortly before he told a Dutch journalist last month he knew in advance Lee Harvey Oswald was going to assassinate President John F. Kennedy, The Dallas News has learned.

The 65-year-old Bishop College French professor agreed to commit himself to the psychiatric unit of Parkland Memorial Hospital last Nov. 9 after his wife filed court papers to force commitment, Dallas County Mental Illness Departmental records show.

The hospital said De Mohrenschildt was released from the psychiatric unit about eight weeks later on Dec. 30, but declined to give information about his examination.

The hospital did not refer De Mohrenschildt to the County Evaluation Center for further examination, which indicated he was not considered harmful to himself or others.

The House Assassinations Committee last Tuesday quizzed a Dutch journalist and longtime De Mohrenschildt friend, Willems Oltmans, who said he had interviewed De Mohrenschildt last month at Bishop College. Oltmans did not say whether he had known of De Mohrenschildt's previous mental problems.

Oltmans quoted De Mohrenschildt as saying he knew in advance what Oswald was going to do before the assassination in Dallas Nov. 22, 1963.

"He said to me, 'How do you think the media would react if I came out and said that I feel responsible for Oswald's behavior,'" Oltmans said.

The Oltmans interview developed into a national news story and sent investigators from the congressional committee scurrying to Dallas in search of De Mohrenschildt and his acquaintances. As of Friday, however, the probers had not inquired about his records with the Dallas County Mental Illness Department.

In response to a request from The Dallas News, which asked that court records regarding De Mohrenschildt's mental illness proceedings be made accessible because such action is "in the public interest," Probate Judge Joseph E. Ashmore Jr. did so.

Congressional committee investigators have been working on the De Mohreschildt case under the impression he disappeared after he left Bishop College March 1. Oltmans told the probers he accompanied De Mohrenschildt to Europe after he left the college on a leave of absence of several days, and then lost contact with him.

Bishop College officials said while De Mohrenschildt had not been heard from, they still expect him to return after the school's spring vacation ends Monday.

De Mohenschildt, who was born in Russia, was questioned at length before the Warren Commission in April, 1964, because of his friendship with Oswald months before the assassination. Then a petroleum engineer, he had befriended Oswald and his wife when they arrived in the Dallas-Fort Worth area in 1962 from Russia.

Mr. and Mrs. De Mohrenschildt had left for Haiti in connection with the oil business seven months before the assassination and were living there when it happened.

One of the fascinating aspects of De Mohrenschildt to the Warren Commission was his personal acquaintance with both Oswald and the mother of President Kennedy's widow, Jacqueline. During his 10 hours of testimony, he acknowledged he had written a letter to Mrs. Hugh D. Auchincloss, Dec. 12, 1963, expressing his sympathies after the assassination.

De Mohrenschildt told the commission he had met and become friends with Mrs. Auchincloss at Belport, Long Island, in 1939, within a year after he arrived in this country from Russia. He said he also met Jacqueline at the same time when she was a little girl.

In his letter to Mrs. Auchincloss, De Mohrenschildt stated he still had "a lingering doubt, notwithstanding all the evidence, of Oswald's guilt."

De Mohrenschildt told the commission he "will have the lingering doubt for the rest of my life . . . mainly because he (Oswald) did not have any permanent animosity for President Kennedy."

Mrs. Auchincloss later wrote back to De Mohrenschildt saying, "It seems extraordinary to me that you knew Oswald and that you knew Jackie as a child. It is certainly a very strange world." She added, "I hope, too, that Mrs. Oswald will not suffer."

Mr. BOLLING. Mr. Speaker, I yield 15 minutes to the gentleman from Ohio (Mr. STOKES), the chairman of the Select Committee on Assassinations.

Mr. STOKES. Mr. Speaker and my colleagues, this particular select committee, as the Members know, was constituted originally in the 94th Congress. Unfortunately, it was constituted under a Member of this body who was in a lame-duck status; consequently, very little was done between the time of constitution and the end of the last Congress. We were reconstituted once again on February 2, 1977, and then of course I need not recite to any of the Members the events which transpired after that time. I do not want to use my time to make reference to that. I would like to utilize my time to give the Members some understanding of what has transpired since March 8, the day that the Speaker of the House appointed me as chairman of this committee.

As the chairman of the committee, I found a situation which I am sure no other chairman of a congressional committee has ever found upon becoming chairman of a committee in this House. I found a situation where there were 73 staff employees, many of whom were investigators and attorneys, who could not make a single long-distance call. They had no authority whatsoever to make a long-distance call to anyone trying to communicate with a congressional committee.

I found a committee that had almost no stationery and no supplies with which to function. I found 73 people on a Federal payroll who had no authority whatsoever to travel anywhere to investigate anything in conjunction with these assassinations. I found a group of very dedicated and highly professional staff people, who in order to comply with the congressional mandate of $84,000 per month for January, February, and March, had taken a 35-percent pay cut in order to comply with that mandate of the Congress.

I found an investigative staff that no longer had any access to FBI records or CIA records, and could not even communicate and get records from Senate investigatory committees because it was a committee without a chairman, and no one wanted to have any relationship with it whatsoever.

I found two Members of the Congress, respectively the gentleman from North Carolina (Mr. PREYER) and the gentleman from Washington, D.C. (Mr. FAUNTROY), both of whom had been subcommittee chairmen in the previous Congress, who in this Congress had not yet been appointed by the former chairman to be subcommittee chairmen. Consequently, neither one of these two Members of Congress and members of the committee could call any meeting of their respective subcommittees. It was a committee that had not yet adopted any rules, even though it had been in existence since the 94th Congress.

So immediately, then, I tried to restore some type or order to a very chaotic situation. This was 22 days ago. Since then we have been able to restore the long-distance telephone services. We have stationery supplies for these people. They can now travel into all parts of the country in order to investigate these assassinations, and they have now acquired access once again to FBI and CIA records and those of other committees.

In addition, I appointed both subcommittee chairmen, and they were able to once again function in their respective capacities. Since we had no rules, the day before I was appointed the chairman of this committee we had to invoke the rules of the House in order to appoint an acting committee chairman in order to be able to adopt some rules. We spent a day or a day and one-half on the adoption of those rules under the acting chairman, the gentleman from North Carolina (Mr. PREYER). There were no committee rules at the time that this committee last went before the Committee on Rules, under the former chairman. There was a great deal of concern about the fact that this committee was going to violate the civil and constitutional rights of those persons whom they were investigating or interviewing. Since the adoption of these rules, we have now received a letter from the American Civil Liberties Union, which says that they no longer oppose the investigation by this committee, that the rules we have adopted do in fact safeguard the civil and constitutional rights of persons who will come in contact with our committee, and they strongly endorse the continuation and reconstitution of this committee.

There have been some allegations made that during January, February and March the staff had spent the allowance by this Congress. I have here a letter, dated March 4, 1977, signed by William H. Cable, which says:

> Based on a reduction in total payroll for February to a figure of approximately $80,100, and assuming your estimates for expenses and salaries for March are as you indicated, $81,600, the Committee would in my judgment stay within the amount authorized by House Resolution 11 of the 95th Congress which is $84,337.12 per month.

I have with me in my hand at this time a recap of our expenses for January, February, and including up to March 31, 1977. Our total expenditure allocation was $247,388.89. To date, we have spent $246,955.03, with $433.86 still remaining for the balance of March.

I might say that under the acting chairman we also spent a day and one-half ascertaining the fact that at no time had the staff exceeded the expenditure allocated by this House. And then, of course, we were in the position where the committee had never adopted and pro-

posed to this Congress a budget which we could come to the floor on. Consequently, I appointed the gentleman from North Carolina (Mr. PREYER) as a task force chairman and appointed members of the task force, and asked them to study the budget as Members of Congress and to bring into this body a practical budget that we could live with.

The previous budget, as I recall, was proposed by our chief counsel, Mr. Sprague. He proposed a budget somewhere in the neighborhood of $13 million for a 2-year period, at the rate of $6.5 million per year.

The Members of Congress spent several days in their task force and then came in with the type of a budget which they felt would be acceptable to this House.

That budget is in the amount of approximately $2.7 million for this year. That is for the 12-month period.

Mr. Speaker, part of the difficulty we had in adopting a budget was due to the fact that there were no previous criteria for such an investigation, because neither the House nor the Senate has ever undertaken the task of investigating two assassinations at the same time. Consequently, the figure that we have arrived at, we felt, is reasonable and practical. We are talking about a little over a million dollars per murder for a year.

In addition, the $2.7 million that we propose for the fiscal year 1977 also includes approximately $250,000, which amount we must repay to the contingency fund of the House at the rate of $84,000 per month.

In regard to both matters, in the past 22 days we have now begun investigations. That is something that had been thwarted up until 22 days ago. In the King matter, for instance, we have now dispatched investigators to various parts of the country, and they are proceeding to investigate. We have issued subpenas. We now have under our physical control for the first time in the 9 years since Dr. Martin Luther King's death all of the physical evidence in that case. We are now proceeding with the forensic scientific testing of some of that material and evidence that is now in our possession, and we are pursuing new leads concerning some previously unpursued facts. We have witnesses who have never previously been interviewed before, one of whom happens to be a constituent of a Member of this body. I am sure the Members have read recently about that.

In the case of James Earl Ray, who evidenced a desire and interest to talk to our committee, we dispatched investigators to Brushy Mount Penitentiary a week ago, and there they spent more than 2 hours interviewing him and taking his statement. This past Monday we sent them back down there again, and they have spent 6 additional hours talking to this man, who has never previously been willing to talk to any other investigatory body.

We have done the same in the matter of the Kennedy investigation. We have dispatched investigators throughout the country; we have issued subpenas; we have taken statements. We have also had before this committee one witness, a very vital witness in this investigation, who upon being called before our committee, took the 1st, the 4th, the 5th, and the 14th amendments 14 times and refused absolutely to divulge any information to this congressional committee.

Mr. Speaker, before I conclude I just want to make reference to the fact that this morning at 10 a.m. our committee met and officially accepted the resignation of Mr. Richard Sprague. That was done reluctantly by the members of this committee, because 11 of us who worked with Dick Sprague, and then subsequently the 12 of us who worked with him, had very high regard for his professional ability.

Dick Sprague resigned this morning not as a result of the charges that have been leveled against him by any Member of this body nor as a result of the truthfulness of any of those charges. He has said continuously since October 8, the day I assumed the chair, that—

> If at any time it is felt that I am an impediment to an investigation that I feel is necessary for the American people and in which I believe, I will step aside.

This morning his official resignation was tendered to us because he felt that the life of this committee depended upon his not being a member or a part of the staff assigned to this particular committee.

This morning the members of this committee paid great tribute to this man for whom they have high personal and high professional regard, and in that spirit they reluctantly accepted his resignation.

In conclusion, Mr. Speaker, I just want to say that the past 22 days has meant for me the assumption of a rather onerous and awesome responsibility, but I did accept this responsibility out of a love and respect and an admiration for the Members of this body. I resented sitting on a congressional committee that was being caricatured in the American newsprint as being a group of buffoons.

I resented sitting on a congressional committee where we were being caricatured as standing in a backroom somewhere assailing and flailing and assassinating one another.

I have tried in the past 22 days to show that this congressional committee is composed of dedicated, highly professional Members of this House who have been united in their efforts in a way I have never seen before in the House.

Mr. Speaker, I want to pay special tribute to the gentlemen on the other side of this aisle, the gentleman from Ohio (Mr. DEVINE), the gentleman from Illinois (Mr. ANDERSON), the gentleman from Nebraska (Mr. THONE), and the gentleman from Connecticut (Mr. MCKINNEY), men who have worked assiduously to try to complete a job to which they were dedicated and to which they were committed in order to try to bring credibility to this House in a responsible and professional manner.

On my own side of the aisle, Mr. Speaker, I am indebted to each of the members of this committee.

I say to the Members, Mr. Speaker, that this is a committee which has undertaken the work of this Congress in an assiduous manner, in a dedicated manner, in a highly competent and professional manner; and I say that it would be a tragedy if this committee were not to be reconstituted.

Mr. Speaker, the American people should have the opportunity to have all of these unanswered questions answered for them and to have this committee enabled to bring in the type of highly professional report that would be a credit and reflect creditably upon this Congress, of which I am so proud to be a part.

Mr. EDWARDS of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. STOKES. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I would like to ask the gentleman two questions.

First, there has been quite a bit of criticism of the previous counsel, Mr. Sprague, because of the fact that he was not, as I understand it, putting in full time on this job, but was putting in time on some other work.

Can the gentleman assure this House that his replacement as counsel to the committee would be a full-time employee who was doing no other outside work than his work as counsel to this committee?

Mr. STOKES. I would say in reply to the gentleman that it would be the intent of this committee that any person assuming that responsibility for the committee would devote full time to it.

The SPEAKER. The time of the gentleman from Ohio (Mr. STOKES) has expired.

Mr. BOLLING. Mr. Speaker, I yield 1 additional minute to the gentleman from Ohio (Mr. STOKES).

Mr. STOKES. Mr. Speaker, I thank the gentleman for yielding.

I say to the gentleman from Oklahoma (Mr. EDWARDS) that this is another unfortunate and unjust charge that has been leveled against Mr. Sprague because Mr. Sprague, while a member of a law firm in Philadelphia, had assured this committee in the full interrogation we made of him consisting of 1½ days in executive session, that each and every charge that has been leveled against him was not true and that while he was a member of the law firm he had not accepted or participated in any other case since assuming employment with our committee.

Furthermore, both former chairmen were apprised of the fact that he also was a law professor at Temple University where he taught school 1 night a week; and at the time we were interrogating him about it, he had missed 4 of the last 5 weeks of teaching that course.

Mr. EDWARDS of Oklahoma. May I say that I am not going back into that subject with respect to Mr. Sprague.

I am trying to get assurance that the committee does intend to get a full-time counsel.

The SPEAKER. The time of the gentleman from Ohio (Mr. STOKES) has again expired.

Mr. BOLLING. I yield 1 additional minute to the gentleman from Ohio (Mr. STOKES).

Mr. EDWARDS of Oklahoma. Mr. Speaker, will the gentleman yield further?

Mr. STOKES. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. To continue, Mr. Speaker, I am concerned about the fact that there has been much discussion throughout the country about there possibly being a conspiracy behind the assassinations and so forth. There have been suggestions made that perhaps foreign governments were involved in some of these conspiracies.

Of course, this raises a question in my mind. We have this wonderful thing which we call détente, and we have all these other things going on. If the gentleman's committee does continue to exist and does find that, in fact, there was a conspiracy and that that conspiracy was international in nature, will the American people know the results or will it be hushed up?

Mr. STOKES. I can say to the gentleman unqualifiedly that this committee is dedicated to trying to, once and for all, allay and put to rest all of the rumors and rumors of rumors and theories that exist with reference to both of these assassinations. It would be our intention, when we have completed the report, to lay the facts out as we find them and let the American people be the judge.

Mr. EDWARDS of Oklahoma. Is it not true that the gentleman cannot assure us that we will be able to find out the results?

Mr. STOKES. I have no way of knowing what the conclusions will be after we have been able to assess and analyze all of the evidence.

Mr. QUILLEN. Mr. Speaker, I yield 4 minutes to the gentleman from Illinois (Mr. ANDERSON).

Mr. ANDERSON of Illinois. Mr. Speaker, and Members of the House, it is perfectly possible I think to serve in a body as large as is the House of Representatives for a fairly long period of time and yet not come to know the full measure of a man's capabilities. I believe that we now understand, in the very masterful presentation that we have heard from the distinguished chairman of the Select Committee on Assassinations, that in the gentleman from Ohio (Mr. STOKES) we have a man who has undertaken to fulfill the mandate that we received from this House on the 2d of February. That is to go into the matter of the committee's budget and to draw up a set of rules that would satisfy the concerns of those who felt that somehow we were reaching too far in this investigation and possibly to involve and imperil the civil rights of American citizens. The gentleman from Ohio has had only 3 weeks to do that job because it was not until the 8th of March as a result of the unfortunate hiatus that developed upon the resignation of the former chairman, that this task was given to him to bring this committee together and to procure the kind of unity that has resulted in all 12 Members introducing House Resolution 433. All four Republican Members and all eight Democratic Members have joined in introducing the resolution that, when adopted today, as I am sure it will, will have the effect of reconstituting this committee.

So, Mr. Speaker, to stand up here and tell this House that we have before us a committee in disarray, one that is somehow going to place in ill repute the good name of the House of Representatives, is to ignore completely the character of the job that the gentleman from Ohio (Mr. STOKES), our new chairman, has done.

I do not want to turn this into a contest of personalities. I have great affection for my friend—and I am pleased to have him sitting over on the Republican side of the aisle this afternoon—great affection for the gentleman from Texas, Mr. HENRY B. GONZALEZ. The gentleman is not the issue in this debate nor is Mr. Sprague, the former chief counsel, who, just a little while ago submitted his resignation. The issue is, as the chairman, the gentleman from Ohio (Mr. STOKES), tried to point out, what we can do during the life of the select committee to try to answer the serious doubts that still exist in the minds of the American people concerning these matters. Was there a conspiracy connected with the murder of John Kennedy or Martin Luther King, Jr.? Maybe there was not. Maybe we will simply reaffirm the conclusions of the Warren Commission and the court that sentenced James Earl Ray.

So, Mr. Speaker, if we do nothing less but to put to rest the kinds of rumors and speculations that have led some 70 to 80 percent of the American people to express doubts that the full story has been told, then I think the money that we will have spent in the course of this investigation will be some of the best spent funds that this Congress has appropriated.

We cannot take lightly the fact that the American public today is skeptical of Government and the processes of Government and the conclusions which we reach. And if we make the kind of dedicated effort I am convinced we will make then I believe that under the rules that even the American Civil Liberties Union endorses and says that they now want, and are asking that the committee go forward, that it is possible we can remove some of the doubts that have been expressed about these two assassinations.

I believe there is a terribly important job to be done. I have confidence in the chairman. I have confidence in the distinguished gentleman from North Carolina (Mr. PREYER), and Mr. FAUNTROY, chairman of the King Subcommittee. Under Mr. PREYER's leadership of the budget task force, on which I was privileged to serve, we have drastically slashed both the proposed budget and the anticipated payroll.

I hope that the House today will unanimously support House Resolution 433.

Mr. BOLLING. Mr. Speaker, I yield 5 minutes to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Speaker, I want to thank the Speaker for recognizing me this morning on a point of order that a quorum was not present. I should have put it in the form of an inquiry or request. I thank the Speaker for his kindness.

I want to thank also the members of the Committee on Rules for allowing us to discuss this measure today openly and freely. I should have preferred an open rule with amendments under the regular 5-minute rule procedure, but the privileged rule they have adopted does give us a chance to have this discussion and to offer amendments or substitutes, and I think this sets better with the House, and I thank the Committee on Rules for doing it.

I also want to make it plain at the outset that I commend the 12 members of the select committee for their discreet approach in searching for some kind of answers. I want to assure them, as the gentleman from Illinois (Mr. ANDERSON) did, that this is not a matter of personalities; this is a matter really of what we do now with this select committee. I think many of the Members know that originally I had planned and may offer some kind of a substitute or amendment to the bill under the 5-minute rule. I think, however, that a more expeditious and forthright approach may be to have a yes-or-no vote on the resolution. I have come to the conclusion that it is best to let this committee go out of existence. The Assassinations Committee, to begin with, was born in doubt. It was a question mark to begin with. It has continued in antagonizing controversy, with very few questions settled. The actual purpose of the investigation still hangs fluttering like an Irish pennant with nothing being settled at all.

Admittedly, at first the issue was the question of Mr. Sprague as against the gentleman from Texas (Mr. GONZALEZ), however one wants to split and analyze it. There are many of us who would say—and I am sure every Member of this House would—that one of the most distinguished Members we have ever had in this body is the gentleman from Texas (Mr. HENRY GONZALEZ). I know for a fact that he is one of the most fearless men in public life that our State or this Congress has ever had. Make no mistake, he would not be this aroused and would not have taken this extreme action if he did not feel that he had been given a rebuff, that he had been repulsed and had not been supported. I do not propose at this time to discuss every step in his proceedings or every step by the leadership or the committee was right. That is for each Member to pass judgment on. I simply at this time will first pay my respects to the gentleman from Texas (Mr. GONZALEZ), who has been really the sole voice, and at times almost the only voice, in trying to pursue the purpose of this committee.

Now the question is what do we do about it? It seems to me we are faced with very few options. We can continue the Assassinations Committee or we can put it to a peaceful rest. This option, at peaceful rest, is probably the best thing for the Congress and this House to do. The committee has given us no peace since its beginning with Mr. Sprague. Surely the Members have not been the problem, but the problems are real and the problems affect us all. Now the question is can there be any credibility for this committee; at least, can there be sufficient credibility for us to ever find out the answer to the questions that actually haunt us? I do not think we can find out these answers now under the select committee. I think that the committee, though they are well-meaning

and though they are honorable members and have the best intentions, will not lay to rest the problem questions on the Kennedy and the King assassinations.

The better solution, in my opinion, would be to set up a special task force in the Department of Justice to handle this investigation. This would have credibility, just like the Watergate Prosecutor's Office had credibility. We could even give a 30-day extension for the staff members, if some felt that this would be in order.

In conclusion, I hope that the Members will vote "no" on the rule.

If this rule does not carry, I have here a bill which I will introduce that directs the Attorney General of the United States to establish a task force in the Justice Department to proceed with the full and further investigation of these questions. It would seem to me we need a fresh start and this I think is the proper course for us today, and I ask for a "no" vote on the rule.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from California (Mr. WIGGINS).

Mr. WIGGINS. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I oppose the rule and I oppose the reconstitution of the committee. I want to focus only on one reason for my decision.

We can agree unanimously that the responsibility of this committee, if it is reconstituted, involves sensitive, delicate matters in which the rights of individuals affected are to be scrupulously protected. We were given assurance by the chairman and by the staff that the work of the committee will be conducted in a professional manner and will not bring discredit on the House of Representatives. I think, Mr. Speaker, that the brief history of this committee contradicts those assurances. In fact, there have been flagrant disregards of right already. Let me tell the Members how and where.

There has been but one public hearing by the committee to my knowledge. That was, as Members will recall, a media event. The witness was a Mr. Trafficante, a person who I am told has been linked in the past with the underworld. He may be a very unworthy individual but it is in precisely that kind of case that rights should be scrupulously protected.

Mr. Trafficante's counsel informed counsel for the committee and the Committee as a Whole prior to the hearing that he would claim his fifth amendment rights if questioned with respect to certain matters. Knowing that fact and before the full glare of television, committee counsel repeatedly asked Mr. Trafficante questions and forced him to the burden of claiming his fifth amendment rights.

Let me ask the attorneys in the Chamber: Is that professional conduct? The American Bar Association in its Standards of Conduct characterizes such questioning as unprofessional. In nearly every jurisdiction in America a prosecutor who questioned a witness under such circumstances would produce a mistrial. It is prejudicial and reversable error to do that. It is not sufficient to say that the act was the misconduct of Mr. Sprague alone. It was the act of the committee. The committee did it, and in doing so, disregarded important rights to which this perhaps unworthy person, Mr. Trafficante, was entitled.

In its first public hearing, under the threat of being disbanded, this committee demonstrated its insensitivity to legal rights. I am not convinced that it will gain that sensitivity in the future if reconstituted.

I offer the Members this important illustration as one more reason why this committee should not be reconstituted.

Mr. PREYER. Mr. Speaker, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from North Carolina (Mr. PREYER).

Mr. PREYER. Mr. Speaker, I would like to point out that on Mr. Trafficante first, we did not know he was going to take the fifth amendment until that morning. We offered to have an executive session. He did not want to go into executive session. I think he wanted to announce he was taking the fifth amendment before the world and the underworld.

Mr. WIGGINS. Did the committee know of Mr. Trafficante's intention to claim his fifth amendment rights before the questions were asked?

Mr. PREYER. Before the questions, yes.

Mr. WIGGINS. That is the issue in terms of professional conduct. I contend that it was grossly unprofessional for the committee to permit the questions to go forward under the circumstances.

Mr. PREYER. I would say to the gentleman these are not questions out of thin air. These are questions on which we have witnesses who would testify on the question asked Mr. Trafficante.

Also I would say to the gentleman it is the intention of the committee in every case to interview witnesses, to hear their initial testimony in executive session, to corroborate their testimony in every way we can before the witness would be put on in public.

Mr. WIGGINS. The gentleman's statement is not persuasive on the question of whether it was unprofessional conduct to ask the questions, knowing of an intention to claim a lawful privilege.

In conclusion, let me say that the spectacle which I have described reminded me of another spectacle which occurred about 25 years ago in the other body, and which brought discredit to the Congress as a whole.

Mr. BOLLING. Mr. Speaker, I yield myself the remaining time.

Mr. Speaker, I yield such time as she may consume to the gentlewoman from California (Mrs. BURKE).

Mrs. BURKE of California. Mr. Speaker, when the House voted on September 17, 1976, to create the select committee to investigate the assassinations of President Kennedy and Dr. Martin Luther King, Jr., the action was considered monumental. For in my view, it represented a great step forward in the effort to restore the faith of millions of Americans in this body. As Members know, governmental bodies at all levels, but particularly the Congress, have not been held in high esteem in recent years by the American people.

I make this point to illustrate the potential problems we may continue to face in this regard if we fail to pass House Resolution 433 continuing the operations of the Select Committee on Assassinations.

It has been 13 years since President Kennedy was slain in Dallas. Dr. King was murdered 9 years ago. Yet a recent Gallup poll indicates that despite this passage of time, 80 percent of the American people still have lingering doubts about the extent to which all of the relevant facts have been disclosed in the assassination of these great men—two of the most traumatic events in American history.

As the committee stated in its report:

> The passage of time has not healed the national trauma caused by these assassinations. In the ensuing years, old doubts have remained and new and disturbing questions have been raised as additional evidence has come to light . . .

In just 5 short days we will observe the ninth anniversary of Dr. King's assassination in Memphis. Nothing could be more fitting for this occasion than to have the American people know that the Congress is indeed determined to put to rest once and for all, all of the facts relating to his murder and that of President Kennedy.

Since its creation, the committee has endeavored to undertake a thorough and impartial inquiry into both murders. Unfortunately, and to the dismay of many of our citizens and Members of this body, the committee has been beset by many problems. The committee has experienced leadership changes on three occasions; objections have been raised about the size of the initial proposed budget and the rules of the committee were in need of revision. Many have complained that the inquiry, to date, has revealed nothing more than a rehash of information produced in previous investigations.

None of these concerns, however, are sufficient reasons for dismantling this important investigation. The House select committee is the only body which has the potential for disclosing all there is to know about these slayings, thus putting the matter to rest once and for all.

As Members know, many witnesses who were earlier available for purposes of corroboration of existing and newfound evidence are now deceased. Even today we are confronted with the mysterious and questionable death of yet another potential witness, George Mohienschildt. Mr. Mohienschildt is reported to have known Oswald and to have had advance knowledge of the plan to assassinate President Kennedy. Committee staff was in the process of contacting him to determine just how much he knew about individuals and circumstances related to the Kennedy case. If we wait another 4 or 5 years to generate a new inquiry, either by Congress or some other governmental body, other witnesses conceivably would not be available.

I suggest to my colleagues that the more time passes, the less likely it will become that we will ever be able to determine all the facts involved in these cases.

Under the chairmanship of the gentleman from Ohio (Mr. STOKES), the problems of the committee have been resolved and the investigations are continuing in a methodical and thorough manner.

The proposed budget, previously an area of much concern to a great many Members, has been reduced from $6.5 to $2.7 million.

On March 7, the committee adopted rules of procedure which insure that the inquiry will be conducted in a credible manner and with appropriate constitutional safeguards.

On March 11, physical evidence used in the investigation and court trial of James Earl Ray in the murder of Dr. King was introduced into evidence of the committee. Mr. Ray, the convicted assassin of Dr. King, has been interviewed twice by committee counsel. Although he pleaded guilty at his trial in 1969, Mr. Ray now claims that he was set up and in fact did not kill Dr. King.

The evidence accumulated to date suggests that Ray did kill Dr. King. A rifle of the same caliber as the one which killed Reverend King was found a short distance from the scene of the crime with his fingerprints on it. A thorough investigation supposedly was conducted by the FBI. The Justice Department followed with its own investigation of the murder concluding that Ray was the lone assassin of Dr. King.

Yet many important questions remain unanswered and much information suggests the possibility that the convicted assassin may have been assisted prior to and following the assassination.

The committee must investigate how Ray was able to escape from prison after allegedly failing on several occasions and how he remained at large for better than a year traveling throughout the United States and at least four foreign countries without being apprehended.

The committee is concerned with where Ray got the money for his travels since he reportedly had earned only $664.34 from a dishwashing job at a restaurant in Illinois. Nevertheless, with no visible means of support he was able to raise nearly $10,000, that he spent in three foreign countries prior to the assassination.

The Justice Department report acknowledged that "the sources for Ray's funds still remain a mystery" and implied that the FBI should have followed up more thoroughly. Needless to say, it did not.

The committee has uncovered other areas of possible assistance to Ray. At the time he was in Los Angeles, his safety deposit box in Birmingham was closed by someone from Baton Rouge, La. We need to know who the mysterious Raoul is? Does he exist? Is he related to Ray? Was he present at the time of the assassination?

The committee is also investigating information from reliable sources that the day of the assassination a black policeman, Edward Reddick, was mysteriously relieved of his assignment at a surveillance post in a firehouse overlooking the hotel in which Dr. King resided. Conflicting reports have been given for his removal. The day before, two black firemen were transferred from the station to other posts.

If a conspiracy to assassinate Dr. King did in fact exist, the committee needs to determine who were the participants in the conspiracy? How did it function? and, What was the motivating force?

With respect to the murder of President Kennedy, the committee is pursuing new leads which, if corroborated, would indicate connections between Lee Harvey Oswald, the FBI and the CIA.

The Warren Commission concluded that Jack Ruby never knew Oswald prior to the Kennedy assassination. The committee is attempting to substantiate information obtained from a witness, never previously interviewed, who has stated that he—or she—was introduced to Oswald by Ruby in November prior to the assassination.

The committee is pursuing leads which suggest that Ruby traveled to Cuba in 1959 to visit Santos Trafficante who was in jail. Trafficante was associated with Sam Giancana and John Roselli, who also visited him in jail. Both Giancana and Roselli were murdered allegedly in connection with the request for their appearance before the Church committee which was investigating the CIA and the Kennedy assassination.

Trafficante appeared before the committee on March 16 concerning his knowledge of the Kennedy assassination, Ruby, Giancana, Roselli, Oswald, the CIA and the FBI. He refused to testify claiming rights under the first, fourth, fifth, and 14th amendments of the Constitution.

Oswald and an unidentified FBI agent were reportedly seen together on several occasions in bars in New Orleans.

Other pertinent information or leads have also surfaced.

If we are to resolve the many doubts and suspicions which still exist in the minds of millions of Americans, we will vote to adopt this resolution before us today. To do less is to simply perpetuate indefinitely the many suspicions which have surrounded the murders of President Kennedy and Dr. King for a decade or more.

Mr. BOLLING. Mr. Speaker, I do not think I will take the 5 minutes.

I think the chairman of the committee, the gentleman from Ohio (Mr. STOKES) made it very clear that the committee is functioning, that it has rules.

I think the fact that the committee membership has held together through thick and thin is one of the most remarkable things that I have seen in this House in all the time that I have been here. Really, the membership of the committee is a cross section of the whole institution and they are unanimous in their efforts. Their current effort is a phenomenon.

Mr. Speaker, I think the notion that this matter should be referred to the Justice Department, while all surely sincere, is really not very meaningful. This House took upon itself the responsibility of examining into these two murders. If it now decides not to do so when its committee is in order, the conclusion and the only conclusion that will be drawn by many of the American people, perhaps unfortunately, is that the House does not want to proceed and is, in effect, covering up.

I do not suggest for a moment that anybody who opposes this rule or opposes the resolution has that in mind. I suggest that that will be the reaction of the American people. They are uneasy, to put it very mildly, about the Warren Commission report. They are very uneasy about the King murder. They deserve from their servants the best possible efforts to mitigate and, if possible, dispel that unease.

Mr. Speaker, I urge a vote for the rule. I urge that we pass the resolution which the rule will bring up.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and on a division (demanded by Mr. PICKLE), there were—ayes 70, noes 54.

Mr. PICKLE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 285, nays 124, answered "present" 1, not voting 22, as follows:

[Roll No. 109]

ANSWERED "PRESENT"—1

Young, Tex.

NOT VOTING—22

Allen	Fountain	Rangel
Ambro	Harkin	Roe
Archer	McCormack	Staggers
Clay	Marlenee	Symms
Dellums	Mikulski	Teague
Eckhardt	Milford	Wilson, Tex.
Evans, Del.	Pepper	
Fisher	Poage	

The Clerk announced the following pairs:

On this vote:

Mr. Pepper for, with Mr. Teague against.

Mr. Rangel for, with Mr. Milford against.

Until further notice:

Mr. Clay with Mr. Allen.

Mr. Ambro with Mr. Fountain.

Mr. Dellums with Mr. Marlenee.

Ms. Mikulski with Mr. Evans of Delaware.

Mr. McCormack with Mr. Charles Wilson of Texas.

Mr. Staggers with Mr. Symms.

Mr. Roe with Mr. Fisher.

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REQUEST FOR PERMISSION FOR SUBCOMMITTEE ON CENSUS AND POPULATION OF THE COMMITTEE ON POST OFFICE AND CIVIL SERVICE TO SIT TODAY WHILE HOUSE IS IN SESSION

Mr. LEHMAN. Mr. Speaker, I ask unanimous consent that the Subcommittee on Census and Population of the Committee on Post Office and Civil Service may be permitted to continue to hold hearings and to take testimony today while the House is in session.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

Mr. ROUSSELOT. Reserving the right to object, Mr. Speaker, I realize that originally the House leadership had asked and we were scheduled to meet at 3 p.m. today and that that made it difficult for subcommittees which had already scheduled meetings during the early afternoon.

However, Mr. Speaker, as my distinguished chairman will understand, I am constrained to object to the request, which I think the gentleman will understand, because this is a critical issue that we are debating.

Therefore, Mr. Speaker, I would ask my colleague, the gentleman from Florida (Mr. LEHMAN) to withdraw his request.

Mr. LEHMAN. If the gentleman will yield, Mr. Speaker, at the request of the distinguished ranking member of the subcommittee, I will withdraw my request and reschedule the hearing.

PROVIDING FOR THE CONTINUATION OF THE SELECT COMMITTEE ON ASSASSINATIONS

Mr. BOLLING. Mr. Speaker, pursuant to the provisions of House Resolution 445, I call up House Resolution 433 and ask for its immediate consideration.

The SPEAKER. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 433

Resolved, That the Select Committee on Assassinations (hereinafter referred to in this resolution as the "select committee"), established by H. Res. 222, Ninety-fifth Congress, adopted February 2, 1977, shall continue in operation for the duration of the Ninety-fifth Congress.

SEC. 2. The select committee shall report to the House as soon as practicable during the present Congress the results of its investigation and study, together with such recommendations as it deems advisable. Any such report which is made when the House is not in session shall be filed with the Clerk of the House.

SEC. 3. The provisions of H. Res. 222, Ninety-fifth Congress, adopted February 2, 1977, shall apply to the select committee during the period of its operation under this resolution, except to the extent such provisions are inconsistent with any provision of this resolution. For the purpose of carrying out H. Res. 222, the select committee is also authorized to bring, defend, and intervene in lawsuits and make applications to courts.

SEC. 4. The provisions of H. Res. 11, Ninety-fifth Congress, shall not apply to the select committee after March 31, 1977.

COMMITTEE AMENDMENT

The SPEAKER. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Beginning on page 2, line 8, strike out all of Section 4.

The committee amendment was agreed to.

Mr. BOLLING. Mr. Speaker, I move to strike the last word.

The SPEAKER. The gentleman from Missouri (Mr. BOLLING) is recognized for 5 minutes.

Mr. BOLLING. Mr. Speaker, I do not intend to take any time except to say that amendments are now in order and that I intend to honor the agreement that I made earlier that I would not move the previous question until I felt the House was ready.

Therefore, Mr. Speaker, I would suggest that anybody who has an amendment might offer his amendment at this time. I have no amendments.

Mr. PICKLE. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I would ask the chairman of the committee whether he has any requests for time or requests to offer amendments, or does the gentleman wish to take time to discuss the bill by section and in detail?

Mr. BOLLING. Mr. Speaker, if the gentleman will yield, I would say that I have no requests for time from any Member. I know of only one amendment that possibly would be offered. I have no desire to delay this matter. I am ready to vote at any time.

Mr. PICKLE. Mr. Speaker, my question actually was addressed to the chairman of the select committee, the gentleman from Ohio (Mr. STOKES) as to whether he had any requests for time or if he wanted to take any time.

Mr. BOLLING. I think the answer to that inquiry would be no. I think the gentleman from Ohio would intend to respond, as I did, if questions are to be asked or if the amendments are offered, or if there are statements made that need responses. But we have debated this at some length earlier.

Mr. PICKLE. I thank the gentleman.

Mr. Speaker, earlier I told the House that I had planned to offer a substitute or amendments to this bill and the rule would so provide. I also told the Members a few minutes ago that I thought it might be best, at this point, to have a straight vote of yes or no on the resolution. I believe that gets to the issue at hand at this stage of debate, whereas it was originally a question of Mr. Sprague and his conduct and our doubts and our suspicions and uncertainty about him.

However now that issue has been removed.

The question is really do we renew this committee? Do we keep it alive?

As I told the Members of the House a few minutes ago, if the rule had failed, I would offer a bill and introduce it that would provide that the Attorney General would establish a task force to consider this matter further.

The rule did pass so my request to vote "no" did not prevail. I can understand this because many of the Members have commented that they would vote "aye" on the rule and then vote "no" on the resolution. I accept that.

I hope the Members will listen to what I say because I am trying hard to make what I believe is a constructive approach to this proposition. I have a bill drawn up here that would direct the Attorney General to establish a task force in the Department of Justice to further investigate and study the assassinations and deaths of John F. Kennedy and Martin Luther King, Jr. I would assume that the bill would be referred to a regular committee and would proceed under regular order.

Another section of the bill also provides that there will be $1.5 million appropriated to carry out the purposes of the proposed act. And if any Member later would want to offer an amendment that would provide for an extension of 30 days for the present staff to continue, I would accept that.

It is my firm conviction with all of the charges, the changes, the accusations, the denials, the doubts and the suspicions, that the best thing for us to do is to put this investigation back at the appropriate place where it belongs and let them, Justice, carry out what we hope might be a full and complete investigation.

So if the Members vote no on the resolution, this does not mean that all is gone or all investigation is stopped. It simply is an attempt to direct the investigation now and send it to the Department of Justice. Some Members will comment that the Department of Justice had looked at this before, and that is true. They just issued a recent report that had been compiled under the past administration, and that general conclusion was that with respect to the Martin Luther King assassination, the assassin acted independently.

The present administration, the present Department of Justice, points out that that was a report prepared by Attorney General Levi, submitted to the Congress as ordered, and each Member could draw his own conclusion. It was not and is not a definitive final expression of the Department of Justice under Attorney General Bell. The Department of Justice is not asking for this approach, but the Department of Justice has been asked and will they proceed? Can they proceed? Do they feel that they could carry out this order in proper fashion? The Department of Justice has said, yes, if the House of Representatives gives us this request, we will undertake it immediately and forthrightly. So I think that is the better approach to take. Many Members honestly feel that with a new chairman and with new rules, with the cost cut down now to $2.7 million per annum instead of a total of $13 million, we can proceed now in a regular and orderly fashion. That may be, but a much better approach would be to allow for the appropriation of $1.5 million and turn this over to the Department of Justice. We have to ask ourselves after several months of wild if not reckless charges the question that the American people must ask themselves: Can any good be accomplished by this investigation under this present established procedure? I think the American people are always going to have doubts that if we proceed as established now that we could ever reach any kind of satisfactory accord. We would always be in doubt.

This investigating committee is a sick cat. I do not think we can mend it or patch it up or squirt some high-life medicine in it. I think the best thing to do is send it to the Department of Justice, which really ought to be doing it right now. I think that is by far the best approach under the circumstances.

So, Mr. Speaker, instead of offering amendments or a substitute that might or might not be germane, I think the House might as well go ahead in whatever order they think and take a vote on the resolution. I have come to the conclusion that it is best to vote no on the resolution, send this to the Department of Justice, and let them proceed in an orderly manner. I have supported the resolution previously, but I do not think we can do this job now under the present climate, and I think it is best to turn it over to the Department of Justice. That is my hope in asking that the Members vote no on the resolution.

Mr. TREEN. Mr. Speaker, I move to strike the requisite number of words.

I have asked for this time in order to make some inquiry of the chairman of the committee. Before doing that, though, I would like to state that I have supported this committee. I supported its original creation, and I supported the extension until March 31. But I have several questions that I would like to have answered that will help me in making a decision on the resolution; I am undecided at this time.

Mr. Sprague, according to a wire service, resigned either last night or this morning. Did he give any reasons for his resignation that the chairman can share with the House?

Mr. STOKES. If the gentleman will yield, Mr. Sprague said that he did not in any way want to be an impediment. I want to read specifically from his letter of resignation which reads as follows:

> Dear Mr. Chairman and members: I am hereby submitting my resignation effective immediately as Chief Counsel and Staff Director of the House Select Committee on Assassinations. I do so with the hope that the Congress can now proceed with the challenge of seeing that these investigations are pursued promptly.

Mr. TREEN. I thank the chairman.

Did Mr. Sprague at any time indicate that he did not think that the funding expected to be requested by the committee would be sufficient to do a thorough and adequate job? Was part of his reason for resigning his belief that he did not think the committee would get enough money to do an adequate job?

Mr. STOKES. No, sir. He was asked specifically about this new budget before he left and as to whether or not the investigation in his opinion could be conducted for that sum of money, and he said he had deferred to both of the counsel who head up the individual investigations who felt that in their opinion it could be done, and he accepted that.

Mr. TREEN. The original budget was about $6.5 million. That was the original idea, and was that for the entire Congress or was that for only one session?

Mr. STOKES. That was for one session. A total of $13 million was proposed for the full Congress.

Mr. TREEN. And the proposed budget is now what, about $5 million for the 2 years?

Mr. STOKES. For the first year we are proposing or projecting $2.7 million.

Mr. TREEN. Yes.

Mr. STOKES. Part of which is, of course, reduced by our having to pay back to the contingency fund of the House, which is about $2.5 million, and we estimated the second year would be somewhere in the same neighborhood.

Mr. TREEN. I would say to the chairman, and the House, my reason for previously supporting the committee may perhaps be similar to that of others, and that is, while I do not know that the committee will turn up anything, I have felt that this is a subject of such importance to the American public that we should have an investigation for that reason. I personally think there are some questions about the King murder that do need answering. But I am concerned about us authorizing this money and the continuation of the committee and then at the end having someone say: "We did not have enough money to do the job right." If that occurs, my purpose and the purpose, perhaps, of others will be frustrated in that we will have had the investigation and then we will still have some people say: "We did not have sufficient authority and we did not have sufficient funds."

My question is, Mr. Chairman: Are you satisfied sincerely that under your budget you will be able to do an adequate job, a thorough job of investigation, that you have the authority by virtue of this resolution and the previous resolution, which is also part of it, to do a thorough job in these two areas?

Mr. STOKES. I can say to the gentleman that the task force under the chairmanship of the gentleman from North Carolina (Mr. PREYER) expended a great deal of time inquiring into the various concerns that this gentleman has and when the task force came back it was evident to us that they had laboriously inquired into the situation. They felt, they assured members of our committee, that given this amount of funds they could do the job that needed to be done.

Mr. TREEN. Do you, Mr. Chairman, specifically feel you have the authority, and with this budget, assuming that it is approved, this committee has the authority and the power to do a thorough job? Do you feel that way?

Mr. STOKES. Yes, I do, sir.

Mr. TREEN. I thank the gentleman.

Mr. BIAGGI. Mr. Chairman, will the gentleman yield?

Mr. TREEN. I yield to the gentleman from New York.

Mr. BIAGGI. I thank the gentleman from Louisiana for yielding.

In response to your threshold question as to the reason why perhaps Mr. Sprague resigned, first I would like the RECORD to show I supported the resolution and I support it again, but I was disinclined to support it with the presence of Sprague as counsel.

I would suggest that as a result of the head check made it appeared that the resolution was doomed and only Mr. Sprague's resignation could possibly have saved this committee. And it is my conclusion that he resigned in order to save this committee or at least give it a chance of survival.

Mr. FITHIAN. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, let me respond briefly to the surmise of the gentleman from New York, Congressman BIAGGI, to say that on behalf of the committee I conducted an unofficial whip count. It was the dedication of the previous counsel to the concept that the investigation ought to go forward, and it was the feeling that the vote was very, very close and the vote today might well end the committee's investigation. This led Mr. Sprague to resign. The gentleman from New York (Mr. BIAGGI) is entirely correct.

This has been indicated in the general debate on the rule. He was not resigning as a result of charges against him.

I would like now briefly to speak to the observations of the gentleman from Texas (Mr. PICKLE) that we, perhaps, ought to let the Justice Department conduct a reinvestigation. Now, I am not one who is opposed to the FBI and I am certainly not here to in any way impugn any Government organization. I am here, however, to argue the case that it would be a very bad judgment call on the part of the House, it would be bad on two grounds: One, that the House having started an investigation should now indicate by its vote that we will not abandon this investigation and go our separate ways in the hopes that at some future date the bill of the gentleman from Texas would be introduced, would be acted upon favorably and that the Justice Department would then pursue that action.

There are just too many "ifs" in that equation.

Now, let me turn to one item which I think might be of interest to the House and that is the recent release of a special task force to review the Martin Luther King, Jr., security and assassination investigation and the report by the Department of Justice. I was reading this report one evening and was startled when I discovered these inconsistencies on two pages facing each other. The pages are 98 and 99. On page 98 they are talking about how James Earl Ray came by his expense money by which he bought cars and paid for them in cash and any other number of expenditures that total probably $9,000 and perhaps as much as $10,500. His only known income was $600 from washing dishes in Winnetka, Ill. This is the Justice Department's report and this is what they say:

> These expenditures suggested that he, Ray, had financial assistance and, hence, possible coconspirators. Therefore, the Bureau was particularly interested in determining his sources of income. On April 23, 1968, the Director advised all field divisions to consider Ray as a suspect in any unsolved bank robberies, burglaries or armed robberies occurring after April 23, 1967 (which was his escape from the penitentiary.) The results were negative.

Now, what we are saying is that they put the entire network of the FBI to work to see if James Earl Ray was a suspect in any robbery or burglary that could have been done by him with the money. Their own conclusion is that "the results were negative."

Imagine my concern when over on page 99 at the bottom of the page I found this:

> It is the Bureau's opinion that Ray most likely committed on a periodic basis several robberies or burglaries during this period in order to support himself. Ray's criminal background does lend credence to this theory.

Our problem, of course, is we must recognize that if the committee is going to carry out the mandate of the House to look into the processes of the Government and see whether or not all information was transmitted to the Warren Commission or all information was available in the investigation of Dr. King's death. Then, clearly, if that is one of our mandates, we may need to come back to the House and indicate legislative correction which would be the responsibility of the House. But my question is how do we ask the FBI to investigate itself? That is one of the questions at issue here.

It would seem to me that we took the right course last September in authorizing the investigation. It seems to me that we reaffirmed that course in February and it seems to me that we ought to reenforce it again today. If we oppose the investigation, if we oppose the work of the committee and the investigators, on whatever substantive grounds, we should know what we are doing.

The SPEAKER pro tempore. The time of the gentleman from Indiana has expired.

(By unanimous consent, Mr. FITHIAN was allowed to proceed for 1 additional minute.)

Mr. FITHIAN. Mr. Speaker, if someone opposes sincerely on the basis of substance the House going into this investigation, then he should vote no, but not on the basis of some possible future action by the Justice Department.

If the Members favor the House going into this, then their position is to vote yes. It seems to me that we ought to keep focus this afternoon and make that decision not on the case of the former chairman versus the former chief counsel; not on the case of whether at some future date the Justice Department may take this up, but on the facts and realities which face this House today; that is, are we or are we not going to carry out the mandates of two preceding resolutions and carry on the investigations into these two murders.

Mr. Speaker, I would urge the Members to vote yes on the resolution on final passage.

AMENDMENT OFFERED BY MR. BAUMAN

Mr. BAUMAN. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. BAUMAN: On page 2, add the following new section:
>
> "SEC. 5. The provisions of clause 6(a)(3) of rule XI of the Rules of the House of Representatives shall apply to the select committee."

Mr. BOLLING. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Missouri.

Mr. BOLLING. If the gentleman will make one minor correction as follows: We have stricken section 4, and the gentleman has section 5 in his amendment; it should be section 4.

If I understand it correctly, this is the one that goes directly to the matter of staffing and the manner in which the members of the committee will staff itself. I am advised by the members of the select committee—and I agree with them—that this amendment is a good amendment and should be accepted.

Mr. BAUMAN. I thank the gentleman.

Mr. Speaker, I ask unanimous consent that the amendment be modified so that it reads "SEC. 4" instead of "SEC. 5".

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. BAUMAN. Mr. Speaker, I will just explain to the membership that the amendment does nothing more than write into the resolution the guarantee the chairman of the select committee gave us, that all future employees of the committee will be employed full time as members of the staff, and will not be engaged in any other outside activity.

The SPEAKER pro tempore (Mr. MOAKLEY). The question is on the amendment offered by the gentleman from Maryland, as modified.

The amendment, as modified, was agreed to.

Mr. HIGHTOWER. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I ask for time in order to propound some questions to the gentleman from Ohio (Mr. STOKES), chairman of the committee.

Mr. Chairman, as I understand it, Mr. Sprague's resignation was clear and unequivocal. Has the committee met and accepted the resignation?

Mr. STOKES. If the gentleman will yield, I will say to the gentleman that we met at 10 a.m. this morning in an open session of the committee and the vote was taken. The vote was 11 to 1 to accept his resignation.

Mr. HIGHTOWER. Has the committee adopted rules in regard to hiring practices, future hiring practices?

Mr. STOKES. Yes, we have.

Mr. HIGHTOWER. Does the chairman have the authority to hire and fire staff members now?

Mr. STOKES. The committee has full authority over all hiring and firing. That is in our rules.

Mr. HIGHTOWER. It would take an act of the full committee to hire and fire any staff employee?

Mr. STOKES. Under the present rules.

Mr. HIGHTOWER. I understand. It

would appear that the resignation is clear and unequivocal. Can we have the assurance of the chairman that at some future time Mr. Sprague will not be coming back to the committee?

Mr. STOKES. The gentleman has my complete assurance on that.

Mr. HIGHTOWER. In any capacity, as adviser, consultant, counsel or full time, part time—in any capacity?

Mr. STOKES. The gentleman has my full assurance on that.

Mr. HIGHTOWER. I thank the chairman.

Mr. RUDD. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I would like to commend the gentleman from Texas for his assurance that in the event this resolution goes down to defeat, the bill will be introduced to permit professionals to become involved and conduct this investigation with full force and vigor.

Mr. Speaker, I rise to oppose continuation of the House Select Committee on Assassinations.

This matter has been a considerable controversy in the House. I have talked to some of the committee's members, and met one evening with several of the committee staff to discuss the many serious reservations and doubts I had about continuation of the committee.

These doubts and concerns have not been dispelled.

First, there is the question of a congressional committee attempting to review evidence of crimes that are 13 and 8 years old respectively.

The world's best law enforcement and investigative professionals have collected and reviewed evidence, and no new evidence has since been uncovered to change the original verdicts in these cases.

The trail of evidence is now stone cold. Efforts of this congressional committee to review the evidence or uncover new evidence in the case of either the President Kennedy or Martin Luther King assassinations are efforts in futility.

The fact that no new hard evidence has been uncovered to date by this committee should be reason enough to abandon this report. The only product of the committee's work has been sensational and wild speculation generated by its activities.

A classic example of this sensationalism and wild speculation is reaction to the suicide yesterday of George de Mohrenschildt, the 65-year-old professor at Bishop College in Texas.

The committee staff had been trying to reach Professor De Mohrenschildt in connection with his statements that he had new information about Lee Harvey Oswald and the President Kennedy murder.

The statements had been published by a Dutch journalist, but Professor De Mohrenschildt apparently shot himself after wide publicity and attempts by the committee to get further information.

Proponents of the committee's continuation, including the news media who will benefit from such sensational stories, are citing this new development as prima facie evidence that the House should continue the work of the committee.

This is an attempt to railroad Congress, and to deceive the American public.

What we are not told is that, according to a March 20 newsstory in the Dallas Morning News, Professor De Mohrenschildt was recently admitted to the psychiatric unit at Parkland Memorial Hospital after his wife filed papers to force his commitment as a mental patient.

This apparent suicide victim was confined as a mental patient at Parkland from November 9 to December 30, 1976.

He made his unsubstantiated statements to the Dutch journalist after his release from the psychiatric unit—resulting in the international newsstories that brought him to the attention of the select committee.

Mr. Speaker, I would like to include the newsstory from the Dallas Morning News at this point in the RECORD:

MENTAL ILLS OF OSWALD CONFIDANT TOLD

(By Earl Golz)

George de Mohrenschildt was having mental problems shortly before he told a Dutch journalist last month he knew in advance Lee Harvey Oswald was going to assassinate President John F. Kennedy, The Dallas News has learned.

The 65-year-old Bishop College French professor agreed to commit himself to the psychiatric unit of Parkland Memorial Hospital last Nov. 9 after his wife filed court papers to force commitment, Dallas County Mental Illness Departmental records show.

The hospital said De Mohrenschildt was released from the psychiatric unit about eight weeks later on Dec. 30, but declined to give information about his examination.

The hopital did not refer De Mohrenschildt to the County Evaluation Center for further examination, which indicated he was not considered harmful to himself or others.

The House Assassinations Committee last Tuesday quizzed a Dutch journalist and longtime De Mohrenschildt friend, Willem Oltmans, who said he had interviewed De Mohrenschildt last month at Bishop College. Oltmans did not say whether he had known of De Mohrenschildt's previous mental problems.

Oltmans quoted De Mohrenschildt as saying he knew in advance what Oswald was going to do before the assassination in Dallas Nov. 22, 1963.

"He said to me, 'How do you think the media would react if I came out and said that I feel responsible for Oswald's behavior,'" Oltmans said.

The Oltmans interview developed into a national news story and sent investigators from the congressional committee scurrying to Dallas in search of De Mohrenschildt and his acquaintances. As of Friday, however, the probers had not inquired about his records with the Dallas County Mental Illness Department.

In response to a request from The Dallas News, which asked that court records regarding De Mohrenschildt's mental illness proceedings be made accessible because such action is "in the public interest," Probate Judge Joseph E. Ashmore Jr. did so.

Congressional committee investigators have been working on the De Mohrenschildt case under the impression he disappeared after he left Bishop College March 1. Oltmans told the probers he accompanied De Mohrenschildt to Europe after he left the college on a leave of absence of several days, and then lost contact with him.

Bishop College officials said while De Mohrenschildt had not been heard from, they still expect him to return after the school's spring vacation ends Monday.

De Mohrenschildt, who was born in Russia, was questioned at length before the Warren Commission in April, 1964, because of his friendship with Oswald months before the assassination. Then a petroleum engineer, he had befriended Oswald and his wife when they arrived in the Dallas-Fort Worth area in 1962 from Russia.

Mr. and Mrs. De Mohrenschildt had left for Haiti in connection with the oil business seven months before the assassination and were living there when it happened.

One of the fascinating aspects of De Mohrenschildt to the Warren Commission was his personal acquaintance with both Oswald and the mother of President Kennedy's widow, Jacqueline. During his 10 hours of testimony, he acknowledged he had written a letter to Mrs. Hugh Auchincloss, Dec. 12, 1963, expressing his sympathies after the assassination.

De Mohrenschildt told the commission he had met and become friends with Mrs. Auchincloss at Belport, Long Island, in 1939, within a year after he arrived in this country from Russia. He said he also met Jacqueline at the same time when she was a little girl.

In his letter to Mrs. Auchincloss, De Mohrenschildt stated he still had "a lingering doubt, notwithstanding all the evidence, of Oswald's guilt."

De Mohrenschildt told the commission he "will have the lingering doubt for the rest of my life . . . mainly because he (Oswald) did not have any permanent animosity for President Kennedy."

Mrs. Auchincloss later wrote back to De Mohrenschildt saying, "It seems extraordinary to me that you knew Oswald and that you knew Jackie as a child. It is certainly a very strange world." She added, "I hope, too, that Mrs. Oswald will not suffer."

Such an incident should warn us that this committee, if continued, will inspire those of questionable responsibility who want to obtain publicity or promote their own self-serving causes through nationwide notoriety.

I am also most concerned about the unprecedented and ambiguous provision of House Resolution 433, which grants the committee standing to sue or intervene in lawsuits in Federal courts.

This is obviously designed to allow the committee and its staff to file motions for grand jury data, and to make motions generally to bring lawsuits and intervene in lawsuits to get its views on the public record.

I have been informed by the American Law Division of the Library of Congress that such authority has never before been granted to a House committee. There is no general jurisdictional statute for Federal courts to hear suits brought by congressional committees.

The authority is therefore obviously being sought as an open mandate for the committee to have fishing expeditions into grand jury testimony and other data.

Much of this material is often hearsay and otherwise not acceptable evidence in a court of law.

Access to such material by this committee will not serve the cause of truth and justice, but will only further fan the flames of hearsay, rumor, and sensationalism.

I urge defeat of this resolution and the prompt termination of the Select Committee on Assassinations.

The SPEAKER pro tempore (Mr.

MOAKLEY). The time of the gentleman from Arizona (Mr. RUDD) has expired.

(On request of Mr. PICKLE and by unanimous consent, Mr. RUDD was allowed to proceed for 1 additional minute.)

Mr. PICKLE. Mr. Speaker, will the gentleman yield?

Mr. RUDD. I yield to the gentleman from Texas.

Mr. PICKLE. Mr. Speaker, I appreciate the gentleman's reference to the fact that he would support the approach I have recommended.

The gentleman from Indiana (Mr. FITHIAN) also asked why I have not already introduced this bill. I take this time to clear up that point by saying that under the rule under which we are debating this resolution I cannot offer that as a germane amendment. I cannot force another committee to consider something other than what the Committee on Rules is offering for us to consider now. Under the rules of the House, it would not be germane.

But I assure the gentleman from Indiana that there is no iffy question about it. I have the bill prepared, and the only reason it is not being offered now is that we must wait for a vote on the resolution. Once that vote has been taken, and the resolution not passed, the measure will be introduced, I assure the gentleman.

Ms. OAKAR. Mr. Speaker, I move to strike the requisite number of words, and I rise in support of House Resolution 433.

Mr. Speaker, I support this resolution because I believe that what is really at stake here is the credibility of the Federal Government in the eyes of the American people.

One of the most fundamental desires of our American people is the desire for the truth, and, clearly, their yearning for the truth on the assassinations of President Kennedy and Dr. King has not been satisfied. Our quest for truth should be reason enough to continue an investigation that practically devastated this country in the 1960's.

As important as these two cases are in themselves, I believe this investigation has a significance beyond them. If there is not further investigation of these cases, despite all of the questions that have been raised about them, how can the American people have any confidence at all in the ability of their Government to deal with the now frequent acts of violence committed by terrorists, among others?

I would make two other points in support of this resolution. First, in neither of these cases has there yet been a vigorous, probing, and independent investigation. We now know that the Warren Commission in effect left it up to the FBI and the CIA to uncover their own mistakes and wrongdoing, and, of course, these agencies did not do so. And as was pointed out earlier, there is not the possibility of these agencies investigating themselves. The House can conduct a truly independent investigation, and I know that this is the type of probe my distinguished colleague, the gentleman from Ohio (Mr. STOKES), and this wonderful committee intends to pursue.

Finally, if we fail now, there probably will never be an independent investigation of these two tragedies. Already over 13 years have passed since the death of President Kennedy, and nearly 9 years since the death of Dr. King. With the passage of time, important witnesses, such as the one who died this morning or last night, pass away, and evidence becomes more and more difficult to uncover.

In addition, this Congress was not afraid to pursue the truth in reference to Watergate. Let us not be afraid to pursue the truth in investigating the assassination of a young President and the assassination of Dr. King.

AMENDMENT OFFERED BY MR. BAUMAN

Mr. BAUMAN. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BAUMAN: On page 2, beginning on line 4, strike out the following: "For the purpose of carrying out H. Res. 222, the select committee is also authorized to bring, defend, and intervene in lawsuits and make applications to courts."

Mr. BAUMAN. Mr. Speaker, a few moments ago in debate this particular provision of the resolution was mentioned. This is the first time that the language this amendment would delete has appeared in any of the resolutions dealing with this select committee. I think the gentleman from Arizona (Mr. RUDD) properly pointed out that such a broad grant of power is unprecedented in the annals of the House of Representatives except in specific instances when committees have come to the House and asked for permission to intervene in pending matters before the courts.

The most recent and one of the rare instances was when the subcommittee chaired by the gentleman from California (Mr. Moss) asked for permission to intervene in a suit in 1976. After extensive debate in the House and a rollcall vote that intervention was allowed.

The language I seek to strike would permit the select committee, by its own majority vote, to file lawsuits and intervene in lawsuits against others, including agencies of the Government, in any number of different capacities.

In a memorandum submitted to the Committee on Rules by the chairman of the Select Committee on Assassinations, the gentleman from Ohio (Mr. STOKES), in part argued in favor of this by saying as follows, and I quote:

. . . there may be instances where it may be preferable for the Committee itself to exercise its right to secure evidence from the Executive branch of Government, rather than having to rely upon the Justice Department to pursue statutory contempt. . . .

This memorandum in many ways describes the wide-ranging possibilities of what this committee can do by majority vote without ever returning to the House of Representatives for any sort of mandate.

I know of no pending litigation that this committee needs to concern itself with; and if, indeed, there are such matters, the privileges of the House would dictate that we retain, as the full House of Representatives, the right to vote yes or no on whether or not any individual committee ought to be engaged in this kind of litigation.

Mr. Speaker, I can see the possibility of the use of this provision to harass the FBI, the CIA, or any number of agencies, should the committee take that direction. I do not suggest that it will, but we should not even create the possibility that it could do that on its own volition.

Therefore, Mr. Speaker, I would hope that the House of Representatives would deny to this committee of all committees with its checkered and erratic career and conduct, the right to go into the courts in a wholesale manner without first coming back to the full House of Representatives and seeking its approval.

Mr. STOKES. Mr. Speaker, I rise in opposition to the amendment.

Mr. Speaker, the specific reason for insertion of this language in the resolution is that House Resolution 222 does not specifically give the committee authority to sue. Unless this authority has been specifically delegated by the House, a committee of the House cannot bring lawsuits.

That was what the court held in *Reed* v. *County Commissioners*, 277 U.S. 376 (1928) when a special Senate committee had attempted to obtain election ballots; the resolution establishing the special committee contained language identical to that of House Resolution 222, that is, the authority to require testimony and other evidence "by subpena or otherwise." The Supreme Court held the absence of specific authority to bring lawsuits required dismissal of the suit.

Mr. Speaker, the Senate then, pursuant to this case, enacted a resolution which gives all of their committees the right to sue and defend.

Being an investigative committee of the House and having the mandate to pursue, accumulate, and acquire data, we inserted this provision so that we would not be in an awkward position when we subpena evidence or have the authority of the committee challenged in the courts.

Therefore, Mr. Speaker, this is the specific reason for the insertion or inclusion of this language, so that a House committee charged with an investigative responsibility would not be in the awkward position of not being able to sue in a court of law and of not being able to defend.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. STOKES. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, I thank the gentleman for yielding.

He has made the statement that this will in some way prevent challenges of the committee's jurisdiction in the courts. It would in no way prevent such suits being filed by any party who considered himself aggrieved.

All it would do, Mr. Speaker, would be to say that one would not have to come to the House for authority to answer. It seems to me that we should come to the House for any authority to go into the courts on any matter, but it would not

diminish in any way the rights of parties to contest jury subpenas or anything else.

Mr. STOKES. Mr. Speaker, I agree with the gentleman that that is the precise position we would be in in coming back to the House for authority.

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from Maryland (Mr. BAUMAN).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 223, nays 195, not voting 14, as follows:

[Roll No. 110]

NOT VOTING—14

Brown, Calif.	Pepper	Symms
Clay	Poage	Teague
Dellums	Rangel	Wilson, C. H.
Marlenee	Roe	Wilson, Tex.
Milford	Staggers	

On this vote:

Mr. Teague for, with Mr. Clay against.

Mr. Milford for, with Mr. Dellums against.

Until further notice:

Mr. Pepper with Mr. Marlenee.

Mr. Roe with Mr Symms.

Mr. Staggers with Mr. Charles H. Wilson of California.

Mr. Rangel with Mr. Brown of California.

Messrs. TUCKER and APPLEGATE changed their vote from "yea" to "nay."

Messrs. SKELTON, ASHLEY, CONABLE, STEED, QUAYLE, JEFFORDS, BROOKS, SHARP, LUKEN, YOUNG of Texas, NEAL, WAXMAN, McCORMACK, and STARK changed their vote from "nay" to "yea."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. SNYDER. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker and my colleagues, let me preface my remarks by saying that I normally do not discuss my mail, whether constituent or otherwise, publicly or in the well of this House, and I would not today except that I met with the individual who has corresponded with me on March 12, and he at that time approved the public use of his letter in the form in which I have used it in times past and will use it today.

Let me say this, that I was not and am not an admirer of Martin Luther King's tactics or of his political philosophy, but that has nothing to do with the man's right to his philosophy or his right to live.

I opposed this resolution when it was up in February, and I speak today not to vouch for the truth or accuracy of the allegations to which I refer and which I will read, but rather to explain my own position in voting to continue the investigation of these allegations.

On February 28 I received a letter, and as I read it to the Members I will insert blanks. The original has the names there, but I believe it best not to read them until the allegations are investigated:

Congressman GENE SNYDER. Sir: I retired from (blank) police department in (blank) after serving (blank) years. While I was in the police dept. I was innocently involved in a conspiracy to assassinate Dr. Martin Luther King. Involved in this conspiracy were agents of the FBI; Agents (Blank), (Blank) and (Blank) and others that I did not know. Members of the (Blank) Police Dept. Chief of Detectives (Blank), Capt. (Blank), Lt. (Blank), Officer (Blank), Lt. (Blank) of the Homicide Bureau and president of the F.O.B. (Blank).

They offered 500,000 dollars to me to assassinate Dr. King. The offer was made to me in my auto which was equipped with a tape recorder and I have a recording of this conversation.

At the same time this offer was made I was under an intense investigation by the (Blank) police dept. and F.B.I. I was suspected of being involved in a (Blank) ring operation in (Blank) where I was born and raised.

On three different occasions I was threatened by F.B.I. agents. In the month previous to the King assassination I was threatened seven or eight times by people I did not know.

When I retired from the police department I went to see (blank) of United Press International who stands me up everytime I make an appointment for him to hear the tapes. He did give me the names and address of James Earl Ray's attorney, Bernard Finsterwald, suite 600, 910 16th Street, N.W., Washington, D.C. 223-1667. Area Code 202-555-1212. I contacted Bernard Finsterwald who referred me to James Lesar, 1231 4th Street, S.W., Washington, D.C. 20024 Area Code 202-484-6023.

I contacted these people both by phone and letter several times and they refused to hear the tapes. I offered to bring them to Washington at my expense. They wanted me to mail them the tapes.

They referred me to their investigator

Harold Weisberg, Route 12, Frederick, Maryland, Area Code 301-473-8186. I talked to Weisberg on the phone, who wanted to know what business it was of mine and where I was going to hide if I tried to do anything with the tapes. I have not tried to contact these people in the last year.

I have written to James Earl Ray but have been unable to contact him. I dont think his attorneys are on his side. I would like your help in contacting James Ray. Also refer this letter to the Committee investigating the assassination of President Kennedy and Martin Luther King.

Respectfully,

When I received that letter I sent it in a sealed envelope, hand-carried, to the then chairman of this committee and the ranking minority member, because I thought it should be up to them as to whose hands they would want this kind of content to fall into. The gentleman from Ohio (Mr. DEVINE), the ranking minority member, a former member of the FBI, advised me that he checked this fellow out and that he checked out as a solid citizen.

As I indicated, I have talked to him face to face. I believe he is a solid citizen.

I recommend that this gentleman come to Washington. I understand he has been interrogated by the staff of this committee for several hours, and he has turned over to them this tape recording. I understand that they have verified that the age of the tape is approximately what the man says it is.

The SPEAKER. The time of the gentleman from Kentucky (Mr. SNYDER) has expired.

(By unanimous consent, Mr. SNYDER was allowed to proceed for 2 additional minutes.)

Mr. SNYDER. Mr. Speaker and my colleagues, I make no charges or allegations against anyone. I have always had and I still have confidence in the law enforcement agencies of this Nation. But nevertheless, I do believe that allegations such as these should be investigated. For that reason, today I shall vote to continue the committee.

Mr. FAUNTROY. Mr. Speaker, will the gentleman yield?

Mr. SNYDER. I yield to the Delegate from the District of Columbia (Mr. FAUNTROY).

Mr. FAUNTROY. I thank the gentleman for yielding.

Mr. Speaker, I think we must commend the gentleman for bringing this information to the attention of the committee and the House of Representatives. I assure the gentleman that, as our report indicates, it is among several leads that we have which we are presently pursuing, leads that suggest that there was a plot or plots to assassinate Martin Luther King, Jr., prior to the fatal day of April 4, 1968.

I simply want to commend the gentleman for having bought this lead to our attention. By doing so, you have given the Nation an instructive example of the seriousness with which a majority of the Members of this House are prepared to pursue the facts in these very important investigations.

Mr. SNYDER. I thank the gentleman.

Mr. Speaker, I do not know, of course, the truth or veracity of these allegations; but I say if they are true, that needs to be found out, and if they are not true, the FBI and the rest need to be exonerated.

Mr. JENKINS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I rise somewhat reluctantly to oppose the continuation of the Select Committee on Assassinations. I do so reluctantly, because Dr. King was a great leader from my own State, and the late President John Kennedy was one of the most loved and best respected of all Presidents, who had the overwhelming support of the people of this Nation and of my own State.

Nevertheless, I am convinced by commonsense and, I hope, unbiased judgment that the continuation of this committee will not only serve no real useful purpose, but on the contrary, it will do the very opposite of what we are attempting to do and want to do.

As I look back through the pages of history, I realize that following the murder of any great leader the doubts and the guilt and the remorse and the confusion always lead to theories, hypotheses, and speculation that are never totally refuted. There is little hope of dispelling all of the possibilities—the possible conspiracies and the potential unlawful agreements—and this Congress will not be successful if that is the intent of this resolution.

The writers are still speculating today as to the people who were really involved in the Lincoln assassination. Contained within the 70 or 80 books of which I am aware relating to the Lincoln death there are theories that Great Britain was involved, that France was the guilty country, that Jefferson Davis and the South were the real conspirators, that the Roman Catholic Church commissioned the deed, that Lincoln's Cabinet was involved, that Mary Surratt was totally innocent, that Vice President Andrew Johnson hired the assassin, that Canada was deeply involved, that John Surratt was an active participant, although never convicted—and the list goes on and on and on.

Mr. Speaker, the hour of decision in this matter today is not upon this Congress and this House. There was a responsibility upon the Congress some 12 years ago to unearth the facts and to reveal its findings to the American people. How that duty was performed may be open to legitimate criticism and study today, but there is no possible way that this Congress can turn back the pages of history to reconstitute an investigation into events that occurred over a decade ago. That hour of decision is gone, and regardless of how much money we spend with this resolution today, that opportunity to perform a more thorough or a different style of investigation cannot be repurchased by whatever money we allocate.

Mr. Speaker, I can conceive of no real benefit that we will derive from this committee. I have the very highest regard for its members and their sincere desire to quiet the doubts of our people concerning these tragedies, but they have an impossible task. If we were commencing today with a new committee and a new staff, without acrimony or distrust and with a clean slate, the job would yet be impossible of satisfactory conclusion. But we cannot even give them that clean slate.

Mr. Speaker, I am convinced that whatever the finding of the committee might be, whatever its revelations, the American people will not accept those findings because, for whatever the reasons, this committee is tainted and suspect in the minds of the people. If no new revelations are forthcoming, I can see the new books coming off the presses now to indicate that a conspiracy was involved to remove the chairman or to remove the chief counsel or to limit the funding of the committee or to restrict the staff of the committee.

The SPEAKER. The time of the gentleman from Georgia (Mr. JENKINS) has expired.

(By unanimous consent, Mr. JENKINS was allowed to proceed for 1 additional minute.)

Mr. JENKINS. Mr. Speaker, let me complete my presentation.

Furthermore, if new hypotheses are developed, can we believe that the people will accept those conclusions that are derived from a committee that is plagued with such problems? I fear that we will accomplish nothing by this action today. The millions of dollars that we spend under this resolution could be better spent in other areas.

Mr. Speaker, I oppose the resolution.

Mr. DEVINE. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, one of the Members who spoke earlier in the well and addressed the Members of the House was the gentleman from Arizona (Mr. RUDD), who is a former FBI agent and who is vitally concerned that it may be that this investigation is going the direction of being critical of our intelligence agencies. It is a real concern.

I, too, am a former FBI agent, and I am concerned about that.

But let me say this to the Members: During the short life of this start-and-stop and start-again committee we have had total and complete cooperation from the Bureau in seeking information, at least up until the time when our former chairman saw the Attorney General and shut off our water so we could not get any more information.

That source has now again been opened, and we are having total cooperation.

Mr. Speaker, I voted against this select committee when it originated last September, because I did not think any useful purpose could be served. I thought, by golly, here we have an election year. The Democrats want to crank this up so that they can get the emotions of the country aroused. Anyway, they did pretty well.

Then we came back after it expired in February. I again voted against it, because the resolution in February only gave us 60 days. No one could conduct any kind of inevstigation on anything in 60 days.

Mr. Speaker, I come before the Members today with a rather heavy heart. We, the Congress, have done a great injustice to a great American. I am speak-

ing of Richard Sprague, and that might surprise the Members.

Here is a man who, I think, has integrity; he has efficiency; he has honesty, and he was doing a professional job, notwithstanding the scurrilous remarks that have circulated in this Chamber and elsewhere about him. He personally sacrificed his future by resigning last night. Why? Because we took a whip count in this House, and in counting noses, it looked as though there were enough Members of this House to say, "We will not vote for this committee unless you get rid of Sprague."

Mr. Speaker, he could have stood firm. We could have fired him, but he said:

> This investigation is too important for one man or one man's career to stand in the way of this committee's having success on the House floor today.

Mr. Speaker, I say to the Members that I have worked with the professional staff that Mr. Sprague got together. I have worked with the fine members of this committee; and under the chairmanship of our colleague, the gentleman from Ohio (Mr. STOKES), I am totally confident that this investigation can go forward in a meaningful manner. We may come up with the same conclusion as the Warren Commission and the Church committee did; but there are many unanswered questions like those brought up by the gentleman from Kentucky (Mr. SNYDER) in the committee. We have a large number of unanswered questions in both cases. This is a two-pronged investigation into serious questions that must be answered.

Therefore, Mr. Speaker, I would say to the Members that there is enough information available for this House to exercise its will as it has done on two previous occasions.

What has happened in the interim period other than the lousing up of the staff and a personality problem? What is any different from what existed last September and last February as to the need to answer the unanswered questions in this matter?

Mr. Speaker, I urge my colleagues here in the House to vote favorably on this resolution.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. DEVINE. I yield to the gentleman from Texas.

Mr. KAZEN. I was interested in one statement the gentleman from Ohio (Mr. DEVINE) made about the former chairman of this committee shutting off any cooperation between the FBI and the committee.

What kind of action did the gentleman take in this respect?

Mr. DEVINE. The former chairman—and he is here and can verify this—personally went to the Attorney General of the United States and asked that all access to FBI files be terminated.

Mr. KAZEN. What was the background for that?

Mr. DEVINE. I think this was at the time that there was a dispute on whether or not Mr. Sprague and the rest of the committee should continue. This was a unilateral action, and I am sure that the gentleman will correct me if I say anything inaccurate.

Mr. WYDLER. Mr. Speaker, will the gentleman yield?

Mr. DEVINE. I yield to the gentleman from New York.

Mr. WYDLER. Mr. Speaker, I would just like to say, as far as the gentleman's statement is concerned, that I, too, have sat and listened to the gentleman from Kentucky (Mr. SNYDER) read that letter.

It would seem to me that that might be investigated at least to find out whether it is or is not a true statement.

However, would it not be just as effective and just as easy to give that statement, for whatever it is worth, and the data, for whatever they are worth, to the Department of Justice and let them tell us if there is anything to it? Can they not do that? Do we have to have a $5 million House of Representatives committee, which really only speaks for one body of Congress, do this entire type of investigation? We still have the Department of Justice. I have great confidence in it.

Mr. Speaker, I would like to see them do that kind of investigation. Why can they not do it?

Mr. DINGELL. Mr. Speaker, I rise to strike the requisite number of words.

Mr. Speaker, the events of the death of Martin Luther King and the events of the death of Robert Kennedy and John F. Kennedy were terrible. They were great men, and all of us here present in this Chamber honored them.

The events occurred a long time ago. The evidence is cold. Witnesses have moved on. Memories have grown frail. Papers have disappeared. Investigations have been carried out to their end. Those found guilty have been sentenced. And to pursue a trail now that is so old would be enormously difficult and of doubtful productivity.

I do not want my colleagues to think I am some kind of reactionary or conservative, because throughout my career I opposed the Un-American Activities Committee which had less power than this committee seeks from the House today. It was a committee which was known for its excesses, its violations of the rights of Americans, of its behavior in a circus atmosphere, which brought shame and discredit upon the House of Representatives. Now we seek to reconstitute that kind of a circumstance here. This committee received a provisional grant of life from this body in January on the assumption that during that period of time they would come forward with some evidence as to the killings of the great Americans who are the subject of this supposed investigation, during which time nothing has happened except they have overspent their budget, they have wrangled in a most unseemly fashion over all circumstances. There has been continuous disharmony, disorganization and outrage within the bounds of the committee. Not one thing has been done.

The mandate of the House of Representatives was that on conclusion of that time period they would be back before us with some facts which would justify their continued existence, with some evidence of conspiracies, or some evidence of unpunished or uninvestigated wrongdoing or of failure of the law enforcement officials to properly investigate and carry out the investigations of the deaths of these three great men.

I have here, and all of the Members of the House have a copy of it, the report with regard to this matter. I challenge any Member of the House to find in this report one word, one sentence which indicates that this subcommittee, which seeks $2.7 million of the taxpayers' money, and it is not our money, it is the taxpayers' money, should be granted this money to spend upon an investigation.

Now they have overspent their money so far, they have wrangled without end and they have presented no evidence.

How much longer must we wait for them to come forward with the smallest smidgen of the promised evidence to justify an expenditure of $2.7 million?

Mr. STOKES. Mr. Speaker, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from Ohio.

Mr. STOKES. Mr. Speaker, I thank the gentleman from Michigan for yielding to me.

I would ask the gentleman from Michigan, in light of the fact that the gentleman has twice made the statement that we have overspent our budget, if the gentleman would give us some evidence of this, in light of the fact that in my earlier presentation today I presented to the House evidence of the fact that this committee has lived within the constraint of $80,000 per month given them in January, February, and March.

In that respect I read into the record a letter from Mr. Cable relative to this matter. And I cite the fact that at the present time the total expenditure allocated to us being $247,388.89 for the period of January 3, 1977, to March 31, and that as of today we have $433 left over in that budget.

Mr. DINGELL. They are $433 within the budget?

Mr. STOKES. That is correct.

Mr. DINGELL. Mr. Speaker, I am not going to debate with the gentleman from Ohio as to whether they have stayed within their budget, but there have been continuous charges emanating from the committee, including comments by the former chairman, that they have overspent their budget. The gentleman from Ohio has said that that is not right. The gentleman from Ohio has corrected me in my statement and I rejoice that that is not so.

But despite that fact, there is not one smidgen of evidence given of failures of the law enforcement officials in the investigation of the death of Dr. Martin Luther King, Jr., and of the deaths of either of the two Kennedys, John F. Kennedy and Robert Kennedy, or that these investigations have in any fashion been inadequately carried out by the law enforcement officials. Nowhere in this report, which is supposedly a document upon which we bottom our judgment as to the merits of this committee, is there such information.

The resolution should be voted down

and we should get on about the business of the House.

Mr. SAWYER. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I had not come in here with the intention of speaking to this subject, and I certainly would not speak to it based on any tenure or status I have here in the House. I do, however, feel I have some qualifications. I spent 31 years full time as an active trial lawyer. I had a 52-man law firm. I am a fellow of the American College of Trial Lawyers, a fellow and director of the International Academy. I spent the last 2 years as prosecuting attorney in a county of 425,000 people. I may be one of the few people who have both successfully defended five first-degree murder trials and successfully prosecuted five first-degree murder trials. My last experience was with a grand jury I constituted to investigate some old murder cases that had grown over a year old and up to 5 years old. We managed to break seven of them, one being a contract-conspiracy murder. So I have a little appreciation of the problem.

For those Members who might not have had this appreciation, let me tell them that when we get involved in these investigations of old cases, we have everything come out of the woodwork. If the matter is getting any publicity, we are deluged with people who are attracted by the glare of the spotlight and who then come forward with all kinds of rumors—some having enough semblance of truth that we have to spend time to run them down. Everybody who is spending time in prison who has any connection, remote or otherwise, with these killings comes forward to try to buy time off, to buy a reduction of sentence, to do all kinds of bargaining. This is a tough professional job, and it is tough enough to do when one is in the cloister of a grand jury. But when we start then to do this kind of highly professional, extremely difficult job under the glare of the media—and the national media which attracts kooks like flies, and where everything is there—this just is not the forum within which to tackle this kind of case.

The House of Representatives might do very well to constitute such a committee to investigate the Korean money situation because that involves them. This is clearly not the mission for a legislative committee, other than perhaps to attract a lot of publicity. It is not the place for the job, and I urge the Members to vote against it and save the taxpayers $5 million.

Mr. ECKHARDT. Mr. Speaker, will the gentleman yield?

Mr. SAWYER. I yield to the gentleman from Texas.

Mr. ECKHARDT. I thank the gentleman for yielding.

I want to join the gentleman from Michigan in that sentiment. I think this is the greatest body for legislation that exists in the civilized world. I think we are pretty good investigators, and I think we are awfully poor inquisitors.

I join the gentleman entirely in his views.

Mr. SAWYER. I thank the gentleman for his comments.

Mr. ALLEN. Mr. Speaker, I move to strike the last word.

I rise, Mr. Speaker, to engage the distinguished Chairman, the gentleman from Ohio (Mr. STOKES) in colloquy, if I may. I would ask the gentleman from Ohio (Mr. STOKES) the question that bothers me in considering this resolution, and I would hope that he can answer it for me to my satisfaction. In that way would the continuation of this committee or its investigation serve the Congress in its consideration of any legislation now pending or contemplated?

Mr. STOKES. Mr. Speaker, will the gentleman yield?

Mr. ALLEN. I yield to the gentleman from Ohio.

Mr. STOKES. I thank the gentleman for yielding.

In the original resolution constituting this select committee, a part of the mandate of the Congress is for the committee to propose legislative proposals to the Congress based upon their findings in both the assassinations.

Mr. ALLEN. Just what kind of legislation could possibly be recommended based on any findings of this committee and its investigation?

Mr. STOKES. If the gentleman will yield further, I would say to the gentleman it is difficult for me at this point in time to be able to say what type of legislative proposal would be based upon conclusions of investigations that would take some time. We are in the initial stages of the investigative process. Obviously, I was unable to say to the gentleman today what conclusions this committee will come to after sorting out, evaluating, and analyzing all the evidence.

But hopefully we will be able to restore the confidence of the American people in their governmental agencies, and that is the problem or the purpose for which we were originally established.

Mr. ALLEN. One more question of the chairman and I will terminate my questioning.

In just what respect does the gentleman think that this investigation is any different from what normally would be handled by the regularly constituted law enforcement agencies and the grand jury? And certainly the Congress does not pretend to be a grand jury or law enforcement agency but rather a legislative body.

Mr. STOKES. I think I need only make reference to the Warren Commission report which we now know the FBI and other agencies of the Government participated in and we know now certain evidence was withheld from that Commission. We know that certain false information was given to that Commission and we know that governmental law enforcement agencies were involved in that process. So I say to the gentleman that an independent body such as the United States Congress needs to investigate and analyze in both of these matters.

Mr. ALLEN. The gentleman does not feel that the present Department of Justice under its new leaders can conduct that investigation impartially and thoroughly and in depth?

Mr. STOKES. If we are assigned the responsibility of investigating these matters and a part of the investigation is for us to ascertain whether or not those Government agencies did in fact what they were supposed to do in those types of investigations, whether they talked to all the witnesses they should have, whether they withheld information, whether they covered up information, obviously we cannot use those agencies to police themselves.

Mr. ALLEN. I thank the chairman.

Mr. KOCH. Mr. Speaker, I move to strike the last word.

Mr. Speaker, it took a very long time to get the select committee appointed. I remember that I was a cosponsor of that resolution. It took literally years until the House voted in favor of appointing the committee. The reason that this House ultimately appointed the committee was that when we went back to our districts people said, and I think almost everyone in this House agrees, that they were not satisfied with the results of the two investigations that are the subject matter of this resolution. I doubt that there is anyone who would get up and defend those investigations by law enforcement authorities as absolutely thorough and complete.

The charge is made that the investigations will never be complete, that they will never be thorough. That really is not an adequate excuse in my view. It may very well be that this House select committee will not be able to do a thorough, complete job. It may be. But I think that the committee will do a thorough and complete job and satisfy the American people that all that could be done was in fact done.

Some aspersions, if you will, not intentional, have been cast upon the ability of the members of the select committee to do the kind of job that would make this House proud, and the fear is that in some way the investigation would become a circus. I remember when we had the impeachment proceedings, and the single group of men and women that brought this House to its highest point in public esteem was the Judiciary Committee because it conducted itself in a way that made not only everybody in this House, but everybody in this country, proud.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. KOCH. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, I share the gentleman's sentiments regarding the Committee on the Judiciary, that it should have the authority to handle this matter. Would the gentleman support a motion to recommit this entire matter to the Committee on the Judiciary for further evaluation as to whether it should continue at all?

Mr. KOCH. The answer is no.

Mr. BAUMAN. I am sorry that the gentleman would not.

Mr. KOCH. Let me tell the gentleman why. Every Member of this House, just like the gentleman who just rose, was very proud of the way the members of

the Committee on the Judiciary conducted themselves. I say that in the same way we will be proud of the people on this select committee. Their names are known to us, but let me read them:

The gentleman from North Carolina (Mr. PREYER).

The delegate from the District of Columbia (Mr. FAUNTROY).

The gentlewoman from California (Mrs. BURKE).

The gentleman from Connecticut (Mr. DODD).

The gentleman from Tennessee (Mr. FORD).

The gentleman from Indiana (Mr. FITHIAN).

The gentleman from Pennsylvania (Mr. EDGAR).

The gentleman from Ohio (Mr. DEVINE).

The gentleman from Illinois (Mr. ANDERSON).

The gentleman from Connecticut (Mr. MCKINNEY).

The gentleman from Nebraska (Mr. THONE).

There is not a single member of that select committee of which I am not proud. I believe that they will conduct themselves in a way that will make this House feel very proud. Furthermore, I believe that if we vote this resolution down that the American public will say that there has been another effort to prevent the truth from being known. Whether it is intended that way or not is not of importance. The credibility that the House has with the American public is at stake and that is why it is essential that we pass this resolution.

Mr. Speaker, for the benefit of my colleagues I would like to read the following letter into the record from 33 individuals who have sent their letter to President Carter and the House Select Committee on Assassinations. Without passing judgment on any of the charges therein I would like to share its content with this House:

MARCH 24, 1977.

DEAR PRESIDENT CARTER: One is tempted to speculate on the recent troubles of the House Select Committee on Assassinations. Would it be, one can wonder, in the interests of high officials in the CIA and the FBI to cooperate with such a committee when such questions as Oswald's links to the CIA or the FBI's alleged malfeasance in the investigation of the slaying of Martin Luther King could be patiently, even authoritatively explored while new evidence further damning the FBI and CIA could also be discovered? (Indeed, who in these organizations would be certain there was no such damning evidence?) Under these circumstances, how could the CIA and the FBI live with the Select Committee on Assassinations? How could they not be ready to apply pressure and sabotage against its workings?

It is, however, in the interest of the American public to have the Committee in existence. The Select Committee on Assassinations may be imperfect, impractical, and a demon for poor publicity. For all we know, it may be riddled with undercover men. But it is the only investigating body we have in the House of Representatives with the obligation to subpoena recalcitrant witnesses on these matters and the duty to listen to witnesses who have studied the flaws in the Warren Commission report for years. By its existence, therefore, the Committee represents a threat to anybody who would hope to maintain public apathy about the assassinations.

Such public apathy exists for good reason. So long as we believe that it is impossible to learn the truths of Dallas or the truths of the murders of Martin Luther King and of Bobby Kennedy, then such deaths are too depressing to contemplate. Yet we pay an incalculable price for living with these unsolved crimes. A clear idea of the character of the events of the recent past is essential to a democracy: without knowledge of what actually happened in an event, how can one debate its meaning? If we do not know whether Jack Kennedy was killed by the demented act of an isolated man, or whether by the concerted acts of a group of conspirators who employed Oswald as the set-up; if we do not know whether the murder of Oswald by Jack Ruby was an attempt to spare the First Lady all the discomfort of appearing at a trial, or an order that came to Jack Ruby out of the chain of communication that ran between the CIA and the Mafia, then we do not know which history we can act upon.

Now we have a new administration seeking to take America out of the historical despondency of the last decade. How promising if this new administration and Congress will recognize that the assassinations of the sixties are not old scars to be covered but unseen bruises that still deaden the confidence of America. For the shadow of the assassinations keeps us thinking we do not have a history that can bear exposure. That is a deadening suspicion. Basic to good feeling about our country is our ability to believe that our representatives are brave enough to undertake thoroughgoing investigations of the role of government itself, no matter where that may lead! Such a need will obviously not be satisfied by stopping the work of the House Select Committee on Assassinations and we, the undersigned, send this letter to President Carter and to the House of Representatives in the hope it will serve the idea that the continuing life of the Select Committee and the voting of an appropriation adequate to its needs are matters of significance to the pyschic well-being of this Republic.

Respectfully signed,

Norman Mailer, Edward Albee, Robert Bly, Malcolm Cowley, Will Durant, E. L. Doctorow, Allen Ginsburg, Doris Kearns Goodwin, Richard Goodwin, Francine du Plessix Gray,

John Hawkes, Shirley Hazzard, Joseph Heller, Larry King, Stanley Kunitz, Joyce Carol Oates, Denise Levertov, William Phillips, Richard Poirer, James Purdy, Dotson Rader, Muriel Rukeyser.

Mark Schorer, Meyer Shapiro, Wilfred Sheed, Francis Steegmuller, Wallace Stegner, William Styron, Hunter Thompson, Kurt Vonnegut, Jr., Richard Wilbur, Irving Howe, and John Aldredge.

Mrs. BOGGS. Mr. Speaker, will the gentleman yield?

Mr. KOCH. I yield to the distinguished gentlewoman from Louisiana.

Mrs. BOGGS. Mr. Speaker, I thank the gentleman for yielding.

Just as the gentleman from New York is proud of the members of the committee, I also am very proud of the patriots of excellence who were members of the Warren Commission, my husband among them.

I would like to say to the House that I was told on many occasions by the chairman of that Commission, Chief Justice Warren, that Hale perfected the language that made it possible for all those members, those excellent members of that Commission, to be able to sign the Commission report unanimously. That language was:

In accordance to the evidence that has been presented to this Commission we find no evidence of a conspiracy.

Mr. Speaker, I have voted for the resolution before. I intend to vote for it today, because I think that it is not a reflection on the members of the Warren Commission. It is their feeling that if new evidence, indeed, could be brought forth, then it should be.

The gentleman from Louisiana (Mr. TREEN) and I had lunch today with 60-odd young people from our area. We asked for a show of hands among the young people on whether or not they approved of continuing this investigation and this committee. Overwhelmingly, they were in favor of it. Whatever the cost, however cold the trail may be, we owe it to the young people of this country to see that this body has done everything in its power to regain their confidence in the Government.

Mr. KOCH. Mr. Speaker, the gentlewoman has presented the position in a way that no one else could improve upon.

Mr. MCKINNEY. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I had not intended to speak today, because as a member of the committee I felt that perhaps my words would not be given any real weight of judgment. There seems to be, however, a misconception of what this committee is about doing. I think that the gentlewoman from Louisiana said it far more succinctly than I could have. but I want to add to it. Eleven members, now twelve, four very disparate Republicans, eight very different Democrats, have tried to tell any of us who would give the time in secret session, "Yes, we know a great deal new, and it bothers us."

Some of you have taken the time and the effort in our busy schedules to come and accept that opportunity. We think we have changed some minds with the facts.

Mr. Speaker, I have heard today the most outrageous statements about how this committee is out to slander the organizations of our Government. It is not. I have heard that this committee has not found new information. It has. I have heard that this committee has been in turmoil. It has not been. The press has made it appear to be in turmoil. I have never, in my entire legislative history, worked under a man—in fact, two men—that I could better go before this House for commendation: RICHARDSON PREYER and LOUIS STOKES. They are the hardest working, fairest, most honest individuals I have ever been associated with in a leadership position.

I could have come before the press of this Nation and this House and torn the majority party's handling of this situation apart. I have not done so. I believe in this. I am not going to stand here and say that you have to endorse STU MCKINNEY or anything else, but I am going to tell the Members something: I am an honest man. I believe in this country. I believe in what it stands for, and I believe that if this investigation is cut off

in the last possible council it will ever have, the people's House of this country, that if this investigation is cut off I will personally feel that this body, to which I am proud to belong, has done the intelligence, and I think the morality of the American people, one of the greatest disservices it could have ever done.

I am not going to be dramatic or anything else, but, Members of the House, I am going to tell you something: I came on this committee with no preconceived notions. I belive my colleague from Ohio (Mr. DEVINE), who voted against this committee twice, had the same feelings. Both of us, I think, have put before the Members our reputations and our belief that if this does not go ahead, this country is in very serious trouble, and our reputation for credibility is equally in trouble.

Mr. PICKLE. Mr. Speaker, will the gentleman yield?

Mr. MCKINNEY. I yield to the gentleman from Texas.

Mr. PICKLE. Mr. Speaker, let me say that there has been no comment at all in this debate today with respect to personalities. There have been no disparate remarks about any member of the select committee. We do not question the sincerity of the members or their dedication to their task. We have left out all name calling, and I think that is commendable on the part of this body.

My question is, do we continue it under the present setup or do we send it to the Department of Justice or continue it in some other way? We are not killing it, but trying to determine which direction to go.

Mr. MCKINNEY. In the privacy of my office or any other place in this building, I will be delighted to meet with the gentleman and counsel with him. I wish I could stand here in the middle of this whole House, in the middle of this difficult process, and tell the Members what I know, but the minute we do that, upstairs becomes the investigation, not the House of Representatives.

The SPEAKER. The time of the gentleman from Connecticut has expired.

(On request of Mr. SISK and by unanimous consent Mr. MCKINNEY was allowed to proceed for 2 additional minutes.)

Mr. SISK. Mr. Speaker, will the gentleman yield?

Mr. MCKINNEY. I yield to the gentleman from California.

Mr. SISK. Mr. Speaker, I appreciate the comments of my colleague from Connecticut, but as one of those who received, so far as I know, a secret briefing—at least, that was the point I understand, and I believe the gentleman was in the room at that time——

Mr. MCKINNEY. Not for that particular briefing, but I have been for many others.

Mr. SISK. Well, this was a special briefing for the Rules Committee. Let me say to my colleague that I had understood that, as he said, that there was some new evidence—and I am not here going to reveal any of the things that were said there in the presence of a group of Members, and Members exclusively, but I will say this: That I read rather carefully the material we were given plus listened very carefully, and I have great respect for the gentleman from Ohio (Mr. STOKES), but the truth of the matter is that the only thing I heard was that you had information that X heard Y tell Z something.

I mean this sincerely: I had hoped to be able to support this effort. There has been a change in staff. But the truth of the matter is—and I say this in all kindness to my colleague from Connecticut—at that so-called secret meeting we absolutely were not given any new evidence or any justification for the continuation of this commitee, as I heard it. Maybe I am not hearing as well as I should.

Mr. MCKINNEY. Of necessity, the briefing the gentleman had was reduced. But far more important, there was a decision made by this committee, which has on it, for instance, an ex-Federal judge, and the decision was that we were never going to say, "Prima facie, this is proof," until we have validated every single aspect of any one of our informants' statements.

As the gentleman well knows, without a telephone for a long time, without any availability of transportation, this has been difficult.

Do we believe what we now know? Yes. But we will not tell you until it is proven.

Mr. HUGHES. Mr. Speaker, I move to strike the requisite number of words, and I rise in support of the resolution.

Mr. Speaker. I know my colleagues are getting rather impatient, and understandably so; and I had not intended, really, to take the well today to speak for or against the resolution. I have listened to all of the debate today. I missed the secret briefings. I had intended to attend them, but unfortunately my schedule did not permit. I did receive a private briefing, however, and I am privy to much of the information that is available to the committee. I have read the secret and confidential reports, and I want to say that every Member of this House should avail themselves of that opportunity.

A colleague of mine, just awhile ago, got up before us and indicated that he had a great deal of trial experience to draw on as he considered this issue. I do not doubt one bit that he experienced many of these things that I experienced in some 10 years of law enforcement. I know how difficult it is to try to pursue a cold trail. I know that the kooks will come out of the woodwork. They will come out, anyway. We do not have to have this kind of an investigation to bring them out.

I was not very happy, I am frank to admit, with the testimony of Santos Trafficante. I think if one of the committee members had asked him whether he agreed it was a nice day, he would have taken the fifth amendment.

I am also concerned about the $2.7 million, funding level at a time when we are struggling to find sufficient moneys for all kinds of things. I do not really fault anyone on the side of the issue because I think it is an issue upon which reasonable men can differ. I had intended to vote against this resolution. That was the direction I learned. But I think it is essential that we vote to continue this committee. I am satisfied that we have a good chairman and that we have a good committee. I know each member of that committee personally, and I think they will do credit to this Congress. I am satisfied that the American people expect us at this time to do what is best for the country. I am not satisfied that we are going to really put to rest all of the issues that are raised. I do not think that will ever happen. I wish it were the case.

But I have seen enough in the confidential files to satisfy me that we must continue this committee to pursue the new leads developed by the committee in its short history. We must put to rest as many of the issues and as much of the uncertainty as humanly possible.

I, therefore, urge my colleagues to join me in supporting House Resolution 433 reconstituting the Committee on Assassinations.

Mr. QUILLEN. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, let me ask the chairman of the committee a question or two, not in an embarrassing way, but certainly in a factual way.

Mr. Sprague resigned, and the committee accepted his resignation?

Mr. STOKES. If the gentleman will yield, that is correct.

Mr. QUILLEN. Is Mr. Sprague still on the payroll?

Mr. STOKES. We have not yet had an opportunity to sign the proper vouchers to terminate him from the payroll. This occurred at 10 o'clock this morning.

Mr. QUILLEN. Will he be off the payroll as of today, or will be given a 30-day notice or a 2-weeks notice, or will he remain on the payroll for a period of time?

Mr. STOKES. Mr. Speaker, we had no discussion with Mr. Sprague relative to any time frame, and I assume that the resignation was effective at the time it was accepted by this committee.

Mr. QUILLEN. Mr. Speaker, I thank the gentleman for his answers.

Mr. Speaker, in line with the colloquy that was had with the gentleman from California (Mr. SISK), I wish to say that I, too, attended a secret meeting with the committee chairman, the gentleman from Ohio (Mr. STOKES), and other members of his committee, and I believe that if the Members of this House could have just one substantial new disclosure to hang their hats on, it would be helpful.

There were things I read in the documents at that time which have been revealed since in the press. One was about James Earl Ray's brother being involved in the conspiracy. The letter that the gentleman from Kentucky (Mr. SNYDER) read a moment ago was top secret. The things that were secret and that were divulged to the members of the Committee on Rules, I say to the gentleman from Ohio, have been made known in general terms.

Without divulging any secret information, does the gentleman have anything that he can give to this House at this time? I know that we hear about strip-teasers who have been converted. We hear this, and we hear that; we hear ru-

mors of activities of members of the staff of the select committee. But does the gentleman have anything that he can tell us in the way of new information that we can hang our hats on?

Mr. STOKES. Mr. Speaker, if the gentleman will yield further, I say to the gentleman that I certainly can, because the gentleman knows that in the briefing which we gave the gentleman concerning both cases, both the Kennedy case and the King case, we had sensitive materials that came out in that private briefing, that executive briefing, and for the first time we revealed certain names of certain individuals who have never been interviewed in either of those investigations. We also had new and unpursued leads, and we asked, because of the sensitive nature of the material, that all that material be given back to us and not revealed publicly. The purpose of the executive briefing was so we would not be in the position of having to endanger the lives of certain persons by revealing that type of testimony openly relative to murder investigations.

Mr. QUILLEN. Mr. Speaker, I thank the gentleman.

I hold in my hand a news article that I referred to this morning in my colloquy, and that concerns the gentleman who killed himself. That name was revealed. Let me quote from the newspaper article:

> The Oltmans interview developed into a national news story and sent investigators from the congressional committee scurrying to Dallas in search of De Mohrenschildt and his acquaintances. As of Friday, however, the probers had not inquired about his records with the Dallas County Mental Illness Department.

The name was revealed not under the leadership of the gentleman from Ohio (Mr. STOKES), but by the committee at a prior time. The man has now killed himself.

Mr. STOKES. Mr. Speaker, I would respectfully ask the gentleman to retract that statement. In no document that we have ever presented to the gentleman has that gentleman's name appeared.

Mr. QUILLEN. No. The gentleman is correct.

Mr. STOKES. I sincerely ask the gentleman to retract that statement.

Mr. QUILLEN. Mr. Speaker, if I have misled the gentleman, I certainly do retract it. I did not say that. I said that I revealed the article which I quoted from this morning, and in the article there is allusion to the fact that staff members of the select committee went to Dallas, found that the man had had a mental health record, and know that he had a mental health record.

Mr. Speaker, I want to correct any misunderstanding on the part of the gentleman from Ohio (Mr. STOKES), because he knows the high regard that I hold for him.

Mr. STOKES. Mr. Speaker, I certainly appreciate that. I am sure the gentleman did not mean to say, as he had said earlier, that we have revealed this individual's name, because I know that we did not.

Mr. QUILLEN. No. That name was not revealed in the secret briefing.

Mr. BOLLING. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I rise to explore the possibilities that we have before us. I do not intend to move the previous question at this time. However, there have not been any amendments offered for quite some time, and I know there could easily be any number of amendments offered.

However, I gather that the House is beginning to feel that it would like to act on this matter; and I hope that Members will conduct themselves with that in mind.

I thank the Speaker.

Mr. STEERS. Mr. Speaker, I am in full support of House Resolution 433, which would reconstitute the House Select Committee on Assassinations. Passage of this resolution will result in a responsible and thorough investigation of the assassinations of President Kennedy and Rev. Martin Luther King, Jr.

It is of course unfortunate, that the former chairman and the former chief counsel got involved in such an unseemly dispute. It is also unfortunate that extravagant proposals were made to spend money which could better be allocated to more pressing needs.

However, the chairman has been replaced and the chief counsel's resignation has been accepted by the committee. The annual budget has been set at $2.5 million instead of $6.5 million.

I earlier voted against a proposal to continue the existence of this committee with totally inadequate funding. Subsequently, the bizarre occurrences relating to the Assassination Committee provided a deplorable and even disgraceful picture to the American public.

However, there is no reason, I feel, to believe the new chairman, Mr. STOKES, will experience the problems of his predecessor. There is no reason a new chief counsel cannot be found who will effectively perform the necessary duties of that position. We go forward with a clean slate and although there can be no guarantee of final answers to all the questions that have been raised, I believe the importance of these questions justifies making a serious effort which this resolution will initiate.

Mr. LAGOMARSINO. Mr. Speaker, I rise in support of House Resolution 433, the resolution reconstituting the Select Committee on Assassinations. I supported the original resolution creating the committee, and I was distressed by the subsequent events which have all but destroyed the original committee and its credibility. Frankly, many of my constituents were equally distraught and a majority of those who wrote to me felt the committee should be terminated.

In view of the recent disclosures and the resignation of Mr. Richard Sprague, committee counsel, however, I am willing to give it one more try, and would urge my colleagues to adopt a similar attitude. The committee has hinted that it may have some new leads, and I feel it's important that we give them a chance to follow up on those.

My support today, however, should not be construed as extending beyond that or of agreement to the funding request. Failing the development of new substantive evidence, or the presentation of a reasonable budget proposal. I will have no choice but to oppose the funding resolution due the end of May.

Mr. ASHBROOK. Mr. Speaker, I urge the defeat of House Resolution 433, which would reconstitute the Committee on Assassinations. I cannot justify pouring any more of our citizens' tax dollars into the highly questionable activities of this committee.

The brief history of the Assassinations Committee has been a strange comedy of errors. Political pundits have called it the congressional version of "The Gong Show." And the committee has lived up to this reputation with one "gong" after another.

The surprises began when the committee's chief counsel Richard Sprague requested $6.5 million in funding and a staff of 170 people. The $6.5 million, moreover, would have covered only a 1-year span. To give some comparison, the House Judiciary Committee needed only $1.5 million during a 1-year period to conduct its impeachment investigations and hearings. Under extreme pressure the budget of the assassinations panel was eventually slashed.

The next major highlight occurred when the committee chairman tried to fire Sprague, labeling him a "rattlesnake" who had to be "stomped" out of the committee's future. The full committee, however, decided to retain Mr. Sprague. Meanwhile the chairman of the committee quit in disgust. Now Mr. Sprague has also resigned. How is that for soap opera? If Mr. Sprague had stayed, I would have been inclined to reluctantly support this resolution.

Credibility is essential for a panel that is checking into the credibility of previous investigations. The Assassinations Committee, however, has so discredited itself in just a few short months as to render its work virtually meaningless. Will anyone really believe what the Assassinations Committee has to say after witnessing these antics?

It is time to bring this sad story to an end. Let us not throw away another $2.3 million on the inept workings of the Assassinations Committee.

Mrs. COLLINS of Illinois. Mr. Speaker, I rise today to ask my fellow Members of Congress to support the reconstitution of the Select Committee on Assassinations. The myriad questions surounding the assassinations of Martin Luther King and John F. Kennedy are too important and persistent to go unanswered.

Public opinion surveys show that the majority of Americans have serious and continuing doubts regarding the sole guilt of James Earl Ray and Lee Harvey Oswald in the King and Kennedy slayings.

I believe that the select committee has carefully considered the criticism that has been leveled at it in recent months. This is reflected in its willingness to trim its budget request from $6.5 million to a lean $2.8 million. In addition, today's resolution requires that the committee report to the House as soon as possible on its findings and recommendations.

Of equal importance is the provision in this resolution that authorizes the com-

mittee to "bring, defend, and intervene in lawsuits and make applications to the courts." This power will enable the committee to conduct a comprehensive investigation.

For these reasons, I firmly believe that an already chastised and, hence, closely watched committee will prove invaluable in getting to the bottom of the assassinations' controversy. I urge you to vote in favor of its reestablishment.

Mr. FORD of Tennessee. Mr. Speaker, there are millions of Americans who still ponder the questions: "Who killed President John F. Kennedy?" and "Who killed the Reverend Martin Luther King, Jr.?" Feelings of outrage and suspicion surround all previous investigations into the King and Kennedy assassinations. These feelings are further complicated by a growing sense of national concern about the adequacy and integrity of the original investigations."

Until a more acceptable study is conducted and completed, the cloud of suspicion will only grow denser. On September 17, 1976, a resolution of the House of Representatives was adopted. This resolution charged the House with a mandate to conduct a full and thorough investigation into the King and Kennedy assassinations.

This mandate—stifled by a brief period of nit-picking and pettiness within the committee assigned to the task—has yet to be completed. Through a concerted effort of reorganization, sense of purpose and new factfindings, the committee has readdresesd itself to the professional task of uncovering evidence and answers relevant to the basic questions which still remain unanswered.

According to a recent Gallup Poll—February 1977—81 percent of the American public question the conclusion delivered by the Warren Commission that Lee Harvey Oswald acted alone in the assassination of John F. Kennedy. Sixty-nine percent of all Americans polled and 84 percent of all nonwhite Americans polled believe James Earl Ray participated in a plot to kill King.

It is obvious that the American public cannot accept all the inconsistencies and suspicions surounding these two assassinations. The American people simply want to know and deserve to know the answers, and we are in a good position to uncover them.

The obstacles to reconstitution are gone now: Richard Sprague is no longer chief counsel and the committee is completely unified. We have a fresh direction and a new sense of purpose. My colleagues, the committee has to act now. As we approach the eve of the assassination of Rev. Martin L. King, Jr., let us not lose sight of our mission. April 4, 1977, will mark 9 years of uncertainty around the death of Martin King.

It seems apparent, then, that we, as the highest elected officials of this great country, not only have an obligation, but we also have a duty to reconstitute the Select Committee on Assassinations. We furthermore have an obligation and duty to see to it that this reconstituted committee is charged with the mission of delivering to the curiously thirsty American public nothing less than a conclusive, credible, and reliable study.

I ask you, can we continue to deny the American people their right to hear a credible study, a study long overdue? Can we allow this long overdue study to become a longed-for never due? The answer is clearly "no" to me.

No, we cannot afford to drop the committee now for the price in time we would have to pay to get the answers tomorrow will simply be unaffordable.

I, therefore, challenge you, fellow Members, to join with me in voting, yes for reconstitution of the House Select Committee on Assassinations.

Mr. WEISS. Mr. Speaker, my support for House Resolution 433, to continue the life of the Select Committee on Assassinations for the duration of the 95th Congress is based on my firm belief that a congressional investigation of these matters is essential in order to determine the facts and to discover any wrongdoing that may have occurred by any agency of the Federal Government.

The public's confidence in various Government organizations ranging from the FBI and the Justice Department to the Central Intelligence Agency has been eroded due to evidence and allegations of misconduct. For short spurts of time, the people of this country had been led to believe that the assassinations of President John F. Kennedy and Rev. Martin Luther King, Jr., had been thoroughly investigated and leads pursued until the end. Our faith in some of the reports that have been presented to the people has been shortlived.

Mr. Speaker, my prime concern is that a full and fair search for the truth be conducted. I believe that the Congress is able to accomplish this and separate itself from the self interests that have characterized past efforts to answer our many questions on these tragedies of our lifetime.

It is also incumbent upon the Congress to conduct our own investigation with decorum and commanding the respect of the people so that we, ourselves, do not end up in the same quagmire.

Mr. DRINAN. Mr. Speaker, after carefully reviewing the report and printed hearings issued by the Select Committee on Assassinations along with all other available evidence, I have decided to vote against the passage of this resolution. It has been more than 6 months since the House voted to establish the select committee on September 17, 1976. I joined with a majority of the House on that date in the hope that a responsible congressional investigation could shed some light on these two tragic crimes.

On February 2, 1977, a 3-month extension of the committee was proposed on the House floor. Despite its complete lack of progress since the previous September, I voted to give the select committee another chance to demonstrate its worth under a new chairman.

Today we are once again faced with the decision of whether to extend the life of this committee once again or permit it to fade into oblivion. I cannot in good conscience simply ignore the record of the committee's performance to date and endorse its continuation once again. The committee has been paralyzed by internal bickering and disputes with its staff for the past several months. The chairman has resigned in anger. The staff director has quit. The unseemly feuding within the committee has become a national spectacle and a source of embarrassment to the House of Representatives.

I could perhaps overlook this chaotic record if the committee had come up with any hard evidence that its investigations were leading to a resolution of either of these cases. But no such evidence has been forthcoming. The committee's progress report is full of the same rumors and uncorroborated allegagations which have appeared in the press on various occasions since 1963. The committee is no closer to discovering the existence of a conspiracy to murder President Kennedy or Reverend King than it was 6 months ago.

I fervently wish that we could resolve these two tragic crimes once and for all in the minds of the American people. But I no longer believe that this committee can accomplish that.

I therefore believe that it is wasteful and fruitless to continue this effort. The family of the late President agrees. So does Rev. Martin Luther King, Sr. The committee should turn over all of its leads to the Justice Department which has been established to conduct criminal investigations of this type. Congress should return to its proper role as a legislative body. I urge the rejection of the pending resolution.

Mr. BAUMAN. Mr. Speaker, I move to strike the last word.

Mr. Speaker, we have heard a great many allegations at this point regarding unrevealed new evidence.

It was my impression, based on the record of this committee during its 7 months' life, that if indeed there were any new facts the committee had come across during any secret session, by now it would have leaked out because almost every other sensational statement has come out of the committee. If the Members will go back and read the select committee's report filed in December, it alleged that there were ex-CIA agents in Mexico who could testify about prior knowledge of the Kennedy assassination. We heard there was a Portugese connection. There were statements on the part of members of the committee that the meetings with James Earl Ray would reveal new information and they did not. We heard that ballistics tests were going to be conducted. All of these things were going to provide us with new information which would support this committee's existence.

Mr. Speaker, if, indeed, there is such information, I think the House has the right to know exactly what it is before it votes to commit $5 million and 2 years and the prestige of the House of Representatives to this particular committee. The committee has thumped along like the Toonerville Trolley dropping rumors, hints, people, two chairmen and a general counsel, who was sacked this morning with all the aplomb of Kaiser Wilhelm dismissing Chancellor Bismarck.

All of these sad events have appeared, one after another, in the headlines, making the House of Representatives look ridiculous.

Mr. Speaker, this committee has hit upon the truth, and they did so in the letter they sent to us today. They said the central issue of this entire investigation "is to resolve the many lingering questions about the assassinations and restore faith in our Government processes and institutions."

There is no way by which this committee, as presently constituted, with or without Mr. Sprague, can accomplish that objective. It has destroyed its own usefulness.

If, indeed, Mr. Speaker, the members of this committee have this information which they feel would warrant the continuation, they have the duty to reveal that to the House now.

Therefore, Mr. Speaker, I would move, under the terms of rule XXIX of the House of Representatives, that we resolve ourselves into a secret session, that we exclude the press and the people in the galleries, and that we be permitted, as Members of the House who have to vote on this, to know what this secret information is that they will not reveal to us here in public on the floor today.

If not, Mr. Speaker, we have no obligation to vote away our constituents' money for a continuation of what essentially has become the biggest legislative circus the House has engaged in for many years.

The SPEAKER. The Chair will state that the Chair appreciates the fact that the gentleman has offered a motion on which a vote may be required. However, before the House votes on a matter like this, the Chair thinks that we would want to have the opinion of the chairman of the committee, the gentleman from Ohio (Mr. STOKES), with respect to whether a communication will be made on this matter.

Mr. BAUMAN. Mr. Speaker, if I still have any time, the motion has been made and I believe it is in order.

The SPEAKER. Will the gentleman yield?

Mr. BAUMAN. Certainly.

The SPEAKER. Is the gentleman's motion in writing?

Mr. BAUMAN. The gentleman would be glad to reduce it to writing.

The SPEAKER. In the meantime the Chair recognizes the gentleman from Ohio (Mr. STOKES).

Mr. BAUMAN. Mr. Speaker, does the gentleman from Maryland still have time?

The SPEAKER. Yes.

Mr. BAUMAN. That being the case, the gentleman from Maryland, Mr. Speaker, would like to say——

The SPEAKER. The Chair has recognized the gentleman from Ohio.

Mr. BAUMAN. Does the gentleman from Maryland still have time remaining in his 5 minutes?

The SPEAKER. The gentleman asked the Chair whether he had time to write out his motion.

Mr. BAUMAN. I asked whether I had time remaining to speak.

The SPEAKER. The answer is in the affirmative. The gentleman has time in which to write out his motion.

Mr. BAUMAN. Mr. Speaker, I asked whether I had time to speak.

The SPEAKER. The Chair begs the gentleman's pardon. The gentleman has time remaining.

Mr. BAUMAN. The gentleman is going to use his time, Mr. Speaker, with the sufferance of the Speaker of the House.

The SPEAKER. The Chair recognizes the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, the gentleman from Maryland has made a motion. The Speaker has required that it be reduced to writing.

The gentleman from Maryland is going to pursue that motion because he believes that under the rules of the House, we have a right to that information.

The SPEAKER. The Chair may be asked to rule on that and asked the gentleman from Maryland whether he will yield to the gentleman from Ohio (Mr. STOKES), the chairman of the committee.

Mr. BAUMAN. Yes, I will yield to the gentleman from Ohio.

Mr. STOKES. Mr. Speaker, I thank the gentleman for yielding.

In reply to the Speaker's question, this committee did consider undertaking a secret, private briefing of the House.

After a great deal of deliberation as to the unwieldy aspects of being able to contain highly sensitive materials and communications, this committee decided that it would be too unwieldy a procedure and would, in all probability redound against the committee, and we decided against such action at that time.

Mr. BAUMAN. Mr. Speaker, let me say that this Member was not invited to any secret briefing. There was a secret meeting held with the select committee and the Committee on Rules with no notice at all given in an effort to get them to get this resolution to the floor. But if there are secrets, we all should be told.

The SPEAKER. The time of the gentleman has again expired.

Mr. BAUMAN. Mr. Speaker, I renew my motion.

The SPEAKER. The time of the gentleman has again expired.

Mr. BAUMAN. I renew my motion.

The SPEAKER. The Chair hears the gentleman from Maryland and the Clerk will read the motion.

MOTION OFFERED BY MR. BAUMAN

The Clerk read as follows:

Mr. BAUMAN moves under rule XXIX that the House resolve itself into secret session.

The SPEAKER. The Chair would like to make the following statement:

There has been a motion made by the gentleman from Maryland (Mr. BAUMAN). If the motion would prevail, in view of the fact that the Chair has said at an earlier date yesterday that we would be through at 5:30 this afternoon, and in view of the precautions that must be taken, the clearing of the galleries, the clearing of the Press Galleries, the proper placement of officers and employees that are necessary in order to protect the House of Representatives, that should the motion prevail that then a motion would be entertained to adjourn the House until 11 o'clock a.m. tomorrow.

The question is on the motion offered by the gentleman from Maryland (Mr. BAUMAN).

The question was taken; and on a division (demanded by Mr. BAUMAN) there were—ayes 76, noes 97.

Mr. BAUMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. The Clerk will reread the motion so that the Members know what they are voting upon.

The Clerk read as follows:

Mr. BAUMAN moves under rule XXIX that the House resolve itself into secret session.

The vote was taken by electronic device, and there were—yeas 185, nays 226, not voting 21, as follows:

The Clerk announced the following pairs:

On this vote:

Mr. Fuqua for, with Mr. Teague against.
Mr. Clay for, with Mr. Milford against.
Mr. Rangel for, with Mr. Heftel against.
Mr. Price for, with Mr. Michel against.
Mr. Findley for, with Mr. Symms against.
Mr. Roe for, with Mr. Broomfield against.

Until further notice:

Mr. Zablocki with Mr. Staggers.

Mr. Hubbard with Mr. Charles Wilson of Texas.

Mr. VOLKMER changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BOLLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, an-

nounced that the Senate insists upon its amendments to the bill (H.R. 4800) entitled "An act to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such act, and for other purposes," disagreed to by the House; requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. LONG, Mr. TALMADGE, Mr. RIBICOFF, Mr. HATHAWAY, Mr. MOYNIHAN, Mr. DOLE, Mr. ROTH, and Mr. LAXALT to be the conferees on the part of the Senate.

TO EXTEND PERIOD DURING WHICH PAYMENTS FROM CONTINGENT FUND MAY BE MADE UNDER HOUSE RESOLUTION 11, 95TH CONGRESS

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 435) and ask for its immediate consideration.

Mr. Speaker, by way of explanation of this resolution, let me say to the Members that it extends the period to May 31, 1977, during which interim payments for committee expenses from the contingent fund of the House may be made under House Resolution 11 of the 95th Congress. It will maintain the present level of spending until the funding resolutions for the particular committees involved are reported.

The Clerk read the resolution, as follows:

H. RES. 435

Resolved, That, notwithstanding the provisions of H. Res. 11, Ninety-fifth Congress, adopted January 4, 1977, the period during which payments may be made from the contingent fund of the House of Representatives in accordance with such resolution, to any standing committee or select committee referred to in the first section or section 2 of such resolution, is hereby extended to the close of May 31, 1977.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the further reading of the resolution be dispensed with and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, could the gentleman from Pennsylvania tell us the committees that will be funded by this resolution?

Mr. DENT. The committees that will be funded are the Committee on Interstate and Foreign Commerce, the Committee on Government Operations, and the Select Committee on Ethics.

Mr. BAUMAN. What about the Select Committee on Assassinations?

Mr. DENT. The resolution for the Select Committee on Assassinations has not as yet reached the committee.

Mr. BAUMAN. But this continuing resolution will fund that committee?

Mr. DENT. No. As I understand, and I may be in error, and if I am, I would be glad to be corrected, the Select Committee on Assassinations was continued earlier in the session at its reduced rate, exactly the rate they were operating under at that time.

Mr. THOMPSON. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman.

Mr. THOMPSON. The distinguished subcommittee chairman, the gentleman from Pennsylvania, Mr. DENT, is correct, I would say to the gentleman from Maryland. Under the continuing resolution which the gentleman from Pennsylvania, Mr. DENT, has before him, the Select Committee on Assassinations will receive nothing else until it is heard by the Subcommittee on Accounts and is run through the Committee on House Administration and then to the floor of the House and will continue to operate under the approximate figure of 84,000 and some dollars per month, and no more.

I would hope the gentleman would not object to the resolution offered by the gentleman from Pennsylvania.

Mr. BAUMAN. In deference to the gentleman from New Jersey, I will certainly not cause any obstruction to this resolution, and that is strictly due to the best efforts of my friend, the gentleman from New Jersey.

I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. DENT. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT OF CONFEREES ON H.R. 4800, EMERGENCY UNEMPLOYMENT COMPENSATION EXTENSION ACT OF 1977

Mr. ULLMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4800), the Emergency Unemployment Compensation Extension Act of 1977, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference requested by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Oregon? The Chair hears none, and appoints the following conferees: The gentleman from Oregon, Mr. ULLMAN; the gentleman from California, Mr. CORMAN; the gentleman from New York, Mr. RANGEL; the gentleman from California, Mr. STARK; the gentleman from Indiana, Mr. JACOBS; the gentlewoman from Kansas, Mrs. KEYS; the gentleman from Virginia, Mr. FISHER; the gentleman from New York, Mr. CONABLE; the gentleman from Michigan, Mr. VANDER JAGT; and the gentleman from California, Mr. KETCHUM.

APPOINTMENT AS MEMBERS OF U.S. DELEGATION OF CANADA-UNITED STATES INTERPARLIAMENTARY GROUP

The SPEAKER. Pursuant to the provisions of 22 United States Code 276d, the Chair appoints as members of the U.S. Delegation of the Canada-United States Interparliamentary Group to be held in Vancouver, British Columbia, on May 27 to May 31, 1977, the following Members on the part of the House: The gentleman from Florida, Mr. FASCELL, Chairman; the gentleman from California, Mr. JOHNSON, Vice Chairman; the gentleman from Massachusetts, Mr. BOLAND; the gentleman from Florida, Mr. GIBBONS; the gentleman from New York, Mr. HANLEY; the gentleman from Washington, Mr. MEEDS; the gentleman from New York, Mr. LAFALCE; the gentleman from Nebraska, Mr. CAVANAUGH; the gentleman from New York, Mr. MCEWEN; the gentleman from Kansas, Mr. WINN; the gentleman from Pennsylvania, Mr. GOODLING; and the gentleman from Vermont, Mr. JEFFORDS.

GEN. GEORGE BROWN OUGHT TO RESIGN OR BE FIRED

(Mr. MIKVA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MIKVA. Mr. Speaker, I think that the Chairman of the Joint Chiefs of Staff, Gen. George Brown, ought to resign or be fired. His most recent remarks prove once again that he is unfit to continue as the Nation's highest military official.

General Brown's comments in the past have revealed an appalling lack of discretion, tolerance, or political and diplomatic sensitivity—qualities which are essential prerequisites to foreign and defense service. In 1974, he declared that Jews exert undue influence over Congress, the media, and banks. Last year, he characterized our defense commitment to Israel as a burden, Britain's Armed Forces as pathetic, and the Shah of Iran as having "visions of the Persian Empire." These statements were inaccurate then, and linger as continuing embarrassments today. But even his past excesses pale in comparison to the latest exposure into the thoughts of Chairman Brown. The mind processes of the Chairman make it clear that he ought to find another forum to spew his junk.

Congress is not, and should never be, immune from public criticism. Indeed, our republican system acknowledges, and even welcomes, the right of citizens to question, challenge, protest, and petition their Government. That function, however, cannot extend to the top military officials who are charged with insuring the national defense. As President Truman so appropriately noted when he was left with no other option than to relieve General MacArthur almost 26 years ago:

Full and vigorous debate on matters of national policy is a vital element in the constitutional system of our free democracy. It is fundamental, however, that military commanders must be governed by the policies and directives issued to them in the manner provided by our laws and Constitution.

One of the hallmarks of a free society is civilian control over the military. The military does not make policy; it executes it. Our generals do not select which policies to carry out; they act on whatever determination has already been made. Through their elected represen-

tatives in Congress and the executive, the people of the United States determine what their foreign policy will be and what defense posture should be taken. In giving the back of his hand to this process, General Brown has shown his insensitivity to the difficulty of holding on to a free parliamentary process. Were it up to him, we would have more efficient people in Congress who did not meddle in foreign affairs or military affairs. Maybe he would prefer the Members of Congress to clear their remarks and votes with him or the Joint Chiefs before we exercised our function.

General Brown's advocacy of privacy invasion and condemnation of congressional input in the decisionmaking process harken back to our recent past, when the American people were routinely denied the truth about their military operations and were bugged almost to death as a democracy.

Mr. Speaker, I would like to see General Brown free to criticize Congress and the Jews and the British and the newspapers to his heart's content. He can do that if he is restored to that civilian status which would suit him so much better than his present spot. Indeed, if he is not sent there soon, the rest of us will lose our right to criticize the General Browns that come into high military position every once in a while. Nowhere is the eternal vigilance that Jefferson urged on us more urgent than when we are dealing with the encroachment of the military on the civilian control of Government.

SELECT COMMITTEE ON ASSASSINATIONS

The SPEAKER pro tempore (Mr. MOAKLEY). Under a previous order of the House the gentleman from Texas (Mr. GONZALEZ) is recognized for 60 minutes.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I am delighted to yield to my distinguished colleague, the gentleman from Texas (Mr. KAZEN).

Mr. KAZEN. I thank the gentleman for yielding.

During the debate on the assassinations resolution this afternoon I attempted on several occasions to get recognition from the Chair but before I could do so the motion on the previous question was ordered. I wanted to take the time of the Committee—which in my opinion was the proper thing to do at that time, but not having been able to, I do it now—to publicly thank the gentleman from Texas (Mr. GONZALEZ) for the work that he did in bringing forth the resolution calling for the creation of an Assassinations Committee and later for the work that he did as chairman of the committee.

I want to state to the Members here today that had it not been for the work that the gentleman from Texas (Mr. GONZALEZ) did on that committee, had it not been for what he did in relation to the chief counsel on that committee, the committee today would not have accepted the resignation of Mr. Sprague. They had to accept his resignation because the gentleman from Texas (Mr. GONZALEZ) put it on the line and they could ill afford to keep that kind of person on the staff.

So when we come right down to it, Mr. Speaker, I believe one of the main reasons the resolution passed this afternoon was because of the magnificent work done by the gentleman from Texas, because we know now had they not fired Mr. Sprague that resolution would never have been adopted by the House. So I for one would like to thank the gentleman in the well for the tremendous job that he did, and I might say that the House vindicated his position. Even the committee vindicated his position and his actions.

Mr. GONZALEZ. I thank the gentleman from Texas. I am deeply grateful for his words. He and I have served in the Texas State Senate. He had a very illustrious background of public service in Texas, going back since he returned as a combat veteran from World War II.

Mr. ECKHARDT. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I am delighted to yield to my distinguished colleague, the gentleman from Texas (Mr. ECKHARDT).

Mr. ECKHARDT. I thank the gentleman for yielding.

First, I would like to echo and endorse the statement the gentleman from Texas (Mr. KAZEN) just made. I join him wholeheartedly. I think he has quite well pointed out that had it not been for the efforts of the gentleman in the well to relieve a very difficult situation, that is to remove Mr. Sprague from his position, it would have been impossible I believe for the resolution to have passed.

Mr. GONZALEZ. I wish to thank my colleague, the gentleman from Texas (Mr. ECKHARDT), who also has had a very distinguished record of service in Texas and of course he has served with great distinction in the House.

These words are heart warming, particularly in view of the rather unfair assaults I have received on the Washington level from some female harridan columnists in the Washington press corps without any opportunity to have justice in that respect, and so testimonials from men who do know me and have known me over a period of 24 years of publicly held elective office are most encouraging.

Mr. ECKHARDT. Mr. Speaker, will the gentleman yield for a moment on that point?

Mr. GONZALEZ. I yield to the gentleman from Texas (Mr. ECKHARDT).

Mr. ECKHARDT. Mr. Speaker, I have known the gentleman in the well for many years. I was absolutely astounded at a statement that the gentleman is inclined to be emotional, to take an arbitrary or hard position. I have found the gentleman from Texas (Mr. GONZALEZ) to be one of the most courteous member of any body in which the gentleman has served. But he is also a most dedicated and strong-minded man. I remember the gentleman in the well conducted for a longer period than any other member of any legislative body in the world a filibuster against nine bills that would have had the effect of impeding the Brown decision in Texas. It was one of the finest displays of a forceful and able defense of the Supreme Court's decision on the question of civil rights that I think ever occurred in this country.

Mr. Speaker, I want to compliment the gentleman for that, and I hope the Nation remembers the gentleman's effort in that regard.

Mr. GONZALEZ. Mr. Speaker, once again I thank my very esteemed colleague, the gentleman from Texas (Mr. ECKHARDT).

The gentleman evokes memories of exactly 20 years ago, and it is with bitterness that I say this. The gentleman who spoke previously, the gentleman from Texas (Mr. KAZEN), and I, were colleagues in arms in the Texas State Senate, the only legislative body of the 11 Confederate States where the so-called massive resistance kit that emanated from Virginia and finally worked itself over to the Texas Legislature were resisted. The Texas Senate was the only legislative body where these infamous laws, because they were an attempt to freeze into law the Jim Crow provisions of the Texas constitution and statutes and to undo the Brown decision of the Supreme Court, among others. In effect, there were a total of 14 bills before the year was out, because the Governor was compelled to cause two special sessions of the legislature. It was exactly 20 years ago and there was nobody else in Texas who fought. It was another world. It was weird. We were intimidated. We had pistoleros, gunmen come in from the white citizens' council, from another world. We would never recognize it today, thank God; but it is ironic that 20 years later there would be a solid black cabal in the select committee that would lead the fight to undo me in a most malicious way, because I cannot characterize the role of the Delegate from the District of Columbia with respect to my ethics, with respect to my situation as chairman after February 2, other than malicious, other than a calculated premeditated effort to first seek the Speaker to knock me out as chairman and then a calculated course to resist my serving as chairman, at least in any reasonable, harmonious way; so, of course, I am bitter because it seems not that I expect ever in politics any such thing as gratitude. I would take the same position again and I would have taken it if it had involved anybody else, because I looked upon it then as merely living up to the oath of office to uphold the Constitution of the United States.

Mr. Speaker, in my own district Americans of black or Negro descent constitute less than 8 percent. They did so then, but that made no difference. I just feel that in view of that fact it is ironic that exactly 20 years almost to the month I would have received my thanks from the black cabal.

Mr. Speaker, I believe awhile ago the gentleman from New Jersey (Mr. PATTEN) had sought recognition. I will be delighted to yield to the gentleman from New Jersey at this time.

Mr. PATTEN. Mr. Speaker, what could make it more natural than the fashion in which a reputable lawyer had stated his respected views? I would like to join and also pay my respects to the gentleman from Texas (Mr. GONZALEZ).

As many know, I voted against the

committee. In my experience, this is wasting the taxpayer's money; but insofar as the role of the gentleman goes to action, I want the gentleman to know from one Member that I am deeply appreciative to the gentleman from Texas (Mr. GONZALEZ).

Mr. GONZALEZ. I thank the gentleman very much. I equally express a sincere and heartfelt sense of gratitude for those expressions from the distinguished gentleman from New Jersey. He has indeed—and in fact, has always—been a friend, even when I came as a callow freshman. One does not forget those things.

Mr. PATTEN. Even when the gentleman was fighting Ed Foreman at that time.

Mr. GONZALEZ. Even during that time period, that is right, from the very beginning. I have not forgotten this, and I surely never will.

Mr. ECKHARDT. Mr. Speaker, will the gentleman yield further?

Mr. GONZALEZ. I yield to my colleague from Texas.

Mr. ECKHARDT. Of course, this Member is not prepared to say anything against any other Member of the House, but I certainly do support the proposition that what was done 20 years ago was not just a matter favorable to that minority generally called "Mexican Americans" in Texas.

I well remember traveling across that State at the time the distinguished gentleman from Texas (Mr. GONZALEZ) was speaking, and reading the newspapers. I happened to be going from Dallas to Edinburgh, and over this sketch of Texas terrain there was a switch in position. In Dallas, newspapers favored the bills that would retard equal opportunities in the schools, and the further one went south, the more one found GONZALEZ's name spoken with reverence and praise. What HENRY GONZALEZS' effort did in Texas was to consolidate two groups who had been discriminated against for years in Texas. There was a time, as the gentleman in the well knows better than I, when there were three separate sets of schools in Texas, and the worst school facilities were found in the so-called Mexican-American schools. The reason for that was that people were not so afraid of a breakdown of segregation between so-called Anglo Americans and Mexican Americans as they were between blacks and whites. So they took the risk of even greater discrimination against the browns than against blacks.

But, the thing the gentleman in the well did in Texas that should never be forgotten is that he consolidated the forces as between all who were being discriminated against at that time, and achieved more advance in Texas, more recognition of the equal rights of people, whether white, black, or brown, than any man I know of in Texas.

It was not too long after that, when to openly attack a politicians because he was fair to minorities became absolutely taboo in politics in our State.

Before the gentleman in the well took his stand and made his filibuster, it was the commonest thing in the world to attack everyone who stood for equal rights in Texas on the grounds that he was too friendly to minorities. They used a very ugly term for that. So, I do not think anybody in my State deserves more praise than the gentleman in the well for advancing equal rights of all persons without regard to race.

Mr. GONZALEZ. Mr. Speaker, let me say that I am particularly grateful for this, because although the gentleman from Texas (Mr. ECKHARDT) has said that before, it has never been on the record. As I say, I think when we take an oath of office, once we are elected there is no black, white, brown; there is no economic minority or majority; there is no rich or poor. One has a duty to represent each and every one, even those who did not vote for us.

Well, President Benito Juarez it was who told my grandfather when they were fighting against the French and won, my grandfather was what was known as Jefe Politico, and alcalde of his area.

The group which fought so successfully against the French came to him and said, "Why did the President want to appoint this man over here? He is a Spaniard; he did not help us fight against the French."

So, my grandfather eventually got to Mexico City and brought the matter up with the President. The President said, "Don Joaquin, please tell our friends, is there anybody there that fought with us that we have not taken care of?"

My grandfather said, "No."

The President said, "Well, will you please convey to our friends my message to please accept my judgment in this matter? It is true that this man is a Spaniard; it is true that he did not fight, but he did not fight us either, and I have a reason for appointing him to what I did."

Remember, when you win, when you triumph, justice, justice, always justice to those you defeated and your enemies. But for your friends, justice and everything else that you can.

And I think that that is a pretty good political lesson that came straight from President Benito Juarez to my grandfather.

I think in this case I have felt that very seriously since I was a city councilman, because once I was elected I would not be more eager to serve those constituents who helped me more than I would this one who has a legitimate cause but did not help me.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. I appreciate the gentleman's yielding.

Mr. Speaker, I could not in good conscience pass up the opportunity to mention that the gentleman should not have to mention the things that he did in the State Senate of Texas. I was serving in the house at the time when his bills were introduced. And, like here, we could not filibuster in the house. We made every attempt possible, sidetracking one bill here, sidetracking another bill there, but the effort had to be made in the senate. And as the gentleman mentioned, in the wee hours of the morning, perhaps 1:30, 2:00 o'clock, we would come over there to give him encouragement. And right outside the gallery was an old black gentleman preacher, who came all the way from east Texas, and he told us, "God bless HENRY GONZALEZ, God bless him forever. May we always have friends like that."

The gentleman did what he thought was the right thing to do, regardless of the opposition. It took great courage in Texas at that time. It is easy now to look back, but it took great personal courage to stand up in the senate of the State of Texas and speak out, long before the world knew there was a Martin Luther King or Selma or Montgomery. And long before "We shall overcome" was sung, the gentleman in the well was doing it, because he thought it was the right thing to do, in the senate of the State of Texas.

And I remember him saying and pointing to some of his colleagues, "For whom the bells toll." He said, "They toll for you, because right"—I think the gentleman used the word—"shall overcome in the end."

And then when they had a constitutional amendment to bring the vote to the District of Columbia, the gentleman from Texas (Mr. WILSON) and the gentleman speaking handled it in the House. The gentleman from Texas (Mr. KAZEN) and the gentleman from Texas (Mr. GONZALEZ) worked in the senate for Texas to confirm, against the objections of many of the same colleagues, that the District of Columbia should have the right to vote and then to have representation. The people of the District of Columbia and, I certainly would hope, those representatives, should have nothing but respect for HENRY GONZALEZ and those who were far away from here and those who were really not suffering the scourge of discrimination, of sitting in the back of the bus. It was people like Mr. GONZALEZ who began the fight, out of the battlefield of Selma and Montgomery. That is where it all began.

I might mention that in the senate of the State of Texas, as in the well of this House, the gentleman stood in the forefront.

Mr. GONZALEZ. I thank the very distinguished gentleman from Texas. Again, I am very grateful, because this is the first time on the record.

I will go further. Before I got to the State senate, in my own hometown I had the honor of fighting an attempt to pass segregative ordinances in 1954.

I stood alone. I lost that fight. The vote was 8 to 1.

The city council of San Antonio did what appeared to be about the same thing the House has been doing here with respect to the Select Committee on Assassinations, about the same thing that the members of the Select Committee on Assassinations have been doing. It is hard to explain. There is no logic, no reason for it. After 124 years of municipal life, since 1839, the city of San Antonio decided on June 19, 1954—which is a date we know as Juneteenth because that is Emancipation Day in Texas—to pass certain ordinances. The city coun-

cil in San Antonio met and passed segregatory ordinances to prevent citizens of black or Negro descent from being allowed access to swimming pools paid for by tax moneys of the city of San Antonio and access to the Municipal Auditorium and all other public facilities except a golf course. The ordinance provided that the blacks could use that golf course on Mondays, Wednesdays, and Fridays exclusively.

I stood up and fought that. I lost 8 to 1. But I was the only one who was reelected, for other reasons, to that city council.

When I came back, within 1 year's time, in 1956, I had the honor of introducing and having accepted unanimously the resolution that did away with discrimination on account of race, color, or creed in any tax-supported facility of the city of San Antonio.

Again I received threats. I had burning crosses thrown out on the front lawn of my house. My wife was phoned and threatened. It looked as if it was political suicide.

As it turned out, it was not that at all. The ordinance prevailed, and San Antonio became the first city south of the Mason-Dixon Line to pass that type of desegregatory ordinance, and that was on April 19, 1956.

Mr. Speaker, I bring that up only because we got into this theme and also because I think that it is obvious that certain members of the committee, under the leadership of the delegate from the District of Columbia and supported solidly by the three other black members of the select committee, picking up support from at least two other members of the select committee, had appealed to the Speaker to dismiss me as chairman. They had made up their minds to resist my appointment as the committee chairman.

They never had the guts, they never had the courage to confront me and say, "We don't accept you. We won't work with you. The Speaker may have felt committed to naming you, but we don't intend to work with you harmoniously."

If they had, I would have accepted that, I can assure the Members. I would have known exactly what to do, because I certainly am not enamored of the title of chairman. I was not elected chairman of the committee by the people of the 20th Congressional District of Texas; I was elected for what I am: The Representative to the U.S. House of Representatives from the 20th District of Texas. That is all, and that is all I expected. I have yet to request any privileges. I have yet to conspire or to grasp for any kind of designation, because I feel that I came up here to work.

Mr. Speaker, I think I ought to place certain facts concerning my attendance record in this RECORD, since my absence last month might indicate that perhaps my attendance might have some deficiency. I would like to point out that for 12 consecutive years my attendance in this House was perfect in every detail, including quorum calls, yea and nay votes, and everything else. Then when my mother took seriously ill and I had other complications involving a member of the family 2 years ago, I lost a few days for the first time. However, up to the time that I left here on February 19, my average attendance and voting record for 15 years and 2 months was 98.6 percent. So when I did finally take the break that I had last month, it was in effect mandated by what I had to confront here, which is the reason I wanted to speak this afternoon.

The House has acted on this resolution anew, but it does not in any way help my situation in making sure that the record reflects the chronological sequence of events and what happened, because, as I have said in the last 2 days of the special orders, it was nowhere to be found.

The record revealed that when my resignation was presented to the House, the whole truth was not given the Members of the House. Under those circumstances, I felt impelled and compelled that as soon as I could, I would come back. What is it that I have? I have no power. I do not even have the support of the leadership. I do not even have the support of those who where saying that they were expecting me to assert leadership. However, I did have the only thing, which is the forum of this House. That is all, ultimately, that a Member has; and therefore, I have resorted to it.

I made very serious allegations, specific allegations. They were not general. During the course of debate today, I felt constraint, first, because I had no real knowledge as to what treatment I would receive, particularly by the majority Members who were handling the time.

Before this, their treatment of me has been arrogant. It has been dictatorial, authoritarian. It has not been very democratic.

Therefore, I felt that any insistence on my part to get up would merely give reason and credence to those who were saying that all I am expressing is "sour grapes."

I will say, however, that there is a lot more involved in this. When we evoke the memory of the things in the State senate in which my stint began exactly 20 years ago, I was critical of the senate then. I found myself at cross-purposes at one point with the Governor, with the Lieutenant Governor, and with the leadership of the senate. I had a fight over the appointment of a judge. I asked the senate not to confirm that appointment, and the senate solidly backed me even though it caused me to be worsely treated than anything one might have read about here.

What happened? I was critical at that time. If anyone had asked me, I would have said that in all the English-speaking world the most undemocratic parliamentary body in this State senate. But now all I can say is that there was a residual virtue; there was an inherently sound core of integrity in the institutional life of that senate then, even with what I felt were arbitrary tactics, which is not present in this House.

Mr. Speaker, when I first came to the House and up to recently, a few years back, I could say, yes, there was an inherent core of health in the institutional vigor of this House, in its leadership, and in its procedures. I find that has eroded seriously; and the course of events reflected in the setting up and in the history, brief as it is, of the Select Committee on Assassinations clearly reveals that.

There were several things that happened with respect to actions that I took in my endeavor to state the record and to give the truth and the rational and logical reasons which motivated each action once I was named chairman, which I should refer to.

For instance, at no time did I have any indication from anybody in leadership position, the Speaker, majority leader, majority whip, or chairman of the Caucus, all whom intervened in this matter, or the chairman of the Committee on House Administration or the subcommittee chairmen thereof, that there was anything other than the strict mandate of the House of Representatives as reflected in House Resolution 222 that said that all the committee had was $84,333 per month, period, for any purpose, for all purposes.

What do we find now? Lo and behold, the chairman of the committee now, the gentleman from Ohio (Mr. STOKES), now says, and he told the Committee on Rules on March 28 and repeated it today, with no questions from anybody, that the committee had at no time been guilty of overspending that amount or that stricure mandated under House Resolution 222.

In the record of February 16, in which I placed the statement I made at the time that I attempted to have a committee meeting to take up the matter of overexpenditure, I introduced a letter into the record that had been written by the chairman of the House Committee on Administration in which it clearly indicated that there were overexpenditures and overcommitments and that something would have to be done.

Well, now we find that, no, technically, they did not use that money to overspend but, all of a sudden, the chairman says they have had a lot of money to go traveling to interview witnesses for the investigators. They have had money to make long distance telephone calls. They have had money to do a lot of things.

And he now says, though he said it in a lower tone and in a less obvious way:

> Oh, by the way, when this resolution is approved today and we go back to the House Committee on Administration, we are going to get $2,768,000, of which $200,000 will pay back the contingency fund of the House of Representatives.

What does this mean? Oh, where are the apostles of frugality over here like the gentleman from Illinois who sits on the committee, and also on the Committee on Rules, Mr. ANDERSON? I have always heard him get up and just get adamant about accountability.

Now, when did this happen? When did the committee get the right to dip into the contingency fund of the House? By whose authority?

The House said all the committee could have was $84,333.

What happened here?

Lo and behold, when I was chairman,

that was prohibited, that was absolutely off limits. What happened? Since when was this $200,000 debt to the House contingency fund incurred? Who has accounted for it? Who gave the order? Who sanctioned it? The committee on its own?

Interesting.

Another question came up. The gentleman from Ohio said I shut off the records from the FBI, as if I were the Attorney General. Well, first let me say I did not shut off any records. That is a canard. It is a lie of whole cloth.

I did meet with the Attorney General the week of February 8, if I remember correctly it was on a Wednesday, or perhaps a Thursday, for another reason. I asked to meet with him not to discuss the committee. Oh, a few people like the delegate from the District of Columbia jumped to the conclusion I was going to ask him about the FBI report they were talking about at that time. But, like many other things he does, he jumped to the wrong conclusion. I wanted to talk to the Attorney General about a malodorous case that arose in an adjacent county concerning the murder of a Mexican young man while he was handcuffed by a municipal police officer and then his body had been taken in a truck by the police officer's wife all the way some 225 miles to another point in Texas. And in sort of a fouled-up west Texas sparsely settled court atmosphere that man had not even been tried for murder, he was tried for a lower felony and given probation.

There was loud indignation at this from the Mexican-American community, and from every other body, whether Mexican-American or not. Some of us had asked the outgoing Attorney General, the outgoing administration, to do something about it, and they refused. I wanted to talk to Attorney General Bell about the violations of the civil rights of this man Morales. Then in the couse of conversing with him on that, he brought two of his assistants and informed me that they had gained permission, although none had ever been asked of the committee, much less the chairman, for certain staff members of the Assassinations Committee to go back into the files of the FBI. Mind you, we have all of these members of the Assassinations Committee saying that I had exceeded my authority. But in January, before there was any committee—there was no committee; there was no staff director—the late unlamented staff director took it on himself the first week in January to get into a very, very bitter dispute with then Attorney General Levi about third-dimensional evidentiary material that the Archives has in its possession in connection with the Kennedy assassination. It looked as though there were going to be an ugly confrontation. I did not see anybody protesting when I was asked to, please, come in and avoid this altercation. I was not chairman. There was no committee. But where were these others? Why did they not do something then? No, they were asking me to do it. The counsel himself called me and said:

I do not know what to do. This FBI is defying me.

I said:

It is not a foreign government. I am going to go over there and sit down and talk to them.

So when I went over, I could not meet with them, so we corresponded and talked on the telephone. The Attorney General then said:

We are willing to make this bulletin that was found down there in Dallas somewhere available to you, but you do not have a committee. In the meanwhile we are not going to allow you to come in and have access to our records until you are constituted again.

He was right. We had to accept it. We were reconstituted then on February 2. Without telling the Chairman or any members of the committee, the two lawyers—one of whom sat here this afternoon—took it on themselves and went to the FBI and demanded access to the files again, saying:

Last night the House reconstituted the committee.

I was not aware of it, but in the meanwhile I was aware that that same committee staff had either lost or misplaced four photographs of the Martin Luther King autopsy that they had taken from the Tennessee authorities, and Mr. Sprague, the counsel, had told me all along that the reason they had not taken physical possession of 99 percent of the evidence that had been subpenaed in November and December was that we had no hold-safe facilities where we could guarantee the integrity of the preservation particularly of the three-dimension evidentiary material or artifacts.

I communicated this to the Attorney General, and I said:

Mr. Attorney General, I do not know who is over there. I am not aware of it, and I will ask you, please, to suspend any access to those files right now unless and until the staff requests the Chairman to make that request in turn.

They never did. Mr. Sprague refused. His staff refused. The Attorney General said:

We are going to honor the Chairman's request because we think it is reasonable and because we do not want to be guilty of finding that some of the evidentiary documentation that we have will get lost.

I defy the present committee, the leadership, the outgoing konked out chief counsel to assure this House that the rifle that they have in their possession, that is supposed to be the rifle that James Earl Ray used, is safe and sound and preserved in a manner that will not embarrass the House at some future time.

I demand to know if they ever located the four missing autopsy photographs of Martin Luther King. They were certainly lost as of a month ago and misplaced. That is the reason for that.

And if the gentleman from Ohio (Mr. DEVINE) had bothered to ask and be present at the meetings called for he might have gotten the truth in case he is interested in that.

Oh, there is another thing. A Member of the House who I think now is on the committee and is pretty new talked about how I was wrong when I said that there were $9,900 plus in terms of expense vouchers that were presented to me that same week that I met with the Attorney General and which included as the biggest single item in that list long-distance telephone call expenses. And in turn those attributed to Sprague formed the biggest single item in that list of long-distance telephone calls. I reiterate that statement. That is exactly the way it was.

But the gentleman who spoke today was nowhere near the committee at that time. At best he could not have come on to the committee until after my resignation, and then had access to vouchers. He said it was not $9,900 for December 1976, over which we had no authority and I had no authority then and the books had closed on the 94th Congress. Where was the money coming from for that? He said:

Oh, no, it was not $9,000. It was $11,000.

The truth is that the dollar amount of nonsalary expenses for the month of December for the committee exceeded $22,000, but the only vouchers I was ever given and asked to sign blindly were for $9,000 plus, and I repeat that statement and I stand behind every bit of it.

Now this man said Sprague gave his check for $124. If he did, he did it recently, and if the rest of the committee is honest and accountable, why do they not search the records for November and October and find out how much Sprague owes for those long-distance calls? I do not see anybody talking about that.

The gentleman from Ohio (Mr. STOKES), the chairman of the committee, said that they reluctantly accepted the resignation of this erstwhile chief counsel and staff director, that they had all faith in him, that at all times he was a great guy. Well, the best I can say in the most charitable sense is that Mr. STOKES has a very facile memory because on December 6 right here where we were assembling for the preorganizational Democratic Caucus, the delegate from District of Columbia, the vizier from Washington, says:

I am ready to bust this thing up. I picked up the paper yesterday and read where Sprague hired two guys from New York and they are both white and one of them is going to be the deputy counsel for Martin Luther King and that is where I come in and I am ready to denounce him and fire him.

I said:

Oh, whoa, just a minute.

Mr. STOKES was at the counter in the cloak room. I summoned him. I said:

Mr. Stokes, at the last meeting we had in November, which was November 15 and 16, you were ready to demand the resignation of Mr. Sprague because you said he had hired only 4 blacks and he had hired a total of 37 people by then. Do you remember that?

He said:

Yes.

I said:

Well, have you been satisfied?

He said:

Well, I do not know, I just wash my hands. I do not trust him.

So I then took it on myself to call on

the other members of the committee and I said:

Hold off. Let us get together and let us get the staff counsel because we have got to get the chairman.

At that time, remember, the chairman was the gentleman from Virginia (Mr. Downing).

Well, the gentleman from Virginia (Mr. Downing) was in Virginia, but the gentleman was on his way back to the district. The gentleman advised that he would not get in until 6 o'clock, so I arranged a breakfast the next morning at 8 a.m. and all but two members of the committee showed up. I said:

This is what has come up, gentlemen. What is the best way to handle it?

They all agreed. The gentleman from Virginia (Mr. Downing) showed up for the breakfast and the gentleman from Virginia (Mr. Downing) said:

I will arrange a meeting at 1:30 with Mr. Sprague and Mr. Fauntroy and Mr. Stokes or anyone else that wants to. Will I miss out?

They must have ironed it out, because when I talked to the delegate from the District of Columbia (Mr. FAUNTROY) and the gentleman from Ohio (Mr. STOKES) about 4 p.m. that afternoon, they said:

Yes, sir; it's okay. We think he is going to be okay.

But I do not know whether he hired any more blacks or whether he did not. I think they had a good point. Why should not there be a black deputy counsel in charge of the Martin Luther King assassination? Why is not one now? I thought they had a good point, but apparently they were satisfied. All of a sudden they say, he has always been okay, but they wanted to fire him as of December 6. The Delegate told me right then and there that he was about to call a press conference. I dissuaded him from it.

In the presentation before the Committee on Rules on Monday, March 28, the gentleman from Ohio (Mr. STOKES) told the chairman and the rajah of the Committee on Rules, the gentleman from Missouri (Mr. BOLLING), he said:

Gonzalez acted without consulting the rest of the committee. I do not want to deal now with the staff problems. The staff would have walked out if Sprague had been fired. The staff feels that the charges against Sprague are unjust and untrue.

This was just Monday, March 28, in the afternoon; to which the gentleman from Missouri (Mr. BOLLING) says:

My impression was that the committee had gone into the charges and unanimously decided it was merely a conflict between the chairman and the committee.

STOKES says:

Absolutely. There was no proof to any of the charges.

The gentleman from Ohio (Mr. STOKES) continues:

We have no problem with Sprague; only one person did.

The gentleman from Illinois (Mr. MURPHY), a member of the Committee on Rules from Illinois, said:

Gonzalez made very disturbing charges against Sprague. What he, Sprague, has done to Henry he can do to you.

Well, the gentleman went on further and he said:

It's a funny way to have an investigation of the charges if just you and the committee and Sprague met and Gonzalez wasn't present.

Who pressed the charges to begin with? Well, let us go into the facts. I charge that Sprague had willfully, premeditatedly and with malice aforethought conspired to keep the nature and the extent of the hiring and anything to do with the staffing from any member of the committee from the chairman on down. Between December 15, 1976, and January 1, 1977, Sprague hired a total of 14 people with total annual salaries of $229,800.

On January 1, 1977, the committee was dying. All committees were dying. The 94th Congress was dying. We are not a continuing body.

Two days prior to the expiration of the committee and the Congress he hired 23 new staff members with total annual salaries of $474,600. He did not consult with or advise me or, to my knowledge, the members of the select committee of these actions.

Mr. STOKES told the Rules Committee on Monday that he knew about it. Well, he told me differently in January and February. I was sitting before the Rules Committee with RICHARDSON PREYER next day. He did not know about it. Now, Sprague explained later, when I demanded an explanation, that he took these actions because he contacted some member of the staff of the House Committee on Administration and was assured that $150,000 would be available under the continuing resolution. Now, how in the world could anybody assure that when we did not even have the new Congress assembled?

I told Mr. Sprague, "The trouble with that is that neither you nor that staffer have an election certificate, and you don't have a voting part in the Congress. Why did you go there? Why didn't you come to the committee to ask this information?"

Well, because somebody told him that this staffer, yet to be identified, in the House Administration Committee, told him it was all right. The truth and the fact is that he unilaterally hired and promoted staff employees at inflated salaries. He hired five employees of the staff of my predecessor, Chairman Downing, but the very fact that he hired these employees, and he did so without calling any member of the committee at any time, is a usurpation of the authority of the committee, and is an abject abdication of responsibility on the part of every member of that committee.

They still condone it. The effect of this hiring was to compel the 73-member staff to take a 35-percent reduction in salaries. On the other hand, as I pointed out yesterday and day before yesterday, Sprague was telling and counseling each member that as soon as his resolution passed—the one that passed today—they would have enough money soon thereafter when they got their $2,700,000 in order to pay back all of that difference of the cut they had taken, plus an increase—is the way he put it. That is another usurpation. He was allocating to himself the proper area of responsibility that only Members of the House can discharge.

Similarly, after the projected February salaries are to be paid, he says that there was to be a balance of $882. However, as I said, the letter from the House Administration Committee to me advised that they were exceeding the mandate of the House. As it now turns out, though, they do not call it that. They do not call it an over-expenditure—but that is what it is—of $200,000 that they owe the House Contingency Fund. What kind of numbers game is this? This is a shell game that I never thought I would see perpetrated on the Members of the House of the U.S. House of Representatives.

There is nobody at this point, including the present makeup of this committee and its chairman, who can tell this House with exactitude exactly how much that overexpenditure, as mandated by the House, of $84,333 is outstanding as of today or tomorrow or by the time the House Administration Committee decides to do something.

Now, there was another aspect that also motivated, and still bothers me very much, because I think the House is eventually going to be extremely embarassed. It will have to be defendant in litigation ultimately, just as sure as I am standing here.

I hope not. I hope it never comes to pass. But it is in the making right now. And some of the staffers and some of the members of the committee know it. At no time have they advised, that I know of, any of the general membership of the House, the reason being that under the ruling of a case styled McSurley against McClellan, decided just December 21, 1976, by the U.S. Court of Appeals for the District of Columbia, it is very possible that the members of the staff, and maybe even Members of the House, can be personally liable. This is the reason why they were trying to sneak through that provision in the resolution today that, fortunately, was knocked out by the House adopting the Bauman amendment that would have made the House pay for their defense when and if it comes.

I can assure the Members that the chances are more likely than not that it is coming. That is the reason I was sensitive about signing vouchers. They talk about having no authority to fire, when they did not object when I hired. The moment I signed the pay vouchers for everyone of that staff at the reduced rate, and only after I compelled them to bring me, for the first time, the full list, having it chronologically fixed up there in column form, showing the base pay annually, the 35-percent reduction reflected, and the certificate from the Administration Committee, it was not until I got that that I signed the pay vouchers for January.

When I did that, I was in effect uni-

laterally hiring that staff. No one in effect suggested it. If they are right, I was exceeding my authority then. I think if we had an objective venue, we could find the precedents and rules to support me. By indirection, I certainly would have the power the other way around. Certainly the other rules of the House that are pertinent in the case of insubordination, in the case of irresponsibility, and willful refusal to be accountable for public funds, why, there is no chairman in this House who would have acted differently under the same circumstances, and where we had a confabulation, where we had a confederation, and where we had a conspiracy to willfully protect a rotten chief counsel and staff director.

I will at this point yield back the balance of my time and appeal to my next special order.

LOBBY REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. RAILSBACK) is recognized for 5 minutes.

Mr. RAILSBACK. Mr. Speaker, this afternoon BOB KASTENMEIER and I are introducing a lobby reform bill similar to the measure which overwhelmingly passed the House in the closing days of the 94th Congress. Before discussing our legislation and the need to reform the existing lobby disclosure statute, I would like to take a moment to commend those who have worked so hard in this area.

First, BOB KASTENMEIER, my good friend and colleague, has been one of the main sponsors of the lobby bill for several years, and he provided the leadership and guidance which were largely responsible for our successes in the last Congress.

I would also like to express my special gratitude to the former chairman of the House Subcommittee on Administrative Law and Governmental Relations, Walter Flowers, and the other Judiciary subcommittee members who labored long and hard to report a fair and evenhanded disclosure measure last year. Thanks are also due to the members of the full Judiciary Committee and its distinguished chairman, Mr. RODINO, for important contributions to the bill, H.R. 15, as it was reported to the House floor.

I would also compliment the work of the Committee on Standards of Official Conduct and its distinguished chairman, JOHN FLYNT, whose substitute proposal presented the opportunity for full consideration of alternative disclosure policies. In addition, praise is due to the more than 150 House Members who have sponsored some form of lobby reform legislation; particularly, the freshmen in the 94th Congress who stood so solidly behind the concept of disclosure and accountability in the political arena. Last, I would like to extend my personal thanks to my colleagues in the other body, who introduced similar legislation, and to the many private individuals who have commented on my efforts. Their comments have been especially helpful to me as I have tried to redraft legislation in this Congress.

Mr. Speaker, 2 years ago BOB KASTENMEIER and I introduced H.R. 15, to replace the ineffective 1946 Lobby Disclosure Act. Hearings were held by a Judiciary subcommittee, the full Judiciary Committee, and the Committee on Standards of Official Conduct.

The bill was amended and reported to the House floor where it was debated along with the standards' substitute and numerous amendments. After lengthy debate, in the early hours of September 29, 1976, H.R. 15 passed the House by an overwhelming vote of 307 to 34. Unfortunately, largely due to the press of end-of-session business, H.R. 15 could not be resolved with the Senate's version before adjournment, and a law was not enacted. However, I am confident we will be successful this Congress.

If one theme dominated our deliberations, it was our determination that we not infringe on the citizen's constitutional right to petition his Government for redress of grievances, and must not overly burden any organization, large or small, having to comply with the requirements of the bill. Yet at the same time we sought to provide the public with another, equally important right—the right to know who is involved in seeking to influence legislative and executive decisions, what the issues are, and perhaps most importantly how much money and time are being spent for such efforts. We were not then, nor are we now, seeking to restrict lobbying—we only want to provide for accountability in an area that is too often closed to the public view. Such secrecy is inimicable to our system of government—it contributes greatly to the public notion that important decisions are made as a result of wining and dining and backroom deals. It also obscures the positive and informational role that the professional lobbyist plays, a role vital to the Government process, and which has often been helpful to me personally.

The bill I am introducing today differs in several respects from the original H.R. 15. Such differences are the result of a concerted effort to balance accountability with a fair, evenhanded approach to lobbying disclosure. For example, only organizations—not individuals—are covered. Further, a geographical exemption is provided when an organization is contacting its own Congressman and Senators. Such provisions, I believe, make clear my concern over any possible chilling effect and my intent not to create any device that would appear to discourage communications.

In addition, the bill sets new standards of applicability. An organization must file reports if it either retains an individual for $1,250 or more in a quarter or hires an individual who spends 30 hours or more for lobbying communications or solicitations.

The legislation also takes into account the burdensomeness of reporting requirements. In my opinion, we are requiring only the essential information, and even give the Comptroller General discretion in waiving some of the requirements in certain cases.

Finally, a contribution category instead of specific dollar figures is a much better requirement that addresses itself to the privacy question that was raised last year.

In sum, it is my hope that this legislation will provide the public with the information it should know, without burdening those organizations which engage in lobbying activities.

I am very pleased and encouraged that the subcommittee chaired by my distinguished colleague Mr. DANIELSON will begin hearings on lobby reform legislation next week. At that time, I hope to expand on my comments, and will urge that the bill BOB KASTENMEIER and I are now sponsoring will be taken into consideration.

Thank you, Mr. Speaker.

MORE EDITORIAL SUPPORT FOR CONGRESSIONAL PAY RAISE DEFERRAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 5 minutes.

Mr. WHALEN. Mr. Speaker, yesterday I placed in the RECORD a fairly lengthy statement reviewing my proposal that no increase in congressional salary should go into effect until the Congress following the one in which it is approved.

In that statement I mentioned that the Congressional Pay Raise Deferral Act, H.R. 1365, has received considerable support from editorialists in the news media. Today, I wish to elaborate on that point.

At the conclusion of my remarks here, I would like to insert in the RECORD the text of three editorials. They are from the Minneapolis Tribune, the Akron Beacon Journal, and KSL–TV in Salt Lake City.

In previous statements in the CONGRESSIONAL RECORD. I have noted editorials supporting H.R. 1365 that were issued by news media outlets in Dayton, Ohio; Omaha, Nebr.; Roanoke, Va.; Seattle, Wash.; Albany, N.Y.; Toledo, Ohio; Richmond, Va.; and Bakersfield, Calif. Of course, there have been additional editorials that I have not cited.

The articles follow:

[From the Minneapolis Tribune, Feb. 28, 1977]

EDITORIAL

Members of Congress just got themselves a healthy pay raise by doing nothing. Now there is something they should do—see to it that their pay increases aren't handled that way in the future.

Raises through inaction are a product of a 1967 law setting up an advisory commission to recommend federal—including congressional—salary increases. Congress can accept, reject, raise or lower the recommendations. Or, if the president endorses the commission's proposal. Congress can do nothing—and the raises take effect in 30 days.

The last option has obvious advantages for members of Congress. They can get more money without having to take the political risks of voting raises for themselves. This year's performance was a typical result: Congressional leaders blocked efforts to bring the

salary issue up for a vote; most members simply waited for the paychecks to go up.

There is a better way, one proposed by Rep. Charles Whalen, R-Ohio, and a bipartisan group of 73 other House members. Their plan would retain the advisory commission to make recommendations, but would require Congress to vote on them. And any raises would not take effect until after the next congressional election. That's like the system about 30 states, including Minnesota, use for setting legislative salaries; a raise voted one session doesn't take effect until the next.

The Whalen proposal would force members of Congress to make a public case for higher salaries, and to take a public stand on them. That's better than letting Congress get something by doing nothing.

[From the Akron Beacon Journal, Feb. 18, 1977]

CONGRESS SHOULD END ITS SNEAKY PAY RAISES

Whether or not congressmen deserve the fat pay raise they voted themselves by their silence is a subject that could be debated from now until the end of the century. But there should be quick agreement that the under-the-table way in which such raises are handled must be changed.

Beginning Sunday, congressmen will receive an increase of $1,075 in their monthly pay—simply because they didn't vote not to increase their salaries.

Legislators at all levels dislike having to vote on pay increases for themselves. They know the question in the minds of all their constituents is: Is he worth what he's getting now? Some legislators don't even like to ask that of themselves.

But only our federal legislators have shown such a complete lack of intestinal fortitude as to bypass the process altogether. A commission recommends salary increases every four years—and those increases take effect automatically after 30 days unless the Congress votes *not* to accept them.

So congressmen will receive their 29 percent increases at the start of next week because they sat on their hands.

Even if the raises are deserved—which they may well be—the method of granting them must become open and above board. "The thing that leaves a bad taste," said Rep. Ralph Regula (R-Navarre), "is the way it's being handled."

Rep. Donald Pease (D-Oberlin), points out that under Ohio law a state legislator cannot receive the benefits of a voted pay increase until after he has stood for reelection.

The same basic idea is contained in a bill offered by Rep. Charles Whalen (R-but-leaning-toward-D-Dayton). The bill, cosponsored by Regula, Pease and J. William Stanton (R-Painesville), would delay raises from taking effect until after a general election.

That would allow voters the opportunity to decide whether a legislator who just voted himself a fat raise is going to receive it. Even more important than providing a potential campaign issue for challengers, though, is that a vote would put each individual congressman on record in favor of or opposed to a raise.

It would be a good idea to separate proposals for congressional raises from those for increases in judicial and executive branch salaries. Political pressure would be greatly reduced for congressmen voting to increase *somebody else's* salary; other top-level officials should neither be punished nor rewarded by being thrown into the same barrel with congressmen.

Although much of the 50 percent inflation over the past eight years can properly be laid at the door of the Congress, we can sympathize with anyone who has only received a five percent pay increase in that time.

So the congressmen may deserve this raise. But this should be the last one until they show enough backbone to change the system of granting salary increases.

[From KSL Television, Salt Lake City, Utah, Mar. 2, 1977]

Subject: Congressional pay raises.

Spokesman: L. H. Curtis, President, KSL, Inc.

We've talked here before about the Congressional pay raise. Sure enough, it became law last Monday as KSL said it would without Congress having to vote on it. This was done by the devious little parliamentary device we described a couple of weeks back.

Congressman Charles Whalen of Ohio has introduced a bill that speaks to this concern. It's called the Congressional Pay Raise Deferral Act and it would defer all pay raises for Congress to the session following the one in which they are approved. In other words, a member of Congress would have to face the voters on the issue before getting the pay raise.

Of course, this is not a new idea. Municipalities and state governments, which are closer to the people and feel the heat more quickly, have adopted this procedure in many cases. Congress should do no less.

But Congress should do more. It should require that no matters involving pay for Congress and the Executive could come into being by such trickery as what took place last week. The vote of each member of Congress should be on record on the issue so that the voters know where they stand. Without some such amendment, Congressman Whalen's bill won't improve matters much.

KSL hopes one of Utah's Congressmen will offer such an amendment.

HUMAN RIGHTS OF UKRAINIANS TO RESURRECT THEIR ORTHODOX AND CATHOLIC CHURCHES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 5 minutes.

Mr. FLOOD. Mr. Speaker, I believe the President has warmed the heart of every morally conscious American with his firm commitment to human rights in our foreign policy. In line with this truly great commitment, several of my colleagues and I have submitted House Concurrent Resolution 165, seeking the concrete resurrection of the Ukrainian Orthodox and Catholic Churches in Ukraine. We anticipate that as the prime significance and meaning of this resolution take hold in our country and abroad, countless groups and individuals will support us in this basic effort.

Why? In the whole record of deprivation of human rights there are no comparable cases on the scale of national import than this Stalinist liquidation of the two major religious institutions of Ukraine. Yes, there is religious persecution in the U.S.S.R. and elsewhere, but these are outstanding cases of religious genocide. Those who are persecuted are at least still in being; the Ukrainian Orthodox and Catholic Churches were completely wiped out under Stalin. This distinguished fact should be of concern to every human being with a moral conscience, and we intend to arouse this conscience in institutional as well as personal quarters. Certainly, this unique case must become high on our agenda for the Belgrade Conference this June.

For our leadership and citizens, I submit for publication the resolution and its cosponsors. Also, I append to these remarks essential excerpts from the article written by Dr. Lev E. Dobriansky of Georgetown University on "Imperialism, Religious Persecution and Genocide," in the Ukrainian Quarterly:

COSPONSORS

Mr. Annunzio, Mr. Burke of Massachusetts, Mr. Delaney, Mr. Derwinski, Mr. Dodd, Mr. Giaimo, Mr. Koch, Mr. Moakley, Mr. Patten, Mr. Sarasin, Mr. Stratton, Mr. Walsh, and Mr. Wydler.

H. CON. RES. 165—TO SEEK THE RESURRECTION OF THE UKRAINIAN ORTHODOX AND CATHOLIC CHURCHES IN UKRAINE

Whereas the Charter of the United Nations, as well as its Declaration of Human Rights, sets forth the objective of international cooperation "in promoting and encouraging respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language, or religion . . ."; and

Whereas in the Constitution of the Union of Soviet Socialist Republics article 124 unequivocally provides that "In order to insure to citizens freedom of conscience, freedom of religious worship, and freedom of anti-religious propaganda is recognized for all citizens"; and

Whereas not just religious or civil repression but the genocide—the absolute physical extermination—of both the Ukrainian Orthodox and Catholic Churches in a nation of over forty-five million brutally violates the basic civilized rights enunciated above: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that the President of the United States of America shall take immediate and determined steps to—

(1) call upon the Government of the Union of Soviet Socialist Republics to permit the concrete resurrection of both the Ukrainian Orthodox and Catholic Churches in the largest non-Russian nation both within the Union of Soviet Socialist Republics and in Eastern Europe; and

(2) utilize formal and informal contacts with Union of Soviet Socialist Republics officials in an effort to secure the freedom of religious worship in places of both churches that their own constitution provides for; and

(3) raise in the General Assembly of the United Nations the issue of Stalin's liquidation of the two churches and its perpetuated effect on the posture of the Union of Soviet Socialist Republics in the light of the United Nations Charter and the Declaration of Human Rights.

IMPERIALISM, RELIGIOUS PERSECUTION, AND GENOCIDE

(By Lev E. Dobriansky)

In our Bicentennial year the only high-level official in our government who defined the nature of the enemy threatening our continued independence as a nation has been Vice President Nelson Rockefeller. In a speech in West Germany he explicitly stated, "The era of old world imperialism has gone, and yet we find ourselves faced with a new and far more complex form of imperialism, a mixture of Czarism and Marxism with colonial appendages."[1] When queried on

[1] *The Washington Star*, May 16, 1976.

this, he added, "I was just telling it like it is." Actually, as pointed out by this writer, "there is nothing new about traditional Russian imperialism, whether Czarist or Marxist, and its projections into Asia, the Mideast and the New World have able precedents in the past."[2] Indeed, excellent precedents and continuities can be established in numerous spheres of societal existence, be it economic, political, social or religious. Stripped of different actors, semantics and ideologies, the basic force of Russian imperialism reveals the same substantial trends, characteristics, and symptoms whether the period was pre-Soviet or now. Intensity, scope, degree and encompassment might differ, but the substantial form is there. And perhaps nowhere is this truth as crystal clear as in the area of religious persecution and genocide, particularly in the cases of the Ukrainian Orthodox and Catholic Churches. * * *

It cannot be too greatly stressed that regarding their exclusive and special status in the area of religious persecution, the Ukrainian Catholic Church and the Ukrainian Orthodox Church have been objects of Soviet Russian genocide. Both Churches are not in actual institutional being today within the Soviet Union. Except for the Byelorussian Orthodox Church, this paramount fact of religious genocide separates the two from most other cases of religious persecution in the USSR.[4] * * *

To understand with vivid feeling the genocide perpetrated on the two Churches in our times, it is essential to have at least a perspectival historical background on the subject, but a holistic one that endeavors to see basically related phenomena in toto and not one of mere chronological sequence. The chief trends of religious, national development in Ukraine from 988 A.D. to the present even lend themselves to neat, coherent diagramatization, as will be provided shortly to save our sight of the forest for the individual factual trees. With a holistic bias, the impact of empires and ideologies on these trends is striking and should be appropriately noted to explain current realities. It is interesting to observe that an atheistic government affects all religious forms adversely, but not in proportionate ways—genocide for some, encouraged use of others. Why? * * *

Regardless of one's primary discipline, whether it be that of an historian, a political scientist, an economist and so forth, to effectively study the structure and behavior of the previous Czarist Russian Empire and, more so, those of the present empire-state, the USSR, necessitates the integrative, holistic approach. If the present imperial state known as the Soviet Union is totalitarian, which indeed it is, then all parts of its behavior and policy must be viewed in the end totalistically or, in effect, holistically. As a pertinent example, no religious body or institution could exist on the surface and in the open in this imperial state with a denial of access to economic resources and facilities. This monopoly of economic power is interlaced with a monopoly of political power, and all are legalistically legitimized against an explicative background of historical causation * * *

With a holistic awareness of the current religious situation in the Soviet Union, the very first cardinal point that needs reiteration is that both the Ukrainian Catholic Church and the Ukrainian Orthodox Church fit into an exclusive sphere for inquiry and action. No doubt, in the Russian Orthodox Church, the Georgian Orthodox Church, the Roman Catholics, Calvinists, Jews, Moslems and others.[5] But the crucial point of distinction for any inquiry, legislation and action is that all of these so persecuted are nevertheless in being institutionally. In sharp contrast, the Ukrainian Catholic and Orthodox Churches are not in being; they have been obliterated by the State. It is, therefore, not only a matter of persecution of individuals but also a clear case of genocide of institutional bodies that serve over time to conserve the spiritual resources of a given people and nation.[6]

Associated with this crucial point is the further consideration in dealing with religious persecution in the Soviet Union that, on the basis of the principle of proportionality, any thought and action in this area be proportional to the object itself, to the reality of the peculiar situation. The two traditional Ukrainian Churches are what can properly be called the expressions of the spiritual soul of a nation. Their institutional liquidation subjects this soul to virtual extinction. And, to repeat the chief contextual point, we are dealing here with a nation that is the largest non-Russian nation not only in the Soviet Union but also in Eastern Europe and, as a consequence, is of special interest to Moscow as indeed it should be to us.

At the recent Congressional hearing on this subject, a thoughtful legislator asked whether for action purposes it is possible to separate the religious strand from the political and ideological so to disallow any pretext for Moscow to predicate its reaction on the latter. The answer to this tactical question is yes. The separation is really one of the operational from the analytic. However, though this may be necessary, the motivation, conviction and passion that would guarantee maximum operation would be of little ingredient value without the breadth and depth of understanding and ordered knowledge provided by the analytic. Thus, as an example, a move is under way to refer this issue to the newly-created Commission on European Security and Cooperation, which aims to monitor Moscow's observance this past year of the Helsinki Accord.[7]

It was the result of my own testimony several years ago before a Congressional committee that I learned the need for such a schema whenever this subject is examined.[8] So, quickly and concisely, with reference to the diagram, Christianity was accepted in the Ukrainian area as early as 988 A.D. Its point of origin was Byzantium. There wasn't any real division then between Rome and Constantinople and, as a consequence diagrammatically, one sees a continuous development of the Christian churches. However, the next significant date in the structural outline is 1054, when the real division occurred and separated Ukrainian Christian institutions from Rome. They developed as independent religious organizations in close union with the Patriarch of Constantinople for at least five centuries. Which brings us to the third very important turning point and date here, specifically, 1596.

Significant as an explanatory note for the division of the Ukrainian Christian Church, in that year a conference of bishops both from Ukraine and Byelorussia made union with the Roman Catholic Church at the Conference of Brest whereby they accepted the leadership of the Pope but retained all rights and customs of the Eastern Church. Not all Ukrainians followed in this course, and the beginning of the two-tiered Ukrainian religious development occurred. On one tier is the development of the Ukrainian Catholic Church, while on the other, representing the majority of the Ukrainian faithful, is the Ukrainian Orthodox Church. This short but substantial description goes a long way in clarifying for contemporary listeners the historical source of the two genocided Churches down to present times.

But even more clarifying for present understanding is the positing of this two-tiered religious development in a subsequent centuries-long historical context marked chiefly by the imprints of empire and ideology. In this determining respect we find a most curious historical phenomenon bearing on imperial inclinations of enlightened self-interest and genocidal absorption as concern the two Churches. By the 18th and 19th centuries the fruitful development of the two Churches is differently affected by the impacts of empire and ideology. With reference to the Orthodox tier and in relatively minor part the Catholic one, the steady expansion of the Czarist Russian Empire and also its ideology of a Third Rome—namely, Moscow being the third Rome and no fourth thereafter—had their adverse impacts in the harassment and eventual curtailment of both the Ukrainian Orthodox Church and part of the Catholic within that empire. Subordination to the Russian Orthodox Church and systematic absorption were the prominent marks of the genocidal Russification policies of the previous Czars, in substance not unlike those under Stalin in more recent decades.

Paradoxically enough, with the evolution of the Austro-Hungarian Empire, in which part of the Ukrainian territory happened to be situated right down to 1918, an enlightened but self-interested dynasty offered encouragement to Ukrainian Catholicism. To emphasize the contrast on the two-tiered analysis basis, in the context of the Austro-Hungarian Empire, the Ukrainian Catholic Church was furthered in a favorable way against the expansionist Russian Empire. On the other hand, the latter with its well-known Russification policies brought about the systematic subordination and literal liquidation of the Ukrainian Orthodox Church and Catholic parishes in the empire.

In our structured schema, the next important date is, of course, 1917, with the disintegration of the Czarist Russian Empire. A long-sought opportunity was historically presented for the open expression of the suppressed desires and aspirations of the Ukrainian people subjugated in that empire. With the declaration of Ukrainian national independence and the establishment of the Ukrainian National Republic in the ensuing period the easy continuation of Ukrainian Catholic development was assured. But with this historic event the other tier saw the resurrection of Ukrainian Orthodox development in full bloom. By 1921, at an all-Ukrainian Orthodox meeting of bishops and others in Kiev, the independent Ukrainian Orthodox Church was reestablished. Even in this period of what was called Soviet Ukraine, prior to its forcible incorporation into what became a new empire under the name of the USSR, and also for a good part of the 20's, when the Ukrainianization program prevailed in the area, the independent Ukrainian Orthodox Church flowered.

However, this was not to be an institutional continuum as observed on the other tier of Ukrainian Catholic development. For

by the end of the 20's and going into the 30's, Moscow's assault against the Ukrainian Orthodox Church was in full swing. This chapter of religious genocide has to be emphatically noted because it presaged the equal tragedy that was to befall the Ukrainian Catholic Church a decade later when, as a result of World War II, this primary empire extended itself west. As before under the old Czars, it was executed in connection with Stalin's Russification policy which negated the Ukrainianization movement and all forces sublimating the national substance and nationalism not only in Moscow's Ukrainian colony but elsewhere in this new Soviet Russian Empire.[10]

To all intents and purposes, the assault the Ukrainian Autocephalic Orthodox Church succeeded by the mid-30's. The Church was abolished, its archbishops and bishops were eliminated, some 20,000 priests, deacons and others were liquidated, and over 3,000 parishes wer disbanded. In effect, the Ukrainian Orthodox faithful were coerced into the Russian Orthodox Church, following a policy with clear historical antecedents. * * *

Scarcely surprising, as the war progressed and Moscow's armed forces advanced toward Berlin, the assault against the Church was intensified. The high point was reached in April, 1945, when the NKVD arrested Slipyj. two bishops and others and, significantly, sought their renunciation of the Union of Brest. Their valiant refusal led to incarceration, and Slipyj himself spent 17 years in Soviet Russian concentration camps. The genocide of the Ukrainian Catholic Church proceeded rapidly with deportations, property confiscation and coercion, and was legalistically capped in 1946 when Moscow, in characteristic Russian potemkin fashion, inspired a spurious synod in Lviv to abrogate the Union of Brest and to proclaim the reunion of the Ukrainian Catholic Church with the Russian Orthodox Church, as though it were ever a part of it.[11] We see here a striking analogy to the equally specious political reunion in the Pereyaslav treaty celebrated in the Soviet Union eight years hence.

THE PRESENT SITUATION

All of these essentials in our schema, including the long arms of history, have shaped the present situation of the Ukrainian Orthodox and Catholic Churches in Ukraine—non-institutions. In addition to the long-run forces already cited, it should also be noted how the regime, as in past times under the old Czars and the sway of the Petrine doctrine, made use of the Russian Orthodox Church as a medium for the obliteration and genocide of these two major Ukrainian religious institutions. The atheistic State has consistently assisted the Moscow Patriarchate by arresting and sentencing recalcitrant clergy for refusing to join the Russian Church. For its own political design it has given the force of law to the spurious reunion of 1946, and has applied it with prosecutions of supposedly illegal Ukrainian clergy and laity who have petitioned authorities for the registration of local congregations.[12] What is construed as law here has as much legitimacy and validity in moral and objective value as the totalitarian, imperialistic regime itself. The facade is thoroughly transparent, but many petitioners suffer from it.

Estimated at about 13% of the population in faithful and loyal membership, or some 7 million, the Ukrainian Catholic Church exists today only in the hearts and minds of individual persons who at great risk congregate in an extensive religious underground. Cumulative evidence indicates without question of doubt that the Catacombs do exist. For these "illegal" Ukrainian Catholics there is one bishop, some 300 clergy and monastics who combine their religious work in a surreptitious, underground manner with their normal secular vocations. Moreover, "the Silent Church," as it is known, is a constant object of attack by the Moscow propaganda machine. Its members are decried as "agents of the Pope," "bourgeois Ukrainian nationalist subversives," and also as "lackeys of American imperialism." The organs of Moscow and Kiev play these tunes regularly.[13] The plain fact is that they are Catholic, anti-Communist Ukrainian patriots whose religious values underly their political and societal values * * *.

IN THE NAME OF HUMAN RIGHTS

Thus, in the name of human rights, what can be done about this current situation? As stressed at the very beginning, the possibilities for concerted world-wide action on this prime genocidal case of human rights are immense. First, a careful distinction must be drawn between religious persecution in the USSR in general, which must be fought, and the religious genocide of the Ukrainian Catholic and Orthodox Churches in particular, which must be concentrated on by rule of logical proportionality. Much more time, resource and concern are devoted to larger crimes than smaller ones. This was the main reason for having a separate Genocide Convention from a Human Rights Declaration.

Second, the legal and procedural bases for the pursuit of this vital distinction are several. As with all forms of religious persecution in the USSR, the prominent case of the Ukrainian Catholic and Orthodox Churches stands in marked contradiction to the USSR constitution and its article 124 providing freedom of religious worship; it stands in crass violation of the U.N. Charter and Declaration of Human Rights, to which Moscow is a signatory; and it stands in equal violation of the Helsinki Accord, to which Moscow is also a signatory. The avenues of pressure on these bases should be obvious. But in singular contrast to all other forms of persecution, the case of the two Churches falls also under the Genocide Convention, which Moscow has ratified. Although, regrettably, the United States has failed up to now to ratify this vital treaty, there is no reason for another democracy subscribing to it not to raise the issue.[14]

Finally, on the procedural plane there is H. Con. Res. 205, now pending in Congress and with proportional weight addressing itself to this special case. It calls upon the government of the USSR to permit the concrete resurrection of both Churches; it urges informal and even formal contacts with USSR officials to secure this in accordance with their own constitution; and it seeks our own representative in the U.N. to raise in the General Assembly this issue of Stalin's liquidation of the two Churches. De-Stalinization in the USSR has affected many areas, but this one area has been overlooked.

In conclusion, what remains is a world-wide religious activism centering on this special case of religious genocide and all forms of religious persecution in the USSR. A move is on in the U.S. Congress for this.[15] It was a natural for the I.E.C. to adopt. As an ecumenical response to the desperate appeal last year to the Pope by the imprisoned Ukrainian Orthodox priest, Vasyl Romaniuk, it should stand high in the actions of the Vatican.[16] Moreover, it should be posed to the World Council of Churches, on which sits the questionable Boris Nikodim, suspected of being a KGB agent.[17] One spark of religious leadership is all that is needed, and a ground-swell of international proportion, involving all believers in fundamental human rights, would be in the offing.

PROPOSED TAX FOR CURRENTLY TAX-EXEMPT ORGANIZATIONS WISHING TO INVEST IN FARMLAND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

Mr. BEDELL. Mr. Speaker, I am today introducing a bill which would help to protect independent farmers from seeing the costs of farmland skyrocket out of sight. A while ago, the Continental Illinois Bank and Merrill Lynch wanted to establish a $50 million pool which would then be invested in the prime farmland of a number of States.

The implications of such a project involve such things as the effects of outside investment on the farm economy and rural communities, the possibility of land prices and assessments in an area being driven up, competition for available farmland with local farmers, and the viability of the family farm.

The project, called the Ag Land Fund I, was especially attractive to Continental Illinois because they proposed to allow employee pension and profit-sharing plans, which are tax exempt, to participate in the project. Mr. Speaker, our purpose should not be to foster the moneymaking schemes of such investment funds. Just the opposite; we should be trying to ease the existing pressures on those people who wish to become or remain truly independent farmers.

To that end, my bill would require that income derived by tax-exempt organizations from investments in farmland and farming operations be considered as "unrelated business taxable income." This would mean that such income would be taxed at the existing corporate rates.

I feel that this would give our family farmers some measure of protection against the sort of project that could put them out of business.

Under my plan, certain charitable and educational organizations would be exempt from this tax if they used the farmland for their charitable or educational purpose. But, other than that, it would be impossible for anyone to invest in a project similar to Continental's Ag

Land Fund and receive special tax advantages.

Continental Illinois Bank clearly stated in their testimony before the House Agriculture Committee that they would not be interested in the Ag Land Fund project if it were not for the tax advantage they hoped to gain. My bill would remove these tax advantages to compete unfairly with the family farm and even further escalate the price of farmland.

UPDATE ON ZAIRE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. BONKER) is recognized for 5 minutes.

Mr. BONKER. Mr. Speaker, I am not satisfied that the vital interest has yet been stated which justifies American support of one particular side over another in a military conflict far off in Zaire. Although here is little dispute that our access to Zaire has strategic and economic importance, the real question is whether it has enough to excuse propping up a dictatorial, unresponsive, corrupt, even brutal regime. Maybe the alternative is worse; but with the present situation arguably beyond the pale as it is, such a rationale rings hollow. In any case, it is not clear that President Mobutu is particularly pro-American, nor that a new regime would necessarily be anti-American. Mobutu in recent years has thrown out a U.S. Ambassador and loudly accused us of meddling; President Neto next door, though Marxist, is eager to negotiate a modus vivendi with Gulf and Boeing.

Our track record of foreign involvement is so checkered, one is indeed tempted to let the chips fall where they may. Given our experience in Vietnam and Cambodia, we ought to be wondering not only whether we are serving a bad cause, but, as a practical matter, whether it is a losing one. If Mobutu lacks popular support, how much money will it take to keep him in power down the road? The reports of corruption and incompetence in the bureaucracy and army should not give us any illusions about the effectiveness of throwing money at the problem.

I am particularly concerned that the exposure of U.S. banks is considered cause for spilling blood. Creditors charge part of their interest precisely for the risk they accept in making loans. I would sooner compensate them directly for their losses than go to the length of supporting Mobutu and a war situation for their indirect benefit—and in the process deprive some of our fellow human beings in Zaire of liberty, economic welfare, and even life.

Some make a last-ditch case for supporting Zaire because we always have, that to do otherwise would seem abandonment of a friend and lack of all-important resolve. But is Mobutu really a friend? And cannot we demonstrate resolve just as well by facing up to our mistakes? At worst, it might demonstrate intelligence. At some point it is best to admit changed circumstances and perceptions. Would it really look better to continue to define Mobutu's survival as a vital interest and send him aid to the bitter end though he finally falls of his own weight? There would only be recriminations from both victor and vanquished; and we would have advertised our failure.

Fortunately, there are at least a couple of silver linings in the situation. One is that the fates of Shaba Province have bestowed the heaviest rains in 18 years, literally to put a damper on the actual fighting. This is not to mention that in many instances the Katangan force seems to be greeted by the local population more as a homecoming than an invasion; or that the troops Mobutu has dispatched are not gaining renown for inspired combat. Taken together, this should buy some time for mediation.

And this is the second blessing, that Nigeria is willing to make an initiative. Andy Young's early effort to treat Africa with gravity and goodwill is already paying off. Nevertheless, it is not entirely the case that General Obasanjo is lending his good offices out of friendship for the United States or even general altruism. In fact, he is concerned with a flareup in such a rich area invites superpower involvement and competition. Nigeria proudly considers itself nonalined and the regional power to reckon with. In addition, a precedent for secession would not sit well in a country not so long ago torn apart itself by the Biafran civil war. The OAU as well has traditionally endorsed the principle of territorial integrity. Though the boundaries of African nations are largely the product of arbitrary European decisions, now that they exist a lot of oxes stand to be gored. If the conflict is really one propelled by outsiders—that is, Angolans and Cubans—international diplomacy can offer substantial leverage. If the Katangan gendarmes turn out to be beyond its control, the image would be reinforced that we are dealing with an internal and historic sort of conflict.

Sounding off about human rights has certainly become fashionable, if not particularly productive. I do not advocate, however, that the United States judge other sovereign nations gratuitously or strictly by our own standards. To developing countries especially, faced with the awesome task of nation-building, parliamentary forms originally tailored to Western industrialized countries may be quite a luxury. Though there is a consensus in this country that the system we have is in its essence right for us, it is not obvious that the model is transferable to all other times and places. We are ourselves, after all, fairly imperfect; and in our own fledgling years we were even more so.

But I do believe that in underwriting a foreign aid program we reserve some limited right to determine if governments of recipient countries comport with the ideal on which the program is promised; namely, establishing a world of security based on liberty and justice. We need not destabilize offending regimes; but neither need we be their accomplice.

PUBLIC DISCLOSURE OF LOBBYING ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 10 minutes.

Mr. KASTENMEIER. Mr. Speaker, the 94th Congress adjourned last year without concluding its work on one of the more important reform issues, lobbying disclosure. Although both Houses of the Congress overwhelmingly passed legislation requiring greater disclosure on the part of those organizations that lobby the Congress and the executive branch, time ran out before the differences between the House and Senate versions could be resolved.

The long deliberations on lobbying disclosure legislation in the previous Congress emphasized what had been known for a long time, that the present lobbying law, enacted in 1946, is ineffective and unenforceable. It is imperative that we pass a new disclosure law, and, today, I am joining Congressman TOM RAILSBACK in introducing the Public Disclosure of Lobbying Act of 1977. This measure is similar, in many respects to H.R. 15 which passed the House in the early hours of September 29, 1976.

This new legislation requires that any organization which: First, makes expenditures in excess of $1,250 in any quarterly filing period to retain another person to make a lobbying communication or solicitation; or second, employs at least one individual who spends 30 or more hours in any quarterly filing period or employs two or more individuals, each of whom spends 15 or more hours in any such period, making lobbying communications or solicitations, to influence the content or disposition of legislation, rulemaking, rule or the awarding of a Government contract involving $1 million or more, to register with the Comptroller General not later than 15 days after engaging in such activities.

Any organization which meets these threshold provisions must inform the Comptroller General of the general description of the methods by which it arrived at its position with respect to any issue, the identification of any person it employs or retains to lobby and an identification of each organization or individual from which it received $3,000 or more which was expended in whole or in part for lobbying activities. The amount of income provided by such an organization or individual need not be stated in exact amounts but can be stated in categories of value system. The Comptroller General is given authority to waive this requirement if such contributions are equal to less than 5 percent of the organization's total annual expenditures and if such organization demonstrated that disclosure of such contributions would violate the privacy of the contributor's religious beliefs or lead to the possible harassment of the contributor.

Thirty days following the close of each quarterly filing period, each lobbying organization must file a report with the Comptroller General concerning its

lobbying activities in that period. Each organization must disclose the total expenditures associated with its lobbying activities. Each expenditure in excess of $35 made to any Federal officer or employee must be reported and such officer or employee identified. The organization is required to disclose the cost of any reception or dinner for Federal officers or employees if the total cost exceeds $500. Any person hired or retained by the reporting organization must be identified along with each issue with which such person was involved. The total expenditures made pursuant to such employment or retention must also be disclosed. In addition, any chief executive officer or principal operating officer of any organization who engages in lobbying activities shall be identified and, if such officer spends more than 15 hours on lobbying communications or solicitations, regardless of whether such officer was compensated or not, the organization shall identify each issue with which that officer was involved. Lastly, a description is required of any solicitation made or paid by such organization along with the subject matter where such solicitation reached or could be reasonably expected to reach, in identical or similar form, 500 or more persons, or 25 or more officers or directors, 100 or more employees or 12 or more affiliates of such organization. This requirement may be satisfied, with respect to a written solicitation, at the discretion of the reporting organization by filing a copy of such solicitation.

The Comptroller General will publish such information contained in the quarterly filing period in the Federal Register. However, the Comptroller General is given authority to withhold from public disclosure, upon petition by any person, any information required to be disclosed to the public upon a showing that such disclosure may reasonably be expected to lead to the harassment of any person, or lead to threats or reprisals against any person.

I want to emphasize that this legislation does not interfere with the constitutional rights of any citizen to communicate his views to Government officials. In fact, the legislation specifically excludes from its coverage any individual who acts solely on his own behalf for a redress of personal grievances or to express personal opinions. Further, this measure, in no way, restricts lobbying activities by an organization with the Federal Government. I do not believe that compliance with the requirements of this legislation is burdensome. Actually, the reporting requirements are much more simplified than those contained in last year's bill.

Mr. Speaker, we all know that lobbyists do represent special interests, and it is well for the public to know that such types of interests are being represented in dealings with the Federal Government. Full disclosure of lobbying activities will benefit the public by enabling them to better understand the nature of special interest pressures, and they will be better equipped to hold public officials accountable for their response to these pressures. In addition, public officials also will gain by lobbying reform since they will, with public disclosure, find it easier to evaluate lobbying pressures and put them in a better perspective.

Mr. Speaker, I am pleased to note that our colleague, Congressman GEORGE DANIELSON, chairman of the House Judiciary Subcommittee on Administrative Law and Governmental Relations, has announced the start of subcommittee hearings on lobbying disclosure legislation beginning on April 4. Such expeditious consideration of the lobbying issue guarantees that this Congress will succeed in passing urgently needed lobbying reform legislation.

PERSONAL STATEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BRADEMAS) is recognized for 5 minutes.

Mr. BRADEMAS. Mr. Speaker, I insert in the RECORD at this point a statement regarding a recorded vote I missed on Tuesday, March 29, 1977, and an indication of how I would have voted had I been present. I was attending a concert in Detroit, Mich., in tribute to the memory of our late colleague, Senator Phillip A. Hart. The vote was on rollcall No. 107, a vote on final passage of H.R. 5045, the Reorganization Act of 1977. The bill passed 395 to 22. I was paired for this bill, and had I been present, would have voted in favor of it.

HENRY B. GONZALEZ

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. KRUEGER) is recognized for 5 minutes.

Mr. KRUEGER. Mr. Speaker, now that the House has determined to establish a committee to pursue its investigation into the assassinations of John Kennedy and Martin Luther King, I rise to make some observations.

First, my friend and colleague, HENRY B. GONZALEZ, has emerged with his dignity and judgment confirmed. Those of us who have known HENRY GONZALEZ well, over some years, know that he is a man with a high sense of personal honor. He could not, in fairness to his respect for the House of Representatives, take lightly the arrogant and unbecoming behavior of a staff member who defied his authority as the duly-appointed chairman of the committee, and who sought to defy the proper processes of Government.

There is no question that if Mr. Sprague had continued to be the committee counsel, when today's vote came the House would not have extended the life of the committee. I regret that Mr. Sprague's departure did not come earlier for, if it had, HENRY GONZALEZ would probably not have resigned, and would be in his rightful place: chairman of a committee that he worked so hard to see established. He was in the forefront in his concern for this issue, and stood almost alone among Members of the House several years ago by his interest in establishing a committee to investigate the assassination of President Kennedy. Then, as so often, Mr. GONZALEZ showed himself to be a person of independent judgment and strong constitution. Few men in this House are as well loved by their constituents as HENRY GONZALEZ, and he has won the respect of the people whom he represents by his courage, his keen intelligence, and his independent bearing. If he has been assertive, as some have called him, he has been so in pursuit of matters close to the concerns of his constituents and his country. A pioneer in the civil rights movement, a man who has been consistently willing to champion unpopular causes when he thought they were right, he maintains, as before, his strong and courageous nature and his shrewd judgment. In assessing the character of the chief counsel of the Assassinations Committee, his judgment has, I believe, been confirmed by the House, for it voted to proceed with the Assassinations Committee only after Mr. Sprague's resignation.

Like many others, I could support the Assassinations Committee only after the resignation of Mr. Sprague. I commend my colleague from Texas, Mr. HIGHTOWER, for receiving confirmation from the gentleman from Ohio (Mr. STOKES) that all connection between the committee and Mr. Sprague has now ended. That is good news, and we must hope that the committee can now proceed in its investigation with judicious assessment of the evidence.

I have myself been at various times undecided about how to vote on whether or not to continue the committee. If Mr. Sprague had continued, I definitely would not have supported the committee's continuance. With his resignation, however, I could look again at the original question: whether or not anything is to be gained by the House of Representatives' investigating the assassinations of two of America's foremost leaders. And information given to me by members of the Special Committee on Assassinations convinces me that questions that are both important and answerable have not been answered because there was no forum for such an investigation. The Justice Department could not effectively undertake it because many of the questions surrounding earlier investigations of both assassinations concern whether or not agencies within the executive branch deserve the full confidence of the American people for their roles in those investigations. If charges, for example, that our intelligence agencies had information they did not reveal to the Warren Commission are ever to be removed, they cannot be removed by asking the Justice Department to investigate itself. Further, no grand jury is likely to have the funds and reach necessary to investigate all of these leads. Therefore, it is appropriate that the only body of Government to which all Members are elected, and none appointed, that is, the House of Representatives, should represent the people themselves in conducting this investigation.

I learned only today that one individual who had been asked to testify before the committee with regard to the Kennedy assassination has evidently committed suicide on being asked to testify. In addition, I learned from a member of the committee that James Earl Ray, convicted of the murder of Dr. King, indicated today that for the first time he is now prepared to take a lie detector test in responding to questions.

At one point, it seemed to me that further investigation by the committee could not come up with any leads and could not set old doubts to rest. I no longer believe that. I believe that there is both enough evidence of new information, and that there are enough serious questions about the past investigations conducted into the murders of President Kennedy and Dr. King to warrant the continuation of investigations for which, more than anyone else, HENRY B. GONZALEZ had the foresight to recognize the need. I intend no offense to those who are now charged with conducting the investigation when I say that I wish my colleague HENRY B. GONZALEZ were the person to chair the committee.

Because HENRY GONZALEZ is a man of great determination, and has presented to the House the story of his dealings with Mr. Sprague, we have now had Mr. Sprague's resignation, which is prerequisite to continuing an investigation which Mr. GONZALEZ first suggested should be undertaken. In this, as in the resignation of Mr. Sprague, HENRY B. GONZALEZ has been vindicated.

REMARKS OF TRADE SUBCOMMITTEE CHAIRMAN CHARLES A. VANIK ADVISORY COMMITTEE FOR TRADE NEGOTIATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

Mr. VANIK. Mr. Speaker, today I had the pleasure of making a few brief remarks before the Advisory Committee for Trade Negotiations, a group created by the Trade Act of 1974 and chaired by the special trade representative Ambassador Robert Strauss. Several committee members have asked for the opportunity to comment on my remarks; therefore, I would like to enter them in the RECORD at this point:

As the new chairman of the Ways and Means Trade Subcommitte, it is a pleasure to meet with you. There is a new trade team in town: new Subcommittees in the Congress and, of course, Ambasador Strauss is asembling a new staff; we are all in a sort of shake-down cruise period. There may be a few mistakes and errors as we learn our jobs. But I am extremely optimistic, because we are a group that works well together. Divided government is gone from Washington; certainly there will be fights and arguments and misunderstandings. But I detect a better sense of cooperation, common purpose and mutual trust than I have seen in years.

I would like to make a few brief remarks on what I view as important elements of the Trad Act of 1974 for the work of this Advisory Committee for Trade Negotiations, the tripartite process the Act established for their implementation and on the enormous trade problems facing us that must be addressed and solved.

Congress had basically three general objectives or purposes in mind in developing the Trade Act of 1974 and in deciding the type of authorities to grant the Executive branch and the procedures to implement them.

One objective is to continue and expand efforts to increase world trade and to improve market and supply access for United States and foreign products through the elimination or reduction of government-imposed impediments to foreign trade in the form of tariffs and nontariff barriers. This would be accomplished largely through MTN agreements. This goal would also be attained through authorities to conclude trade agreements with nonmarket economy countries and to provide preferential tariff access in the United States market for developing countries.

A second purpose of the Act is to bring about greater equity and fairness in the international trading rules and in the operation of the world trading system. Congress has become increasingly concerned with the absence or inadequacy of international rules to govern some trading practices and by existing rules often being honored more in the breach. Consequently, reform of the trading rules and institutions is another basic theme of the Act.

A third objective is to improve and strengthen domestic procedures and measures to safeguard United States industry, labor, and other national interests against injurious fair or unfair trade competition and to permit the orderly adjustment of workers and firms to freer and increased trade while enabling consumers to benefit from greater competition and a wider choice of goods.

Congress couples the grant of extensive negotiating authorities to the Executive branch with a number of statutory conditions, time limits, interagency and public advisory and hearing procedures, and specific Congressional oversight and implementation mechanisms. Their purpose was to ensure the necessary inputs and review in the exercise of the Trade authority in the national interest.

The tripartite process that resulted, involving the Executive branch, private interests, and the Congress, is in many respects new, unique, and an experiment in greater liaison and partnership in the foreign economic policy field.

One of the main procedural innovations contained in the Trade Act is the advisory committee structure for ensuring consultation between industry, agriculture, labor and other private interests and the Government in developing policy positions for the trade negotiations. The committees representing individual industry, agriculture, and labor interests provide the necessary inputs of technical, detailed information and advice on specific product areas affected by potential agreements on tariff reductions and nontariff barriers.

The 45 members of this overall Advisory Committee for Trade Negotiations, on the other hand, have the responsibility, as does the Congress, to represent, advise, and act not on behalf of any particular special interest, but rather in the *overall* United States economic interest. The input of experience and advice from this Committee based on this broader perspective of balancing national economic goals and interests will be crucial not only to the trade negotiators, but to the Congress in helping it evaluate and make a decision on the merits of any trade agreements submitted for implementation. The Members and Committees concerned will await with great interest your reports and opinions required under the Act on the extent to which each trade agreement serves the national economic interest and this Committee's views on the results of the trade negotiations overall.

That is basically what the Congress had in mind with respect to the interaction of the Executive branch, Congress and the private sector. However, our task has been complicated by the enormous trade problems now facing us. You are aware of these issues and I do not want to go into them today. Personally, I believe that the root of many of our problems lies in the oil price crisis. World trade and finance will be out of shape until the nations of the world are able to achieve better energy conservation and new and widely held sources of energy. Hopefully, President Carter's April energy message will be an important step toward stability in the long-range future of world trade and energy.

Whatever the source of our problems, it is disconcerting to take over a new Subcommittee and turn around and read almost daily in the media that the United States is moving in the direction of protectionism. Indeed, there has been a great deal of discussion in the last two months about mounting "protectionism" and the threat created for world trade by a number of pending decisions in the International Trade Commission, before the President, and in the courts.

I would like to make several observations about these developments. Treasury Secretary Blumenthal made a good point in response to the recent ITC decisions by saying that "Protection is not necessarily protectionism." The fact of the matter is that sometime in the next two years, Senator Ribicoff and I are going to have to Floor manage legislation implementing agreements reached at Geneva. Can you imagine the fury which would have built up by that time if no import relief has been provided. I view the ITC decisions as escape valves to avoid the build-up of popular and Congressional opinion that would be overwhelmingly against any further trade expansion.

I think that the Congressional veto process is extremely healthy. If the President disagrees with any of the recommendations of the ITC, the Congress can choose between the President's position and the ITC's. Frankly, I must tell you that in my opinion a third of the House is protectionist today. Whole State delegations could vote solidly against trade liberalization. Any votes on the Floor in which we have to choose between the President and the ITC will be very, very close. But this should not be viewed as something "awful"—this should be viewed as a message and a warning—as a mini-referendum on the much larger package that we all hope to obtain at Geneva. This warning will help strengthen the hand of our negotiators in Geneva when they argue that the United States simply cannot concede on certain points.

Some may say that the ITC decisions and pending court cases will be viewed overseas as protectionist and that we should not do this to our trading partners. Frankly, I sometimes think we are our own worst critics; we debate these issues so freely and so openly that we make it easy for the rest of the world to throw rocks at us and forget that we should be attacking many of their trade practices. For example, I do not remember seeing a single editorial in the Washington papers about the European Community and Japanese steel cartel agreement of last summer in which the Japanese agreed to cut steel shipments to Europe by 2.6 million long tons. They are not going to eat that steel—and I think we should be concerned about it heading our way. The Europeans and the Japanese have gotten together on ball bearing trade, and they have divided up the world shipbuilding industry. The European preferential agreements with their former colonies have hurt our agricultural trade. As the MTN preparatory work of our own government shows, all of our major negotiating partners have added to their kits of trade restrictions even as the MTN has been underway. While we stand around worrying about whether every

little thing we do is protectionist and whether it will be liked by our trading partners, they are busy locking up Boardwalk and Park Place.

I have a number of objections to the recent ITC decisions. One of the most objectionable features of the ITC decisions, for example, is the uncalled for action by several Commissioners of listing areas where our trade partners could seek compensation or retaliate. Our trading partners can take care of themselves—and we should spend some time taking care of ourselves—This is not protectionism, this is a way of heading off protectionism.

The work of this Advisory Commission is very important. The Trade Act of 1974 probably provided for more advice and public citizen input than any other piece of legislation I have worked on. We want desperately to avoid the disappointment which followed the Kennedy Round when the Congress failed to accede to the elimination of the American Selling Price provision. Hopefully, our negotiators will be bringing one of the great economic documents of the century—and in the back of everyone's mind is the fear that without adequate consultation, it may be treated like another great document, the League of Nations.

As Chairman of the Trade Subcommittee, I would like to say that I hope to explore several new ideas or concepts during the coming year.

First, on import quotas or tariff quotas, there must be adequate consideration of the interest of the consumer, both initially in deciding the action, and in monitoring the import relief, particularly when consumer cost increases begin to exceed the trends in cost of living index as a result of the import restraints. The import relief should be structured in such a way as to prevent windfall profits from accruing to the efficient domestic producers an ensure a continuing price discipline on the domestic industry, thereby protecting the consumer.

Second, I am very troubled by the discriminatory system of country-by-country quotas. If a quota system is imposed, why not provide for a single global figure so there is competition for the American market and the consumer has a greater choice of which country's products he wants to buy. At present, some countries do not fully use their quotas, the system involves enormous paperwork, and tends to discriminate against new entrants into the market. A global quota permits the consumer to determine the source of imports based on price and quality. The decision is removed from the discretion of the bureaucracy.

Finally, most of our trading partners appear to have tacitly adopted a system whereby foreign imports are not allowed to take over or penetrate more than a certain percentage of their domestic market. While this is obviously not the ideal of pure, theoretical free trade, it provides assurances to domestic producers and workers and avoids the development of an attitude of fear about foreign trade. In the long run, the general concept of a certain acceptable level of penetration may be essential to ensuring the continued support for relatively open world trade. Domestic support for the MTN and trade in general might be increased if American labor and industry knew that there was a certain point beyond which foreign market penetration could not go and that there would be a certain level of jobs and investment which would remain American. Whenever we find it necessary to impose import relief, we must guard against the development of cartel arrangements. In this imperfect world in which we live, the adoption of this concept, which I believe is already generally a political fact of life for the major industries of America, would provide reassurance and guidance to ourselves and our trading partners.

In closing, I want to emphasize my view that the advisory and consultative process envisaged by the Congress is essential and must be a three-way process. In this regard, I have just been in touch with Ambassador Strauss to plan a series of large-scale briefings for Members and staffs and smaller, more or less monthly afternoon meetings with various State and regional delegations. I would like to keep the ACTN notified of these smaller meetings and perhaps those of you in town on a particular meeting date could come by and help in the educating process—and be educated in turn about our concerns for a sound trade package.

Again, thank you for your time and I will look forward to working with you in the months ahead.

PERSONAL EXPLANATION

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, legislative matters forced me to be off of Capitol Hill during two votes earlier this week. Had I been present on Monday, I would have voted "yes" on House Resolution 420, establishing a Select Committee on Congressional Operations.

Yesterday, I would have voted "no" on the amendment that sought to require that the House and Senate pass approval resolutions for reorganization plans.

EQUALITY FOR THE HANDICAPPED IS LONG OVERDUE

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, the handicapped of our Nation must be accorded their rights as soon as possible. I would like to urge Secretary Califano of the Department of Health, Education, and Welfare, to consider the needs of the handicapped a priority, and that he sign promptly the regulations enforcing section 504 of the Rehabilitation Act of 1973.

Section 504 is that part of the Rehabilitation Act that has become known as the Handicapped Civil Rights Act. Congress passed the Rehabilitation Act in 1973, and overrode a Presidential veto of that act by one of the largest majorities ever mustered in the Congress.

The Executive order requesting the Department of Health, Education, and Welfare to promulgate regulations to guide the implementation of the act was not given until spring of last year, or 2½ years after enactment of the bill. Throughout 1976, the Department held extensive hearings on the proposed regulations. However, when the regulations were presented to then-Secretary Mathews in January, he refused to sign them. A court order requiring his signature was issued, and litigation on the matter is still pending.

When Secretary Califano entered his office as the new Secretary of HEW, he elected to study the proposed regulations further. He immediately created an intradepartmental HEW task force to study and evaluate the proposed regulations for a 30-day period. In requiring this assessment of the effects of the regulations, the Secretary has demonstrated an interest in aiding the handicapped that I hope is reflected in the promulgation of the most stringent regulations possible.

This task force is expected to report back to Secretary Califano at the first of April. I look forward to receiving their recommendations in these next few days, and hope that the Secretary's signature of the regulations is immediate, providing he does not approve any changes in the regulations that would weaken them. Changes should serve to strengthen the regulations.

Mr. Speaker, this fall it will be 4 years since the Rehabilitation Act was passed. Delays in implementation of the act have resulted in continued discrimination of handicapped citizens by recipients of Federal funds, including State and local units of government. Unless these regulations take effect, the handicapped will continue to be denied access to the labor force, educational programs, public transportation, and other services. Expeditious implementation of the regulations is a necessary step toward fulfilling the commitment we made in 1973 to fully incorporate our handicapped citizens into our society.

IN SUPPORT OF H.R. 3361, THE PUBLIC PARTICIPATION IN FEDERAL AGENCY PROCEEDINGS ACT OF 1977

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, I had the pleasure of testifying this morning with Senator KENNEDY and Judiciary Committee Chairman PETER RODINO on H.R. 3361, the Public Participation in Federal Agency Proceedings Act. We appeared before the Administrative Law and Intergovernmental Relation Subcommittee of the House Judiciary Committee. The subcommittee, chaired by Representative GEORGE DANIELSON, is conducting 2 days of hearings, today and tomorrow, on the bill which Chairman RODINO and I originally introduced in May 1976. The legislation now has 87 cosponsors in the House. A list of those cosponsors follows the text of my prepared remarks from this morning:

TESTIMONY OF THE HON. EDWARD I. KOCH

Mr. Chairman, I am pleased to be here this morning with Senator Kennedy and Judiciary Committee Chairman Peter Rodino to testify on behalf of H.R. 3361. As one of the chief House sponsors, I am especially gratified that the House of Representatives has begun formal consideration of this legislation and on behalf of the 87 bipartisan House cosponsors I would like to commend Chairman Danielson for his leadership in this area.

Mr. Chairman, I am one who has sponsored and cosponsored sunshine, sunset, financial disclosure, attorney's fees and other significant pieces of legislation in the area of regulatory reform and governmental accountability. So I come here this morning with a full appreciation of the legislative history which serves as the backdrop of these proceedings. It is with many of those laws and proposals in mind that I present to you the simple premise I wish to advance this morning: H.R. 3361 is uniquely suited to address regulatory reform issues faced by the 95th Congress.

Mr. Chairman, I believe that there are three central issues we in the 95th Congress need to address with respect to our Federal agencies:

First, we must provide American citizens with agencies and agency procedures which they can have confidence in.

Secondly, we must provide adequate access to our Federal agencies to those whose views have been underrepresented.

Finally, we must help our agencies with the difficult task of reaching fair and well-balanced decisions.

The recent crisis of confidence in government is one that has been experienced acutely at the Federal Agency level. The repeated incidence of serious abuses of power and conflict of interest has intensified the public's perception that government regulation benefits the regulated and not the public.

We in the Congress have done very little to address this widespread concern. A uniform Federal program of increasing citizen participation in agency decision making is legislation that can help offset the perception of one-sided decision making by establishing a consistent reliable pattern of citizen access.

Additionally, Mr. Chairman, we are faced with the spiraling costs of lengthy and drawn out governmental proceedings. We are already at the point that, regardless of how accessible our process is, the costs of participation are prohibitive. The Congress must make some provisions for, in certain instances, alleviating citizens from the heavy financial burden of representation, or it will have effectively cut citizens off from their right to participate in our governmental processes.

This, of course, most severely affects those who have traditionally been under-represented—minority groups and the poor—but it also has a substantial effect on consumers and small businessmen who don't have access to large amounts of money.

Finally, we in the Congress must sincerely attempt to work with the Federal agencies themselves. They need our help. The job of balancing all of the competing interests that come to bear upon most governmental policies is a formidable one, and if we can provide the aegncies with additional tools for their deliberative processes we will be performing a significant service. By establishing guidelines and funding for citizen participation, we will increase the ability of Federal agencies to arrive at fair decisions by allowing them to consider a wider range of views and it will assist agencies in avoiding court challenges which have been based on a lack of consideration of the public's perspective.

The above three points are what I believe to be the broad policy considerations that should guide our discussion of legislation in this area. But we also need to address the specifics of the legislation before us. For the benefit of my colleagues, I would like to highlight the major provisions of H.R. 3361.

With respect to decision making at the agency level:

Each agency is authorized to award reasonable attorney fees, expert witness fees, and other costs of participation when public participation can reasonably be expected to promote a full and fair determination of the issues involved in the proceeding.

To be eligible a person or class of persons must be reasonably expected to substantially contribute to a fair determination of the proceeding, and either the person or classes' economic interest in the case is small or their resources are so small that they couldn't participate without an award.

The act applies to all licensing, ratemaking, rulemaking proceedings and such other agency proceedings which involve issues relating to health, safety, civil rights, environment and consumer pocketbook issues.

Each agency makes the determination of eligibility under this section prior to the commencement of any proceeding, unless that is impractical. The agency must decide whom to compensate, how funds should be allocated among eligible participants when not enough funding is available fully to compensate all of them, and when petitions should be consolidated to avoid duplication.

A person or organization who receives funds shall be liable for repayment if there is a finding that the person or class has not provided the contemplated representation or has acted in an obdurate, dilatory, or mendacious fashion or for oppressive reasons.

There are provisions to bring a civil action to review an agency action which has denied or insufficiently awarded or reimbursed attorney fees. Agencies are required to adopt regulations to take effect within six months after enactment.

There are reporting requirements for each agency head to make an annual report to Congress on the nature and disposition of all proceedings in which fees and costs were sought under this Act.

There is a 3-year authorization for $10 million each year.

With respect to appeals from agency decisions:

Any party or intervenor in a Civil action for judicial review of agency action shall be entitled to collect reasonable attorney's fees where the court affords the relief sought, and the court determines that an important public purpose was served; and the economic interest in the case is small or their resources are so low that without an award under this section they could not have participated. Promulgation of rules and a reporting system are also established under this section of the Act.

The Public Participation in Federal Agency Proceedings Act is a well-conceived and thoughtful approach towards addressing the policy concerns we face in the 95th Congress. I would like to suggest five basic reasons why I believe this legislation is particularly desirable.

First, the concept of public participation is a proven concept. I want to be emphatic about the fact that we are not advocating the creation of a new untested participation mechanism. The Federal Trade Commission has been operating a reimbursement program under the authority and guidelines provided in the Magnuson-Moss Warranty and Federal Trade Commission Improvements Act. The sum of $500,000 was appropriated for the program in its first full year and there is general agreement that the program is going well. FTC Chairman Calvin Collier testified last month in support of S. 270, the companion bill sponsored by Senators Kennedy and Mathias. As you know, Marjorie Smith, head of the FTC's Bureau of Consumer Protection, will be testifying before you tomorrow in support of the legislation, and I am sure she will explain to you the mechanics of the FTC program.

However, I do want to bring attention to the kinds of participation that the FTC program has resulted in. There are many outstanding examples of groups with limited resources who were able to participate in FTC proceedings because of the reimbursement program. The National Council of Senior Citizens received a grant of $36,000 for participating in proceedings to establish regulations concerning hearing aids. As one who is particularly sensitive to the needs and concerns of our elderly, it is particularly gratifying to me to see these funds used to allow our senior citizens to have a voice over regulations which profoundly affect them. This is just one of many outstanding examples I could list.

I do hope the members of the subcommittee will closely examine the list of FTC participants and their respective awards, which the FTC will make available, because it will dispell one prevalent myth that has clouded this legislation. Over 60% of the awards made by the FTC went to citizens, citizen's groups and expert witnesses. Less than 40% went to actual legal representation. I believe this is significant because some people have raised the cry that this is a "lawyer's relief bill"—the figures show that is not the case at all.

In addition to the FTC experience, several other agencies including the FDA, CAB, DOT, and the CPSC are all at various stages of implmenting public participation reimbursement programs. The support of the public participation concept by these agencies is indeed encouraging.

One may, at this point, ask if agencies other than the FTC (which has specific authority under the Magnuson-Moss) can already establish public participation programs why is there a need for this legislation? The Comptroller General stated that agencies are authorized to pay the participation expenses of parties who "can reasonably be expected to contribute substantially to a full and fair determination of the issues" in a proceeding. (Opinion of the Comptroller General, FDA B–139703 Dec. 3, 1976). But restrictions on the agencies' inherent reimbursement authority limit the agencies in certain important respects. The Comptroller General's rulings hold that the agencies are empowered to reimburse the expenses only of indigent participants. The agencies are thus unable to provide financial assistance to a whole class of participants whose contributions could be extremely useful but whose economic interests in a proceeding would not justify their expending the substantial sums that effective participation would require. H.R. 3361 authorizes reimbursement to such participants. In addition, the Comptroller found that advance payments are now barred by 31 U.S.C. § 529. Legislation such as H.R. 3361 is needed to overcome this restriction, which seriously impairs the ability of particularly needy participants to prepare their presentations even if reimbursement is available at the end of the proceeding.

An additional reason for the necessity of the legislation has been well stated by the Comptroller General in an opinion issued last year:

"It would be advisable for the parameters of such financial assistance, and the scope and limitations on the use of appropriated funds for this purpose to be fully set forth by the Congress in legislation, as was done in . . . the Magnuson-Moss Warranty-Federal Trade Commission Improvement Act." (Opinion of the Comptroller General, FTC, B–180224, May 10, 1976.) Furthermore, citizen participation programs should be available in all agencies which come under the APA and not just in those agencies that decide to establish programs on their own initiative. Those agencies least likely to initiate such programs are most likely to truly need them.

My second point is that the scope of H.R. 3361 is relatively narrow. If there is one misconception I have heard about this bill repeatedly it is the belief that under this bill all of our constituents stand to be compensated when they bring individual complaints against our government and win. Like many other Members, I receive letters daily from individual Veterans, small businessmen and Social Security recipients who can't afford to "fight back" because its too expensive. And I think all of us would like to be able to provide legislation which would guarantee each citizen the costs of participation so that he or she could bring legitimate individual claims or complaints. However, that would be an expensive proposition which the country does not appear willing to bear at this time. Short of that, however, we may be able to have a significant impact on providing adequate access by insuring that there is access to those proceedings which

determine overall policy. H.R. 3361 applies to rulemaking, ratemaking and licensing proceedings. These are the proceedings that have broad policy implications. So while H.R. 3361 might not necessarily help the individual businessman who wants to challenge the specific applicability of O.S.H.A. regulations to his business, it would create eligibility for him or his businessman's group to have significant input into the original proceedings that set up the unworkable regulation in the first place. In addition, the bill does specifically state that if an individual adjudication has a significant impact on issues relating to health, safety, civil rights, environment and consumer pocketbook issues then there might be eligibility if the individual did not have a significant economic interest in the outcome of the proceeding or where his or her resources were so low as to preclude participation. It seems to me that this limited applicability, while it does not serve the needs of all of our constituents, does at least focus the legislation to impact on those proceedings of greatest significance.

My third point is that H.R. 3361 would establish an appropriately modest pilot program. The authorization is only for three years and the amount of the authorization would be $10 million per year. As a pilot program, H.R. 3361 does appropriately put a $10 million/year ceiling on the total amount to be spent and therefore would have each agency award its participation reimbursements within a confined budget.

Fourthly, H.R. 3361 attempts to aid the agencies from within but does contain adequate safeguards against agency and participant abuse. There have been many suggestions that these participation funds should be administered by the courts, by an independent agency or by some other neutral party. H.R. 3361 provides for each agency to make the initial determination of award with that decision subject to judicial review.

I am pleased to be able to note that this legislation has been drafted as an integral part of the Administrative Procedure Act. It is meant to complement and support that Act, and I believe the drafted language does that admirably. It is in keeping with the spirit of the Act that these programs be administered by the Agency itself, subject to review, so that these programs become an important decision making tool to be used in unison with other agency deliberations and not as a club with which to threaten agencies. I too am concerned that some agencies might use these funds to support their own vested interests rather than for the intended purpose, but I believe the courts can police this potential abuse. At least at the outset we should give the agencies these programs and if we find that there is widespread abuse then we can consider using the courts or some independent agency for administering public participation funds.

My final point is that H.R. 3361 will be an important complement to whatever other strategies the Congress adopts in the area of regulatory reform. A Consumer Protection Agency, Sunset Laws, improved Congressional Oversight and Government Reorganization can all be very significant and useful reforms. But I believe there is no adequate substitute for direct citizen access to our Federal agencies. The expertise, perspective and compassion of our individual citizen's and their organizations will always be needed and should always be encouraged regardless of what else we do. If we neglect our citizens themselves we are making an eggregious error and going far astray from what any proper notion of democracy should be.

Mr. Chairman, I want to conclude by again stating my appreciation to you and your subcommittee for sponsoring these hearings. These hearings come at a time when the American people are no longer convinced that Government is working in the public's best interests, nor do the majority of the American people have the resources to effectively represent their position against a well-funded and powerful bureaucracy. We therefore have a special opportunity to affirmatively address these concerns, and I firmly believe that H.R. 3361 is one important vehicle for bringing the American people much needed relief. A list of the House cosponsors of H.R. 3361 follows:

LIST OF HOUSE COSPONSORS OF H.R. 3361, PUBLIC PARTICIPATION IN FEDERAL AGENCY PROCEEDINGS ACT

1. The Honorable Joseph P. Addabbo of New York.
2. The Honorable Daniel K. Akaka of Hawaii.
3. The Honorable Thomas L. Ashley of Ohio.
4. The Honorable Herman Badillo of New York.
5. The Honorable Max Baucus of Montana.
6. The Honorable Berkley Bedell of Iowa.
7. The Honorable Anthony C. Beilenson of California.
8. The Honorable David E. Bonior of Michigan.
9. The Honorable William M. Brodhead of Michigan.
10. The Honorable George E. Brown, Jr., of California.
11. The Honorable Yvonne Brathwaite Burke of California.
12. The Honorable John L. Burton of California.
13. The Honorable Phillip Burton of California.
14. The Honorable Charles J. Carney of Ohio.
15. The Honorable Shirley Chisholm of New York.
16. The Honorable John Conyers, Jr., of Michigan.
17. The Honorable James C. Corman of California.
18. The Honorable Baltasar Corrada of Puerto Rico.
19. The Honorable William R. Cotter of Connecticut.
20. The Honorable Ronald V. Dellums of California.
21. The Honorable Christopher J. Dodd of Connecticut.
22. The Honorable Thomas J. Downey of New York.
23. The Honorable Robert F. Drinan of Massachusetts.
24. The Honorable Robert W. Edgar of Pennsylvania.
25. The Honorable Don Edwards of California.
26. The Honorable Dante B. Fascell of Florida.
27. The Honorable Walter E. Fauntroy of the District of Columbia.
28. The Honorable Hamilton Fish, Jr., of Pennsylvania.
29. The Honorable Daniel J. Flood of Pennsylvania.
30. The Honorable Harold E. Ford of Tennessee.
31. The Honorable Donald M. Fraser of Minnesota.
32. The Honorable Lee H. Hamilton of Indiana.
33. The Honorable Mark W. Hannaford of California.
34. The Honorable Tom Harkin of Iowa.
35. The Honorable Michael Harrington of Massachusetts.
36. The Honorable Augustus F. Hawkins of California.
37. The Honorable Harold C. Hollenbeck of New Jersey.
38. The Honorable Elizabeth Holtzman of New York.
39. The Honorable James M. Jeffords of Vermont.
40. The Honorable John W. Jenrette, Jr., of South Carolina.
41. The Honorable Barbara Jordan of Texas.
42. The Honorable Martha Keys of Kansas.
43. The Honorable Edward I. Koch of New York.
44. The Honorable Peter H. Kostmayer of Pennsylvania.
46. The Honorable Joseph A. Le Fante of York.
46. The Honorable Joseph A. LeFante of New Jersey.
47. The Honorable William Lehman of Florida.
48. The Honorable Elliott H. Levitas of Georgia.
49. The Honorable Andrew Maguire of New Jersey.
50. The Honorable Romano L. Mazzoli of Kentucky.
51. The Honorable Helen S. Meyner of New Jersey.
52. The Honorable Barbara A. Mikulski of Maryland.
53. The Honorable Abner J. Mikva of Illinois.
54. The Honorable Parren J. Mitchell of Maryland.
55. The Honorable Joe Moakley of Massachusetts.
56. The Honorable Anthony Toby Moffett of Connecticut.
57. The Honorable John E. Moss of California.
58. The Honorable Robert N. C. Nix of Pennsylvania.
59. The Honorable James L. Oberstar of Minnesota.
60. The Honorable Richard L. Ottinger of New York.
61. The Honorable Leon E. Panetta of California.
62. The Honorable Jerry M. Patterson of California.
63. The Honorable Edward W. Pattison of New York.
64. The Honorable Donald J. Pease of Ohio.
65. The Honorable Claude Pepper of Florida.
66. The Honorable Charles B. Rangel of New York.
67. The Honorable Fredrick W. Richmond of New York.
68. The Honorable Matthew J. Rinaldo of New Jersey.
69. The Honorable Peter W. Rodino Jr. of New Jersey.
70. The Honorable Benjamin S. Rosenthal of New York.
71. The Honorable Fernand J. St Germain of Rhode Island.
72. The Honorable James H. Scheuer of New York.
73. The Honorable John F. Seiberling of Ohio.
74. The Honorable Stephen J. Solarz of New York.
75. The Honorable Gladys Noon Spellman of Maryland.
76. The Honorable Fortney H. Stark of California.
77. The Honorable Newton I. Steers, Jr. of Maryland.
78. The Honorable Louis Stokes of Ohio.
79. The Honorable Bob Traxler of Michigan.
80. The Honorable Morris K. Udall of Arizona.
81. The Honorable Bruce F. Vento of Minnesota.
82. The Honorable Douglas Walgren of Pennsylvania.
83. The Honorable Henry A. Waxman of California.
84. The Honorable Theodore S. Weiss of New York.
85. The Honorable Timothy E. Wirth of Colorado.
86. The Honorable Lester L. Wolff of New York.
87. The Honorable Leo C. Zeferetti of New York.

PRESIDENT PARK: KOREA'S TRUE EMERGENCY

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, the continuing repression by the Park government in the Republic of Korea, together with President Carter's outspoken support for the cause of human rights in all countries, brings the issue of U.S. involvement in Korea into the spotlight once again. In spite of a dismal record of civil and human rights violations in the Republic of Korea, the Congress is being asked to approve a total of $280 million in military aid and another $111 million in economic aid to that country for fiscal 1978.

The United States is currently mired in a conflict between its defense interests and its historical dedication to the principles of democratic government, a conflict exacerbated by the Republic of Korea's flagrant disregard for these principles. Perhaps the most touching symbol of the repressiveness of President Park Chung Hee's government is the fate of Yun Po Sun, the 80-year-old former President of the Republic of Korea who has been sentenced to 8 years in prison for violating Emergency Decree No. 9, which flatly bans all criticism of the Park regime. Yun Po Sun was 1 of 18 prominent Koreans who received jail sentences following the publication on March 1, 1976, of a "Declaration for National Salvation and the Restoration of Democracy," calling for the abolishment of emergency decrees, restoration of a parliamentary democracy and an independent judiciary in the Republic of Korea. The statement also called for Park's resignation. For these beliefs, Yun Po Sun will end his life in prison.

These dissidents have protested the systematic abuses of human and civil rights which have been given a veneer of legal legitimacy by the Republic of Korea's Government. The "Yushin Constitution," dictated by President Park in 1972 after he declared martial law, was obviously designed to enhance his power by moving the limit on the number of terms a President may serve, ending the direct popular election of the President, and by giving the President power to restrict civil liberties and "temporarily suspend the freedom and rights of the people," whenever he deems it necessary to meet an "emergency." I submit, Mr. Speaker, that the Republic of Korea's most threatening emergency is President Park himself. Aside from its moral indefensibility, Park's suppression of democratic and civil rights ultimately may create more dissatisfaction and instability than it cures.

Yun Po Sun's contempt for the "Yushin Constitution" seems well founded, according to the latest human rights reports of the U.S. State Department. In its human rights report on the Republic of Korea, prepared as required by the Foreign Assistance legislation of 1976, the State Department notes that "the present Yushin constitution guarantees virtually all the basic rights and freedoms prescribed by the Universal Declaration of Human Rights, but provides that they may be limited by law or Presidential decree—as they often are."

The State Department lists surveillance, detention for questioning, and lengthy interrogation without counsel as common violations of human rights under "emergency decrees." Other reprehensible practices include arrest without warrant and trials by panels of judges instead of juries. The State Department has also received reports concerning 17 former prisoners in the Republic of Korea who claim they were tortured in 1972 and 1974. Psychological pressure during interrogation, including deprivation of sleep, has also been alleged by persons who have been detained.

As a close friend and protector of the Republic of Korea for decades, the United States has a right and obligation to expect that country to do more to uphold basic principles of human rights. While it can be argued that our military presence and support is vital to the preservation of peace in Korea, we must also question the nature of the peace we are preserving. The ex-president and prisoner Yun Po Sun addressed the question of United States-Korean relations in his appeal to the Republic of Korea's Supreme Court and to the "court of truth, a court of conscience, and a court of the masses." He said, "Friendly ties should be confirmed between the United States, Japan, and Korea on the assumption that the three countries share democratic values. Such relations should not promote division, harm national reconciliation, and undermine democracy."

The Congress is being asked this year to grant the Republic of Korea $275 million in foreign military sales credits and guaranties, $4 million in grants under the military assistance program and another $1.4 million for the U.S. sponsored international military education and training program. In addition, the total amount of undelivered military assistance program grant aid authorized in previous years now stands at more than $100 million. These figures, added to the request for more than $111 million for economic aid under Public Law 480, give the Congress considerable leverage in its effort to encourage changes in the Republic of Korea's policies on human rights and democratic principles. I believe Congress must show its determination to stop supporting dictatorial regimes with a blank check for military and economic aid.

YOUTH UNEMPLOYMENT: A CENTRAL CHALLENGE

(Mr. DELLUMS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DELLUMS. Mr. Speaker, the challenge of youth unemployment is probably one of the most difficult questions of economic policy we face today. It seems unresponsive to traditional economic policy. It does not have an organized and politically sophisticated interest group pressing for solutions: on the contrary, it is a source of alienation and hopelessness. It is a social time bomb for the future, and an economic waste today.

I have noticed that the automatic prescriptions of the traditional American ideologies simply have not succeeded with this specific problem. The liberals say, "Stimulate the economy in the traditional way, and supplement any difficult problems with retraining programs." The conservatives say, "Repeal the minimum wage and cut down on social benefits that make it costly to hire people."

When we look at the record, neither approach—although there are sound arguments for both—seems to work. In view of the importance of the problem, I think we need, first, to examine the specific framework of the youth unemployment problem, in order to devise a policy to meet this problem head-on. Second, we need to go beyond ideologies and take what is really helpful from both approaches.

I have prepared a paper on this subject for the Congressional Black Caucus. In view of the importance of the problem, and the necessity for seeing it directly and without ideological blinders, I would like to insert in the RECORD my discussion with the hope that its call for action is heeded:

YOUTH UNEMPLOYMENT: PROPOSED RECOMMENDATIONS

Almost all studies of the youth unemployment problem concur in their definition of the parameters of the problem. Stated simply, the unemployment rate of youth is continuing to rise regardless of the national unemployment rate. Even with vigorous national economic growth, youth unemployment as a problem of crisis proportions will not simply "go away." Basically, this paper summarizes prior analyses from a variety of recent papers and then presents alternatives for consideration in new legislation seeking to respond to the youth employment problem.

A. THE "UNEMPLOYMENT" RATE OF YOUTH

The unemployment level of Black teenagers has risen steadily since 1955 from 15.8 percent to 36.9 percent.[1] The unemployment rate of Black 20 to 24 year olds has risen every year since 1965 from 10.8 percent to 23.2 percent.[2] The recent upturn in the economy has reduced unemployment for all groups except Black youth.

Although data on the unemployment rate for youth have been given the major attention, the most critical differences in the employment status of White and Black youth is the difference in their Labor Force Participation (LFP) rates. Although adult Black men (25–64) have a labor force participation rate similar to White men, and adult Black women (25–64) have a higher labor force participation rate than White women, the labor force participation rate for Blacks, in the age categories 16–17, 18–19, and 20 to 24, is markedly less than Whites for the same age, sex, and educational status. Additionally, the LFP rate of Black male youth has dropped consistently for each group since 1960, regardless of educational status, age, or the economic climate of the society. There are only two possible reasons for this difference by race. The first is that those Blacks who are now not in the labor force have been unable to find work, and therefore, have withdrawn from the labor force by ceasing to seek employment; the second is that many Black youth have never entered the labor force at all. Thus these youth are not counted

[1] Employment and Training Report of the President, Department of Labor, 1976.
[2] Ibid.

as unemployed by the Department of Labor. The unemployment rate as determined by the Department of Labor is based on the number of persons who are unemployed as a percentage of the labor force participants Thus by not seeking employment they reduce the unemployment rate twice, once by not being counted as unemployed and once by not being counted in the LFP rate. The Labor Force Participation Rate includes those who are employed plus those who have actually looked for a job during the past week (the unemployed). Thus, all those persons who are unemployed, but have stopped looking because they believe no jobs exist for them are not unemployed. In effect, then, the reported unemployment rate, (high as it is) is based on an artificial definition that obscures the seriousness of the problem.

An alternative, and more revealing way of examining the data is to look at the percent of all youth out of school who are employed, unemployed, and not in the labor force in terms of three different classifications of youth—In-School; High Shool Graduates; Dropouts. In this method we are not viewing the unemployed as a percent of those in the labor force, but rather as a percent of all persons in the classification, and can compare the percentage not in the labor force across the races and educational classifications. (See Table 1.)

TABLE 1.—EMPLOYMENT BY RACE, BY EDUCATIONAL STATUS IN 1975

[In percent]

	Employed	Unemployed	Not in labor force	Total
Enrolled in school: [1]				
White	40.1	6.5	54.3	100
Black	21.7	7.1	71.3	100
Not enrolled in school:				
High school graduates: [2]				
White	74.4	9.4	16.2	100
Black	60.6	17.3	22.0	100
Dropouts: [3]				
White	49.2	14.5	36.4	100
Black	35.2	19.2	45.6	100

[1] In school—Young people in school are seeking part-time or summer employment; by and large their motivation in job seeking is income rather than career motivation. (This group represents 24 percent of all white youth and 33 percent of all black youth who are unemployed or likely to desire employment.)

[2] High school graduates, out of school—Those who are high school graduates or have had some college are likely to meet employers minimal expectation; some have specific skills to offer employers. By and large, they are seeking full-time jobs as a first step on a career ladder (34 percent of all white youth and 30 percent of all black youth who are unemployed or likely to desire employment fall in this classification).

[3] Dropouts, out of school—Dropouts are the youth who have the most difficulty achieving entry into the labor force, and have the least to offer employers. These youth are most likely to be tamong the structurally unemployed and are likely to remain in that group throughout their lifetime, yet they also are seeking full-time jobs, and, no less than the high school graduates, are interested in gaining access to rewarding lifetime careers (this group represents 42 percent of all white youth and 37 percent of all black youth who are unemployed or likely to desire employment).

Note: See tables 2 and 3.

Thus, we are able to see from Table 1 that of all those in-school the percent looking for jobs who are unemployed is reasonably equal for Whites and Blacks and that the major difference is the markedly fewer Blacks than Whites who are employed (40 percent to 22 percent) and the substantially higher percent of Blacks not in the labor force (71 percent to 53 percent). For both White and Black dropouts the percent employed is much lower than for High School Graduates although both are out of school seeking full-time jobs. The difference among unemployed Black and White dropouts is comparatively small (4 percent), but 14 percent more Whites are employed than Blacks, and 46 percent of Black youth in the dropout classifications are not in the labor force, (compared to 36 percent of White youth). By examining the unemployed from this more realistic point of view, we find that the largest number requiring service are the dropouts—both Black and White.

TABLE 2.—*Supply and demand equation of the labor market*

SUPPLY	DEMAND
Characteristics of youth	*Characteristics of labor market*
Live in inner city neighborhoods; have difficulty (frequently impossibility) in reaching suburban jobs.	Major shift of jobs, especially skilled and semiskilled blue-collar jobs, from urban to suburban areas and from North to South.
Cannot meet requirements for white-collar jobs; frequently do not want menial service jobs.	Remaining jobs in the cities increasingly white-collar, and lower level service jobs.
Have low reading and math achievement levels; lack experience.	Preference of employers for more education, skills, and experience; and preference for employing white men 25–44 years of age.
Lack of knowledge of labor market and tend to pursue entry-reentry pattern; youth accept jobs that they do not want, and therefore, have high absenteeism, tardiness, and quit rates.	Employers want employees who will provide stable work force.
Have unrealistic wage expectations.	Employers want employees whose productivity warrants wage rates paid.

As Table 2 demonstrates, given the disparity between the characteristics of youth, and the hiring standards of employers, large scale unemployment among inner city youth is likely to continue even if significant numbers of job vacancies become available unless considerable changes are made in both the supply and demand sides of the labor market.

Reordering priorities in the development of a youth strategy requires the definition of the segments of the youth population who suffer particularly severe unemployment problems, and are, therefore, the most appropriate target populations for employment/training programs. These groups of youth, (in-school, high school graduates, dropouts) were defined in Table 1. Different portions of these groups fall into three types of unemployment. Although the majority of each group suffers from a different type of employment, members of each group—e.g., High School Graduates and Dropouts who are out of school and in-school youth—are to be found suffering from each type of unemployment, e.g., frictional, cyclical and structural.

1. Frictional unemployment: In-school; High School Graduates—usually short-term unemployment, occasioned by normal, voluntary movement between jobs, and into and out of the labor force (includes unemployment during the summer of young people who flow into the labor force during these months). (Types A and B.)*

2. Cyclical unemployment: In-school; Graduates—some of which is of long duration during periods of recession of persons willing and capable of work who are unable to find jobs because of lack of jobs (Types A and B).*

3. Structural unemployment: Dropouts; Graduates—long-term unemployment, primarily among certain groups of youth, which is structural in nature because of absence of saleable skills and may presage a lifetime of unstable, marginal employment experiences (Type C and sometimes B).*

Structural problems are of particular concern for employment/training programs since, unless addressed, the youth in this classification are likely to carry permanent lifetime handicaps in the labor market.

C. ASSESSMENT OF CURRENT PROGRAMS

A variety of employment and training programs for youth have been devised and funded utilizing federal resources. The majority have been work experience programs for in-school youth. Evaluations of these programs indicate that few youth are likely to receive any training or other services that will improve their future employability or income. The Congress and the Department of Labor have been more interested in numbers served, than the quality of placements; and therefore, the emphasis has been on serving as many persons as possible rather than investing in high quality service for fewer persons. Training programs have tended to be for a maximum of 20–26 weeks, permitting youth to acquire only those skills that industry can easily train for itself. The employment and training programs have focused on preparing people for jobs in the secondary labor market that are often not superior to the jobs that they would have obtained without participating in the program.

For most youth, the history of CETA and its predecessors has been merely a holding action, "an aging vat." When increased earnings have been reported they largely reflect the increased age and maturity of the participants, rather than any increased value attained through training and services received.

A brief review of the various programs illuminates their limitations:

Work Experience programs including Summer Youth programs

This is the largest type of employment and training program for youth, and it focuses primarily on students. Essentially these programs, whether during the summer or yearround, are designed to put income into enrollees pockets rather than upgrading their employability.

Institutional and On-the-Job Training programs

Gains in earning levels are obtained through increased labor force participation, (i.e., youth work more hours per week for more weeks), rather than higher earnings. OJT trainees record more gains than institutional training, at half the program cost. Length of training is rarely adequate to obtain access of skilled employment.

Public Service Employment

On-the-job training programs in the public sector are not usually available to youth.

Job Corps

The Job Corps program focuses on dropouts with the most severe employment problems. On the basis of Job Corps experience, total remediation is expensive, ($9,000–$10,000 per person year), and useful for only a small number of youth who are willing and able to benefit. Follow-up placement services are essential if the participants are to record any real gains. Most importantly, no defini-

*See Table 1.

tive and replicable "treatment" model has emerged.

Job Opportunities in the Business Sector (JOBS)

The cost has been typically around $3,000, but these funds have included the costs of hiring, training, and supportive services. The long-run effect on disadvantaged youth has been minimal. Employers received subsidies for hiring individuals similar to those they normally employed, and often they provided only few extra services.

Vocational Education

A comparatively small amount of federal, state, and local funds, combined, are allocated to providing service to the disadvantaged. The best programs are offered in Technical Institutes which limit their intake to those with high academic achievement. The variety of courses are limited at the high school level, and states and local communities are placing greater emphasis on the provision of skill training at the postsecondary level. All of these operate to the disadvantage of Black inner city youth.

State employment services (ES)

In 1973, only about one-third of all youth seeking employment made use of the Employment Service in their job search; and less than 6% used it as their most frequent source. Of those using the ES, approximately 14% actually found their last job through the ES. Placements were usually in secondary labor market jobs that youth might have obtained on their own.

D. RECOMMENDATIONS

Against the background of the failures of employment and training programs, proposed youth employment legislation foresees a major expansion of these same programs that have not improved the employability of youth in the past. Students are still likely to receive the highest priority, and school dropouts are still likely to be underrepresented, although they are most in need of service; and youth are likely to receive little save a limited increase of income for their efforts.

Youth account for about one-half of all unemployed; therefore, the overall unemployment problem cannot be solved without substantially reducing the level of youth unemployment. In fact, relieving the disproportionate burden of joblessness borne by young workers generally, and by Black youth particularly, could be considered an economic recovery strategy in itself. At the very least, it has to be regarded as a major focus of any economic recovery program. Since economic recovery alone has not improved youth unemployment rates over the past two decades for those 20–24 year olds or for teenagers, it is unlikely that either economic recovery or an expansion of existing programs alone is likely to solve the problem to any appreciable degree.

If real gains are to be made for those most in need of service, a major re-examination of the type of service that should be funded is essential. If major funds are to be invested, some of these funds must be invested to examine the whole problem of regularizing youth's transition from school to work, as well as an effort to design programs that will absorb the structurally unemployed into the mainstream of the labor force. Work experience programs have their purpose, but more permanent solutions addressing the root causes of youth unemployment must be developed. The Black Caucus is considering alternative solutions designed to deal with the causes of youth employment problems and is particularly concerned with their affect on those most severely injured by the present system—the Black urban youth.

Two overall approaches are being considered—one that deals with improvement of program content in approaches designed for youth, the other by exploring alternative economic solutions that are likely to be particularly beneficial to youth. Since these are alternatives, it is not proposed that all alternatives be available to *all* youth.

1. *Program content issues*

Subsidized Employment

Subsidized employment opportunities should be sought for youth with both public and private employers in both large industry and in small businesses that offer valuable training opportunities. Placements should be selected in terms of the likelihood that youth will obtain training and/or experience that will permit them to attain permanent access to the primary labor force. On-the-job training, as appropriate, would be provided by the employer. Placements should be for a period of two years. Fifty percent of the youth so placed should be 21–24 years of age, and 50% under 21 years of age. Youth should be selected on the basis of their family income, race, and sex of the unemployed youth in the local political jurisdiction. For the first six months, the youth should be paid 80% of the average entry wage paid persons in the occupation in the jurisdiction; 90% for the second six months; and 100% for the second year. During the first six months, 50% of the wages should be contributed by the federal government; 45% during the second six months; and 40% during the second year. We can expect an average entry wage of $8,000 per year; this would require a government contribution of $3,200 per year for two years. The employer's share of the salary would average $3,600 for the first year, and $4,800 for the second year. (The assumption is that the employee would increase his/her value to the employer as s/he gained skills and experience.) The trainee would earn $6,400 the first six months, $7,200 the second six months, and $8,000 the second year. Five hundred dollars per trainee should be provided to the local or state CETA for services to the trainees. One billion dollars would provide approximately 270,000 slots per year. A program of this nature combining selective public and private subsidized employment should be a major component of any youth legislation.

Transition from School to Work

Although there have been task forces exploring the issue of transition from school to work, no research has been undertaken to deal seriously with long-range solutions to the issue of regularizing the transition of young people from school to work. Experimentation with new policies and programs must be undertaken so that a start can be made in developing models that will attack the roots of the problem. Federal funding should be large enough to attract state (and local) commitments of youth employment and training and vocational education funds of sufficient magnitude to test different systems. In order to assure that positive findings can be replicated, each effort should be carefully evaluated from the beginning to provide data on the usefulness of each tested model.

Public Works

All public works bills should be amended to require the employment of one youth trainee for every five adult employees (trainees to be allocated 50% to those 21–24 years of age, and 50% to those 18–21 years of age). Trainee wages should be pegged to a percentage of journeyman wages.

The Public Works Act should emphasize rehabilitation in the central cities to make them habitable and to decrease the continuing pressure on the low- and moderate-income housing market. This approach would be more labor intensive and would produce more jobs for inner city youth, as well as for construction workers, than the types of programs that are presently being funded, frequently to build non-essential public buildings.

State Employment Service (ES)

An improved ES placement service emphasizing its role as a Labor Exchange would not only improve services to youth, but could also have an economic impact. Paucity of data makes it difficult to determine by how much unemployment could be reduced, if openings listed with ES were rapidly filled, but the difference should be considerable. If employers were required to list all jobs with the ES as a requirement of the Unemployment Compensation system, more jobs would be available for more referrals; this would also reduce unemployment and in turn would have its effect on the economy.

2. *Programs affecting the economy*

Employment Tax Credit

An Employment Tax Credit targeted on providing a tax credit to employers based on the employment of additional youth should be studied. Such a tax is expected to produce low-skilled blue-collar jobs, which should increase employment of Black youth. This could be substituted for the investment tax credit currently in effect, which apparently works against increased employment of Black youth.[1]

Social Security and the Minimum Wage

A lower minimum wage for youth is often suggested as a means of increasing youth employment. Bernard Anderson's study indicates that a youth wage below minimum wages would exacerbate the problems which characterize the employment of youth, such as high turnover rates. Also it has been predicted that a reduction of minimum wage for teenagers could create 800,000 jobs for youth, but could also simultaneously reduce adult employment by about 500,000, a very questionable price to pay. An alternative approach to reducing the cost of employing youth without reducing the take home pay of the working youth is needed.

One option to be explored is utilization of the social security system to encourage employers to hire youth. If employers were relieved of paying their share of the Social Security tax for youth, the youth would continue to receive income at the minimum wage level, but employing youth would become more attractive to employers. In effect, employers would be saving 5.8% of the youth's salary. The funds in the Social Security system could be made up over the years, and in any case, if youth are not employed, no social security contribution would be made at all.

Unemployment Compensation

An in-depth study of Unemployment Compensation is long overdue. It is important to determine whether its present administration encourages youth to remain unemployed, particularly in its extended time coverage, and permits youth to refuse jobs because they are not "suitable" with no time limitation for a "cut-off."

Research in Subsidized Youth Employment

The impact of investment in subsidized youth employment programs as an immediate economic stimulus warrants further study. Much of the proposed tax reduction to adults and families will be allocated to debt reduction, whereas youth are likely to put any money they earn directly into the purchase of goods, thereby providing an immediate stimulus to the economy.

Agency Structure and Allocation Formula

Whatever programs are instituted, the state and local CETA structure already in place should have the responsibility for any new youth programs. However, a new for-

[1] E. R. Berndt, J. R. Kesselman, and S. H. Williamson, *Tax Credits for Employment Rather than Investment*, Institute for Research on Poverty,

mula should be developed to allocate funds to jurisdictions where youth and their problems are concentrated. Such factors as incidence of poverty based on family income, low labor force participation rate, low employment rate and high unemployment rates, and youth population (as opposed to total population) should be included in any allocation formula.

TABLE 3.—SUMMARY OF PAPER

Black youth	Actual unemployment rate [1]	Type of unemployment [2]	Type of programs presently offered [3]	Possible new programs [4]
In school type A	32.8 percent	Frictional	CETA—Work experience, summer program, vocational education.	Transition from school to work; improved ES services.
Out of school, type B: high school graduates and above.	30.3 percent	Cyclical	On-the-job training; JOBS; institutional training; work experience.	Subsidized public and private employment; Public Works Act.
Type C: Dropouts	36.9 percent	Structural	Job Corps; work experience	Improved ES services.

[1] White labor force participation rate minus black labor force participation rate plus reported unemployment rates equals actual unemployment rate.
[2] Each group falls typically, but not exclusively, in these categories.
[3] The limitations of these programs are described in the section: Assessment of Current Programs.
[4] Programs affecting the economy would impact all groups.

PROPOSED TAX CREDIT TO VETERANS

(Mr. HAMMERSCHMIDT asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. HAMMERSCHMIDT. Mr. Speaker, today, I am introducing a bill that would provide a tax credit of $1,500 spread over a 3-year period for every honorably discharged veteran who had served in a combat zone. Members will recall that I informed them yesterday that Senator STEVENS of Alaska had introduced a similar bill on this subject in the other body. For those who may be interested in the equity involved in this measure, I should point out that my bill excludes those veterans whose discharges are eligible for upgrading as a result of the Department of Defense announcement of 2 days ago from participating in the tax credit.

THE SALES REPRESENTATIVES PROTECTION ACT

(Mr. OTTINGER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. OTTINGER. Mr. Speaker, I am introducing today a revised version of the Sales Representatives Protection Act, a bill which I first cosponsored in the 94th Congress. If enacted, this legislation will go a long way in protecting independent salesmen from the abuses they now face.

Independent sales representatives are the lifeline of this Nation's free enterprise system. As the essential link between thousands of manufacturers and the multitudes of wholesalers and retailers, they represent a vital safeguard of free entry to the marketplace. The fact is that virtually any small firm or individual with an innovative idea can market a new product by using the resources of independent salesmen, who work for commission only.

Unfortunately, the very source of the independent salesman's versatility—his commissioned salary—is also the source of his greatest vulnerability. Some unscrupulous manufacturers rob the sales representative of the commission he has earned while diligently working to build up an account for a principal. It is a devastating situation for the representative who has invested much time and personal resources in an account—all to the financial benefit of his principal—only to have his territory cut, his commission slashed, or an entire segment of business transformed into a "house account." The salesman is now without recourse to protect himself from these assaults upon his basic financial rights.

The Sales Representatives Protection Act provides a system of post-termination compensation in the event that a salesman is abruptly terminated. The purpose of this bill is simply to insure that a salesman is indemnified by his principal if he is terminated without reasonable compensation or his financial position is otherwise abused. It also stipulates minimal conditions to be met in any contract between a sales representative and his principal.

Last year, the Subcommittee on Consumer Protection and Finance of the House Commerce Committee conducted a day of hearings on H.R. 13180, the predecessor of this bill. In response to some of the constructive criticism offered at that time, I have made a significant change in this legislation.

The act now provides that salesmen who have contracts with their principals will be exempt from the indemnification mechanism of title I, provided that the contract meets the specifications required by the act and insures that the principal will give 30 days of notice before terminating a sales representative for each year that the salesman has worked, up to a maximum of 90 days. The purpose of this change is to encourage sales representatives and their principals to enter into reasonable contracts that provide adequate protection for the representative.

Mr. Speaker, it is nearly 30 years since the playwright Arthur Miller first shocked the American people with his "Death of a Salesman," a grim portrayal of the grueling life of a sales representative. Since that time, few advances have been made to improve the rights and working conditions of these important contributors to the American economy. They are in limbo between the powerful organizations of both labor and management. The salesman is not eligible for union membership; he has gained neither workmen's compensation nor unemployment insurance. The Willy Lomans of the United States still look to the Congress for the equitable working conditions they deserve. On their behalf, I urge my colleagues to lend their support to the Sales Representatives Protection Act.

The text of the bill follows:

H.R. 5824

A bill to provide for payments to certain sales representatives terminated from their accounts without justification, to provide for the scope of contracts between sales representatives and their principals, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Sales Representatives Protection Act".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress makes the following findings:

(1) Many individuals who work as sales representatives for business firms are independent contractors who are compensated primarily by commission.

(2) Such sales representatives generate sales without which the economy of the United States would not produce needed goods and services.

(3) Such sales representatives operate most effectively and productively when assured that they will be compensated for their efforts in accordance with the terms of their contracts with their principals.

(4) Such sales representatives do not generally have the benefits of workmen's compensation, unemployment compensation, or company-sponsored retirement or pension plans and are not eligible to bargain collectively.

(5) Such sales representatives invest their own time and resources in the development of their territories and markets.

(6) Many sales representatives are subjected to wrongful termination from their accounts, reduction in the size of their sales territories, conversion of their accounts to house accounts serviced directly by their principals, and other abuses which deny such sales representatives the full benefits of their labor.

(7) It is in the public interest to provide a means by which sales representatives who are wrongfully terminated may be reasonably compensated for such termination.

(b) The purpose of this Act is to provide a reasonable and equitable system under which sales representatives may be indemnified for commissions denied them because of wrongful terminations.

SEC. 3. For the purposes of this Act:

(1) The term "principal" means any person who—

(A) is engaged in the business of manufacturing, producing, assembling, importing, or distributing merchandise for sale in commerce to a customer who purchases such merchandise for resale or for use in business;

(B) utilizes sales representatives to solicit orders for such merchandise; and

(C) compensates such sales representatives, in whole or in part, by commission.

(2) The term "sales representative" means any person (other than an agent-driver or commission-driver) who is an independent

contractor engaged in the business of soliciting, on behalf of a principal, orders for the purchase of such principal's merchandise.

(3) The term "good cause" means conduct on the part of a sales representative with respect to a principal of such sales representative which constitutes—

(A) dishonesty or fraud or other criminal activity;

(B) a material breach of the contract between such sales representative and such principal;

(C) failure to put forth a good faith effort to obtain orders for the merchandise of such principal; or

(D) gross negligence in the performance of the duties of such sales representative.

(4) The term "commerce" means trade, traffic, transmission, communication, or transportation—

(A) between a place in a State and any place outside thereof; or

(B) which affects trade, traffic, transmission, communication, or transportation described in subparagraph (A).

(5) The term "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, and the Canal Zone.

TITLE I—INDEMNIFICATION

INDEMNIFICATION BY PRINCIPAL OF UNJUSTLY TERMINATED SALES REPRESENTATIVE

SEC. 101. (a)(1) Except as provided in paragraph (3), any principal who, without good cause, terminates any sales representative from an assignment to solicit orders on behalf of such principal from an account of such sales representative described in paragraph (2) shall indemnify such sales representative in accordance with section 102(a).

(2) An account referred to in paragraph (1) is a customer of a principal—

(A) which purchases merchandise of such principal through a sales representative of such principal for resale or for use in business;

(B) the business of which with such principal—

(i) was initially solicited by such sales representative; or

(ii) was not less than 50 per centum greater in dollar volume in any twelve-month period during which such sales representative was a party to a contract or contracts with such principal under which such sales representative solicited orders from such customer than in the twelve-month period ending with the month preceding the month in which such a contract was first entered into; and

(C) to which such sales representative was assigned to solicit orders on behalf of such principal for a period of not less than eighteen months immediately preceding the termination by such principal referred to in paragraph (1).

(3) This subsection shall not apply to any principal who, for a period of two years after a termination referred to in paragraph sales representatives, nor accepts orders from the account involved in such termination.

(b)(1) Any principal who, without good cause and for the primary purpose of preventing a sales representative from becoming entitled to an indemnification under subsection (a)(1), terminates such sales representative from an assignment to solicit orders on behalf of such principal from an account of such sales representative described in paragraph (2) shall be liable to such sales representative in the amount described in section 102(a)(2)(A).

(2) An account referred to in paragraph (1) is a customer of a principal—

(A) which purchases merchandise of such principal through a sales representative of such principal for resale or for use in business; and

(B) to which such sales representative was assigned to solicit orders on behalf of such principal for a period of not less than twelve months immediately preceding the termination by such principal referred to in paragraph (1).

(c)(1)(A) Any principal who reduces the size of the geographic territory, if any, which such principal has assigned to a sales representative with respect to an account of such sales representative described in paragraph (4) shall, if such reduction results in a reduction of not less than 25 per centum in the dollar amount of commissions paid by such principal to such sales representative for orders accepted from such account in the twelve-month period immediately following such reduction in geographic territory compared with the dollar amount of commissions paid by such principal to such sales representative for orders accepted from such account in the immediately preceding twelve-month period, indemnify such sales representative in accordance with paragraph (3).

(B) In any determination under subparagraph (A), any reduction in the dollar amount of commissions paid by such principal to such sales representative because such principal failed to fill orders submitted by such account due to an act of God, an act of war or insurrection, a strike, or an act of an agency of government shall be disregarded.

(2) Any principal who reduces the rate of commission paid to a sales representative of such principal for orders accepted by such principal from an account of such sales representative described in paragraph (4) shall, if the total effect of such reductions in any twelve-month period is a reduction in rate of commission of not less than 25 per centum, indemnify such sales representative in accordance with paragraph (3).

(3) Upon a reduction in amount of commissions described in paragraph (1) or a reduction in rate of commission described in paragraph (2), the principal causing such reduction shall—

(A) if the sales representative involved elects to terminate his relationship with such principal with respect to the account involved, indemnify such sales representative for such reduction in accordance with section 102(a); or

(B) indemnify such sales representative for such reduction in accordance with section 102(b).

(4) An account referred to in paragraphs (1) and (2) is an account described in subsection (a)(2), except that the reference in subparagraph (C) of such subsection to a termination by a principal is, for the purposes of this paragraph, a reference to a reduction by such principal described in paragraph (1) or (2).

COMPUTATION OF INDEMNITY

SEC. 102. (a)(1) Subject to paragraph (2), any principal required under section 101(a) or 101(c)(3)(A) to indemnify a sales representative shall be liable to such sales representative in an amount computed by multiplying—

(A) the amount which is the greater of—

(i) one-twelfth the sum of the commissions paid or to be paid such sales representative for orders accepted by such principal from the account from which such sales representative has been terminated in the twelve-month period preceding the date of such termination; or

(ii) the sum of the commissions paid or to be paid such sales representative for orders accepted by such principal from such account in the shorter of—

(I) the thirty-six-month period preceding the date of such termination; or

(II) the period in which such sales representative was a party to a contract or contracts with such principal under which such sales representative solicited orders from such account;

divided by the number of months in such period;

(B) the number of months in which such sales representative was a party to a contract or contracts with such principal under which such sales representative solicited orders from such account; and

(C) 10 per centum.

(2)(A) In no event shall the amount of any liability of a principal to a sales representative computed under paragraph (1) exceed the greater of—

(i) the sum of the commissions paid or to be paid such sales representative for orders accepted by such principal from the account from which such sales representative has been terminated in the twelve-month period preceding the date of such termination; or

(ii) the sum of the commissions paid or to be paid such sales representative for orders accepted by such principal from such account in the shorter of—

(I) the three-year preceding the date of such termination; or

(II) the period in which such sales representative was a party to a contract or contracts with such principal under which such sales representative solicited orders from such account;

divided by the number of years (stated to the nearest twelfth part of a year) in such period.

(B) The amount of any liability of a principal to a sales representative computed under paragraph (1) with respect to an account of such sales representative shall be reduced by the amount of any indemnification computed under subsection (b) which was paid by such principal to such sales representative with respect to such account.

(3) For the purpose of computing the amount of any liability under paragraph (1), any sales representative whose amount of commissions have been reduced as described in section 101(c)(1) or whose rate of commission has been reduced as described in section 101(c)(2) may treat the date of such reduction as the date of termination referred to in such paragraph.

(b) Upon election by a sales representative under section 101(c)(3) not to terminate his relationship with a principal with respect to an account after such principal has caused a reduction in amount of commissions described in section 101(c)(1) or rate of commission described in section 101(c)(2), such principal shall be liable to such sales represenative in an amount computed by determining the amount to which such sales representative would be entitled under subsection (a) if such reduction were a termination under section 101(a) and multiplying such amount by the percentage of such reduction.

PAYMENT OF INDEMNITY RESULTING FROM SETTLEMENT

SEC. 103. (a) Following the making of a binding agreement to settle a claim by a sales representative against a principal for an indemnity under this title, the principal involved shall pay the amount of such settlement to such sales representative—

(1) not later than thirty days after the date of such agreement; or

(2) if the amount of such settlement is greater than $3,000, in the manner described in subsection (b); whichever such principal elects.

(b) A principal electing under subsection (a) to pay the amount of a settlement in excess of $3,000 under this subsection—

(1) shall pay not less than 40 per centum of such amount to the sales representative referred to in subsection (a) not later than thirty days after the date of the agreement to make such settlement; and

(2) shall, at the time of the payment referred to in paragraph (1), give such sales representative two negotiable notes, each for one-half of the balance of such amount, one of which shall be due not later than twelve

months after the date of such agreement and shall bear interest at twice the highest rate of interest paid by the United States on notes issued by it during any three-day period including such date to be due in twelve months and the other of which shall be due not later than twenty-four months after the date of such agreement and shall bear interest at twice the highest rate of interest paid by the United States on notes issued by it during any three-day period including such date to be due in twenty-four months.

TITLE II—CONTRACTS BETWEEN SALES REPRESENTATIVES AND PRINCIPALS

CONTRACT TERMS

SEC. 201. Any contract between a sales representative and a principal under which such sales representative shall solicit orders for the merchandise of such principal shall include a provision with respect to each of the following items:

(1) The rate of commission to be paid by such principal to such sales representative for orders accepted by such principal from an account of such sales representative, and a statement of any other form of compensation to be paid by such principal to such sales representative.

(2) The amount and method of payment of any advance on the future compensation of such sales representative to be given by such principal to such sales representative, and the terms under which such principal will recover such advance.

(3) The amount of notice, if any, such principal shall give such sales representative before terminating such sales representative provided that such notice is not less than 30 days after one year of representation, not less than 60 days after two years of representation, and not less than 90 days after three years of representation, and the manner in which any such notice shall be given.

(4) A description of the sales territory, if any, assigned to such sales representative and a statement of whether such territory will be an exclusive territory of such sales representative with respect to the merchandise, or a line of merchandise, of such principal.

(5) The terms, if any, under which disputes between such principal and such sales representative shall be submitted to arbitration, including, if such disputes shall be submitted to arbitration, the method to be used in selecting the arbitrator.

(6) The ownership of any samples furnished by such principal to such sales representative for use in business.

(7) The number of days after an order for the merchandise of such principal is transmitted by such sales representative to such principal within which such principal must notify such sales representative whether such order has been accepted or rejected.

(8) The terms, if any, under which such sales representative will be paid a commission for an order which was transmitted by such sales representative to such principal before the termination of such sales representative from the account from which such order was transmitted, but which was accepted by such principal after such termination.

(9) The terms, if any, under which such sales representative will receive copies of shipping documents which relate to merchandise shipped by such principal to an account of such sales representative.

(10) The terms, if any, under which such sales representative will be allowed to solicit orders for the merchandise of other principals.

DUTIES OF PRINCIPAL

SEC. 202. Any principal who enters into a contract with a sales representative under which such sales representative shall solicit orders for the merchandise of such principal shall—

(1) inform such sales representative, within a reasonable time to be specified in such contract, of such principal's receipt of each order from an account of such sales representative;

(2) furnish such sales representative, within a reasonable time to be specified in such contract, copies of all invoices and credit memorandums issued with respect to sales in the assigned geographic territory, if any, of such sales representative;

(3) furnish such sales representative monthly statements of commissions due such sales representatives; and

(4) provide such sales representative, upon the request of such sales representative—

(A) an accounting showing each sale made by such principal in the preceding twelve months in the assigned geographic territory, if any, of such sales representative;

(B) information with respect to any matter which is related to any claim by such sales representative against such principal for a commission; and

(C) access to the records of such principal for the purpose of verifying information supplied under subparagraphs (A) and (B).

TITLE III—MISCELLANEOUS

PROCEDURE

SEC. 301. (a) An action to enforce any rights of liabilities created by this Act may be brought in a district court of the United States without regard to the amount in controversy or in any other court of competent jurisdiction.

(b) In the case of an action arising under this Act which is brought in a district court of the United States, such action may be brought in the judicial district where all the plaintiffs reside in addition to any other judicial district provided by law.

(c) No action may be brought under this Act later than five years after the right to such action first arises.

(d) In any action brought by any sales representative against any principal under this Act, the burden of proof on the issue of whether such principal acted without good cause shall rest on such principal.

(e) In any successful action brought by a sales representative under this Act, the court may award reasonable attorneys' fees and the cost of the action to such sales representative.

WAIVER PROHIBITED

SEC. 302. Any provision in any contract between any sales representative and any principal requiring such sales representative to waive any of the provisions of this Act shall be void. However, where a contract which conforms with the provisions of Title II of the Act exists, the indemnification provisions of Title I shall not apply.

EFFECT ON STATE LAW

SEC. 303. Nothing in this Act shall invalidate or restrict any right or remedy of any sales representative under the law of any State.

EFFECTIVE DATE

SEC. 304. Sections 101, 201, and 202 of this Act shall take effect at the end of the ninety-day period beginning with the date of enactment of this Act.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows for:

Mr. HEFTEL (at the request of Mr. WRIGHT), after 3:30 p.m. today, through April 6, 1977, on account of official business.

Mr. FOUNTAIN (at the request of Mr. WRIGHT), until 2:30 today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MARLENEE) and to revise and extend their remarks and include extraneous matter:)

Mr. RAILSBACK, for 5 minutes, today.

Mr. WHALEN, for 5 minutes, today.

Mr. STEERS, for 5 minutes, today.

Mr. MCKINNEY, for 60 minutes, on Tuesday, April 5, immediately following Mr. PREYER.

(The following Member (at the request of Ms. OAKAR), to revise and extend their remarks, and to include extraneous matter.)

Mr. FLOOD, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. BEDELL, for 5 minutes, today.

Mr. BONKER, for 5 minutes, today.

Mr. KASTENMEIER, for 10 minutes, today.

Mr. BRADEMAS, for 5 minutes, today.

Mr. KRUEGER, for 5 minutes, today.

Mr. MITCHELL of Maryland, for 60 minutes, on March 31.

Mr. PREYER, for 60 minutes, on April 5.

(The following Members (at the request of Mr. GONZALEZ), to revise and extend their remarks, and to include extraneous matter:)

Ms. HOLTZMAN, for 15 minutes, today.

Mr. VANIK, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. KOCH, to revise and extend his remarks during consideration of H. Res. 445 today.

Mr. QUILLEN to include extraneous material in his remarks during consideration of House Resolution 445 today.

(The following Members (at the request of Mr. MARLENEE) and to include extraneous matter:)

Mr. VANDER JAGT.

Mr. DERWINSKI in three instances.

Mr. SCHULZE in three instances.

Mr. MCCLOSKEY.

Mr. MCEWEN.

Mr. ANDERSON of Illinois in two instances.

Mr. FRENZEL in five instances.

Mr. COLLINS of Texas in three instances.

Mr. QUAYLE.

Mr. RUDD.

Mr. RINALDO.

Mr. ABDNOR in two instances.

Mr. DEL CLAWSON.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 964. An act to provide that the salaries of certain positions and individuals which were increased as a result of the operation of the Federal Salary Act of 1967 shall not be increased by the first comparability pay adjustment occurring after the date of the enactment of this Act; to the committee on Post Office and Civil Service.

ENROLLED JOINT RESOLUTION SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the followinng title, which was thereupon signed by the Speaker:

H.J. Res. 351. Joint resolution making further continuing appropriations for the fiscal year 1977, and for other purposes.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 40 minutes p.m.), the House adjourned until tomorrow, Thursday, March 31, at 11 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1126. A letter from the Secretary of Agriculture, transmitting notice of a delay in submission of the report on Dutch elm disease due by March 1, 1977 under section 20 of the National Forest Management Act of 1976; to the Committee on Agriculture.

1127. A letter from the Chairman National Advisory Council on the Education of Disadvantaged Children, transmitting the Council on the Education of Disadvantaged Children, transmitting the Council's 1977 annual report pursuant to section 134(c) of the Elementary and Secondary Education Act, as amended (84 Stat. 125); to the Committee on Education and Labor.

1128. A letter from the Secretary of the Interior, transmitting the sixth annual report on the operation of the Colorado River, covering actual operation during water year 1976 and a projected plan of operation for water year 1977, pursuant to section 602(b) of Public Law 90–537; to the Committee on Interior and Insular Affairs.

1129. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

1130. A letter from the Administrator, Federal Energy Administration, transmitting a clarification of the explanatory materials accompanying Energy Action No. 11 (H. Doc. No. 95–115); to the Committee on Interstate and Foreign Commerce and ordered to be printed.

1131. A letter from the Acting Assistant General Counsel for International, Conservation, and Resource Development Programs, Federal Energy Administration, transmitting notice of a meeting related to the International Energy Program to be held April 5 and 6, 1977, in Paris, France; to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DODD: Committee on Rules. House Resolution 448. Resolution providing for the consideration of H.R. 4976. A bill to amend the Public Health Service Act, the Community Mental Health Centers Act, title V of the Social Security Act, and the program of assistance for home health services to authorize appropriations for fiscal year 1978 for health services programs, and for other purposes (Rept. No. 95–140). Referred to the House Calendar.

Mr. DODD: Committee on Rules. House Resolution 449. Resolution providing for the consideration of H.R. 4975. A bill to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for biomedical research and related programs (Rept. No. 95–141). Referred to the House Calendar.

Mr. LONG of Louisiana: House Resolution 450. Resolution providing for the consideration of H.R. 4974. A bill to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for health planning and related programs (Rept. No. 95–142). Referred to the House Calendar.

Mr. SISK: Committee on Rules. House Resolution 451. Resolution providing for the consideration of H.R. 4895. A bill to amend the Strategic and Critical Materials Stock Piling Act, and for other purposes (Rept. No. 95–143). Referred to the House Calendar.

Mr. BROOKS: Committee on Government Operations. Report on allocation of budget totals by program. (Rept. No. 95–144). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BALDUS:

H.R. 5754. A bill to authorize the Small Business Administration to make grants to support the development and operations of small business development centers in order to provide small business with management development, technical information, product planning and development, and domestic and international market development, and for other purposes; to the Committee on Small Business.

By Mr. BEDELL:

H.R. 5755. A bill to amend the Internal Revenue Code of 1954 to treat certain income derived by tax-exempt organizations from investments in farmland as unrelated business taxable income; to the Committee on Ways and Means.

By Mr. BLOUIN:

H.R. 5756. A bill to amend the Clayton Act to provide for additional regulation of certain anticompetitive developments in the agricultural industry; to the Committee on the Judiciary.

By Mr. BOLAND (for himself, Mr. CONTE, Mr. EARLY, Mr. HARRINGTON, Mr. MARKEY, Mr. MOAKLEY, Mr. STUDDS, and Mr. TSONGAS):

H.R. 5757. A bill to amend the Internal Revenue Code of 1954 to encourage manufacturing-related investments in any State which has an unemployment rate which exceeds 6 percent; to the Committee on Ways and Means.

By Mr. BOWEN (for himself and Mr. MOORE):

H.R. 5758. A bill to provide price and income protection for cotton farmers and assure consumers plentiful supplies of food and fiber at reasonable prices; to the Committee on Agriculture.

By Mr. BRODHEAD:

H.R. 5759. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for State and local utility taxes; to the Committee on Ways and Means.

H.R. 5760. A bill to provide medicare coverage for orthopedic shoes or other supportive devices prescribed by a physician for correction or treatment of abnormalities of the feet or legs which cause serious detrimental medical effects; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. BROOKS (for himself, Mr. BAUCUS, Mr. HARRINGTON, Mr. NEAL, and Mr. PATTEN):

H.R. 5761. A bill to establish a Department of Energy in the executive branch by the reorganization of energy functions within the Federal Government in order to secure effective management to assure a coordinated national energy policy, and for other purposes; to the Committee on Government Operations.

By Mr. BROOMFIELD:

H.R. 5762. A bill to terminate age discrimination in employment; to the Committee on Education and Labor.

By Mr. BROWN of Ohio (for himself, Mr. HOLLENBECK, Mr. BURLESON of Texas, Mr. COLLINS of Texas, Mr. KINDNESS, Mr. DEVINE, Mr. MOORHEAD of California, Mr. FREY, Mr. EILBERG, Mr. MARKS, Mr. LEGGETT, Mr. JEFFORDS, Mr. FRENZEL, and Mr. PATTISON of New York):

H.R. 5763. A bill to amend the Federal Food, Drug, and Cosmetic Act with respect to food additives; to the Committee on Interstate and Foreign Commerce.

By Mr. CARNEY:

H.R. 5764. A bill to establish a utility services stamp program to assist low-income and fixed income households to meet the rising cost of utilities; to the Committee on Interstate and Foreign Commerce.

By Mr. COLLINS of Texas:

H.R. 5765. A bill to amend the Communications Act of 1934 to permit the Federal Communications Commission to deny the renewal of any radio or television broadcast license if the licensee has broadcast information regarding certain crimes in a manner which impeded law enforcement efforts; to the Committee on Interstate and Foreign Commerce.

By Mr. CORMAN (for himself, Mr. CLEVELAND, Mr. CORCORAN of Illinois, Mr. FITHIAN, Mr. HEFTEL, Mr. HYDE,

Mr. JENRETTE, Mr. LUJAN, Mr. MADIGAN, Mr. MOAKLEY, Mr. MURPHY of New York, Mr. RANGEL, Mr. RISENHOOVER, Mr. SOLARZ, Mr. STEED, Mr. STEERS, Mr. TRAXLER, and Mr. WEAVER):

H.R. 5766. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for optometric and medical vision care; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. ROBERT W. DANIEL, JR. (for himself, Mr. MCDADE, Mr. RICHMOND, Mr. MITCHELL of New York and Mr. WIRTH):

H.R. 5767. A bill to provide that the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay shall only apply to taxable years beginning after December 31, 1976; to the Committee on Ways and Means.

By Mr. EDGAR:

H.R. 5768. A bill to amend the Federal Hazardous Substances Act, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. EDGAR (for himself, Mr. BADILLO, Mr. BAUCUS, Mr. JOHN L. BURTON, Mr. CARR, Mr. CORNWELL, Mr. HANNAFORD, Mr. HOLLENBECK, Mr. KOSTMAYER, Mr. LENT, Mr. LEVITAS, Mr. LLOYD of California, Mr. MATHIS, Mr. MAZZOLI, Mr. MOAKLEY, Mr. PANETTA, Mr. RICHMOND, Mr. RUSSO, Mr. SEIBERLING, Mr. SOLARZ, Mrs. SPELLMAN, Mr. STARK, and Mr. WEISS):

H.R. 5769. A bill to amend title 39, United States Code, to establish a special rate of postage for postal cards mailed to Members of the Congress by their constituents; to the Committee on Post Office and Civil Service.

By Mr. EDWARDS of Alabama:

H.R. 5770. A bill to modify the project for navigation improvements in Mobile Harbor, Theodore Ship Channel, Ala., and for other purposes; to the Committee on Public Works and Transportation.

By Mr. EVANS of Georgia:

H.R. 5771. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to grant additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 5772. A bill to amend the Internal Revenue Code of 1954 to exempt certain agricultural aircraft from the aircraft use tax, to provide for the refund of the gasoline tax to the agricultural aircraft operator, and for other purposes; to the Committee on Ways and Means.

By Mr. EVANS of Georgia (for himself, Mr. WINN, Mr. SIMON, Mr. ERTEL, Mrs. SPELLMAN, Mr. CORNWELL, Mr. LE FANTE, and Mr. MOORHEAD of California):

H.R. 5773. A bill to amend section 203 of the Federal Property and Administrative Services Act of 1949 to require, prior to disposal, that notice and first right of refusal be given to certain previous owners of surplus real property; to the Committee on Government Operations.

By Mr. FISHER (for himself, Mr. CORRADA, Mr. DAN DANIEL, Mr. PATTERSON of California, Mr. PRICE, and Mr. STEERS):

H.R. 5774. A bill to restore to Federal civilian and Postal Service employees their rights to participate voluntarily, as private citizens, in the political processes of State and local governments, to protect such employees from improper political solicitations, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. GOODLING:

H.R. 5775. A bill to permit the marketing of saccharin with labeling warning of evidence of its risk to health; to the Committee on Interstate and Foreign Commerce.

By Mr. GONZALEZ:

H.R. 5776. A bill to amend section 2254 (relating to Federal habeas corpus for certain persons in State custody) of title 28 of the United States Code to provide that the exclusionary rule apply in cases under that section to the same extent that the exclusionary rule would apply in an appellate proceeding arising out of the conviction on which such custody is based; to the Committee on the Judiciary.

By Mr. HALL:

H.R. 5777. A bill to amend the Federal Food, Drug, and Cosmetic Act respecting the standard for the regulation of food additives found to induce cancer; to the Committee on Interstate and Foreign Commerce.

H.R. 5778. A bill to amend the Federal Water Pollution Control Act defining the term "navigable waters"; to the Committee on Public Works and Transportation.

H.R. 5779. A bill to amend the Federal Water Pollution Control Act; to the Committee on Public Works and Transportation.

By Mr. HAMMERSCHMIDT:

H.R. 5780. A bill to provide Combat Bonuses for Honorable Vietnam Service through tax credits; to the Committee on Ways and Means.

By Mr. HEFTEL:

H.R. 5781. A bill to provide a minimum level for retirement salaries of certain Federal judges to territories and possessions; to the Committee on the Judiciary.

By Ms. HOLTZMAN (for herself, Mr. SOLARZ, and Mr. TREEN):

H.R. 5782. A bill to amend the Immigration and Nationality Act to exclude from admission into and to deport from the United States all aliens who persecuted others on the basis of religion, race, or national origin under the direction of the Nazi Government of Germany; to the Committee on the Judiciary.

By Mr. KASTENMEIER (for himself and Mr. DODD):

H.R. 5783. A bill to amend title 39, United States Code, to establish procedures to regulate the manner in which the U.S. Postal Service may close post offices serving rural areas and small communities and towns; to the Committee on Post Office and Civil Service.

By Mr. LEACH:

H.R. 5784. A bill to provide for the phased withdrawal of U.S. ground forces from the Republic of Korea; to the Committee on International Relations.

By Mr. MCCORMACK:

H.R. 5785. A bill to name the lake located behind Lower Monumental Lock and Dam, Washington, Lake Herbert G. West; to the Committee on Public Works and Transportation

By Mr. MCDADE (for himself, Mr. AMMERMAN, Mr. BADILLO, Mr. BIAGGI, Mr. DOWNEY, Mrs. FENWICK, Mrs. MEYNER, Mr. JOHN T. MYERS, Mr. PURSELL, Mr. QUILLEN, Mr. STRATTON, and Mr. VANDER JAGT):

H.R. 5786. A bill to establish a Charles S. Peirce National Historical Site in the Delaware Water Gap National Recreation Area; to the Committee on Interior and Insular Affairs

By Mr. OBERSTAR:

H.R. 5787. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to require as a condition of assistance under such act that law enforcement agencies have in effect a binding law enforcement officers' bill of rights; to the Committee on the Judiciary.

By Mr. OBERSTAR (for himself, Mr. RYAN, Mr. NOLAN, Mr. HARRIS, Mr. NEAL, Mr. DICKS, Mr. AKAKA, Mr. VENTO, Mr. FLORIO, Mr. LEHMAN, Mr. MURPHY of Pennsylvania, and Mr. HARKIN):

H.R. 5788. A bill to provide for the procurement by the General Services Administration of existing solar energy devices for use in Government buildings; to the Committee on Public Works and Transportation.

By Mr. QUILLEN:

H.R. 5789. A bill to amend the Social Security Act to provide for the payment of services by psychologists, and for other purposes; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 5790. A bill to amend titles XVIII and XIX of the Social Security Act to provide for a greater utilization of the professional services of qualified clinical social workers in the medicare and medicaid programs, to include outpatient services, community mental health centers, and neighborhood health centers among the entities which may be qualified providers, and to remove the special limitations which are presently imposed on coverage of psychiatric and mental health services under parts A and B of title XVIII and title XIX; jointly to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. RAILSBACK:

H.R. 5791. A bill to reduce the burden on the Federal courts of prisoners' suits brought under section 1983 of title 42, United States Code, to improve the administration of State institutions holding confined persons, and for other persons; to the Committee on the Judiciary.

H.R. 5792. A bill to amend title 18, United States Code, to permit a Federal court, upon the recommendation of the U.S. prosecutor, to place certain persons charged with Federal crimes in programs of community supervision and services; to the Committee on the Judiciary.

H.R. 5793. A bill relating to the employment and training of criminal offenders, and for other purposes; to the Committee on the Judiciary.

H.R. 5794. A bill to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information; to the Committee on the Judiciary.

By Mr. RAILSBACK (for himself and Mr. KASTENMEIER):

H.R. 5795. A bill to regulate lobbying and related activities; to the Committee on the Judiciary.

By Mr. RANGEL:

H.R. 5796. A bill to amend the Internal Revenue Code of 1954 to deny the foreign tax credit for any tax paid or accrued to the Republic of South Africa; to the Committee on Ways and Means.

By Mr. REUSS (for himself and Mr. OTTINGER):

H.R. 5797. A bill to amend title I of the Housing and Community Development Act of 1974 for the purpose of providing that units of general local government receiving grants under the hold-harmless provisions of such title shall be entitled, after fiscal year 1977, to continue to receive at least the amount to which they are presently entitled under such provisions; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ROONEY:

H.R. 5798. A bill to amend the Interstate Commerce Act to authorize appropriations for the Office of Rail Public Counsel for fiscal year 1978; to the Committee on Interstate and Foreign Commerce.

By Mr. SCHULZE:

H.R. 5799. A bill to amend title 18 of the United States Code to increase the penalties

imposed for certain firearms violations; to the Committee on the Judiciary.

By Mr. SISK:

H.R. 5800. A bill to establish a national adoption information exchange system; to the Committee on Education and Labor.

H.R. 5801. A bill to amend the Land and Water Conservation Fund Act of 1965 to create the Disabled Eagle passport program under which disabled persons are admitted free to certain admission fee areas in national parks and national recreation areas, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 5802. A bill to amend the Land and Water Conservation Fund Act of 1965, as amended; to the Committee on Interior and Insular Affairs.

H.R. 5803. A bill to amend the Internal Revenue Code of 1954 to allow a deduction from gross income for social agency, legal, and related expenses incurred in connection with the adoption of a child by the taxpayer; to the Committee on Ways and Means.

By Mr. SISK (for himself, Mr. BADILLO, Mr. BLOUIN, Mr. DON H. CLAUSEN, Mr. COUGHLIN, Mr. DOWNEY, Mr. DRINAN, Mr. EDWARDS of California, Mr. EDWARDS of Oklahoma, Mr. EVANS of Delaware, Mrs. FENWICK, Mr. HARRINGTON, Mr. JEFFORDS, Mr. LAGOMARSINO, and Mr. LEHMAN):

H.R. 5804. A bill to amend the Immigration and Nationality Act to facilitate the adoption of more than two children; to the Committee on the Judiciary.

By Mr. SISK (for himself, Mr. MAGUIRE, Mr. MATHIS, Mr. MCCORMACK, Mrs. MEYNER, Mr. MINETA, Mr. OTTINGER, Mr. PIKE, Mr. RANGEL, Mr. ROYBAL, Mr. SARASIN, Mrs. SPELLMAN, Mr. SIMON, Mr. VOLKMER, and Mr. CHARLES WILSON of Texas):

H.R. 5805. A bill to amend the Immigration and Nationality Act to facilitate the adoption of more than two children; to the Committee on the Judiciary.

By Mr. UDALL:

H.R. 5806. A bill to provide for the development of certain minerals on public lands; and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ANDERSON of Illinois (for himself, Mr. BEVILL, Mr. DICKINSON, Mr. FISH, Mr. GUYER, Mr. HYDE, Mr. LAGOMARSINO, Mr. KRUEGER, Mr. MOORHEAD of Pennsylvania, Mr. JOHN T. MYERS, Mr. PATTISON of New York, Mr. PICKLE, Mr. PRITCHARD, Mr. SEBELIUS, and Mr. WHITEHURST):

H.R. 5807. A bill to provide Federal financial and technical assistance to the States to encourage the development and implementation of youth camp safety plans and programs; to the Committee on Education and Labor.

By Mr. BAUCUS:

H.R. 5808. A bill to amend medicare and medicaid provisions as they relate to rural health care facilities; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. BROWN of California (for himself, Mr. MCCORMACK, Mr. TEAGUE, Mr. PRICE, Mr. RODINO, Mr. PICKLE, Mr. HAWKINS, Mr. FASCELL, Mr. LEGGETT, Mr. HARRINGTON, Mr. FITHIAN, Mr. SEIBERLING, and Mr. NEAL):

H.R. 5809. A bill to establish a 5-year research and development program leading to advanced automobile propulsion systems, and for other purposes; to the Committee on Science and Technology.

By Mr. PHILLIP BURTON (for himself, Mrs. BURKE of California, Mr. RODINO, Mr. MOSS, Mr. LEGGETT, Mr. MAZZOLI, Mr. BROWN of California, Mr. CORMAN, Mr. DRINAN, Mr. DOWNEY, Mr. WEAVER, Mr. BADILLO, Mr. BEILENSON, Mr. DINGELL, Mrs. SPELLMAN, Mr. OTTINGER, Mr. DE LUGO, Mr. BRODHEAD, Mr. WALGREN, Mr. SCHEUER, Mr. MOAKLEY, Mr. FITHIAN, Mr. NEAL, Mr. CORRADA, and Mr. LAFALCE):

H.R. 5810. A bill to amend the act of October 2, 1968, an act to establish a Redwood National Park in the State of California and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. CORRADA:

By Mr. KINDNESS:

H.R. 5819. A bill to amend the Internal Revenue Code of 1954 to allow individuals a deduction for tuition expenses for the higher education of themselves, their spouses, or their dependents; to the Committee on Ways and Means.

By Mr. MCCORMACK (for himself, Mr. OTTINGER, Mr. AKAKA, Mr. AUCOIN, Mr. BADILLO, Mr. BEARD of Rhode Island, Mr. BEILENSON, Mr. BLANCHARD, Mr. BLOUIN, Mr. BONIOR, Mr. CAPUTO, Mr. CARR, Mrs. COLLINS of Illinois, Mr. CORNWELL, Mr. D'AMOURS, Mr. DANIELSON, Mr. DELLUMS, Mr. DOWNEY, Mr. EDGAR, Mr. EDWARDS of California, Mr. EMERY, Mr. ERTEL, Mr. FLORIO, Mr. FRASER, and Mr. GAYDOS):

H.R. 5820. A bill to promote the use of energy conservation, solar energy, and total energy systems in Federal buildings; to the Committee on Public Works and Transportation.

By Mr. MCCORMACK (for himself, Mr. OTTINGER, Mr. RISENHOOVER, Mr. RODINO, Mr. ROE, Mr. ROSE, Mr. RYAN, Mr. ST GERMAIN, Mr. SCHEUER, Mr. SEIBERLING, Mr. THONE, Mr. TSONGAS, Mr. UDALL, Mr. VAN DEERLIN, Mr. VENTO, Mr. WALGREN, Mr. WAXMAN, Mr. WEAVER, Mr. WEISS, Mr. CHARLES H. WILSON of California, Mr. CHARLES WILSON of Texas, Mr. WINN, Mr. WON PAT, and Mr. FORD of Michigan):

H.R. 5821. A bill to promote the use of energy conservation, solar energy, and total energy systems in Federal buildings; to the Committee on Public Works and Transportation.

By Mr. MARTIN (for himself, Mr. CONABLE, Mr. COCHRAN of Mississippi, Mrs. PETTIS, Mr. KELLY, Mr. MILLER of Ohio, Mr. LENT, Mr. MARLENEE, Mr. WHITLEY, Mr. COLEMAN, Mr. CORMAN, Mr. MCKINNEY, Mr. ROBINSON, Mr. JENKINS, Mr. WHITTEN, and Mr. MCCORMACK):

H.R. 5822. A bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it; to the Committee on Interstate and Foreign Commerce.

By Mr. MITCHELL of New York:

H.R. 5823. A bill to amend the Agricultural Act of 1970 for the purpose of authorizing the Secretary of Agriculture to include hay as a disaster reserve; and for other purposes; to the Committee on Agriculture.

By Mr. OTTINGER:

H.R. 5824. A bill to provide for payments to certain sales representatives terminated from their accounts without justification, to provide for the scope of contracts between sales representatives and their principles, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. PANETTA:

H.R. 5825. A bill to permit teachers to change employment across State lines without substantial loss of retirement benefits; to the Committee on Education and Labor.

By Mr. QUAYLE (for himself, Mr. DORNAN, Mr. O'BRIEN, Mr. ABDNOR, Mr. ROUSSELOT, Mr. KEMP, and Mr. BARNARD):

H.R. 5826. A bill to amend the Occupational Safety and Health Act of 1970 to provide that such act shall not apply to employers, including farming operations, having 25 or fewer employees; to the Committee on Education and Labor.

By Mr. RANGEL (for himself, Mr. BADILLO, Mr. BIAGGI, Mr. CAPUTO, Mrs. CHISHOLM, Mr. COTTER, Mr. DE LA GARZA, Mr. DIGGS, Mr. DRINAN, Mr. EDWARDS of California, Mr. ENGLISH, Mr. FLOOD, Mr. FREY, Mr. GILMAN, Mr. ERTEL, Mr. FAUNTROY, Mr. GUYER, Mr. HAWKINS, Mr. JENRETTE, Mr. KOCH, Mr. MITCHELL of Maryland, Mr. MOAKLEY, Mr. MURPHY of Illinois, Mr. NIX, and Mr. PEPPER):

H.R. 5827. A bill to direct the Attorney General to establish Special Drug Forces for the purpcse of providing temporary emergency law enforcement assistance to States and local governments; to the Committee on the Judiciary.

By Mr. RANGEL (for himself, Mr. PRICE, Mr. RAILSBACK, Mr. RICHMOND, Mr. VENTO, Mr. WEISS, Mr. WHITEHURST, Mr. CHARLES WILSON of Texas, Mr. CHARLES H. WILSON of California, and Mr. WON PAT):

H.R. 5828. A bill to direct the Attorney General to establish Special Drug Forces for the purpose of providing temporary emergency law enforcement assistance to States and local governments; to the Committee on the Judiciary.

By Mr. ROGERS:

H.R. 5829. A bill to amend the Public Health Service Act to authorize appropriations for certain fiscal years for purposes of providing assistance to the States with respect to safe drinking water; to the Committee on Interstate and Foreign Commerce.

H.R. 5830. A bill to amend the Public Health Service Act to extend certain authorities and authorize appropriations for certain fiscal years for purposes of providing assistance to the States with respect to safe drinking water, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. RUPPE:

H.R. 5831. A bill to establish a system for the development of mineral resources on public lands of the United States; to the Committe on Interior and Insular Affairs.

By Mr. SOLARZ (for himself, Mr. BEDELL, Mr. BROWN of California, Mrs. CHISHOLM, Mr. DELLUMS, Mr. EDWARDS of California, Mr. FLOOD, Mr. HARRINGTON, Mr. HAWKINS, Mr. JACOBS, Mrs. MEYNER, Mr. MITCHELL of Maryland, Mr. PATTISON of New York, Mr. ROSENTHAL, Mr. ROYBAL, Ms. SCHROEDER, and Mrs. SPELLMAN):

H.R. 5832. A bill to provide for the phased withdrawal of U.S. Armed Forces from Korea; to the Committee on International Relations.

By Mr. TRAXLER (for himself, Mr. BARNARD, Mr. RICHMOND, Mr. NEDZI, and Mr. BONIOR).

H.R. 5833. A bill to authorize the Secretary of Agriculture to make financial assistance available to agricultural producers who suffer losses as the result of having their agricultural commodities or livestock quarantined or condemned because such commodities or livestock have been found to contain toxic chemicals dangerous to the public health; to the Committee on Agriculture.

By Mr. VANIK (for himself, Mr. BADILLO, Mr. BAUCUS, Mr. BOWEN, Mr. EDWARDS of California, Mr. FINDLEY, Mr. HAWKINS, Mr. HIGHTOWER, Mr. LONG of Maryland, Ms. OAKAR, Mr. MURPHY of Pennsylvania, Mr. PATTERSON of California, Mr. ROSENTHAL, Mr. SEIBERLING, Mr. STARK, Mr. VENTO, Mr. WEISS, and Mr. OBERSTAR):

H.R. 5834. A bill to amend title II of the Social Security Act to raise the amount by which an individual's social security benefits are to be increased on account of delayed retirement; to the Committee on Ways and Means.

By Mr. VANIK (for himself, Mr. BADILLO, Mr. BAUCUS, Mr. BEDELL, Mr. BOWEN, Mr. EDWARDS of California, Mr. FINDLEY, Mr. HAWKINS, Mr. HIGHTOWER, Mr. LONG of Maryland, Ms. OAKAR, Mr. MURPHY of Pennsylvania, Mr. PATTERSON of California, Mr. ROSENTHAL, Mr. SEIBERLING, Mr. STARK, Mr. VENTO, Mr. WEISS, and Mr. OBERSTAR):

H.R. 5835. A bill to amend title II of the Social Security Act to increase the amount of outside earnings which (subject to future cost-of-living adjustments) is permitted any individual each year without deductions from benefits thereunder in the case of individuals receiving less than the maximum provided for benefits of the type involved; to the Committee on Ways and Means.

By Mr. WALSH:

H.R. 5836. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. DELLUMS (for himself, and Mr. CONYERS):

H.J. Res. 367. Joint resolution to provide independence for Puerto Rico; to the Committee on Interior and Insular Affairs.

By Ms. MIKULSKI:

H.J. Res. 368. Joint resolution to provide for a study of the effects of saccharin; to the Committee on Interstate and Foreign Commerce.

By Mr. BRODHEAD:

H. Res. 452. Resolution to amend rule XLIII of the Rules of the House of Represenatives respecting the solicitation or acceptance of gifts by Members of the House; to the Committee on Standards of Official Conduct.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

70. By the SPEAKER: Memorial of the Legislature of the State of Idaho, relative to designation of wilderness areas; to the Committee on Interior and Insular Affairs.

71. Also, memorial of the Legislature of the State of New Jersey, requesting that Congress call a convention for the purpose of proposing an amendment to the Constitution of the United States relative to the right to life; to the Committee on the Judiciary.

72. Also, memorial of the Legislature of the Commonwealth of Virginia, relative to tanker safety standards; to the Committee on Merchant Marine and Fisheries.

73. Also, memorial of the House of Representatives of the State of Hawaii, relative to canceling State indebtedness to the Unemployment Compensation Trust Fund; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FISHER:

H.R. 5837. A bill for the relief of John S. Barry; to the Committee on the Judiciary.

By Mr. HILLIS:

H.R. 5838. A bill for the relief of Gaudiosa M. Etulle; to the Committee on the Judiciary.

By Mr. McCLORY:

H.R. 5839. A bill for the relief of Dr. and Mrs. Milton Margoles; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII.

68. The SPEAKER presented a petition of the Suffolk County Legislature, Riverhead, N.Y., relative to open water disposal for dredged material in Western Long Island; to the Committee on Public Works and Transportation.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3199

By Mr. EDGAR:

On page 38, strike out everything after line 24 up to and including line 2 on page 43, and insert in lieu thereof the following:

SEC. 16. Section 404 of the Federal Water Pollution Control Act (33 U.S.C. 1344) is amended by adding at the end thereof the following new subsections:

"(d) For purposes of this section, the following shall not be considered discharges of dredged or fill material:

"(1) plowing, cultivating, seeding, and harvesting for the production of food, fiber, and forest products;

"(2) maintenance, including emergency reconstruction of recently damaged parts, of currently serviceable fills such as dikes, dams, levees, groins, riprap, breakwaters, causeways, bridge abutments or approaches, and other transportation structures;

"(3) maintenance of irrigation and drainage ditches and small dams that create stock ponds and farm ponds.

"(e) No permit shall be required under this Section or Section 402 of this Act for discharges of dredged or fill material necessary to construct farm ponds, stock ponds, and debris basins.

"(f) consistent with the requirements of subsections (a), (b), and (c) of this Section, the Secretary of the Army acting through the Chief of Engineers, may issue general permits for discharges of dredged or fill material where such activities are similar in nature and cause only minimal adverse environmental impact. Such permits shall contain such conditions as necessary to achieve the purposes of this Act and shall be for a maximum period of five years. A general permit may be revoked or modified if it is determined that the effects of the permitted activities are such that individual permit treatment is required consistent with the goals of the Act.

"(g) The Secretary shall submit a detailed report to the Congress on or before December 31, 1977, on the implementation to such date by the Department of the Army of the provisions of this Section. This report, which shall be prepared in conjunction with the Administrator, shall detail the progress made in implementing the requirements of this Section and the objectives of this Act, shall assess State programs that are similar to this program, and shall provide recommendations on the manner in which State and local agencies can become more directly responsible for fulfilling the requirements of this Section in a manner consistent with the purposes of the Act."

On page 38, strike out everything after line 24 up to and including line 2 on page 43, and insert in lieu thereof the following:

SEC. 16. Section 404 of the Federal Water

Pollution Control Act (33 U.S.C. 1344) is amended by adding at the end thereof the following new subsections:

"(d) For purposes of this section, the following shall not be considered discharges of dredged or fill material:

"(1) plowing, cultivating, seeding, and harvesting for the production of food, fiber, and forest products;

"(2) maintenance, including emergency reconstruction of recently damaged parts, of currently serviceable fills such as dikes, dams, levees, groins, riprap, breakwaters, causeways, bridge abutments or approaches, and other transportation structures;

"(3) maintenance of irrigation and drainage ditches and small dams that create stock ponds and farm ponds.

"(e) No permit shall be required under this Section or Section 402 of this Act for discharges of dredged or fill material necessary to construct farm ponds, stock ponds, and debris basins.

"(f) consistent with the requirements of subsections (a), (b), and (c) of this Section, the Secretary of the Army acting through the Chief of Engineers, may issue general permits for discharges of dredged or fill material where such activities are similar in nature and cause only minimal adverse environmental impact. Such permits shall contain such conditions as necessary to achieve the purposes of this Act and shall be for a maximum period of five years. A general permit may be revoked or modified if it is determined that the effects of the permitted activities are such that individual permit treatment is required consistent with the goals of the Act.

"(g) The Secretary shall submit a detailed report to the Congress on or before December 31, 1977, on the implementation to such date by the Department of the Army of the provisions of this Section. This report, which shall be prepared in conjunction with the Administrator, shall detail the progress made in implementing the requirements of this Section and the objectives of this Act, shall, in consultation with the Secretary of Agriculture, assess the impact of this section on the rural, agricultural, ranching, and forestry community, and shall provide recommendations on the manner in which State and local agencies can become more directly responsible for fulfilling the requirements of this Section in a manner consistent with the purposes of the Act.

"(h)(1) Until April, 1978, in any case where an application for permit has been filed at least 30 days prior to discharge, but final administrative disposition of such application has not been made, such discharge of dredged or fill material shall not be a violation of Section 301(a) of this Act, unless (A) the Secretary or Administrator determines that the proposed activity will violate the guidelines established pursuant to subsection (b) of this Section, or (B) final administrative disposition of such application cannot be made because of the failure of the applicant to furnish information reasonably required or requested in order to review the application.

"(2) This subsection shall not be applicable to the discharge of dredged or fill material in any coastal water of the United States subject to the ebb and flow of the tide, any inland water of the United States that is used, was used in the past, or is susceptible to use to transport interstate or foreign waterborne commerce, any primary tributary to such waters, any natural lake greater than five acres, and any marshes, shallows, swamps, and wetland areas adjacent to these waters that are periodically inundated with a frequency sufficient to support a prevalence of aquatic vegetation."

Strike Section 16.

Strike the last word.

On page 40, in line 5, after the word "this", strike out everything up to and including line 7 on page 40, and insert in lieu thereof "section.".

H.R. 4976

By Mr. PEPPER:

Page 16, line 15, strike "$3,450,000" and insert in lieu thereof "$8,000,000".

Page 16, line 19, strike "$1,000,000" and insert in lieu thereof "$4,000,000".

SENATE—*Wednesday, March 30, 1977*

(Legislative day of Monday, February 21, 1977)

The Senate met at 10:30 a.m., on the expiration of the recess, and was called to order by Hon. JAMES B. ALLEN, a Senator from the State of Alabama.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O God, the strength of those who put their trust in Thee, we bow daily in Thy presence lest we yield to the subtle temptation of relying on our own strength. For without Thee, work is barren, days are unproductive, life is robbed of its wonder, its dignity, and its beauty. The closer we draw to Thee, the more we know of Thy love, the more we become aware that we are not flawless nor without sin. While we confess our sins, keep us from magnifying evil, exaggerating defects, and from confessing other people's sins. Deliver us from the hypocrisy of pretending to be better than we are and from the baser hypocrisy of pretending to be worse than we are. By Thy spirit living in us, make us to be the best we can become—humble, reverent, sincere servants of Thy higher kingdom.

We pray in the name of Him who came to bring the kingdom which is above all earthly kingdoms. Amen.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Tuesday, March 29, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, there are three nominations in the Department of State which have been cleared on both sides of the aisle.

I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar, beginning with "New Reports."

There being no objection, the Senate proceeded to the consideration of executive business.

The ACTING PRESIDENT pro tempore. The nominations will be stated.

The second assistant legislative clerk proceeded to read the nominations.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations be considered and confirmed en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF STATE

Joseph D. Duffey, of the District of Columbia, to be an Assistant Secretary of State.

Matthew Nimetz, of New York, to be counselor of the Department of State.

Herbert J. Hansell, of Ohio, to the legal adviser of the Department of State.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations under "International Bank Posts" and "Department of Commerce" be considered and confirmed en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

INTERNATIONAL BANK POSTS

W. Michael Blumenthal, of Michigan, to be U.S. Governor of the International Monetary Fund for a term of 5 years and U.S. Governor of the International Bank for Reconstruction and Development for a term of 5 years; a Governor of the Inter-American Development Bank for a term of 5 years; and U.S. Governor of the Asian Development Bank and U.S. Governor of the African Development Fund.

DEPARTMENT OF COMMERCE

Sidney Harman, of New York, to be Under Secretary of Commerce.

Jerry Joseph Jasinowski, of the District of Columbia, to be an Assistant Secretary of Commerce.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, the President will be notified of the confirmation of the nominations.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate resume the consideration of legislative business.

There being no objection, the Senate resumed the consideration of legislative business.

WAIVER OF THE CONGRESSIONAL BUDGET ACT WITH RESPECT TO CONSIDERATION OF S. 1070

Mr. ROBERT C. BYRD. Mr. President, there is a budget waiver, Calendar No. 62, Senate Resolution 123, which has reference to S. 1070, Calendar No. 52, a bill

to authorize additional funds for housing assistance. That matter has been cleared on both sides of the aisle.

I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 62.

The ACTING PRESIDENT pro tempore. The resolution will be stated.

The legislative clerk read as follows:

A resolution (S. Res. 123) waiving the provision of sec. 402(a) of the Congressional Budget Act of 1974 with respect to S. 1070.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to, as follows:

Resolved, That the provisions of section 402(a) of the Congressional Budget Act of 1974 are waived with respect to S. 1070, a bill to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance program, to establish a National Commission on Neighborhoods, and for other purposes. The waiver is necessary in order to provide for the continuation of Housing and Urban Development's crime and riot insurance programs, to provide supplemental funds requested by the administration for assisted housing programs, and for the conduct of a study of policies required to improve the Nation's urban neighborhoods.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I have nothing further at this time. I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. The Chair recognizes the distinguished minority leader.

STRATEGIC ARMS LIMITATIONS

Mr. BAKER. Mr. President, prior to Secretary Vance's departure for the preliminary discussions with the Soviet Union, the distinguished House minority leader, Representative JOHN RHODES, and I assured him that the minority of both Houses endorsed the efforts of the administration to achieve a meaningful and realistic agreement on the limitations of strategic arms.

We did so to allay any possible misapprehension on the part of the Soviet leaders that the Secretary undertook his mission to Moscow without the full bipartisan support of the Congress. It was in no way intended to prejudge the outcome of these important discussions nor was it an attempt to limit the flexibility of the administration as it develops the framework for SALT II.

That said, Mr. President, I should add that the reports of the initial meetings in Moscow are intriguing. Naturally, I do not know the details of the discussions; but I am confident that the appropriate committees of Congress will be fully briefed upon the Secretary's return.

At that time, and prior to the beginning of the substantive negotiations in Geneva, I am likewise confident that the Congress and the administration will be able to cooperate fully in the development of a SALT package mutually acceptable to all the parties concerned. I look forward to that effort with the belief that a meaningful agreement, which does not degrade the ability of the Nation to deter aggression, is a goal of the highest national priority.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have no requirement nor requests for the remainder of my time under the standing order, and I yield back the time.

The ACTING PRESIDENT pro tempore. At this time, in accordance with the previous order, the Chair recognizes the distinguished junior Senator from Rhode Island (Mr. CHAFEE) for not to exceed 15 minutes.

Mr. BAKER. Mr. President, I yield the time I have under the special order this morning to the distinguished junior Senator from Rhode Island.

The ACTING PRESIDENT pro tempore. Without objection, the remaining time of the distinguished minority leader will be added to the time of the Senator from Rhode Island.

Mr. CHAFEE. I thank the Senator from Tennessee for yielding me the remainder of his time.

CONCERNING THE ALL-VOLUNTEER FORCE

Mr. CHAFEE. Mr. President, in my judgment it is wise and helpful for our country to have a constructive dialog on the All-Volunteer Force. A few Members of this body have already begun to examine and discuss the AVF, its successes or failures and its future.

Any examination of the AVF should begin with a review of the role of conscription and volunteerism in this country. Such a review reveals that peacetime conscription is a departure from the norm in our country's history.

The first Federal draft began in 1863 during the Civil War and was accompanied by some of the worst riots in our Nation's history. That draft ended in 1865. No further inductions occurred until 1917 when the draft was reinstated for World War I. Again, the draft lasted for only the duration of the war. In 1940, the fall of France brought the return of a wartime draft which remained in effect until 1947 when it terminated.

During the early postwar years, the country struggled with many issues of military personnel policy. From April 1947 to June 1948, the armed services relied on volunteer recruitment but were unable to attract the numbers necessary to maintain a strong force. The failure of the policy at that time was attributable to the widening gap between military and civilian pay and the Army's raising of acceptable mental test standards. Universal military training and various forms of national service were frequently debated and proposed, but were always rejected as too costly.

The beginning of the cold war in the late forties brought the first truly peacetime draft, though initially on a temporary basis. The Korean war finally established a peacetime reliance on the draft. During the late fifties and early sixties, as the size of our forces declined, the problems inherent in a peacetime draft began to emerge.

The greatest problems derived from the size of the manpower pool. Nearly 2 million 18-year-olds entered the pool each year. They remained in the pool until age 26. Of the millions available, as few as 60,000 were drafted in a given year.

Because the draft required only a few from the many available, deferments appeared to be a logical means of narrowing the manpower pool to a level comparable with need.

But Vietnam all to vividly illustrated that the deferment policy was blatantly unfair. The poor and the uneducated made up the great bulk of these called. As we all remember, the result was great bitternesss and political turmoil which tore at the fabric of our society. The lottery, instituted in 1969, helped cool dissent, but the issue continued to be divisive until the withdrawal from Vietnam permitted the suspension of draft calls. After all, the lottery still took a few from the many available.

In 1969, President Nixon appointed a 15-person blue ribbon commission composed of leaders from military, business, and academic backgrounds to examine the possibility of reinstituting a peacetime volunteer force. Under the chairmanship of Thomas Gates, a former Secretary of Defense, the commission unanimously agreed "that the Nation's interests will be better served by an All-Volunteer Force, supported by an effective standby draft, than by a mixed force of volunteers and conscripts." In 1970, the Gates Commission recommended that the services be staffed in peacetime solely by volunteers. The President concurred.

The inauguration of an all-volunteer armed force was the culmination of a lengthy national debate on the potential risks and benefits of relying solely on volunteer military personnel. Opponents of the volunteer force had said that it would not be feasible, that it would cost up to $17 billion, that it would be mercenary, that it would create a separate military elite, and that it would be composed of the poor, the black, and the uneducated.

Proponents of the volunteer force advocated it on the basis of military efficiency, equity, and individual freedom. The proponents prevailed and the use of the draft was terminated in January 1973.

At first, the most pressing problems came in connection with the active forces. They were unable to attract an adequate number of qualified perosnnel. With time, however, solutions were found. An effective recruiting structure was built, broader options were offered to recruits, training opportunities were guaranteed to those who qualified, specialized enlistment and reenlistment bonuses were established, and many other improvements in manpower management were implemented.

The experience of the past 4 years shows that such innovative management on the part of the services has enabled them to overcome most active force problems, without going beyond the cost

originally estimated by the National Security Council.

Today, questions are being raised concerning the All-Volunteer Force—questions related to the number of personnel the services are obtaining, the quality of the personnel, the cost of the AVF, and the strength of the Reserve components. As a result, we also hear discussion of restoring a peacetime draft or even instituting a broader form of compulsory national service.

A strong national defense is of paramount importance. But if we can have a strong military without compelling peacetime service in it, then that is the course we should follow. None of us would hesitate to reactivate the draft if emergency circumstances necessitated such action in the interests of national security. But, before we draft one free American, it is our responsibility to be sure that it is impossible to avoid compulsion.

What is the real status of the AVF?

Manpower statistics should be examined for long-term trends, rather than for short-term occurrences. It is misleading to take a snapshot of manpower statistics.

First, let us look at the Active Forces, then at the Reserve.

A primary concern raised about the AVF is that the quality of our recruits is down. The long-term trend, however, suggests the opposite. Two yardsticks used by the services to assess quality are level of education—has the enlistee completed high school—and standardized test scores. One reason for the emphasis on high school graduates is that they cause fewer disciplinary problems than non-high-school graduates. Trends indicate that the percentage of high school graduates for all services totaled has risen steadily from 61 percent in fiscal year 1974 to 71 percent in the summer of 1976—a remarkable 16 percent increase. Even in the Army, which has the greatest recruiting needs, the percentage of high school graduates has risen from 50 to 60 percent over the same period.

The Armed Services Vocational Aptitude Battery—ASVAB—produces the standardized test scores which are the other measure of quality. On the basis of ASVAB, applicants are classified into one of five mental categories, with category I having those with the highest military aptitude and those in category V being disqualified from service.

According to the Department of Defense, the results of the ASVAB show that there has been a steady increase since fiscal year 1974 in enlistees with above average scores, a moderate increase in those with average scores, and of most importance a steady decrease in enlistees with below average scores. In fiscal year 1976 less than 5 percent entered the services from the below average mental group, category IV. This was more than a 50-percent decrease in category IV's since fiscal year 1974, and showed up, most importantly, in the Army and Marine Corps—the difficult services for which to recruit.

A second issue in the Active Forces is the quantity of recruits. The facts are these. In the Active Forces all services were manned within 99 percent of their end strength obectives for the 15-month period ending last September. The services virtually met their total recruiting goals for the same period. In fact, for every fiscal year since the inauguration of the AVF, active duty force levels have been virtually met. In other words, as of October 1976, the beginning of this fiscal year, there were no significant shortages in the number of Active Force personnel.

During the final 3 months of 1976, recruitment dropped to 95 percent of the goals. Some suggest that this represents a new trend leading to the conclusion that 4 years of success have ended. But brief periods of recruitment difficulty have occurred in the past with no permanent consequences.

In fact, with a 5-percent recruitment shortfall in late 1976, the military fell only one-third of 1 percent below desired force levels.

Another measure of recruiting strength, hidden from superficial analysis, is the number of recruits who have signed up to join the military at a later date when their training slot becomes available. If recruiting shortfalls are significant, future recruitment presumably would be very slow. Yet the Army has a "delayed entry pool" twice last year's level and seven times the level of January 1974.

Indeed, recruiting for an All-Volunteer Force is always a competitive situation. No longer can the services simply say as they did under the draft, "We need 40,000 men this month" and the draft produced 40,000. The services now have to go out and recruit every person they need. Some months are more difficult for recruitment than others.

To criticize the volunteer force on this basis is a misrepresentation of the overall picture. It is again, taking a narrow snapshot of our 4-year experience.

Part of the fear that the AVF will not continue to succeed is based on the belief that our 4 years of success is attributable to the recent poor state of the economy. It is worth noting that the AVF was already showing strong signs of succeeding prior to the economic downturn in late 1974. As the economy improves, the AVF may encounter some recruiting problems, but that does not mean they will be insoluble.

We often hear that desertion rates are a problem with the AVF. The facts are these. The Army has the lowest rate of desertion since 1966. The Marine Corps desertion is high, but is about one-half of what it was 2 years ago and is still dropping. The Navy has developed a very serious desertion problem—reaching levels two to three times that of the Vietnam era. The Air Force, as always, does not have a desertion problem. This mixed pattern is puzzling and different people can give different explanations of its causes. While all the services, and particularly the Navy, should give unstinted attention to these problems, I do not think any fair minded analyst can conclude that this pattern is sufficiently disastrous to scuttle the AVF.

Thus, all significant long-term trends suggest no unmanageable problems with the quantity or quality of our recruits in the active forces.

One unalterable fact about the military manpower situation is that the number of 18-year-olds will gradually decrease until the early 1990's when it will rise again. The decrease is quite gradual, thus there is no immediate reason to institute a draft or national service program to help the active forces. As for the future, we do not know what our active force recruitment requirements will be a decade from now.

Next, let us look at the Reserve components. Of all the AVF problems being discussed, those of the Reserve components seem the most pressing.

Our primary Reserve system, known as the Ready Reserve, is composed of the Selected Reserve and the Individual Ready Reserve, the IRR. The problems should be viewed separately.

The Reserve Forces Act of 1955 requires all military personnel to serve a minimum obligation of 6 years. Whatever portion of that obligation is not fulfilled in active duty is met by being in either the Selected Reserve or the IRR.

The Selected Reserve is composed of prior service and nonprior service personnel and maintains a constant preparedness level through weekend and summer training. These men and women are paid and they are designated as the first force to be called to supplement our Active Forces in an emergency.

The Selected Army Reserve components are about 8 percent below authorized levels. More importantly, this shortfall can, at present rates, be expected to increase to 18 percent in the next 18 months. The Marine Corps Reserve also shows a shortage in combat arms units, but the Naval Reserve, the Air National Guard, and the Air Force Reserve are about on target.

Should we use the draft or national service to solve the Reserve problems? Before we consider such drastic measures, we should be sure that no reasonable management solutions exist. Our present shortages in the Selected Reserve did not come upon us without forewarning. In 1970, the Gates Commission recognized that problems with Reserve recruiting might arise in the late 1970's and that special attention might be needed. Later, in 1972, the administration at first sought, and then withdrew, proposals for incentives for Reserve enlistments.

Now, after 7 years of inattention, the problems of Reserve requirements can no longer be ignored.

Until last August none of the Reserve components except the Navy and Marines had a full-time recruiting force. Money to build a Reserve recruiting structure is in the fiscal year 1978 budget, but realistically we should expect that it will take a couple of years to build a successful and attractive recruiting program.

To improve Reserve recruiting we should ask management-oriented questions. Can we make participation in Reserve components more attractive? Do recruits spend training sessions involved in constructive, interesting work, or do

they just put in their time sitting around armories and getting haircuts?

The other component of the Ready Reserve, the individual Ready Reserve, is composed of men and women who have completed active duty, have a remainder of their 6-year obligation to complete, but do not join an organized unit. The size of the individual Ready Reserve is dependent upon the number of men and women who have recently completed active duty and the number of years each one has left to complete his 6-year obligation.

The individual Ready Reserve has declined since the introduction of the volunteer force for two reasons:

First, we have reduced our active force level from roughly 3.5 million at the height of the Vietnam war to 2.1 million. Obviously a comparable reduction in the individual Ready Reserve was inevitable, although not desirable.

Second, recruits are averaging longer periods of service in the active force. Longer active service has improved the quality, stability, and readines of our forces, while reducing the training costs and turnover. But, longer active duty has also shrunk the IRR pool.

In full mobilization, all Americans with recent military service are likely to be called back anyway. If we recognize this fact in our statistics, it would lessen our concerns regarding the number of individual Ready Reserves. We must maintain our Reserve strength, but a return to the crutch of the draft to solve this problem of adequate postactive service obligations is wholly unwarranted.

Perhaps the most recurrent question raised about the viability of the All-Volunteer Force is cost. The suggestion is that if we returned to the draft, it would reduce various personnel costs significantly. Let us look at pay first.

While the draft was still in effect, Congress made the decision to raise pay for new recruits to a level competitive with the civilian sector. It was deemed equitable to stop penalizing those who were compelled to serve their country in times when only a portion of our youth were needed.

Competitive pay has certainly aided the transition to an All-Volunteer Force. Indeed the AVF policy would have been impossible without competitive pay. Compensation increases have been dramatic for recruits. It was necessary that compensation be nearly doubled in 1971 to reach equity with the private sector, an objective long since reached for the military careerist.

But the crucial question is: Would we return to inequitable pay scales if we were to reinstitute the draft? I doubt that we would consider such a regressive action under peacetime circumstances.

In order to implement the AVF, additional personnel expenditures in the form of recruiting and bonus funds are required. These amount to $400 to $500 million per year.

These figures are substantial, but when military manpower costs total $60 billion, less than a half billion dollars spent to avoid compulsion appears reasonable.

Present military manpower problems should be addressed with management solutions, rather than with a draft or some form of national service wherein every 18-year-old is required to do some form of military or civic duty.

The All-Volunteer Force serves both the interests of the people and the interests of our national defense. The AVF is in the tradition of our country. It represents equity, freedom of choice, and fair pay. Under it we have seen the end of the national unrest that accompanied the draft.

It is only my belief that the volunteer force has helped the military. Since the services began to convert to an all-volunteer status, they have become more efficient in their use of manpower. The combat readiness of our forces is high; jobs and the skills of those who perform them are well matched; and drug problems and racial disturbances have declined.

Several management problems remain. We need to upgrade reserve activities and build a full-time, stable, dedicated recruiting force. We need to review the definitions of reserve obligations in light of current needs. We need to understand why desertion increases in one service and drops in others. We need to continue our vigilance of all aspects of volunteer force management.

If we do this, we will have a well-managed All-Volunteer Force, and we will not need to return to the draft.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business of not to exceed 15 minutes, with statements therein limited to 5 minutes each, and with no resolutions coming over under the rule.

The PRESIDING OFFICER (Mr. ANDERSON). Without objection, it is so ordered.

TRANSFER OF MEASURES TO UNANIMOUS-CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are two bills on the general orders calendar that have been cleared for unanimous consent on both sides of the aisle. I ask that the clerk transfer those measures, calendar order Nos. 58 and 60, from page 10 of the general orders calendar of measures cleared to be considered by unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, may I say respectfully that does not require unanimous consent.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

CIVIL SERVICE COMMISSION ANNUAL REPORT—MESSAGE FROM THE PRESIDENT—PM 60

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

I am transmitting herewith a copy of the United States Civil Service Commission's Annual Report for the fiscal year ended June 30, 1975. This Report was prepared and received prior to the beginning of my Administration.

JIMMY CARTER.

THE WHITE HOUSE, *March 30, 1977.*

MESSAGE FROM THE HOUSE

At 2:51 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that the House has passed the bill (S. 626) to reestablish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes, with an amendment in which it requests the concurrence of the Senate.

The message also announced that the House has passed the following bills in which it requests the concurrence of the Senate:

H.R. 2521. An act to provide for the mandatory inspection of domesticated rabbits slaughtered for human food, and for other purposes;

H.R. 2992. An act to authorize appropriations for fiscal year 1978 for carrying out the Comprehensive Employment and Training Act of 1973 as amended; and

H.R. 3416. An act to amend section 316(c) of the Agricultural Adjustment Act of 1938 to provide that leasing of flue-cured tobacco acreage-poundage marketing quotas after June 15 of any year be permitted only between farms on which at least 80 per centum of the farm acreage allotment was planted for such year.

ENROLLED JOINT RESOLUTION SIGNED

The message further announced that the Speaker has signed the enrolled joint resolution (H.J. Res. 351) making further continuing appropriations for the fiscal year 1977, and for other purposes.

The enrolled joint resolution was subsequently signed by the President pro tempore.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC-1006. A letter from the Secretary of Defense transmitting a draft of proposed legislation to authorize certain construction at military installations and for other purposes (with accompanying papers); to the Committee on Armed Services.

EC–1007. A letter from the Secretary of Transportation transmitting, pursuant to law, a report recommending further action of funds to be made available to New York and Ohio for the costs of operating and maintaining rail service facilities (with accompanying papers); to the Committee on Commerce, Science, and Transportation.

EC–1008. A letter from the Acting Assistant General Counsel for International, Conservation, and Resource Development programs of the Federal Energy Administration transmitting, pursuant to law, notice of a meeting related to the International Energy Program (with accompanying papers); to the Committee on Energy and Natural Resources.

EC–1009. A letter from the Acting Administrator of the Energy Research and Development Administration transmitting a draft of proposed legislation to authorize appropriations to the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended, section 305 of the Energy Reorganization Act of 1974, and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, and for other purposes (with accompanying papers); to the Committee on Energy and Natural Resources.

EC–1010. A letter from the Secretary of Transportation transmitting, pursuant to law, a report on the activities of the Federal-Aid Highway Act of 1973; to the Committee on Environment and Public Works.

EC–1011. A letter from the Assistant Secretary for Congressional Relations transmitting notice of the full-scale meetings of the fourth session of the Diplomatic Conference on the Reaffirmation and Development of International Humanitarian Law Applicable in Armed Conflicts to be convened by the Swiss Government on April 14, 1977 and conclude on June 10, 1977; to the Committee on Foreign Relations.

EC–1012. A letter from the Administrator of the Federal Energy Administration transmitting, pursuant to law, a report on a new system of records, in accordance with the Privacy Act (with an accompanying report); to the Committee on Governmental Affairs.

EC–1013. A letter from the Mayor of the District of Columbia transmitting a draft of proposed legislation to revise the basis for estimating the annual Federal payment to the District of Columbia for water and water services and sanitary sewer services furnished to the United States (with accompanying papers); to the Committee on Governmental Affairs.

EC–1014. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Federally Assisted Areawide Planning: Need To Simplify Policies and Practices" (GGD–77–24, March 28, 1977) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1015. A letter from the Secretary of Labor transmitting, pursuant to law, a report on the administration of the Freedom of Information Act during the calendar year 1976 (with an accompanying report); to the Committee on the Judiciary.

EC–1016. A letter from the Chairman of the Federal Election Commission transmitting, pursuant to law, a detailed statement of its activities during 1976 (with an accompanying report); to the Committee on Rules and Administration.

EC–1017. A letter from the Secretary of Agriculture transmitting a request for an extension beyond the March 1, 1977 deadline for the report on Dutch elm disease; to the Committee on Agriculture, Nutrition, and Forestry.

EC–1018. A letter from the Secretary of the Navy transmitting a draft of proposed legislation to amend title 10, United States Code, to authorize reimbursement for expenses incurred in obtaining quarters by certain members of the uniformed services on sea duty who are deprived of their quarters aboard ship, and for other purposes (with accompanying papers); to the Committee on Armed Services.

EC–1019. A letter from the Director of the Congressional Budget Office transmitting a compilation of technical background papers used in the development of the CBO report "Advance Budgeting: A Report to the Congress" (with an accompanying report); to the Committee on the Budget.

EC–1020. A letter from the Administrator of the Federal Energy Administration transmitting a clarification of the explanatory materials accompanying Energy Action No. 11; to the Committee on Energy and Natural Resources.

EC–1021. A letter from the Secretary of Commerce transmitting a draft of proposed legislation to provide temporary authorities to the Secretary of Commerce to facilitate emergency actions to mitigate the impacts of the 1976–1977 drought and promote water conservation (with accompanying papers); to the Committee on Environment and Public Works.

EC–1022. A letter from the Acting Assistant Secretary of the Army, Civil Works, transmitting a draft of proposed legislation authorizing additional appropriations for prosecution of projects in certain comprehensive river basin plans for flood control, navigation, and for other purposes (with accompanying papers); to the Committee on Environment and Public Works.

EC–1023. A letter, dated March 24, 1977, from the Assistant Legal Adviser for Treaty Affairs of the Department of State transmitting, pursuant to law, international agreements other than treaties entered into by the United States within the past sixty days (with accompanying papers); to the Committee on Foreign Relations.

EC–1024. A letter from the Attorney General transmitting, pursuant to law, a report on the existence of two previously unpublished systems of records maintained by the FBI (with an accompanying report); to the Committee on Governmental Affairs.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions which were referred as indicated:

POM–107. Senate Concurrent Resolution No. 16 adopted by the Legislature of the State of South Dakota memorializing the Congress and the President to take steps to upgrade both rail and barge transportation systems for agricultural products; to the Committee on Commerce, Science, and Transportation:

"SENATE CONCURRENT RESOLUTION No. 16

"A concurrent resolution, memorializing the Congress and the President to take steps to upgrade both rail and barge transportation systems for agricultural products.

"Be it resolved by the Senate of the State of South Dakota, the House of Representatives concurring therein:

"Whereas, the food supplies of this nation and the world are dependent on the production of the fertile bread basket of the midwest; and

"Whereas, the export of agricultural products is a vital component of the United States balance of trade helping to offset the large imports of energy products; and

"Whereas, transportation of agricultural products from the midwest involves both rail traffic and barge traffic; and

"Whereas, the rail traffic facilities of this nation are in dire need of major improvement through capital investment:

"Now, therefore, be it resolved, by the Senate of the Fifty-second Legislature of the state of South Dakota, the House of Representatives concurring therein, that the Congress and the President be encouraged to take all possible steps to upgrade and improve both the rail and barge systems for transporting agricultural products; and

"Be it further resolved, that the Secretary of the Senate is hereby directed to forward copies of this resolution to the presiding officers of the United States Senate and House of Representatives, members of the South Dakota's Congressional Delegation and the Secretary of Transportation."

POM–108. Senate resolution No. 7 adopted by the Senate of the State of South Dakota urging Congress to expedite solutions to issues raised recently by the Federal Communications Commission regarding telephone services in South Dakota; to the Committee on Commerce, Science, and Transportation:

"SENATE RESOLUTION No. 7

"A Senate resolution, urging Congress to expedite solutions to issues raised recently by the Federal Communications Commission regarding telephone service in South Dakota

"Be it resolved by the Senate of the State of South Dakota:

"Whereas, the Telecommunications Act of 1934 was enacted to assure the widest possible availability of basic telephone service at the lowest practicable cost to the consumer; and

"Whereas, the Federal Communications Commission which was created by the Communications Act of 1934, has made recent policy decisions which could affect basic telephone service in South Dakota; and

"Whereas, these policy decisions have raised questions regarding the appropriate limits of federal and state regulatory jurisdictions, and those services where a regulated monopoly best serves all peoples' interest; and

"Whereas, regulations are required to assure the establishment of national technical and service standards to safeguard the network and our nation's consumers; and

"Whereas, these policy decisions will impact the long term effects on the rates of telephone service in South Dakota; and

"Whereas, these questions represent significant issues confronting our nation's present and future telecommunications policies; and

"Whereas, these issues demonstrate the urgent need for Congress to define the solutions which will best serve the interest of our Nation and South Dakota;

"Now, therefore, be it resolved, by the Senate of the Fifty-second Legislature of the State of South Dakota that the Senate of the State of South Dakota does hereby urge the Congress of the United States to reaffirm the intent of the Communications Act of 1934 which provides that basic telephone service be made universally available to all people at the lowest possible rates; and

"Be it further resolved that the Secretary of the Senate is hereby directed to forward copies of this resolution to the presiding officers of the United States Senate and House of Representatives, the members of South Dakota's Congressional Delegation, and the Director of the Federal Communications Division."

POM–109. Senate Resolution No. 110 adopted by the Senate of the State of Hawaii endorsing the recommendations of the Intergovernmental Relations Committee of the National Conference of State Legislatures for strengthening our Nation's electric utility industry; to the Committee on Energy and Natural Resources:

"SENATE RESOLUTION 110

"Senate resolution endorsing the recommendations of the Intergovernmental Relations Committee of the National Conference of State Legislatures for strengthening our Nation's electric utility industry

"Whereas, state governments have traditionally assumed the responsibility for regulating the operation of electric utilities

in order to insure the provision of safe, reliable, and adequate electric services to consumers at reasonable rates; and

"Whereas, the assumption of this regulatory responsibility is necessitated by the monopolistic nature of the electric utility industry; and

"Whereas, over the years, a steady and upward climb in the cost of providing electric services has in turn, resulted in the pass-on to the consumer of higher rates; and

"Whereas, these cost increases result essentially from technical and economic factors including (1) the rapid and continuing rise in the unit cost of new plants, (2) the increases in the cost of fuel, and (3) other cost increases generally attributable to inflation, and

"Whereas, the uncertainty associated with utility investment planning has increased markedly, in no small part due to the uncertainty over the impact of rising price levels on future demand levels; and

"Whereas, energy conservation and unresolved issues relating to uncertainties over the rate of application of new technology add further elements of uncertainty; and

"Whereas, the net effect of the various factors impinging upon the electric utility industry has been the deterioration of the financial condition of the industry as a whole; and

"Whereas, a reversal of the adverse trend both in terms of the declining financial posture of the industry and the rising cost of service delivery clearly indicate the need for modifications both within utility management and state regulatory practices; and

"Whereas, the Intergovernmental Relations Committee of the National Conference of State Legislatures has offered the following suggestions which state governments should consider: (1) electric utility rate structures should accurately relate consumer prices to the costs each consumer or class of consumers impose on electric utility systems and in particular, the declining block rate structure which was acceptable in a period of steadily falling costs and prices as a method for achieving widespread consumer access to electric services, must be reexamined; (2) rate structures should be considered which are fair and equitable to consumers and classes of consumers and which attempt to eliminate the possible conflicts between energy conservation goals and electric utility financial stability; (3) state regulatory bodies must exercise their responsibility to determine the need for new electric generating capacity; and (4) ratepayers must be provided with adequate information to take advantage of the economic savings which will become available to them if a more accurate cost-reflecting rate structure is found (consumer education must be accomplished to a greater extent than in the past); and

"Whereas, other findings and recommendations offered by the Intergovernmental Relations Committee of the National Conference of State Legislatures include (1) the recommendation that responsible state and federal regulatory agencies should be provided with adequate staff and financial resources to assure the capacity to competently carry out the complex analysis task, and (2) given the wide disparity among utilities, consumers, economic and environmental conditions, analysis must be on system-by-system basis; and

"Whereas, the State of Hawaii is most unique among the fifty states of the Union in that (1) Hawaii is geographically separated by over 2,000 miles of water from the mainland U.S., (2) Hawaii is 100 percent dependent on imported oil for primary energy and possesses no fossil fuel resources of its own, (3) each island in the State is supplied electricity by an isolated, relatively small utility with no electrical interties between islands, and (4) there is no possibility of interstate transmission of electricity between Hawaii and the mainland and so for the reasons stated above, federal regulation of electric utilities, or the establishment of federal standards governing state regulation is wholly inappropriate (for this reason, the proposed federal legislation establishing such standards should be rejected); and

"Whereas, the Senate of the State of Hawaii supports those findings and recommendations of the Intergovernmental Relations Committee of the National Conference of State Legislatures summarized in this Resolution, which are reinforced by Hawaii's own special conditions, now, therefore,

"Be it resolved by the Senate of the Ninth Legislature of the State of Hawaii, Regular Session of 1977, that it endorses those parts of the policy position taken by the National Conference of State Legislatures in the area of electric utility operation and regulation as set forth in this resolution; and

"Be it further resolved that certified copies of this Resolution be transmitted to the President of the United States, the President of the United States Senate, the Majority Leader of the United States Senate, the Speaker of the United States House of Representatives, the Majority Leader of the United States House of Representatives, the Chairman of the Intergovernmental Relations Committee of the National Conference of State Legislatures, the President of the National Conference Legislatures, the Chairman of the National Governors Conference, and to each member of Hawaii's delegation to the Congress of the United States."

POM-110. House Concurrent Resolution No. 3030 adopted by the Legislature of the State of North Dakota supporting the expeditious reconstruction of Locks and Dam 26 on the Mississippi River at Alton, Illinois; to the Committee on Environment and Public Works:

"HOUSE CONCURRENT RESOLUTION NO. 3030

"A concurrent resolution supporting the expeditious reconstruction of Locks and Dam 26 on the Mississippi River at Alton, Illinois

"Whereas, North Dakota's present and future economic strength is dependent upon the prosperity of the state's agricultural economy; and

"Whereas, agriculture generates about 75 percent of North Dakota's new wealth annually; and

"Whereas, small grains produce about 60 percent of North Dakota's farm income annually, with hard red spring and durum wheat accounting for about 50 percent of the total; and

"Whereas, North Dakota producers market about 25 percent of their hard red spring and durum wheat production through the Minneapolis-St. Paul terminal markets, which accounts for 59 percent of the total handled by those markets; and

"Whereas, 61 percent of the wheat moving into the Minneapolis-St. Paul terminal markets moves outward therefrom by barge on the Mississippi River; and

"Whereas, the prices received by North Dakota producers for hard red spring and durum wheat are reduced as transportation charges to the ultimate market for that grain is increased; and

"Whereas, barge transportation is less expensive than other modes of transporting grains; and

"Whereas, the production of small grains is dependent upon the availability of farm inputs such as petroleum and fertilizer which move by barge through the locks of the Mississippi River; and

"Whereas, barge transportation is dependent upon an efficient and dependable lock system on the Mississippi River; and

"Whereas, the physical condition of Locks and Dam 26 on the Mississippi River, located at Alton, Illinois, is hindering the efficient movement of barge traffic on the river system; and

"Whereas, the U.S. Army Corps of Engineers has developed a plan to replace Locks and Dam 26;

"Now, therefore, be it resolved by the House of Representatives of the State of North Dakota, the Senate concurring therein:

"That the Forty-fifth Legislative Assembly strongly urges the President and the Congress of the United States of America to provide for the expeditious replacement of Locks and Dam 26 on the Mississippi River at Alton, Illinois; and

"Be it further resolved, that Senators Milton R. Young and Quentin N. Burdick and Congressman Mark Andrews are urged to take a leadership role in the introduction of appropriate legis.ation into the Congress of the United States to provide for such expeditious replacement of Locks and Dam 26; and

"Be it further resolved, that copies of this resolution be forwarded by the Secretary of State to the President of the United States, the Speaker of the U.S. House of Representatives, the President of the U.S. Senate, and the North Dakota Congressional Delegation."

POM-111. House Resolution No. 234 adopted by the House of Representatives of the State of Hawaii requesting the Congress of the United States to enact legislation to cancel the indebtedness of the States to the federal account in the unemployment compensation trust fund for advances to pay unemployment benefits; to the Committee on Finance:

"HOUSE RESOLUTION NO. 234

"House resolution requesting the Congress of the United States to enact legislation to cancel the indebtedness of the States to the Federal account in the unemployment compensation trust fund for advances to pay unemployment benefits

"Whereas, unemployment is not unique to Hawaii but is a nation-wide problem reflecting the economic ills confronting the United States; and

"Whereas, Congress early recognized that unemployment and the alleviation of the suffering occasioned therefrom was a federal, as well as a state, problem with the enactment of Titles III and IX of the Social Security Act in 1935, thereby fostering the development of our federal-state cooperative system of unemployment compensation under the aegis of the U.S. Department of Labor; and

"Whereas, a crisis has developed in this federal-state cooperative system because the present economic recession has extended over an unduly long period and has caused the depletion of state trust fund accounts maintained for the payment of unemployment benefits within the Unemployment Compensation Trust Fund, a pooled Federal fund where all employer contributions are deposited for subsequent payment of benefits; and

"Whereas, at least twenty-two states, including Hawaii, have already been compelled to request advances from the Federal Unemployment Account in the Unemployment Compensation Trust Fund to pay benefits to their citizens because the amounts credited to their own accounts in the trust fund have already been depleted and more states will undoubtedly be compelled to seek such advances; and

"Whereas, Congress has reiterated its position that unemployment and the alleviation of suffering occasioned therefrom is a federal, as well as a state, problem by extending the payment of unemployment benefits through Congressional action; and

"Whereas, the repayment of the funds advanced will be an undue burden for the states during this period of economic adversity and they will be unable to repay

such advances without assessing substantially higher taxes against employers; and

"Whereas, if employers in Hawaii and the other states are assessed these additional amounts to repay the advances, it will undoubtedly further compcund the economic problems presently confronting the states and the nation; now therefore,

"Be it resolved by the House of Representatives of the Ninth Legislature, Regular Session of 1977, that the Congress of the United States be respectfully requested to enact legislation cancelling or forgiving the indebtedness of the states to the Federal Unemployment Account in the Unemployment Compensation Trust Fund for funds advanced to the states for the payment of unemployment compensation benefits; and

"Be it further resolved that certified copies of this House Resolution be transmitted to the Speaker of the House of Representatives of the United States Congress, the President of the Senate of the United States Congress, members of Hawaii's Congressional delegation, and the Secretary of Labor of the United States."

POM–112. Senate Concurrent Resolution N. 9 adopted by the Legislature of the State of South Dakota memorializing the Congress of the United States to refrain from repealing the Barden Amendment, or section 14(b) of the Taft-Hartley Act which allows states to prohibit agreements requiring membership in a labor organization as a condition of employment; to the Committee on Human Resources.

"SENATE CONCURRENT RESOLUTION NO. 9

"A concurrent resolution memorializing the Congress and the President of the United States to refrain from repealing the Barden Amendment, or section 14(b) of the Taft-Hartley Act which allows states to prohibit agreements requiring membership in a labor organization as a condition of employment

"Be it resolved by the Senate of the State of South Dakota, the House of Representatives concurring therein:

"Whereas, the so-called Barden Amendment, designated as section 14(b) of the Taft-Hartley Act, and codified as 29 USC 164(b) of the United States Code, permits states to prohibit agreements requiring membership in a labor organization as a condition of employment; and

"Whereas, the South Dakota electorate in November, 1946, adopted such a prohibition as part of our state Constitution known as the right-to-work guarantee, which being a part of section 2 of article IV of our Constitution, provides that "the right of persons to work shall not be denied or abridged on account of membership or nonmembership in any labor union, or labor organization"; and

"Whereas, all persons should be free to either affiliate or join or not to affiliate or join any organization, association, or trade union, and no person should be compelled by arbitrary decree or provision of law to become a member of any such organization involuntarily or against his or her wishes; and

"Whereas, the people of South Dakota believe in the God-given right of a person to earn a living through honest toil, with free choice in accepting or rejecting artificial restrictions which may be imposed by any person or organization; and

"Whereas, the United States Supreme Court has upheld the constitutionality of section 14(b) of the Taft-Hartley Act and all state laws enacted under its authority; and

"Whereas, the repeal of section 14(b) would strip South Dakota and all states of their authority to enforce their duly enacted right-to-work laws and would be a direct invasion of the sovereign rights of the states to determine the desirability and economic and political necessity of such laws; and

"Whereas, the South Dakota right-to-work laws place affiliation with a labor organization on a personal, voluntary basis within the informed judgment of the individual, and further prohibits employers from requiring that any person become or remain a member of any labor organization as a condition of employment or continuation of employment and thus guarantees and protects the individual rights and liberties of all persons with regard to their employment relationships and affiliations:

"Now, Therefore, be it resolved, by the Senate of the Fifty-second Legislature of the state of South Dakota, the House of Representatives concurring therein, that the Congress of the United States, the members of the United States Senate and House of Representatives from South Dakota, and the President of the United States are hereby memorialized to refrain from enacting federal legislation which would repeal, modify or otherwise subvert the provisions of section 14(b) of the Taft-Hartley Act, as codified as 29 USC 164(b); that each member of South Dakota's Congressional delegation is hereby further respectfully memorialized to vote against any proposed repeal, modification, or subversion of section 14(b) and to thus sustain the will of the people of South Dakota, protect its state's rights, and guarantee the individual constitutional liberties and guarantees afforded by the Constitution of this state."

POM–113. Senate Concurrent Resolution No. 113 adopted by the Legislature of the State of South Dakota memorializing the Congress and the President of the United States to refrain from enacting "common situs" picketing legislation; to the Committee on Human Resources:

"SENATE CONCURRENT RESOLUTION NO. 13

"A concurrent resolution, memorializing the Congress and the President of the United States to refrain from enacting 'common situs' picketing legislation.

"Be it resolved by the Senate of the State of South Dakota, the House of Representatives concurring herein:

"Whereas, in 1951 the United States Supreme Court ruled that certain types of union picketing at construction sites are currently outlawed as constituting the kind of 'secondary-boycott' forbidden by the Taft-Hartley Act; and

"Whereas, under existing law, if a labor union has a dispute with a certain subcontractor at a construction site it can legally picket that particular subcontractor but cannot picket the entire site and thus shut down the entire project; and

"Whereas, if 'common situs' picketing legislation were enacted, labor unions could force all contractors and subcontractors working at a common site to exclusively employ only union labor; and

"Whereas, 'common situs' picketing will lead to labor unrest in an already troubled industry, lead to more costly strikes and construction delay, higher unemployment among non-union labor, and increased inflation as costs are passed on to consumers:

"Now, therefore, be it resolved, by the Senate of the Fifty-second Legislature of the state of South Dakota, the House of Representatives concurring therein, that the Congress of the United States, the members of the United States Senate and House of Representatives from South Dakota, and the President of the United States are hereby memorialized to refrain from enacting 'common situs' picketing legislation; that each member of South Dakota's Congressional delegation including its Senators and Representatives, is hereby further respectfully memorialized to vote against any such proposed 'common situs' picketing legislation, and thus to preserve the individual's right to join or not join a labor organization against his or her will in order to preserve or protect his gainful employment; and

"Be it further resolved, that copies of this resolution be immediately forwarded by the Secretary of the Senate of the state of South Dakota to the President of the United States Senate, and to the Speaker of the House of Representatives of the Congress of the United States, the President of the United States, and each South Dakota member of the United States Senate and United States House of Representatives."

POM–114. House Concurrent Resolution No. 3057 adopted by the Legislature of the State of North Dakota urging Congress to reject legislation providing for the vertical and horizontal divestiture of American oil companies; to the Committee on the Judiciary:

"HOUSE CONCURRENT RESOLUTION NO. 3057

"A concurrent resolution urging Congress to reject legislation providing for the vertical and horizontal divestiture of American oil companies

"Whereas, legislation has been introduced in the United States Congress to provide for vertical and horizontal divestiture of American oil companies; and

"Whereas, such legislation would restrict oil companies to operating in only one functional sector of the petroleum industry, such as production, transportation, or refining, and would prohibit oil companies from developing other energy sources; and

"Whereas, a strong and productive domestic petroleum industry is vital if the United States is to develop energy self-sufficiency and reduce the increasing dependence upon foreign oil imports which amounted to over 40 percent of the United States domestic crude oil needs during 1976; and

"Whereas, the growing reliance upon foreign oil imports is strengthening the power of oil-producing nations who are members of the Organization of Petroleum Exporting Countries (OPEC) and making the United States increasingly vulnerable to another oil embargo similar to the 1973–74 embargo which caused severe shortages and long lines of motorists at service stations; and

"Whereas, divestiture legislation will neither add to our domestic petroleum supplies nor reduce our dependence on foreign oil imports, but will rather deprive United States oil companies of the benefits of vertical and horizontal integration; and

"Whereas, vertical integration enables oil companies to operate more efficiently and economically in finding and producing oil and moving it to the consumer in addition to allowing for more efficient and flexible controls over supply, distribution, and cost of crude oil and petroleum products, which benefits the consumer with regard to both cost and availability of products; and

"Whereas, horizontal integration enables oil companies to utilize their expertise, technology, and financial resources in the development of non-oil energy sources which must be accelerated to meet future growth in domestic energy demand; and

"Whereas, prohibiting oil companies from contributing capital and expertise to the development of non-oil energy sources will severely delay the development of such sources and worsen existing energy problems; and

"Whereas, no evidence has been provided by the proponents of this legislation that divestiture will be in the best interests of the consumer, the economy, or the national security of this nation;

"Now, therefore, be it resolved by the House of Representatives of the State of North Dakota, the Senate concurring therein:

"That the Forty-fifth Legislative Assembly urges the United States Congress to reject legislation providing for the vertical and horizontal divestiture of oil companies as being contrary to the national interest; and

"Be it further resolved, that copies of this resolution be forwarded to the President of

the Senate, the Speaker of the House of Representatives, and the North Dakota Congressional Delegation."

HOUSE BILLS REFERRED

The following bills were each read twice by their titles and referred as indicated:

H.R. 2521. An act to provide for the mandatory inspection of domesticated rabbits slaughtered for human food, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

H.R. 2992. An act to authorize appropriations for fiscal year 1978 for carrying out the Comprehensive Employment and Training Act of 1973 as amended; to the Committee on Human Resources.

H.R. 3416. An act to amend section 316(c) of the Agricultural Adjustment Act of 1938 to provide that leasing of Flue-cured tobacco acreage-poundage marketing quotas after June 15 of any year be permitted only between farms on which at least 80 per centum of the farm acreage allotment was planted for such year; to the Committee on Agriculture, Nutrition, and Forestry.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. CANNON, from the Committee on Rules and Administration, with amendments:

S. Res. 102. A resolution authorizing expenditures by the Select Committee on Indian Affairs (Rept. No. 95-74).

By Mr. CANNON, from the Committee on Rules and Administration, without amendment:

S. Res. 113. A resolutuion authorizing additional expenditures by the Committee on Appropriations for routine purposes (Rept. No. 95-75).

S. Res. 119. A resolution authorizing additional copies of the report entitled "Developments in Aging: 1976" (Rept. No. 95-76).

S. Res. 128. An original resolution authorizing additional expenditures by the Committee on Rules and Administration for routine purposes (Rept. No. 95-77).

H. Con. Res. 157. A concurrent resolution authorizing the printing of a compilation of tributes by Members of the House in the Halls of Congress to commemorate the years of service of the Honorable Gerald R. Ford (Rept. No. 95-78).

EXECUTIVE REPORT OF THE COMMITTEE ON ARMED SERVICES

Mr. HARRY F. BYRD, JR. Mr. President, as in executive session, from the Committee on Armed Services, I report favorably the nomination of Vice Admiral Julien J. LeBourgeois, U.S. Navy, for appointment to the grade of vice admiral on the retired list. I ask that this nomination be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated.

By Mr. CHILES:

S. 1177. A bill to amend the Occupational Safety and Health Act of 1970 to improve the administration of that Act, and for other purposes; to the Committee on Human Resources.

By Mr. THURMOND (for himself and Mr. EASTLAND):

S. 1178. A bill to amend the Communications Act of 1934 in order to prohibit the television broadcasting of programs portraying nudity, obscenity, explicit sexual activity, gross physical violence or morbid torture, any of which is offensive to the public taste and morals; to the Committee on Commerce, Science, and Transportation.

By Mr. HATCH:

S. 1179. A bill for the relief of Ifalame Moala Motuliki; to the Committee on the Judiciary.

By Mr. CHURCH:

S. 1180. A bill to designate certain endangered public lands for preservation as wilderness, to provide for the study of additional endangered public lands for such designation, to further the purposes of the Wilderness Act of 1964, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. HATHAWAY:

S. 1181. A bill to amend title XVI of the Social Security Act to provide that in the case of an individual residing in the household of a relative, support and maintenance furnished in kind to such individual by such relative shall be excluded from income and shall not cause a reduction in benefits; to the Committee on Finance.

S. 1182. A bill to amend title XVI of the Social Security Act with respect to disabled individuals who are medically determined to be alcoholics or drug addicts; to the Committee on Finance.

By Mr. McCLURE (for himself, Mr. CHURCH, Mr. CANNON, Mr. GARN, Mr. HANSEN, Mr. HATFIELD, Mr. LAXALT, Mr. STEVENS, Mr. TOWER, Mr. WALLOP, and Mr. YOUNG):

S. 1183. A bill to provide for rangeland improvement by permitting work in lieu of payment for grazing permits; to the Committee on Energy and Natural Resources.

By Mr. MAGNUSON (by request):

S. 1184. A bill to amend section 7(e) of the Fishermen's Protective Act of 1967, as amended; to the Committee on Commerce, Science, and Transportation.

By Mr. MAGNUSON (for himself, Mr. BIDEN, Mr. CHILES, Mr. DURKIN, Mr. FORD, Mr. HUDDLESTON, Mr. McINTYRE, Mr. MATHIAS, Mr. STONE, and Mr. WILLIAMS):

S. 1185. A bill to regulate interstate commerce with respect to parimutuel wagering on horseracing, to maintain the stability of the horseracing industry, and for other purposes; to the Committee on Commerce, Science, and Transportation, and the Committee on the Judiciary, jointly, by unanimous consent.

By Mr. MAGNUSON (for himself and Mr. JACKSON):

S. 1186. A bill to authorize construction of the project for navigation and other purposes on the Blair and Sitcum Waterways, Tacoma Harbor, Wash.; to the Committee on Environment and Public Works.

By Mr. MAGNUSON (by request):

S. 1187. A bill to provide a comprehensive system of liability and compensation for oil spill damage and removal costs, and for other purposes; to the Committee on Commerce, Science, and Transportation, and the Committee on Environment and Public Works, jointly, by unanimous consent.

By Mr. MAGNUSON (for himself and Mr. LONG):

S. 1188. A bill to amend the Interstate Commerce Act, the Rail Passenger Service Act, and the Harter Act in order to provide for expeditious claim-setting procedures to facilitate the flow of freight in interstate commerce, to provide shippers with greater security against monetary loss, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. RANDOLPH (for himself, Mr. STONE, Mr. DURKIN, Mr. MATSUNAGA, Mr. STAFFORD, Mr. THURMOND, and Mr. HANSEN):

S. 1189. A bill to amend title 38 of the United States Code in order to revise and improve the program of making grants to the States for construction, remodeling, or renovation of State home facilities for furnishing hospital, domiciliary, and nursing home care for eligible veterans, and for other purposes; to the Committee on Veterans' Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CHILES:

S. 1177. A bill to amend the Occupational Safety and Health Act of 1970 to improve the administration of that Act, and for other purposes; to the Committee on Human Resources.

Mr. CHILES, Mr. President, I introduce today a bill to amend the Occupational Safety and Health Act of 1970. I am proposing this legislation with the hope that perhaps the 95th Congress will be the Congress that faces up to the issue of OSHA reform. I am hoping that this year we will objectively evaluate the present law, determine the actual problems that exist, and act to make constructive changes.

When I first came to the Senate, OSHA was one of the major areas of concern brought to my attention by Floridians. Over the years this concern has continued unabated. This will be the third Congress in which I have proposed OSHA reform legislation. Other Senators have also put forth reform legislation. And yet we have not seen serious committee consideration of such legislation nor has the full Senate had the opportunity to take up the OSHA issue. What we have seen is the Senate trying to work its will on OSHA reform through temporary measures tacked on the Labor-HEW appropriations bill. This is hardly the way to deal with the issue and I would hope that we will not have to repeat that process in this session.

I believe it is important to keep in mind that discontent on the part of employers with OSHA does not reflect a lack of support for the effort to bring about a safe and healthful working environment. I have yet to talk to an employer who is not interested in eliminating hazardous conditions. The question at issue is whether we are going about the achievement of an effective worker safety program in the most reasonable and efficient manner.

My feeling is that as long as OSHA remains an object of suspicion and fear by the business community, we are not really going to accomplish much in the way of improved worker safety. You cannot hire enough inspectors to monitor every business establishment in this Nation. If OSHA is going to be a cops and robbers game, then it will never work as Congress intended. It will remain, as current surveys indicate, the Federal

agency of foremost concern to the American business community.

I think we definitely need to improve our record on worker safety. So if we have an agency charged with the mission of bettering working conditions, let's make it work. The basic ingredient needed is the development of a working partnership between the employer and OSHA. The current situation of suspicion, confusion, and unrealistic demands on the businessman is hardly conducive to the establishment of such a partnership.

OSHA must get out of the role of policeman, trying to rack up a full tally sheet of fines on every inspection. Instead it should be an agency that assists the employer in the task of identifying and correcting possible safety or health hazards. The employer in turn must cooperate with the agency in seeing that unsafe conditions are rectified.

A number of the problems that have been experienced with OSHA stem from the manner in which the agency was administered. In the last year there has been some progress toward more reasonable policies and I hope this will continue. Dr. Morton Corn, the former Assistant Secretary for Occupational Safety and Health, made clear in his recent report that major overhaul work is still required. Dr. Corn pointed out:

> Implementation of the OSH Act of 1970 was conceived in a strictly managerial sense. In other words, it was believed that efficient managers without health and safety expertise could pilot the agency. There is almost an absolute absence of highly qualified technical personnel among the Washington staff and in the highest field positions. In December 1975 major offices of the Agency were headed by individuals without health and safety expertise. This omission of technical understanding of health and safety, perhaps the major ingredient of an OSHA program has, in my opinion, led to alienation of the clients the Agency serves and the allied professional community.

While I expect a continued effort to improve the way OSHA is run, this is not the total answer. Congress has a definite responsibility to address the OSHA issue. I think it is clear that there are areas in which the law can be changed to provide more feasible procedures and requirements from the standpoint of the employer and to assist the employer in complying with standards. We need well-conceived, constructive legislation to improve OSHA's operations and to eliminate the activities that serve only to irritate and frustrate the business community. Such legislation will help to put the agency on the right course. To the employer, the passage of such legislation will serve as a signal of change and the start of the end of hostilities.

The legislation I am proposing today takes into account the new policy directions in the last year by the Agency. It also reflects the benefit of testimony given to the Labor Subcommittee in its oversight field hearings in Jacksonville, Fla., in which I participated this past September.

Initially, my bill addresses the question of costs borne by employers in attempting to comply with OSHA regulations. While certainly a price cannot be placed on consideration of health or safety, economic feasibility must be a factor in the development of standards. Requirements levied upon the employer must be technically and economically practicable if we are to realistically expect the businessman to be able to comply and remain in business.

The Occupational Safety and Health Administration has, to some extent, moved in the direction of evaluating the economic impact of proposed standards especially in response to the Executive order requiring that all major legislative proposals, regulations, and rules emanating from the executive branch include a statement certifying that the inflationary impact of such action has been considered. My proposal would require by statute a technological and economic feasibility study, at least 30 days prior to promulgation of the standard, for a new safety or health standard which significantly affects employees' working conditions.

Determining the applicable standards and keeping up with the continual revisions being made in the standards by the Occupational Safety and Health Administration has proven an overwhelming and confusing task for many businessmen, particularly small businessmen. The Department of Labor has said it was not feasible to compile regulations and standards in volumes or booklets according to industry. However, I believe it is feasible for the Department to assist businesses by preparing annual reports containing the most common safety and health violations, together with references to the regulations, by industry and occupation. Such reports should be made available to any trade association or labor organization.

The confusing and voluminous nature of OSHA standards presents a rather difficult situation for the average employer in trying to comply with every aspect of applicable regulations. This uncertainty and the resulting frequency of small fines is a source of considerable frustration to the business community, but hardly serves in any way to materially improve worker safety and health. The authority to levy fines for nonserious violations during an initial inspection is not necessary for the accomplishment of the goals of the act and has proven to be merely an irritant. As a step toward fostering an improved relationship between OSHA and the employer, I think these fines should be terminated.

In examining the current operation of the appeal process, there is an evident need for more workable and equitable procedures in contesting a citation. Needed changes that I have proposed include increasing the period of time in which an employer may decide to contest to 30 days; stipulating that an employer may withdraw from a proceeding at any time previous to the conclusion of a hearing without change in citation; limiting the jurisdiction of the OSHA Review Commission to be that of upholding, reducing, or dismissing penalties, not adding increased penalties; and granting a stay of the OSHA Review Commission's decision, if the employer appeals to the appropriate Court of Appeals, for at least 90 days or until the court has ruled on the request for the stay.

I believe the act should be amended to require that the Department in issuing citations will, when requested by the employer and where practicable, also provide guidance as to how the violation may be corrected. The lack of such guidance in the past has been a particular problem for the smaller businessman, not well acquainted with the mechanics of dealing with a Federal agency, and often at a loss in determining what effort at compliance will be acceptable to the Department and yet reasonable in terms of his own financial resources.

One final area for change that should prove of considerable importance in facilitating compliance is that of instituting onsite consultations by the Occupational Safety and Health Administration. Current problems with compliance stem in a large measure from the lack of any real assistance from the Federal Government in the task of identifying and correcting possible safety or health hazards. At present, the Occupational Safety and Health Administration will not provide consultation without issuing citations for violations and quite naturally there are few requests for consultations of that nature.

The regulations are complex and technical and there is a definite need for a program of assistance in order to achieve compliance. This is especially vital for the smaller employer, financially unable to engage the services of a professional safety consultant. As one Florida businessman wrote me:

> We are doing our best and would like to have the health safety inspectors helping us with consultation rather than further burdening us with fines.

I am sure that Congress, in enacting the Occupational Safety and Health Act of 1970, was interested in the improvement of working conditions and not in seeing how many fines could be levied. As I have repeatedly indicated, OSHA and business must work together to achieve the goals of the act and a system in which the only way to receive help is to run the risk of fines hardly serves to encourage the development of such a partnership.

What is needed is a more constructive role for OSHA in providing assistance to the employer in meeting the objectives of the law. The present training and employee education provision in the act should be broadened in scope to include technical assistance. The agency would be directed to initiate onsite consultations and provide advice at the request of employers and be required to make recommendations for eliminating hazards. Priority would go to employers unable to obtain consultation from a State consultation program and small businesses and hazardous workplaces. No citation or fine would be imposed; however, if death or serious physical harm could result from the conditions disclosed, the employer would be required to eliminate such conditions. Further, functions of consultants and inspectors would be separated and information regarding specific consultative visits would not be given to inspectors except as necessary to alleviate conditions which could result in death or serious physical harm. The addition of this function will meet

a very real need that has become evident since the passage of the Occupational Safety and Health Act.

I believe these amendments to the Occupational Safety and Health Act of 1970 are necessary to the achievement of effective worker protection. I urge prompt consideration of this bill by the Senate Human Resources Committee.

Mr. President, I ask unanimous consent that the text of the bill I am introducing today be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1177

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Occupational Safety and Health Act Amendments of 1977".

SEC. 2. Section 6(b)(2) of the Occupational Safety and Health Act of 1970 is amended by inserting at the end thereof the following: "In proposing any rule promulgating a new occupational health or safety standard which would significantly affect the safe and healthful working conditions for men and women, the Secretary shall prepare and have published in the Federal Register, at least 30 days before the proposed standard is promulgated, technological and economic feasibility studies of such proposed standard.".

SEC. 3. Section 8(g) of the Occupational Safety and Health Act of 1970 is amended by adding at the end thereof the following new paragraph:

"(3) The Secretary, after consultation with the Secretary of Health, Education, and Welfare, shall compile and publish in an appropriate form by March 31 of each year, annual reports of the classes of violations of this Act most often occurring in the previous calendar year, classified by industry and occupation. Upon request, the Secretary shall furnish, without charge, copies of the reports required by this paragraph to any trade association or labor organization.".

SEC. 4. Section 9(a) of the Occupational Safety and Health Act of 1970 is amended by inserting immediately after the third sentence the following: "Upon request by the employer, at or shortly after the time of the inspection or investigation, the citation shall where practicable, suggest a course of action which, if implemented, would correct the violation. The employer shall not be bound to use that course of action to the exclusion of any others the employer determines more suitable in correcting the condition.".

SEC. 5. (a)(1) The first sentence of section 10(a) of the Occupational Safety and Health Act of 1970 is amended by striking "fifteen working days" and substituting "thirty days".

(2) The second sentence of section 10(a) of such Act is amended by striking "fifteen working days" and substituting "thirty days".

(3) The first sentence of section 10(b) of such Act is amended by striking "fifteen working days" and substituting "thirty days".

(4) The second sentence of section 10(b) of such Act is amended by striking "fifteen working days" and substituting "thirty days".

(5) The first sentence of section 10(c) of such Act is amended by striking "fifteen working days" and substituting "thirty days".

(b) The second sentence of section 10(c) of such Act is amended by striking "modifying" and substituting "reducing".

(c) Section 10(c) of such Act is amended by adding at the end thereof the following: "Any employer who has notified the Commission that he intends to contest a citation issued under section 9(a) or notification issued under subsection (a) or (b) of this section may withdraw the notice of intent to contest the citation at any time prior to conclusion of a hearing thereon and upon so doing the citation and assessment, as proposed, shall be deemed a final order of the Commission and not subject to review by any court or agency.".

(d) The fourth sentence of section 11(a) of such Act is amended to read as follows: "The commencement of proceedings under this subsection shall operate as a stay of the order of the Commission for the lesser of 90 days or until such time that the court has ruled on the requests for such stay.".

SEC. 6. (a) Subsections (b), (c), (d), (e), (f), (g), (h), (i), (j), (k), and (l) of section 17 of the Occupational Safety and Health Act of 1970 are redesignated as subsections (c), (d), (e), (f), (g), (h), (i), (j), (k), (l), and (m), respectively.

(b) Section 17(b) of such Act is amended by inserting after subsection (a) the following:

"(b) If, as a result of an initial inspection of any establishment or workplace, an employer received a citation for a violation of the requirements of section 5 of this Act, of any standard, rule, or order promulgated pursuant to section 6 of this Act, or of regulations prescribed pursuant to this Act, and such violation is specifically determined not to be of a serious nature, such employer shall not be assessed a civil penalty for the violations.".

SEC. 7.(a) Section 21 of the Occupational Safety and Health Act of 1970 is amended by inserting at the end thereof the following new subsection:

"(d)(1) In order to further carry out his responsibilities under this section, the Secretary may visit the workplace of any employer for the purpose of affording consultation and advice to the employer. Such consultative visits may be conducted only upon a request by the employer for consultation and advice at the workplace concerning the obligations of the employer under section 5. In making consultative visits under this subsection, the Secretary shall give priority to, (A) employers who would be unable to obtain on-site consultation from a State occupational safety and health consultation program, (B) small businesses, and (C) hazardous workplaces. The Secretary shall make and transmit to the employer a written report, containing recommendations regarding the elimination of any hazards disclosed during any such consultative visit.

"(2) No consultative visit authorized by this subsection shall be regarded as an inspection or investigation under section 8 of the Act and no citations shall be issued nor shall any civil penalty be imposed by the Secretary upon such visit, except—

"(A) whenever an employer fails to eliminate an imminent danger disclosed during a consultative visit, the Secretary shall take appropriate action under section 13 to eliminate such condition; and

"(B) if there is substantial probability that death or serious physical harm to employees could result from conditions disclosed during a consultative visit, the Secretary shall immediately notify the employer of such conditions and afford the employer a reasonable time to eliminate such conditions.

Whenever the Secretary is not satisfied through a further consultative visit, documentary evidence, or otherwise that the elimination of the violation has taken place, the Secretary may take any appropriate action under this Act.

"(3) Information regarding consultative visits shall not be transmitted to representatives of the Secretary engaged in enforcement activities except where necessary in order to carry out the provisions of paragraph (2).

"(4) Except as otherwise provided, nothing herein shall affect the duties and responsibilities of the Secretary under sections 8, 9, 10, and 13. Advice given during a consultative visit shall not be binding on the Secretary in the event of any inspection of the workplace. In the event of such inspection, a written report of the consultation visit may, with the consent of the employer, be considered by the Secretary for the purpose of determining the employer's good faith in proposing penalties.

"(5) In prescribing rules and regulations pursuant to this subsection, the Secretary shall provide for the separation of functions between officers, employees, or agents who conduct consultive visis pursuant to this subsection and officers, employees, or agents who conduct inspections or investigations under section 8".

(b) The heading of section 21 of such Act is amended to read as follows:

"TRAINING, EDUCATION, AND TECHNICAL ASSISTANCE".

SEC. 8. This Act shall take effect sixty days after the date of its enactment.

By Mr. THURMOND (for himself and Mr. EASTLAND):

S. 1178. A bill to amend the Communications Act of 1934 in order to prohibit the television broadcasting of programs portraying nudity, obscenity, explicit sexual activity, gross physical violence or morbid torture, any of which is offensive to the public taste and morals; to the Committee on Commerce, Science, and Transportation.

Mr. THURMOND. Mr. President, I rise today to introduce legislation which I believe may ultimately affect the attitudes, behavior and moral fiber of the citizens of this great Nation.

With the advent of the television, all Americans—old and young, rich and poor—were given the opportunity to become a more meaningful part of our society. This medium was a giant step in modern technology and mass communications. Broad vistas of opportunities and challenges were opened to all who viewed these "images-on-screen." People could travel to the four corners of the Earth without leaving their living room. The confines of a classroom or library were removed, giving way to a vehicle through which all Americans could become better educated and improve their status in life. The impact of this invention is immeasurable, yet, Mr. President, this great gift to mankind has become a two-edged sword.

Recently, many Americans have become concerned about the effects that the television has had on young people during their maturation process. Educators like Dr. Benjamin Bloom, of the University of Chicago, maintain that by the time a child reaches 5 years of age, he has undergone as much intellectual growth as will occur over the next 13 years. According to the noted television pollster, A. C. Nielsen, children under the age of 5 watch an average 23.5 hours of television a week. On the other hand, adults have a far greater appetite for television, consuming an alarming 44 hours per week; however, the effects on young people can be enormous and possibly dangerous. It has been estimated that by the time of one's high school graduation, today's typical teenager will have logged ap-

proximately 15,000 hours before a television screen. These are perhaps the most important years of an individual's life. They are growing years, the learning years.

Mr. President, I stand today not as a foe and archenemy of the field of television and its related industries, but rather as both a concerned parent of four children 5 years of age or younger, and as an advocate of responsible television programing. The question I place before the Senate today in the form of this legislation, is whether we, as Senators, owe a duty to require responsible regulation of an industry which profoundly affects the attitudes, behavior, and general complement of Americans.

Each of us recognizes that television broadcasting is unique because it is directed indiscriminately toward the public. In a different way from other media of mass communication, it is both pervasive and intrusive. The passive act of watching television is different, practically, socially, and physically from obtaining literature or gaining admission to a movie theater. To gain access to risque literature or motion pictures, a consumer must enter a store or theater and make a purchase. Bookstore and theater proprietors can easily exclude persons who are under age and thus reduce the likelihood that young children will be exposed to matters that are deemed unacceptable for their consumption. Furthermore, the use of magazines, books, and movies are matters which parents find it both simple, and natural, to regulate. Parents can monitor both the movies their children see and the books they read. But television broadcasts are much more difficult for parents to supervise. Such broadcasts are easily accessible to young persons even in the privacy of the home, without the need for comparable affirmative acts. The offensive matter may be received and consumed with no one the wiser.

Thus, unlike a bookstore owner or theater operator, a broadcast licensee has no comparably effective means of sorting out and excluding youthful customers. Moreover, as is widely known and widely deplored in our society, television viewing for young children is an experience largely devoid of direct parental supervision. Although most parents monitor their children's viewing and listening habits some of the time—particularly during later evening hours when parents themselves place heavy reliance on broadcast media to satisfy their entertainment needs—it is unrealistic to expect such close oversight all the time.

Mr. President, it is those times when unsupervised children are most likely in the audience that I express particular concern. It is at this time that I believe broadcasters must use the public interest standard, and program accordingly. A broadcaster should not force parents to accept the risk that their children will be exposed to portrayals of nudity, obscenity and gross physical violence while in the privacy of their own home.

Mr. President, I believe that a licensee television network or station should conduct itself as a fiduciary with obligations to present those views and voices which are representatives of the community which it serves. Also, the courts have long recognized the existence of a special societal interest in protecting young children from sexually explicit material. This interest is warranted not only by the State's interest in the moral and emotional adjustment of children, but also a recognition of parents' right to rear their children according to their own best judgment.

Therefore, Mr. President, I believe it is entirely appropriate for Congress, through legislation, to assist the FCC to determine and define the standard by which the public interest is judged. It seems to me that an elementary standard of the public interest would be to take into account the concern that millions of Americans share about the level of sexual material, violence, and carnage entering their homes.

Today, I, along with Senator EASTLAND, am sending to the desk a bill which would empower the FCC to prohibit television stations from broadcasting portrayals of nudity, obscenity, explicit sexual activity, gross physical violence or morbid torture, any of which is offensive to the public taste and morals. I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1178

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That part I of title III of the Communications Act of 1934 is amended by inserting at the end thereof a new section as follows:

"PROHIBITION OF CERTAIN TELEVISION BROADCASTING

"SEC. 332. (a) The Congress finds that in view of the purpose of this Act, as stated in section 301, 'to maintain the control of the United States over all the channels of interstate and foreign radio transmission', television broadcasting stations should in the public interest be prohibited from broadcasting programs portraying nudity, obscenity, explicit sexual activity, gross physical violence or morbid torture, any of which are offensive to the public taste and morals.

"(b) The Commission shall as soon as practicable prescribe regulations prohibiting such broadcasting stations from broadcasting such portrayals of nudity, obscenity, explicit sexual activity, gross physical violence or morbid torture."

By Mr. CHURCH:

S. 1180. A bill to designate certain endangered public lands for preservation as wilderness, to provide for the study of additional endangered public lands for such designation, to further the purpose of the Wilderness Act of 1964, and for other purposes; to the Committee on Energy and Natural Resources.

ENDANGERED AMERICAN WILDERNESS ACT OF 1977

Mr. CHURCH. Mr. President, it is with particular personal pleasure that I send to the desk for introduction the Endangered American Wilderness Act of 1977.

As I said when this measure was first introduced last June, I am especially gratified to initiate this legislation, because it represents a major new step in building America's national wilderness preservation policy. It was 16 years ago that I served as floor manager for the original Wilderness Act, a renowned landmark in our conservation policy. This new bill extends and strengthens the program which that historic law began.

AMERICA'S WILDERNESS PROGRAM

In 1964, Congress enacted the Wilderness Act after more than 8 years of careful consideration. That law created the National Wilderness Preservation System, to be comprised of Federal land areas preserved by decision of Congress as wilderness. The lands involved are Federal lands, in several categories, but all are to be managed under a common policy: To perpetuate the natural character of the land and its ecological community of life, in order to secure for all Americans the significant benefits and values which wilderness gives to our lives and our culture. Portions of our national forests, national parks, and our national wildlife refuges and game ranges are being designated as wilderness. All authority to decide what areas are suitable and should be designated as wilderness is exercised by Congress.

We are proceeding well in carrying out the mandate of the Wilderness Act. Additional areas are being studied and Congress is acting to bring new areas into the National Wilderness Preservation System.

The 94th Congress was a successful one for this wilderness program, with a number of additional areas given final designation. In all, 36 new units of wilderness were established in 22 States, including such major new areas as the Hells Canyon Wilderness in Idaho and Oregon, the Flat Tops and Eagles Nest Wilderness Areas in Colorado, and the Alpine Lakes Wilderness in Washington. Additional portions of our national parks and wildlife refuges were also designated for wilderness protection. A number of key national forest areas were given special interim protection pending completion of wilderness reviews. Finally, we at last corrected a major gap in our national wilderness program by mandating a careful wilderness review for the roadless lands administered by the Bureau of Land Management.

OUR DE FACTO WILDERNESS

Despite this progress, there remain other lands within our national forests which have not yet received full consideration for wilderness protection. The national forest lands we have focused on thus far, in the Wilderness Act and in the reviews which it mandated, were almost entirely set aside for protection prior to World War II under administrative orders. With the Wilderness Act, we have strengthened the statutory protection of these areas and moved to complete the studies of the old "primitive areas" which were created in the 1930's. But we have not given equal attention to the other remnants of undisturbed land, the so-called "de facto wilderness."

"De facto wilderness" is that portion of the public domain which has remained roadless and undeveloped through no special protection or program, but

merely because it has been too remote or low in commercial value to be developed. And because it has no special protection, it is this category of land which is most in danger of losing its wilderness character before it can be given thorough review and consideration.

"De facto wilderness" is indeed a fragile resource. It has been diminishing steadily as we have moved in to settle and develop most of our land. As Bob Marshall, a founder of the wilderness movement, said in 1937, the "de facto wilderness" is disappearing like a snow bank melting away on a south-facing mountain slope in the hot June sun.

A FRAGILE RESOURCE

The history of our heritage of "de facto wilderness" is not encouraging. Of course, we must continue to develop parts of the public domain, using its manifold resources to build our country and improve the lives of our people. But inadequate planning has resulted, in some places, in the needless sacrifice of wildlands without due consideration being given to the important wilderness and natural values at stake.

As recently as 1926, L. F. Kneipp, Assistant Chief of the Forest Service, prepared an inventory of "de facto wilderness" in the national forests. His criteria for the minimum size of wilderness areas was generous by today's standard: He limited his inventory to areas greater than 360 square miles without roads. He found, in 1926, 74 separate tracts with a total area of 55 million acres. Some of this land was subsequently classified as primitive areas, and a small portion found its way into new national parks. But by far the largest portion of all that expanse of "de facto wilderness" has since been developed. By 1961, a similar inventory, conducted by the Wildlands Research Center of the University of California, found the number of areas satisfying Kneipp's criteria was reduced from 74 to 19. The total acreage involved in such units was reduced from 55 million acres to 17 million acres.

Since 1961, the same trend of vanishing wilderness has continued. In 1972, the Forest Service conducted its own inventor was reduced from 360 square tional Forest System, commonly known as the RARE program—roadless area review and evaluation. They inventoried a total of 56 million acres of roadless lands left on the national forests of the West—but the minimum size for this inventory was reduced from 360 square miles to just 5,000 acres.

Mr. President, not all of the roadless areas found in the 1926 survev should have been preserved. Nor should all of the roadless areas remaining today. Some should and will be developed for other uses.

The basic issue here is how these decisions are to be made. It is clear from the growing concern expressed by many that a sound and consistent program has not yet been put into effect. As I said when this legislation was first introduced last year:

We must insist that the decisions about the fate of these last wild lands be made with full consideration given to their wilderness values. In fact, however, these *"de facto* wilderness" areas are rapidly being committed for development, through decision-making processes that many feel do not properly evaluate the values of the wilderness as such. A crescendo of concern for these areas among citizens throughout the West is rapidly rising. Problems in the quality of Forest Service land use planning and decision-making are resulting in increasing controversy over the fate of these last roadless areas.

CITIZEN WILDERNESS PROPOSALS

The proposed wilderness areas embraced in the Endangered American Wilderness Act of 1977 reflect this rising tide of concern. It is charged that the Forest Service has inadequately considered the wilderness values of these areas and is, instead, making hasty decisions to open them up for development which will destroy their wilderness qualities. In some cases, a single large tract of land with wilderness potential has been arbitrarily subdivided by the Forest Service into a number of artificially separated units. Subdivided in this way, the overall wilderness qualities of the total area are never properly considered in the land use planning process. The result is a calculated procedure in which the wilderness is destroyed in piecemeal steps.

In other cases, citizen complaints call attention to the failure of a Forest Service land use plan to focus on one particular roadless area. A number of separate areas are lumped together, and the public is presented an artificially extreme choice: Preserve all the roadless areas, or none of them. In fact, few of our people favor either extreme, yet the Forest Service planning process has polarized opinion, and created unnecessary problems and delays.

Our people cannot be expected to settle for decisions resulting from this sort of flawed procedure. So, controversy erupts over these areas, appeals are filed, and lawsuits eventually result.

It is the purpose of the Endangered American Wilderness Act to bring this whole problem into better focus, and to expedite at least a part of the decisions to be made.

The bill proposes 11 new wilderness areas, each an outstanding natural area with important wilderness qualities. In addition, eight other areas are proposed as wilderness study areas, to receive a full wilderness review, with interim protection.

The areas included in the bill are:

PROPOSED WILDERNESS AREAS

Golden Trout Wilderness—California—240,000 acres.

Santa Lucia Wilderness—California—21,250 acres.

Ventana Wilderness (additions to existing area)—California—60,080 acres.

Goose Creek Wilderness (additions to the Weminuche Wilderness)—Colorado—69,400 acres.

Manzano Mountain Wilderness—New Mexico—37,000 acres.

Sandia Mountain Wilderness—New Mexico, 30,700 acres.

French Pete (addition to the Three Sisters Wilderness)—Oregon—42,000 acres.

Middle Santiam Wilderness—Oregon—24,500 acres.

Wild Rogue Wilderness—Oregon—29,000 acres.

Wenaha-Tucannon—Washingtin-Oregon—129,000 acres.

PROPOSED WILDERNESS STUDY AREAS

West Chichagof-Yakobi Island Study Area—Alaska—405,000 acres.

Galiuro Wilderness Additions Study Area—Arizona—80,430 acres.

La Garita Wilderness Additions Study Area—Colorado—82,700 acres.

Chama River Canyon Wilderness Study Area—New Mexico—50,900 acres.

Mount Henry Wilderness Study Area—Montana—22,000 acres.

McGregor-Thompson Wilderness Study Area—Montana—89,000 acres.

Welcome Creek Wilderness Study Area—Montana—28,915 acres.

PROPOSED WILDERNESS AND WILDERNESS STUDY COMBINATION

Kalmiopsis Wilderness (additions to existing area)—Oregon—134,000 acres.

Kalmiopsis Wilderness Study Area—Oregon—136,000 acres.

Originally, many areas throughout the West were proposed for inclusion in this legislation. Before making a final decision as to which areas would be in the bill, I consulted with my Western colleagues. Each of the areas in the bill which I am introducing today has been brought to the attention of both Senators from the State in which they are located. These Senators do not necessarily support wilderness or wilderness study classification for these areas. Some Senators have expressed their intention of waiting until after the Senate Energy and Natural Resources Committee has held hearings on the bill, and the opinions of local citizens can be ascertained, before deciding to support or oppose a particular area in the bill.

The areas included in this bill are diverse. Each has outstanding wilderness potential. Each has strong local citizen support. Each is an area of "de facto wilderness." Each in one way or another, is under threat from developments which would destroy or degrade its wilderness values and character. As a group, these areas serve to illustrate the problems facing America's "de facto wilderness."

There is one areas of "de facto wilderness" within of Idaho which may, at a later date, be added as an amendment to this bill. That area, known as Gospel-Hump for its two most prominent features, Gospel Peak and Buffalo Hump Mountain, is part of the largest region of roadless land left in the contiguous 48 States. The area is roughly bounded by the south fork of the Clearwater River, John's Creek drainage, Wind River drainage, the southern breaks of the Salmon River and the Mackay Bar-Crooked Creek Road. Gospel-Hump has 450,000 acres, in eight Forest Service planning units, nine contiguous roadless areas, on two national forests in two Forest Service regions. Land use plans for two of the planning units were recently appealed to the Regional Forester for Region I and finally to the Chief of the Forest Service on the grounds that local planners did not consider the entire Gospel-Hump roadless area in their planning, but were adopting a piecemeal approach. The Chief upheld the appeal on March 8, and directed that all the adjacent roadless portions within the Gospel-Hump area be evaluated collectively for their wilderness potential.

Local citizens in this area of Idaho are very concerned about the whole For-

est Service land use planning process. The future use of the entire region is highly uncertain. Recently, in a breakfast meeting I attended with 50 members of the Grangeville Chamber of Commerce, we had the opportunity to discuss this matter at some length. The general consensus of those present at this meeting was that perhaps the most expeditious way to decide the fate of the land in question was simply for interested parties from all concerned agencies and groups to sit down and work out a package plan to expedite the decisionmaking process regarding the Gospel-Hump area. This approach could save years of delay and uncertainty which is of no benefit to either environmental or user groups, and could cause serious economic dislocation. I am hopeful this can be done. If a decision can be made about the future of this area, I will offer an amendment to the Endangered American Wilderness Act to include relevant portions of Gospel-Hump in the National Wilderness Preservation System. The amendment would be written in such a way as to also designate certain buffer zones adjacent to the wilderness for further study, in conjunction with a comprehensive soil survey and a survey of the elk herd and other wildlife values, while the remaining land would be released for multiple-use management. This would assure an adequate base to maintain an annual cut in line with the needs of the local lumber industry.

THE VALUES OF WILDERNESS

In the face of the problems facing our efforts to properly fulfill our national wilderness preservation policy, it is important to stress the many values wilderness provides.

Perhaps we think first of the values gained by those who use these wilderness areas for recreational enjoyment. And indeed, millions of Americans do use these areas. The burgeoning use of our wilderness areas is obvious, as Forest Service statistics demonstrate. Outfitters report unprecedented numbers of people from every State signing up for guided wilderness trips, rafting down the rivers, hiking the high wilderness plateaus, or horseback trips, packing into the heart of our great wilderness expanses. The boom in businesses selling wilderness equipment—backpacks, camping equipment, hiking boots, cross-country skiing gear, and all the provisions—is enormous. An important new industry has arisen to provide the equipment and provisions for wilderness trips.

When the Wilderness Act was first debated in the Senate in 1961, the Committee on Interior and Insular Affairs report on the bill included some explanation of the values and uses of wilderness areas. Some excerpts from that report are instructive:

Lands devoted to wilderness provide benefits beyond those identified as wilderness benefits and are truly multiple-use lands.

They provide game which, if it could be produced at all, would cost tens of millions of dollars to maintain, propagate and produce in artificial facilities. Scientists testify that some species cannot exist except in wilderness.

Under the provisions of (The Wilderness Act) areas of the wilderness system will continue to supply forage for domestic livestock.

And they supply the recreational, scenic, scientific, educational, conservation, and historical use values to which (the Wilderness Act) directs emphasis in future management of the wilderness preservation system.

Although these values are most often described as intangible, unmeasurable values, their worth to the Nation and to mankind is becoming increasingly easy to perceive and to estimate, even in dollar terms, as the National attempts to reacquire title to lands for necessary outdoor recreation facilities, or for wetlands essential to fish and game, or to build museums in which relatively miniscule evidences of natural history may be preserved for scientific, educational and historical purposes.

And the recreational use of wilderness areas, the 1961 report of the Committee on Interior and Insular Affairs said:

The use is less casual than use of other types of recreational facilities. Trips into wilderness are frequently of many days or weeks duration. They are often a once-in-10-years event in life, or even a once-in-a-lifetime expedition to some remote scenic or historic mountain or area. As a consequence of the nature of wilderness use, annual visitor figures—even if more adequately and reliably gathered—would not be indicative of the proportion of citizens interested in wilderness recreation.

The value of wilderness areas for scientific research and educational use is growing in significance. Our 1961 committee report quoted the testimony of Dr. Walter Cottam, professor of botany at the University of Utah, and an eminent scientist:

Besides the great spiritual and recreational blessing afforded to all the people living and unborn, this bill also provides laboratory sanctuaries for biological research that should prove to be of inestimable academic and economic worth. One of the most perplexing problems in land management today is the lack of available wilderness areas from which comparisons can be made and lessons learned on the life histories, on food chains, and other ecological interactions of myriads of living forms whose impact on the future of man himself may well prove to be far greater than any of us can possibly realize.

PEOPLE SUPPORT WILDERNESS

Preserving a decent sampling of America's wilderness heritage is an important goal, and a goal enjoying great public support. The people are getting involved as never before in the land management decisions being made today.

The Wilderness Act—I am proud to say—has paved the way for greater public participation in these far-reaching decisions. The Wilderness Act mandated public involvement, through hearings in the locality of each proposed wilderness. And it gave the ultimate decision on wilderness designation to the Congress, where the public will can best be registered. In my own State, as we have brought under consideration the question of giving full wilderness classification to the Idaho Primitive Area, extensive public hearings have been held, as the act required. The strength and diversity of public support for wilderness in Idaho, as elsewhere, is demonstrated by the fact that these public hearings showed a substantial margin in favor of the largest proposal for wilderness—some 2.3 million acres, as proposed by the River of No Return Wilderness Council.

The American people want their wilderness preserved, just as they want a reasonable supply of the other multiple values which can be obtained from our public lands. For each wilderness proposal embodied in this Endangered American Wilderness Act, there is substantial public support in the local area.

CONGRESS SHOULD DECIDE

Mr. President, the Forest Service has long been a chief steward of America's wilderness areas. Through its land use planning procedures, the agency is now enedavoring to come to grips with difficult questions in the tradeoff of competing uses for parts of our national forests. Wilderness is a part of the multiple-use pattern of our national forests, as the Congress specified in the 1960 Multiple Use-Sustained Yield Act. Wilderness areas are truly multiple-use lands, providing high quality watershed protection, grazing, recreational, and scenic enjoyment for many people, and for scientific and cultural values. Wilderness has a place in our national forests, and I commend the Forest Service for its efforts to identify key areas of wilderness potential.

However, the final arbiter of these decisions must be the Congress. It is altogether appropriate that concerned citizens have petitioned Members of Congress to secure protection for wilderness areas through special legislation. As a result of these citizen petitions, we have enacted a number of special bills for such areas. The Endangered American Wilderness Act is a step to further the resolution of the land use questions, and to deal with problems with some of the Forest Service land use plans and development decisions.

It is my hope that this new bill will engage great and widespread public interest and support, and broad support here in Congress.

WE CAN PRESERVE THE WILDERNESS

Mr. President, one of the notable pioneers in the fight to preserve America's wilderness was the naturalist, Aldo Leopold. As a forester with the Forest Service in the early 1920's, he is credited with the proposal that led to the establishment of our first dedicated wilderness, the Gila Wilderness in New Mexico. In 1953, a group of people gathered at the edge of that first great wilderness to dedicate a memorial to Aldo Leopold's contributions. I would like to bring to the attention of my colleagues the words of two of those who spoke at that occasion, 25 years ago.

One speaker was Harvey Brome, president of the Wilderness Society, who said:

Ours is the first great nation in history to be possessed of both the knowledge and means to bring about within its borders a state of permanent and harmonious coexistence with the land.

Wilderness must be the cornerstone of such a world. For there are the grizzlies, the coyotes, and the deer; there are the lions, and the chickadees; there are the forests and the waters, the fish and the insects; there are the humus and the soil, the prairie and marsh grasses, all living and existing in balance, in beauty and harmony. There, in the unspoiled remnants of the wild earth,

spotted across our continent, man will find the basis of understanding. Then, wilderness will influence civilization and civilization will cease to alter and destroy wilderness. Then, indeed, will Thoreau's lord of creation walk as a member—and not as a fumbling outsider—in the community of living things.

The other speaker that day in 1953 was our late, beloved colleague, the Senator from New Mexico and former Secretary of Agriculture, Clinton Anderson. Senator Anderson was a leader in the fight to obtain the Wilderness Act, and he counted it among his proudest achievements. On that day in 1953, he spoke of his friend Aldo Leopold's work to save wilderness, and Senator Anderson said this:

The work of Aldo Leopold has been done. We now become trustees of his inheritance. Those of us who may visit within the wilderness and who are able to rest and be restored in our peace of mind and body by the quiet that it will always possess have nonetheless an obligation to see that the work of one generation shall not be sacrificed by those that come after. We have an obligation to make sure this area (and others like it) may remain untouched for generations and perhaps centuries to come. We cannot take our burdens as trustees lightly if we are to keep faith with those who struggled so mightily to achieve these precious spots within the confines of a busy continent. The erection of this memorial reminds each of us that our lives as well can contribute to the things that mean beauty for the eye and rest for the spirit. We, too, can preserve the wilderness.

It is the purpose of the Endangered American Wilderness Act to continue the work begun by Aldo Leopold and so ably carried on by Clinton Anderson and so many others. Through this initiative, which will receive careful study and consideration by Congress, we, too, can help preserve and protect our remaining wilderness.

We are trustees of our wilderness heritage, and of those remaining lands which possess important wilderness values and have yet to be fully protected. This is a responsibility those of us from the West feel especially keenly. In closing debate here in the Senate when we first passed the wilderness bill in 1961, I said:

I supported the Wilderness Bill for many reasons which I have stated during the course of the debate, but I must emphasize in closing that the ultimate reason, above all others is a philosophical reason. Though we tend to feel that we are presently the owners of this country, we are not, in any true philosophical sense. We are the trustees of this country for a little time only. Our fathers and our grandfathers before us though they may be dead and gone, still have a claim upon this country. Our children and grandchildren, and generations yet unborn who will come after us have rights in this country. Our trusteeship will quickly pass, and we owe a responsibility to our forefathers before us and our children after us to see to it that the trust is properly discharged.

The great purpose of the Wilderness Bill is to set aside a reasonable part of the vanishing wilderness, to make certain that the generations unborn will know what it is to experience life on undeveloped, unoccupied land in the same form and character as the Creator fashioned it. This is an experience we in the West can still know. The enactment of the bill will mean that our children will know it too.

It is a great spiritual experience. I never knew a man who took a bedroll onto an Idaho mountainside and slept there under a star-studded summer sky who felt self-important the next morning. Unless we preserve some opportunity for future generations to have the same experience we shall have dishonored our trust to posterity.

Mr. President, I ask unanmous consent that the text of the Endangered American Wilderness Act be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1180

Be it enacted by the Senate and House of Represenatives of the United States of America in Congress assembled, That this Act may be cited as the "Endangered American Wilderness Act of 1977.

STATEMENT OF FINDINGS AND POLICY

SECTION 1. (a) The Congress finds that—

(1) many areas of undeveloped national forest lands possess and exhibit outstanding natural characteristics giving them high value as wilderness and will, if properly preserved, contribute as an enduring resource of wilderness for the benefit of the American people;

(2) certain of these undeveloped national forest lands meet all statutory criteria for suitability as wilderness as established by subsection 2(c) of the Wilderness Act (78 Stat. 890), but are not adequately protected and lack statutory designation pursuant to the Wilderness Act as units of the National Wilderness Preservation System;

(3) certain other undeveloped national forest lands are of evident wilderness resource value, but require more thorough study of boundary locations prior to designation as wilderness by Act of the Congress;

(4) these and other undeveloped national forest lands exhibiting wilderness values are immediately threatened by pressures of a growing and more mobile population, large-scale industrial and economic growth, and development and uses inconsistent with the protection, maintenance, restoration, and enhancement of their wilderness character; and

(5) among such immediately threatened areas are lands not being adequately protected or fully studies for wilderness suitability by the agency responsible for their administration.

(b) Therefore, the Congress finds and declares that it is in the national interest that certain of these endangered areas be promptly designated as wilderness within the National Wilderness Preservation System, in order to preserve such areas as an enduring resource of wilderness which shall be managed to promote and perpetuate the wilderness character of the land and its specific multiple values for watershed preservation, wildlife habitat protection, scenic and historic preservation, and scientific research and educational use, primitive recreation, solitude, physical and mental challenge and inspiration, for the benefit of all of the American people of present and future generations.

DESIGNATION OF WILDERNESS AREAS

SEC. 2. (a) In furtherance of the purpose of the Wilderness Act, the following lands (hereinafter referred to as "wilderness areas"), as generally depicted on maps appropriately referenced, dated June 1976, are hereby designated as wilderness and, therefore, as components of the National Wilderness Preservation System—

(1) certain lands in the Inyo and Sequoia National Forests, California, which comprise about two hundred and forty thousand acres, are generally depicted on a map entitled "Golden Trout Wilderness Area—Proposed," and shall be known as the Golden Trout Wilderness;

(2) certain lands within and adjacent to the Los Padres National Forest, California, which comprise about twenty-one thousand two hundred and fifty acres, are generally depicted on a map entitled "Santa Lucia Wilderness Area—Proposed," and shall be known as the Santa Lucia Wilderness;

(3) certain lands in the Los Padres National Forest, California, which comprise about sixty thousand and eighty acres, which are generally depicted on a map entitled "Ventana Wilderness Additions—Proposed," and which are hereby incorporated in, and shall be deemed to be a part of, the Ventana Wilderness as designated by Public Law 91-58;

(4) certain lands in the Rio Grande National Forest, Colorado, which comprise about sixty-nine thousand four hundred acres, which are generally depicted on a map entitled "Goose Creek Wilderness Additions—Proposed," and which are hereby incorporated in, and shall be deemed to be a part of, the Weminuche Wilderness as designated by Public Law 93-632;

(5) certain lands in the Cibola National Forest, New Mexico, which comprise about thirty-seven thousand acres, are generally depicted on a map entitled "Manzano Mountain Wilderness Area—Proposed," and shall be known as the Manzano Mountain Wilderness;

(6) certain lands in the Cibola National Forest, New Mexico, which comprise about thirty thousand seven hundred acres, are generally depicted on a map entitled "Sandia Mountain Wilderness Area (North and South Units)—Proposed," and shall be known as the Sandia Mountain Wilderness;

(7) certain lands in the Willamette National Forest, Oregon, which comprise about forty-two thousand acres, which are generally depicted on a map entitled "French Pete Creek and Other Proposed Additions, Three Sisters Wilderness," and which are hereby incorporated in, and shall be deemed to be a part of, the Three Sisters Wilderness as designated by subsection 3(a) of the Wilderness Act;

(8) certain lands in the Willamette National Forest, Oregon, which comprise about twenty-four thousand five hundred acres, are generally depicted on a map entitled "Middle Santiam Wilderness Area—proposed," and shall be known as the Middle Santiam Wilderness;

(9) certain lands within and adjacent to the Siskiyou National Forest, Oregon, which comprise about twenty-nine thousand acres, are generally depicted on a map entitled "Wild Rogue Wilderness Area—Proposed," and shall be known as the Wild Rogue Wilderness; and

(10) certain lands in the Umatilla National Forest, Washington and Oregon, which comprise about one hundred twenty-nine thousand acres, are generally depicted on a map entitled "Wenaha-Tuchannon Wilderness Area—Proposed," and shall be known as the Wenaha-Tuchannon Wilderness.

DESIGNATION OF WILDERNESS STUDY AREAS

SEC. 3. (a) In furtherance of the purposes of the Wilderness Act, the Secretary of Agriculture (hereinafter known as the "Secretary") shall, within five years after the date of enactment of this Act, review each area designated by this section as to the suitability of such area for preservation as wilderness, and report his findings to the President.

(b) Areas to be reviewed pursuant to this section (hereinafter referred to as "wilderness study areas"), as generally depicted on maps appropriately referenced, dated February 1976, include—

(1) certain lands in the Tongass National Forest, Alaska, which comprise about four hundred and five thousand acres, and are generally depicted on a map entitled "West Chichagof-Yakobi Island Wilderness Study Area";

(2) certain lands in the Coronado National Forest, Arizona, which comprise approximately eighty thousand four hundred and thirty acres and are generally depicted on a map entitled "Galiuro Wilderness Additions Study Area";

(3) certain lands in the Rio Grande and Gunnison National Forests, Colorado, which comprise approximately one hundred eighty-two thousand seven hundred acres and are generally depicted on a map entitled "La Garita Wilderness Additions Study Area";

(4) certain lands in the Kootenai National Forest, Montana, which comprise approximately twenty two thousand acres and are generally depicted on a map entitled, "Mount Henry Wilderness Study Area";

(5) certain lands in the Lolo and Kootenai National Forests, Montana, which comprise approximately eighty nine thousand acres and are generally depicted on a map entitled "McGregor-Thompson Wilderness Study Area";

(6) certain lands in the Lolo National Forest, Montana, which comprise approximately twenty eight thousand nine hundred and fifteen acres and are generally depicted on a map entitled "Welcome Creek Wilderness Study Area";

(7) certain lands in the Santa Fe and Carson National Forests, New Mexico, which comprise approximately fifty thousand nine hundred acres and are generally depicted on a map entitled "Chama River Canyon Wilderness Study Area"

(c) The Secretary shall conduct his reviews, and the President shall advise the United States Senate and House of Representatives of his recommendations, in accordance with the provisions of subsection 3(b) and 3(d) of the Wilderness Act, except that any reference in such subsections to areas in the national forests classified as "primitive" shall be deemed to be a reference to the wilderness study areas designated by this Act and except that the President shall advise the Congress of his recommendations with respect to all such areas within five years after the date of enactment of this Act: *Provided, however,* That the Secretary shall give at least sixty days' advance public notice of any hearing or other public meeting concerning such areas.

(d) Nothing herein contained shall limit the President in proposing, as part of his recommendations to Congress, the alteration of existing boundaries of any wilderness study area or recommending the addition to any such area of any contiguous area predominately of wilderness value.

KALMIOPSIS WILDERNESS ADDITIONS

SEC. 4. In furtherance of the purposes of the Wilderness Act, certain lands in the Siskiyou National Forest, Oregon, which comprise about one hundred and thirty-four thousand acres, as generally depicted on a map entitled "Kalmiopsis Wilderness Additions and Wilderness Study Area" and dated June 1976 are hereby designated as wilderness and are incorporated in, and shall be deemed to be a part of, the Kalmiopsis Wilderness designated by subsection 3(a) of the Wildernes Act. Certain other contiguous roadless lands, which comprise about one hundred and thirty-six thousand acres, as generally depicted on said map, shall be reviewed by the Secretary as to their suitability for preseravtion as wilderness in accordance with the provisions and timetables set forth in section 3 of this Act.

FILING OF MAPS AND DESCRIPTIONS

SEC. 5. As soon as practicable after enactment of this Act, a map of each wilderness study area and a map and a legal description of each wilderness area shall be filed with the Committee on Energy and Natural Resources of the United States Senate and the Committee on Interior and Insular Affairs of the House of Representatives, and each such map and description shall have the same force and effect as it included in this Act: *Provided, however,* That correction of clerical and typographical errors in each such legal description and map may be made. Each such map and legal description shall be on file and available for public inspection in the Office of the Chief of the Forest Service, Department of Agriculture.

MANAGEMENT OF AREAS

SEC. 6. Subject to valid existing rights, the wilderness areas and, until Congress determines otherwise, the wilderness study areas designated by this Act shall be managed by the Secretary in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness areas.

By Mr. HATHAWAY:

S. 1181. A bill to amend title XVI of the Social Security Act to provide that in the case of an individual residing in the household of a relative, support and maintenance furnished in kind to such individual by such relative shall be excluded from income and shall not cause a reduction in benefits; to the Committee on Finance.

Mr. HATHAWAY. Mr. President, I am introducing a bill that would change the requirement that persons collecting supplemental security income living at home have their payments reduced by one-third. This provision has imposed hardships on both the recipients and the administering agency alike.

We are faced with the anomaly that while experts in developmental disabilities, rehabilitation, and aging are promotive of home care and deinstitutionalization, our welfare system creates disincentives to keeping the physicially and mentally disabled and aged person at home. At the same time, the requirement places a burden on the Social Security Administration. Thus, we find a provision of law that works against widely espoused social policy to encourage family life and to less costly alternative to institutional care, while creating additional work for an increasingly overloaded Federal agency.

Perhaps the single largest factor behind the lack of adequate or appropriate long-term care for a large number of the chronically disabled is the general lack of adequate or appropriate long-term care and lack of alternatives to institutional care. Often the question of whether a person will remain in the community depends on the existence of family support, the adequacy of financial resources and the availability of non-institutional health and social services. This bill attempts to address one of these factors, but a complete solution awaits more comprehensive health and welfare reform.

The bill excludes support received from a relative from income. The cost of supporting a disabled child or adult is costly, but less costly than care in an institution. Families who devote their time, energies and material resources to a disabled relative should not be penalized for their dedication.

There are those who will say that such a change in law will be costly. True, it will cost money in the short run, but the incentives it will create to keep our most vulnerable citizens in their homes will be both cost effective in the long run and promotive of enhanced family stability and involvement.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1181

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1612(a)(2)(A) of the Social Security Act is amended—

(1) in clause (i) by inserting after "another person's household" the parenthetical phrase "(other than the household of a relative)";

(2) in clause (ii) by striking out the word "and" at the end thereof;

(3) in clause (iii) by striking out the semicolon at the end thereof and inserting in lieu thereof a comma and the word "and"; and

(4) by adding at the end thereof the following new clause:

"(iv) in the case of any individual (and his eligible spouse, if any) living in the household of a relative (as defined in section 1614(g)) and receiving support and maintenance in kind from such relative, such support and maintenance shall be excluded from income;".

(b) Section 1614 of such Act is amended by adding at the end thereof the following new subsection:

"DEFINITION OF RELATIVE

"(g) For purposes of this title, the term 'relative' means a father, mother, grandfather, grandmother, brother, sister, stepfather, stepmother, stepbrother, stepsister, uncle, aunt, first cousin, nephew or niece.".

(c) The amendments made by this Act shall be effective upon the first day of the first month beginning more than 60 days after the date of enactment of this Act.

By Mr. HATHAWAY:

S. 1182. A bill to amend title XVI of the Social Security Act with respect to disabled individuals who are medically determined to be alcoholics or drug addicts; to the Committee on Finance.

Mr. HATHAWAY. Mr. President, I am introducing an amendment to the Social Security Act that would delete the provision that requires an alcoholic or drug addict to be in active treatment. Under current regulations a drug addict or alcoholic is not eligible for disability benefits solely because of his or her addiction or alcoholism. The criteria used is physical or mental damage which precludes gainful employment. Yet, a class of recipients are singled out. This despite the fact that section 1615(c) of the act states that—

No individual shall be an eligible individual or eligible spouse for purposes of this title if he refuses without good cause to accept vocational rehabilitation services for which he is referred under subsection (a).

Since appropriate facilities are unavailable in most communities, the Social Security Administration accepts the client's statement of intent to enter treatment making the provision a virtual charade. In addition, an alcoholic who is a member of a self-help group such as Alcoholics Anonymous does not qualify if the law is interpreted strictly. This bill would serve to remedy a redundant and discriminatory provision.

In addition, the bill I am introducing would delete the requirement that representative payee be designated to receive

SSI payments for an alcoholic or drug addict regardless of whether they have been determined to be financially responsible or not. This results in a situation where the client is prone to being cheated by unscrupulous persons, and in which a financial incentive is created to keep the client in settings which may not be medically or socially indicated. The determination of the need for a representative payee, in the bill I am introducing would be based on financial responsibility by a court of competent jurisdiction rather than any arbitrary classification based on condition or disease.

We cannot condone a lesser level of civil liberties for the disabled than we can for other citizens. Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1182

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1611(e) of the Social Security Act is amended by striking out paragraph (3).

(b) Section 1631(a)(2) of such Act is amended by striking out the second sentence thereof and inserting in lieu thereof the following: "Notwithstanding the provisions of the preceding sentence, in the case of any eligible individual or eligible spouse who is medically determined to be a drug addict or an alcoholic, the Secretary shall provide for making payments of the benefit to any other person (including an appropriate public or private agency) who is interested in, or concerned with, the welfare of such individual (or spouse) for any month during which such individual (or spouse) is determined to be not financially responsible by a court of competent jurisdiction.

(c) The amendments made by this Act shall be effective upon the first day of the first month beginning more than 60 days after the date of enactment of this Act.

By Mr. MCCLURE (for himself, Mr. CHURCH, Mr. CANNON, Mr. GARN, Mr. HANSEN, Mr. HATFIELD, Mr. LAXALT, Mr. STEVENS, Mr. TOWER, Mr. WALLOP, and Mr. YOUNG):

S. 1183. A bill to provide for rangeland improvement by permitting work in lieu of payment for grazing permits; to the Committee on Energy and Natural Resources.

Mr. MCCLURE. Mr. President, today, on behalf of myself and 10 cosponsors I introduce a bill to provide for rangeland improvement by permitting work in lieu of payment for grazing permits. The western public lands provide a needed contribution to the economic life blood of grazing in Idaho and other Western States. Recent reports suggest that part of the western range is in need of improvement, not only for livestock grazing, but also for wildlife use.

My bill would permit the development of approved improvements on the public lands by permittees, and this work be counted as partial payment to the Government as a portion of that amount due for the privilege of grazing on the public lands. In no way, as some have suggested, would this be construed as developing a vested interest on the public lands by the permittee. It makes sense to have this program available, as the permittee is geared up to do the work, and he does not have the bureaucratic constraints of work hours and the public would get more work for the dollar by the project being developed privately than being done through the appropriation process.

There is ample precedent for this approach to improvements on the public lands in that thousands of miles of multiple-use roads on national forest lands have been built through a system of purchaser credits whereby authorized permanent roads are constructed by national forest timber purchasers who are reimbursed for the work by reduction in timber stumpage payments corresponding to the dollar value of the work.

I feel the public would benefit by timely passage of this bill in that early improvement of the range could take place without waiting for uncertain funding through the appropriation process. I ask for early consideration of this approach to improving the condition of the range on the public lands.

By Mr. MAGNUSON (by request):

S. 1184. A bill to amend section 7(e) of the Fishermen's Protective Act of 1967, as amended; to the Committee on Commerce, Science, and Transportation.

Mr. MAGNUSON. Mr. President, I introduce today, at the request of the Department of Commerce, a bill to amend section 7(e) of the Fishermen's Protective Act of 1967, as amended.

I ask unanimous consent that the statement of purpose and need prepared by the Department of Commerce, and the text of the bill be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1184

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (e) of section 7 of the Fishermen's Protective Act of 1967, as amended (82 Stat. 729, as amended; 22 U.S.C. 1977), is further amended by deleting the date October 1, 1977" and inserting in lieu therefor "October 1, 1979".

THE SECRETARY OF COMMERCE,
Washington, D.C., March 2, 1977.

Hon. WALTER M. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed are six copies of a draft bill "To amend section 7(e) of the Fishermen's Protective Act of 1967, as amended," together with a statement of purpose and need in support thereof.

This proposed legislation has been reviewed by the Department in the light of Executive Order No. 11821 and has been determined not to be a major proposal requiring evaluation and certification as to its inflationary impact.

We have been advised by the Office of Management and Budget that there would be no objection to the submission of our draft bill to the Congress from the standpoint of the Administration's program.

Sincerely,

JUANITA M. KREPS.

STATEMENT OF PURPOSE AND NEED

Section 7 of the Fishermen's Protective Act of 1967 which is administered by the National Marine Fisheries Service (NMFS) of the National Oceanic and Atmospheric Administration (NOAA) of the U.S. Department of Commerce authorizes the Federal Government to insure vessel owners and crews from financial losses resulting from the seizure of United States fishing vessels by a foreign government on the high seas or on the basis of rights or claims to territorial waters not recognized by the United States.

To date, there have been 119 seizures eligible for compensation under section 7 of the Act. Ecuador was responsible for 88 of these seizures; Peru, for 30; and Panama, for one. Claims resulting from these seizures have totaled almost $3.3 million. About 40%, or $1.3 million, of that amount was generated by vessel owners in the form of fees paid for section 7 insurance agreements. The rest was paid by the U.S. Government through Congressional appropriations. Fees have also paid the cost of administering the program.

Section 7 of the Act has worked well, providing valuable protection to the Nation's tuna and distant-water shrimp fleets. Particularly in the case of the tuna fleet, there is an established need for the continuation of section 7.

The proposed legislation would extend section 7 from its present expiration date of October 1, 1977 until October 1, 1979.

By Mr. MAGNUSON (for himself, Mr. BIDEN, Mr. CHILES, Mr. DURKIN, Mr. FORD, Mr. HUDDLESTON, Mr. MCINTYRE, Mr. MATHIAS, Mr. STONE, and Mr. WILLIAMS):

S. 1185. A bill to regulate interstate commerce with respect to parimutuel wagering on horseracing, to maintain the stability of the horseracing industry, and for other purposes; to the Committee on Commerce, Science, and Transportation, and the Committee on the Judiciary, jointly, by unanimous consent.

Mr. MAGNUSON. Mr. President, I am introducing today for myself and Senators BIDEN, CHILES, DURKIN, FORD, HUDDLESTON, MCINTYRE, MATHIAS, STONE, and WILLIAMS, the Interstate Horseracing Act of 1977, a bill designed to regulate interstate commerce with respect to parimutuel wagering on horseraces. The bill is designed both to protect the parimutuel racing industry and the States which permit such racing and depend upon it as a source of tax revenues. Ultimately, it would also protect those States which currently allow off-track betting on races not being run within their own State borders.

In recent years, the growth of horseracing in the United States has been substantial. Part of this growth is reflected by the estimated tax revenues realized by governmental entities as a result of this enterprise; at the moment, it is estimated that these revenues exceed $1 billion annually. In addition to these tax benefits, the racing industry provides employment opportunities for both skilled and semiskilled personnel. Another benefit to the economy stems from the fact that the U.S. equine industry has experienced a substantial surplus in international trade activities as a result of the development of the high quality racing bloodstock in the United States.

The legislation I am introducing today will assure the continued vitality of the racing industry by stopping what has become a growing trend toward States accepting parimutuel wagers at their off-track betting facilities on races

which are run in other States. This practice causes attendance at race tracks to suffer, and consequently purses are smaller and the quality of racing declines. While in the short run, those States permitting this sort of out-of-State wagering may reap some temporary immediate benefits, in the long run all States which depend upon racing as a source of revenue will lose because of the deterioration of conditions at the track themselves. The bill does not in any way affect the right of a State to permit off-track betting on races run within its own borders; it only applies to races which are run in other States. The bill protects the States, the horsemen, and the tracks from off-track wagering in foreign states through a prohibition of such activities and provision for injured parties to pursue civil remedies in the event of a violation of this prohibition. I ask unanimous consent that that bill be referred to the Committee on Commerce and to the Committee on the Judiciary, in that order.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. MAGNUSON (for himself and Mr. JACKSON):

S. 1186. A bill to authorize construction of the project for navigation and other purposes on the Blair and Sitcum Waterways, Tacoma Harbor, Wash.; to the Committee on Environment and Public Works.

Mr. MAGNUSON. Mr. President, today I am introducing for myself and Senator JACKSON legislation to authorize the U.S. Army Corps of Engineers to modify the Blair and Sitcum Waterways in the Tacoma, Washington Harbor. These modifications are required to permit the harbor to receive modern deeper-draft vessels and have been specifically recommended by the Chief of Engineers in his report of February 8, 1977. I am introducing this legislation now with the hope that the Public Works Committee will incorporate it in the next omnibus Water Resources Development Act which it reports to the Senate.

The modifications authorized by this bill are as follows:

First, Blair Waterway, which was constructed by the Federal Government, would be deepened from its current depth of 30–35 feet to between 41–45 feet.

Second, an existing bridge over the Blair Waterway which provides vessels only 150 feet of horizontal clearance would be removed and replaced with a new bridge providing 300 feet of horizontal clearance.

Third, the Corps of Engineers would assume maintenance responsibility for the Sitcum Waterway and maintain it at a depth of 35 to 40 feet. While the Sitcum Waterway was not constructed by the Federal Government, the Corps' Board of Engineers for Rivers and Harbors has concluded that "there is a Federal interest in assuming maintenance responsibility of the * * * Sitcum Waterway since it is being used by vessels to import both general cargo and alumina, and that transportation savings would be realized through continued maintenance of the existing project."

The Board of Engineers reports that the benefit-to-cost ratio would be 2.2:1 for the Blair Waterway modifications, and 9.9:1 for the Sitcum Waterway modification.

The Federal first cost for the Blair modification would be $16,367,700 matched by a local first cost of $1,546,500. Annual maintenance costs for the Blair Waterway would be only $4,000 more than they are at present. Likewise, the modification of Sitcum Waterway would cost the Federal Government only $4,000 annually.

Mr. President, I ask unanimous consent that the text of the bill, together with the report of the Chief of Engineers dated February 8, 1977, be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1186

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the project for navigation and other purposes on the Blair and Sitcum Waterways, Tacoma Harbor, Washington, is hereby adopted and authorized to be prosecuted by the Secretary of the Army, acting through the Chief of Engineers, substantially in accordance with the recommendations contained in the report of the Chief of Engineers dated February 8, 1977, at an estimated Federal cost of $16,367,700.

DEPARTMENT OF THE ARMY,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, D.C., February 8, 1977.

Subject: Blair and Sitcum Waterways, Tacoma Harbor, Wash.

1. I submit for transmission to Congress my report for Blair and Sitcum Waterways, Tacoma Harbor, Washington, accompanied by the report of the Board of Engineers for Rivers and Harbors, and the reports of the District and Division Engineers. These reports are in partial response to Section 209 of the Flood Control Act of 1962, which requested a survey of Puget Sound, Washington, and adjacent waters, including tributaries, in the interest of flood control, navigation, and other water uses and related land resources.

2. The District and Division Engineers recommend the Blair Waterway be deepened from its Federally authorized depths of 30 feet seaward of 11th Street and 35 feet for the remainder of the waterway to 45 feet below MLLW throughout its entire 2.6 mile reach. They also recommend replacing the existing restrictive 11th Street bridge with a new bridge to provide 300 feet of horizontal clearance necessary for safe vessel operation. The District and Division Engineers recommend that the non-Federally constructed 4,000 foot long Sitcum Waterway should be maintained at Federal expense to 40 feet below MLLW in the outer 3,000 feet and 35 feet below MLLW in the inner 1,000 feet.

3. Based on August 1975 prices, the District and Division Engineers estimate the total cost of the project to be $18,340,000, of which $1,553,300 would be non-Federal. Estimated annual charges for the Blair Waterway, based on an interest rate of 5⅞ percent and a 50 year period of analysis, would be $1,112,000 including $4,000 for annual maintenance beyond that now required. Annual charges for maintaining the Sitcum Waterway are estimated at $4,000. Average annual benefits in the amount of $2,484,000 and $39,400 would accrue to the Blair Waterway and Sitcum Waterway, respectively. The benefit-cost ratio for the Blair Waterway is 2.2 and the benefit-cost ratio for the Sitcum Waterway is 9.9.

4. The Board of Engineers for Rivers and Harbors concurs generally in the findings of the reporting officers. However, the Board recommends that Blair Waterway be deepened to a depth of 41 feet below MLLW instead of to 45 feet as recommended by the reporting officers for the reach from Lincoln Avenue through the turning basin. This modification would reduce the Federal first cost of the project to $16,367,700 and the non-Federal first cost to $1,546,500. With this modification, and based on a 50 year period for economic analysis and using an interest rate of 6⅛ percent, average annual benefits and costs for Blair Waterway are estimated at $2,459,900 and $1,123,000, respectively. The benefit-cost ratio is 2.2. Cost and benefits for maintaining the Sitcum Waterway are not appreciably affected by using a 6⅛ percent interest rate. Accordingly, the Board recommends the modifications of Blair Waterway and Federal assumption of maintenance on Sitcum Waterway, subject to certain items of local cooperation.

5. In making its recommendation, the Board noted that maintaining a 35-foot depth in Sitcum Waterway is adequate for general cargo vessels and that maintenance of a 40-foot depth in the outer 3,000 feet of the channel is required to accommodate alumina vessels. The Board considered the possible single user aspect of the 40-foot depth since the alumina facility is currently leased by one company. The Board concluded that there have been occasions when other alumina companies have benefited from the facility and that similar occasions are expected in the future. Accordingly, the Board concludes that benefits would accrue to several users and that Federal assumption of maintenance of the Sitcum Waterway is warranted. I further support this conclusion of the Board in that the cost difference between maintaining a 40-foot waterway over a 35-foot waterway is not significant enough to warrant consideration of cost-sharing.

6. The estimated January 1977 cost for the Blair Waterway improvement is $18,400,000. Annual costs and benefits are $1,300,000 and $2,460,000, respectively, for a benefit-cost ratio of 1.9 at 6⅜ percent interest. Costs and benefits for maintaining the Sitcum Waterway are not appreciably affected by using updated prices nor the 6⅜ percent interest rate.

7. I concur in the views and recommendations of the Board.

R. C. MARSHALL,
Major General, U.S.A.,
Acting Chief of Engineers.

By Mr. MAGNUSON (by request):

S. 1187. A bill to provide a comprehensive system of liability and compensation for oil spill damage and removal costs, and for other purposes; to the Committee on Commerce, Science, and Transportation, and the Committee on Environment and Public Works, jointly, by unanimous consent.

Mr. MAGNUSON. Mr. President, I introduce today, at the request of the Department of Transportation a bill to provide a comprehensive system of liability and compensation for oil spill damage and removal costs, and for other purposes.

I ask unanimous consent that the bill be referred jointly to the Committee on Commerce, Science, and Transportation; and the Committee on Environment and Public Works.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MAGNUSON. I further ask unanimous consent that the letter of transmittal and the text of the bill be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1187

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Comprehensive Oil Pollution Liability and Compensation Act of 1977."

TITLE I—DOMESTIC OIL POLLUTION LIABILITY, COMPENSATION, AND FUND

SEC. 101. DEFINITIONS. For the purposes of this title, the term—

(a) "Secretary" means the Secretary of Transportation;

(b) "Fund" means the fund established by section 102 of this title;

(c) "person" means an individual, firm, corporation, association, or partnership, or government entity;

(d) "incident" means any occurrence or series of occurrences, involving one or more vessels, facilities, or any combination thereof, which causes or poses an imminent threat of oil pollution;

(e) "vessel" means every description of watercraft or other artificial contrivance used, or capable of being used, as a means of transportation on water;

(f) "public vessel" means a vessel which—(1) is owned, or chartered by demise, and operated by (A) the United States, (B) a State or subdivision thereof, or (C) a foreign government, and (2) is not engaged in commercial service;

(g) "ship" means any vessel carrying oil in bulk as cargo;

(h) "facility" means a structure, or group of structures (other than a vessel or vessels), used for the purpose of transporting, producing, processing, storing, transferring, or hauling oil;

(i) "onshore facility" means any facility, other than an offshore facility located in, on, or under any land within the United States;

(j) "offshore facility" means any facility located in, on, or under the navigable waters or, if the facility is subject to the jurisdiction of the United States, the high seas;

(k) "terminal" means a permanently situated facility, located within the territorial limits of the United States and not owned by any agency of the Federal Government, which receives oil in bulk directly from any vessel, offshore production facility, offshore port facility, onshore pipeline, or a pipeline constructed under the provisions of the Trans-Alaska Pipeline Authorization Act;

(l) "refinery" means a terminal which receives crude oil for the purpose of refinement;

(m) oil pollution means:

(l) the presence of oil, either in an uncharged at an unlawful rate—

(1) the presence of oil, either in an unlawful quantity or which has been discharged at an unlawful rate—

(ii) in or on the waters of the contiguous zone established by the United States under Article 24 of the Convention or the Territorial Sea and the Continuous zone; or

(iii) in or on the waters of the high seas, when discharged in connection with activities conducted under the Outer Continental Shelf Lands Act, as amended, 43 U.S.C. 1331 et seq. or the Deepwater Port Act of 1974, as amended by this Act, 33 U.S.C. 1501 et seq; and

(2) the presence of oil on the high seas causing injury to or loss of natural resources belonging to, appertaining to or under the exclusive conservation and management jurisdiction of the United States; and

(3) the presence of oil in or on the territorial Sea, internal waters, or adjacent shoreline, of a foreign country where damages are recoverable by a foreign claimant under this title;

(n) "navigable waters" means those waters of the United States (including the territorial sea) the general character of which is navigable and which either by themselves or by uniting with other waters, form a continuous waterway on which vessels may navigate or travel between two or more States or to or from any foreign nation;

(o) "United States claimant" means any resident of the United States, the Government of the United States or agency thereof, or the government of a State or political subdivision thereof, who asserts a claim;

(p) "foreign claimant" means any resident of a foreign country, or the government of a foreign country, or any agency or political subdivision thereof, who asserts a claim:

(q) "United States" and "State" include the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Canal Zone, Guam, American Samoa, the United States Virgin Islands, the Commonwealth of the Northern Marianas, the Trust Territory of the Pacific Islands, and any other territory or possession over which the United States has jurisdiction;

(r) "oil" means petroleum, including crude oil or any fraction or residue therefrom;

(s) "cleanup costs" means costs of reasonable measures taken after an incident has occurred to prevent, minimize, or mitigate oil pollution from that incident;

(t) "person in charge" means the individual immediately responsible for the operations of a vessel or facility;

(u) "claim" means a demand in writing for a sum certain;

(v) "discharge" means any emission, intentional or unintentional, and includes spilling, leaking, pumping, pouring, emptying, or dumping;

(w) "owner" means any person holding title to, or, in the absence of title, any other indicia of ownership of a vessel or facility, but does not include a person having only a security interest in, or security title to, a vessel or facility, under a contract of conditional sale, an equipment trust, a chattel or corporate mortgage, a lease which is the functional equivalent of an extension of credit, or any similar instrument;

(x) "operator" means

(1) in the case of a vessel, a charterer by demise or any other person, except the owner, who is responsible for the operation, manning, victualing, and supplying of the vessel, or

(2) in the case of a facility, any person, except the owner, responsible for the operation of the facilty by agreement with the owner;

(y) "property" means littoral or riparian property, including vessels;

(z) "removal costs" means—

(1) costs incurred under subsections (c), (d), and (1) of section 311 of the Federal Water Pollution Control Act, as amended by this Act, section 5 of the Intervention on the High Seas Act, and subsection (b) of section 18 of the Deepwater Port Act of 1974, as amended by this Act; and

(2) cleanup costs, other than the costs described in clause (1); and

(aa) "guarantor" means the person, other than the owner or operator, who provides evidence of financial responsibility for an owner or operator.

(bb) "National Contingency Plan" means the plan published pursuant to subsection (c) of section 311 of the Federal Water Pollution Control Act, as amended (33 USC 1321).

FUND ESTABLISHMENT, ADMINISTRATION, AND FINANCING

SEC. 102. (a) There is hereby established in the Treasury of the United States a Comprehensive Oil Spill Liability Fund, not to exceed $200,000,000. The fund shall be administered by the Secretary and the Secretary of the Treasury as specified in this section. The fund may sue and be sued in its own name.

(b) The fund shall be constituted from—

(1) all fees collected pursuant to subsection (b);

(2) all moneys recovered under section 108;

(3) all other moneys recovered or collected on behalf of the fund, under this Act; and

(4) all moneys received as payment for civil or criminal penalties or fines assessed or adjudged under section 7 of the Oil Pollution Act of 1961, as amended, under paragraph (5) or paragraph (6) of subsection (b) of section 311 of the Federal Water Pollution Control Act, as amended, respecting discharges of oil, under section 12 of the Intervention on the High Seas Act, under section 16 or section 18 of the Deepwater Port Act of 1974, as amended, or under this Act.

(c) In addition to the settlement of claims under section 107, the fund shall be immediately available for the removal costs described in section 101(z)(1), and the Secretary is authorized to promulgate regulations designating the person or persons who may obligate available money in the fund for such purposes.

(d) The fund shall be available for the costs of administering the provisions of this title. Administrative costs shall include all costs to the Federal government incident to claims settlement activities, including adjudicatory and judicial proceedings, whether or not recoverable under section 108. When determined by the Secretary to be necessary for the purposes of establishing claims under section 103(a)(4), the fund shall be available, pursuant to regulations prescribed by the Secretary, for the costs of assessing injury to or the destruction of natural resources resulting from oil pollution incidents classified as "major" under the National Contingency Plan.

(e)(1) The Secretary of the Treasury shall collect from the owners of refineries receiving crude oil, and from the owners of terminals receiving any oil for export or entry into the United States, whether for import or transfer to a foreign country, a fee, not to exceed three cents per barrel of oil received. In the case of refineries receiving crude oil by pipeline, the collection of the fee shall be waived, upon the certification by the Secretary, to the Secretary of the Treasury, that the handling of the oil involved, either in the pipeline or at the refinery, does not constitute a significant threat of oil pollution. Oil upon which a fee has been levied under this paragraph shall not be subject to any subsequent levy hereunder.

(2) The Secretary of the Treasury, after consulting with the Secretary, may promulgate reasonable rules and regulations relating to the collection of the fees authorized by paragraph (1), and, from time to time, the modification thereof. Modifications shall become effective on the date specified therein, but no earlier than the ninetieth day following the date the modifying regulation is published in the Federal Register. Any modification of the fees shall be designed to insure that the Fund is maintained at a level not to excede $200,000,000. No regulation which modifies the fes, or any modification of such a regulation, whether or not in effect, may be stayed by any court pending completion of judicial review of that regulation, or any modification thereof.

(3)(A) Any person who fails to collect or

pay fees as required by the regulations promulgated under paragraph (2) shall be liable for a civil penalty not to exceed $10,000, to be assessed by the Secretary of the Treasury, in addition to the fees required to be collected or paid, and the interest on those fees. Upon the failure of any person so liable to pay any penalty, fee, and interest upon demand, the Attorney General may, at the request of the Secretary of the Treasury, bring an action in the name of the fund against that person for such amount.

(B) Any person who falsifies records or documents required to be maintained under any regulation promulgated under this subsection shall be subject to prosecution for a violation of section 1001 of title 18, United States Code.

(f)(1) The Secretary shall determine the level of funding required for immediate access in order to meet potential obligations of the fund.

(2) The Secretary of the Treasury may invest any excess in the fund, above the level determined under paragraph (1), in interest bearing special obligations of the United States. Such special obligations may be redeemed at any time in accordance with the terms of the special issue and pursuant to regulations promulgated by the Secretary of the Treasury. The interest on, and the proceeds from the sale of, any obligations held in the fund shall be credited to and form a part of the fund.

(g) If at any time the moneys available in the fund are insufficient to meet the obligations of the fund the Secretary shall issue to the Secretary of the Treasury notes or other obligations in the forms and denominations, bearing the interest rates and maturities, and subject to such terms and conditions as may be prescribed by the Secretary of the Treasury. Redemption of these notes or obligations shall be made by the Secretary from moneys in the fund. These notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding marketable obligations. The Secretary of the Treasury shall purchase any notes or other obligations issued hereunder and for that purpose he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act The purposes for which securities may be issued under that Act are extended to include any purchase of these notes or obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of these notes or other obligations shall be treated as public debt transactions of the United States.

DAMAGES AND CLAIMANTS

SEC. 103. (a) Claims for damages for economic loss, airing out of or directly resulting from oil pollution, may be asserted for—

(1) removal costs;

(2) injury to, or destruction of, real or personal property;

(3) loss of use of real or personal property;

(4) injury to, or destruction of, natural resources;

(5) loss of use of natural resources;

(6) loss of profits or impairment of earning capacity due to injury or destruction of real or personal property or natural resources; and

(7) loss of tax revenue for a period of one year due to injury to real or personal property.

(b) A claim authorized by subsection (a) may be asserted—

(1) under item 1, by any claimant: *Provided*, That the owner or operator of a vessel or facility involved in an incident may assert such a claim only if he can show that he is entitled to a defense to liability under section 104(c)(1) or, if not entitled to such a defense to liability, that he is entitled to a limitation of liability under section 104(b): *Provided further*, That where he is not entitled to such a defense to liability but entitled to such a limitation of liability, such claim may be asserted only as to the removal costs incurred in excess of that limitation;

(2) under items 2, 3, 5, and 6 by any United States claimant, if the property involved is owned or leased, or the natural resources involved were lawfully and directly used by the claimant in the ordinary course of his business;

(3) under item 4, by the President, as trustee for natural resources over which the United States Government has sovereign rights or exercises exclusive management authority or by any State for natural resources within the boundary of the State belonging to, managed, controlled by, or appertaining to the State; provided that compensation paid under this item shall be used only for restoration of the natural resources damaged or for acquisition of equivalent resources;

(4) under item 6, by any United States claimant who does not qualify under clause (2) of this subsection if the claimant derives at least 25 per centum of his earnings from activities which utilize the property or natural resource;

(5) under item 7, by any state or political subdivision thereof;

(6) under items 2 through 7, by a foreign claimant to the same extent that a United States claimant may assert a claim, if—

(A) the claimant is not otherwise compensated for the damages;

(B) the oil was discharged from a facility or from a vessel or ship located within the navigable waters or was discharged in connection with activities conducted under the Outer Continental Shelf Lands Act, as amended, 43 U.S.C. 1331 et seq. or the Deepwater Port Act of 1974, as amended by this Act, 33 U.S.C. 1501 et seq.; and

(C) recovery is authorized by a treaty or an executive agreement between the United States and the foreign country in which the pollution occurred, or if the pollution occurred out of the territory of any nation, the foreign country of which the claimant is a national, or if the Secretary of State, in consultation with the Attorney General and other appropriate officials, certifies that such country provides comparable remedy for United States claimants: *Provided, however*, That conditions (B) and (C) shall not apply where the claim is asserted by a resident of Canada and where the oil pollution involves oil that has been transported through the pipeline authorized under the Trans-Alaska Pipeline Authorization Act, as amended, and has been loaded on a ship for transportation to a port under the jurisdiction of the United States and is discharged from the ship prior to being brought ashore in such a port; and

(7) under any item, by the Attorney General, on his own motion or at the request of the Secretary, on behalf of any group of United States claimants who may assert a claim under this subsection, when he determines that the claimants would be more adequately represented as a class in asserting their claims.

(c) If the Attorney General fails to take action under clause (7) of subsection (b) within sixty days of the date on which the Secretary designates a source under section 106, any member of a group may maintain a class action to recover damages on behalf of that group. Failure of the Attorney General to take action shall have no bearing on any class action maintained by any claimant, for damages authorized by this section.

LIABILITY

SEC. 104. (a) Subject to the provisions of subsections (b) and (c), the owner and operator of a vessel other than a public vessel, or of a facility, which is the source of, or poses a threat of, oil pollution, shall be jointly, severally, and strictly liable for all damages for which a claim may be asserted under section 103.

(b) Except when the incident is caused by gross negligence or willful misconduct within the privity or knowledge of the owner or operator, or when the incident is caused by a gross or willful violation by the owner or operator of applicable safety, construction, or operating standards or regulations of the Federal Government, or when the owner or operator fails or refuses to provide all reasonable cooperation and assistance requested by the responsible Federal official in furtherance of cleanup activities, the total of liability under subsection (a) and removal costs incurred on behalf of the source of the discharge shall not exceed—

(1) in the case of a vessel other than a ship, $150 per gross ton,

(2) in the case of a ship, $500,000 or $300 per gross ton or whichever is greater, or

(3) in the case of a facility, $50,000,000 or such lesser limit as is established under subsection (d).

(c) There shall be no liability under subsection (a)—

(1) where the incident is caused solely by an act of war, hostilities, civil war, or insurrection, or by a natural phenomenon of an exceptional, inevitable, and irresistible character; or

(2) as to a particular claimant, where the incident or the economic loss is caused, in whole or in part, by the gross negligence or willful misconduct of that claimant.

(d) The Secretary shall issue regulations establishing limits of liability, up to $50,000,000, for various classes of facilities: *Provided*, That the limits of liability for deepwater ports and offshore production facilities shall not be less than $50,000,000. These regulations shall take into account the size, type, location, oil storage and handling capacity, and other matters relating to the likelihood of incidents as to those classes. Such limits shall, to the extent practicable, be comparable to those limits established under subsection (b)(2), taking into account the relative potential threat of oil pollution.

(e) The Secretary shall, from time to time, report to Congress on the desirability of adjusting the monetary limitation of liability specified in subsection (b).

(f)(1) Subject to the provisions of paragraph (2) hereof, the fund shall be liable for all damages for which a claim may be asserted under section 103, to the extent that the loss is not otherwise compensated on behalf of the owner or operator.

(2) Except for the removal costs specified in clause (1) of section 101(z), there shall be no liability under paragraph (1) hereof to the extent that the incident is caused by an act of war, hostilities, civil war, or insurrection, or, as to a particular claimant, where the incident or economic loss is caused, in whole or in part, by the gross negligence or willful misconduct of that claimant.

(g)(1) In addition to the damages for which claims may be asserted under section 103, and without regard to the limitation of liability provided in section 104(b), the owner, operator, or guarantor shall be liable to the claimant for interest on the amount paid in satisfaction of the claim for the period from the date upon which the claim was presented to such person to the date upon which the claimant is paid, inclusive, less the period, if any, from the date upon which the owner, operator, or guarantor shall offer to the claimant an amount equal to or greater than that finally paid in satisfaction of the claim to the date upon which the claimant shall accept that amount, inclusive. However, if the owner, operator, or guarantor shall offer to the claimant, within sixty days of the date upon which the claim was presented, or of the date upon which

advertising was commenced pursuant to section 106, whichever is later, an amount equal to or greater than that finally paid in satisfaction of the claim, the owner, operator, or guarantor shall be liable for the interest provided in this paragraph only from the date the offer was accepted by the claimant to the date upon which payment is made to the claimant, inclusive.

(2) The interest provided in paragraph (1) shall be calculated at the average of the highest rate for commercial and finance company paper of maturities of one hundred and eighty days or less obtaining on each of the days included within the period for which interest must be paid to the claimant, as published in the Federal Reserve Bulletin.

(h) Nothing in this Act shall bar a cause of action that an owner or operator, subject to liability under subsection (a), or a guarantor, has or would have, by reason of subrogation or otherwise, against any person or governmental entity.

(i) To the extent that they are in conflict with, or otherwise inconsistent with, any other provisions of law relating to liability or the limitation thereof, the provisions of this section shall supersede all such other provisions of law, including those of section 4283(a) of the Revised Statutes, as amended (46 U.S.C. 183(a)).

FINANCIAL RESPONSIBILITY

SEC. 105. (a)(1) The owner or operator of any vessel (except public vessels and any nonself-propelled barge that does not carry oil as fuel or cargo), over 300 gross tons, which uses an offshore or onshore facility or the navigable waters, shall establish and maintain, in accordance with regulations promulgated by the President, evidence of financial responsibility sufficient to satisfy the maximum amount of liability applicable to that vessel under the provisions of section 104(b) of this title and the provisions of subsections (f) and (g) of section 311 of the Federal Water Pollution Control Act, as amended. Financial responsibility may be established by any one, or any combination, of the following methods acceptable to the President: evidence of insurance, guarantee, surety bond, or qualification as a self-insurer. Any bond filed shall be issued by a bonding company authorized to do business in the United States. In cases where an owner or operator owns, operates, or charters more than one vessel subject to this subsection, evidence of financial responsibility need be established only to meet the maximum liability applicable to the largest of such vessels.

(2) The Secretary of the Treasury shall refuse the clearance required by section 4197 of the Revised Statutes of the United States, to any vessel subject to this subsection, which does not have certification furnished by the President that the financial responsibility provisions of paragraph (1) of this subsection have been complied with.

(3) The Secretary, in accordance with regulations promulgated by him, shall (A) deny entry to any port or place in the United States or navigable waters to, and (B) detain at the port or place in the United States, from which it is about to depart for any other port or place in the United States, any vessel or ship subject to this subsection which, upon request, does not produce certification furnished by the President that the financial responsibility provisions of paragraph (1) of this subsection have been complied with.

(b) The owner or operator of a facility shall establish and maintain, in accordance with regulations promulgated by the Secretary, evidence of financial responsibility sufficient to satisfy the maximum amount of liability applicable to that facility under the provisions of section 104(b).

(c) Any claim authorized by section 103(a) may be asserted directly against any guarantor providing evidence of financial responsibility as required under this section. In defending such claim the guarantor shall be entitled to invoke all rights and defenses which would be available to the owner or operator under this title. He shall also be entitled to invoke the defense that the incident was caused by the willful misconduct of the owner or operator, but shall not be entitled to invoke any other defense which he might have been entitled to invoke in proceedings brought by the owner or operator against him.

NOTIFICATION, DESIGNATION, AND ADVERTISEMENT

SEC. 106. (a) The person in charge of a vessel or facility, which is subject to the provisions of this title, as soon as he has knowledge of an incident in which the vessel or facility is involved, shall immediately notify the Secretary of the incident.

(b)(1) When the Secretary receives information, pursuant to subsection (a) or otherwise, of an incident which involves oil pollution, the Secretary shall, when possible, designate the source or sources of the oil pollution and shall immediately notify the owner and operator of such source, and the guarantor, of that designation.

(2) When a source designated under paragraph (1) is a vessel or a facility, and the owner, operator, or guarantor fails to inform the Secretary, within five days after receiving notification of the designation, of his denial of such designation, such owner, operator, or guarantor, in accordance with regulations promulgated by the Secretary, shall advertise the designation and the procedures by which claims may be presented to him. The requirement to advertise may be waived by the Secretary when the discharge is classified as "minor" under the National Contingency Plan and where the damage is minimal and potential claimants may be notified by other means. If advertisement is not otherwise made in accordance with this paragraph, the Secretary shall, at the expense of the owner, operator, or guarantor involved, advertise the designation and the procedures by which claims may be presented to that owner, operator, or guarantor.

(c) In a case where—

(1) the owner, operator, and guarantor all deny a designation in accordance with paragraph (2) of subsection (b);

(2) the source of the discharge was a public vessel; or

(3) the Secretary is unable to designate the source or sources of the discharge under paragraph (1) of subsection (b),

the Secretary shall advertise or otherwise notify potential claimants of the procedures by which claims may be presented to the fund.

(d) Advertisement under subsection (b) shall commence no later than fifteen days from the date of the designation made thereunder.

CLAIMS SETTLEMENT

SEC. 107. (a) Except as provided in subsection (b), all claims shall be presented to the owner, operator, or guarantor.

(b) All claims shall be presented to the fund—

(1) where the Secretary has advertised or otherwise notified claimants in accordance with section 106(c), or

(2) where the owner or operator may recover under the provisions of section 103(b)(1).

(c) In the case of a claim presented in accordance with (a), and in which—

(1) the person to whom the claim is presented denies all liability for the claim, for any reason, or

(2) the claim is not settled by any person by payment to the claimant within sixty days of the date upon which (A) the claim was presented, or (B) advertising was commenced pursuant to section 106(b)(2), whichever is later,

the claimant may elect to commence an action in court against the owner, operator, or guarantor, or to present the claim to the fund, that election to be irrevocable and exclusive.

(d) In the case of a claim presented in accordance with subsection (a), where full and adequate compensation is unavailable, either because the claim exceeds a limit of li bility invoked under section 104(b), or because the owner, operator, and guarantor aro financially incapable of meeting their obligations in full, a claim for the amount not compensated may be presented to the fund.

(e) In the case of a claim which has been presented to any person, pursuant to subsection (a), and which is being presented to the fund, pursuant to subsection (c) or (d), such person shall at the request of the claimant, transmit to the fund the claim and supporting documents. The Secretary may, by regulation, prescribe, the documents to be transmitted and the terms under which they are to be transmitted.

(f) In the case of a claim presented to the fund, pursuant to subsection (b), (c), or (d), and in which the fund—

(1) denies all liability for the claim for any reason, or

(2) does not settle the claim by payment to the claimant within sixty days of the date upon which (A) the claim was presented to the fund, or (B) advertising was commenced pursuant to section 106(c), whichever is later,

the claimant may submit the dispute to the Secretary for decision in accordance with section 554 of title 5 of the United States Code. However, a claimant who has presented a claim to the fund pursuant to subsection (b) may elect to commence an action in court against the fund in lieu of submission of the dispute to the Secretary for decision, that election to be irrevocable and exclusive.

(g)(1) The Secretary shall promulgate regulations which establish uniform procedures and standards for the appraisal and settlement of claims against the fund.

(2) Except as provided in paragraph (3), the Secretary shall use the facilities and services of private insurance and claims adjusting organizations or State agencies in administering this section and may contract to pay compensation for those facilities and services. Any contract made under the provisions of this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes, as amended, upon a showing by the Secretary that advertising is not reasonably practicable. The Secretary may make advance payments to a contractor for services and facilities, and the Secretary may advance to the contractor funds to be used for the payment of claims. The Secretary may review and audit claim payments made pursuant to this subsection. Payment to a claimant for a single claim in excess of $100,000, or two or more claims aggregating in excess of $200,000, shall be first approved by the Secretary.

(3) to the extent necessitated by extraordinary circumstances, where the services of private organizations or State agencies are inadequate, the Secretary may use Federal personnel to administer the provisions of this section.

(i) Without regard to subsection (b) of section 556 of title 5 of the United States Code, the Secretary is authorized to appoint, from time to time for a period not to exceed one hundred and eighty days, one or more panels, each comprised of three individuals, to hear and decide disputes submitted to the Secretary pursuant to subsection (f). At least one member of each panel shall be qualified in the conduct of adjudicatory proceedings and shall preside over the activities of the panel. Each member of a panel shall possess competence in the evaluation and assessment of property damage and the

economic losses resulting therefrom. Panel members may be appointed from private life or from any Federal agency except the staff administering the fund. Each panel member appointed from private life shall receive a per diem compensation, and each panel member shall receive necessary traveling and other expenses while engaged in the work of a panel. The provisions of Chapter 11 of title 18, United States Code, and of Executive Order 11222 regarding special government employees, apply to panel members appointed from private life.

(i)(1) Upon receipt of a request for decision from a claimant, properly made, the Secretary shall refer the dispute to (A) an administrative law judge, appointed under section 3105 of title 5 of the United States Code, or (B) to a panel appointed under subsection (h).

(2) The administrative law judge and each member of a panel to which a dispute is referred for decision shall be a resident of the United States judicial circuit within which the damage complained of occurred, or, if the damage complained of occurred within two or more circuits, of any of the affected circuits, or, if the damage occurred outside any circuit, of the nearest circuit.

(3) Upon receipt of a dispute, the administrative law judge or panel shall adjudicate the case and render a decision in accordance with section 554 of title 5, United States Code. In any proceeding subject to this subsection, the presiding officer may require by subpoena any person to appear and testify or to appear and produce books, papers, documents, or tangible things at a hearing or deposition at any designated place. Subpoenas shall be issued and enforced in accordance with procedures in subsection (d) of section 556 of title 5, United States Code, and rules promulgated by the Secretary. If a person fails or refuses to obey a subpoena, the Secretary may invoke the aid of the district court of the United States where the person is found, resides, or transacts business in requiring the attendance and testimony of the person and the production by him of books, papers, documents, or any tangible things.

(4) A hearing conducted under this subsection shall be conducted within the United States judicial districts within which, or nearest to which, the damage complained of occurred, or, if the damage complained of occurred within two or more districts, in any of the affected districts.

(5) The decision of the administrative law judge or panel under this subsection shall be the final order of the Secretary, except that the Secretary, in his discretion and in accordance with rules which he may promulgate, may review the decision upon his own initiative or upon exception of the claimant or the fund.

(6) Final orders of the Secretary made under this subsection shall be reviewable pursuant to section 702 of title 5, United States Code, in the district courts of the United States.

(j)(1) In any action brought against an owner, operator, or guarantor, both the plaintiff and defendant shall serve a copy of the complaint and all subsequent pleadings therein upon the fund at the same time those pleadings are served upon the opposing parties.

(2) The fund may intervene in the action as a matter of right.

(3) In any action to which the fund is a party, if the owner, operator, or guarantor admits liability under this Act, the fund upon its motion shall be dismissed therefrom.

(4) If the fund receives from either the plaintiff or the defendant notice of such an action, the fund shall be bound by any judgment entered therein, whether or not the fund was a party to the action.

(5) If neither the plaintiff nor the defendant give notice of such an action to the fund, the limitation of liability otherwise permitted by section 104(b) of this title is not available to the defendant and the plaintiff shall not recover from the fund any sums not paid by the defendant.

(k) In any action brought against the fund, the plaintiff may join any owner, operator, or guarantor, and the fund may implead any person who is or may be liable to the fund under any provision of this Act.

(l) No claim may be presented, nor may an action be commenced for damages recoverable under this title, unless that claim is presented to, or that action is commenced against, the owner, operator, or guarantor, or against the fund, as to their respective liabilities, within three years from the date of discovery of damages under section 103 (a), or within six years of the date of the incident which resulted in that loss, whichever is earlier.

SUBROGATION

SEC. 108. (a) Any person or governmental entity, including the fund, who shall pay compensation to any claimant for an economic loss, compensable under section 103, shall be subrogated to all rights, claims, and causes of action which that claimant has under this Act.

(b) Upon request of the Secretary, the Attorney General may commence an action, on behalf of the fund, for the compensation paid by the fund to any claimant pursuant to this title. Such an action may be commenced against any owner, operator, or guarantor, or against any other person or governmental entity, who is liable, pursuant to any law, to the compensated claimant or to the fund, for the damages for which the compensation was paid.

(c) In all claims or actions by the fund against any owner, operator, or guarantor, pursuant to the provisions of subsections (a) and (b), the fund shall recover—

(1) for a claim presented to the fund (where there has been a denial of source designation) pursuant to section 107(b)(1), or (where there has been a denial of liability) pursuant to section 107(c)(1)—

(A) subject only to the limitation of liability to which the defendant is entitled under section 104(b), the amount the fund has paid to the claimant, without reduction,

(B) interest on that amount, at the rate calculated in accordance with section 104 (g)(2), from the date upon which the claim was presented by the claimant to the defendant to the date upon which the fund is paid by the defendant, inclusive, less the period, if any, from the date upon which the fund shall offer to the claimant the amount finally paid by the fund to the claimant in satisfaction of the claim against the fund to the date upon which the claimant shall accept that offer, inclusive, and

(C) all costs incurred by the fund by reason of the claim, both of the claimant against the fund and the fund against the defendant, including but not limited to, processing costs, investigating costs, court costs, and attorneys' fees, and

(2) for a claim presented to the fund pursuant to section 107(c)(2)—

(A) in which the amount the fund has paid to the claimant exceeds the largest amount, if any, the defendant offered to the claimant in satisfaction of the claim of the claimant against the defendant—

(i) subject to dispute by the defendant as to any excess over the amount offered to the claimant by the defendant, the amount the fund has paid to the claimant,

(ii) interest, at the rate calculated in accordance with section 104(g)(2), for the period specified in clause (1) of this subsection, and

(iii) all costs incurred by the fund by reason of the claim of the fund against the defendant, including, but not limited to, processing costs, investigating costs, court costs, and attorneys' fees or

(B) in which the amount the fund has paid to the claimant is less than or equal to the largest amount the defendant offered to the claimant in satisfaction of the claim of the claimant against the defendant—

(i) the amount the fund has paid to the claimant, without reduction,

(ii) interest, at the rate calculated in accordance with section 104(g)(2), from the date upon which the claim was presented by the claimant to the defendant to the date upon which the defendant offered to the claimant the largest amount referred to in this subclause. (However, if the defendant tendered the offer of the largest amount referred to in this subclause within sixty days of the date upon which the claim of the claimant was either presented to the defendant or advertising was commenced pursuant to section 106, the defandant shall not be liable for interest for that period.), and

(iii) interest from the date upon which the claim of the fund against the defendant was presented to the defendant to the date upon which the fund is paid, inclusive, less the period, if any, from the date upon which the defendant shall offer to the fund the amount finally paid to the fund in satisfaction of the claim of the fund to the date upon which the fund shall accept that offer, inclusive.

(d) The fund shall pay over to the claimant that portion of any interest the fund shall recover, pursuant to clause (1), and subclause (A) of clause (2), of section (c), for the period from the date upon which the claim of the claimant was presented to the defendant to the date upon which the claimant was paid by the fund, inclusive, less the period from the date upon which the fund offered to the claimant the amount finally paid to the claimant in satisfaction of the claim to the date upon which the claimant shall accept that offer, inclusive.

(e) The fund is entitled to recover for all interest and costs specified in subsection (c) without regard to any limitation of liability to which the defendant may otherwise be entitled.

JURISDICTION AND VENUE

SEC. 109. (a) The United States district courts shall have exclusive original jurisdiction over all controversies arising under this title, without regard to the citizenship of the parties or the amount in controversy.

(b) Venue shall lie in any district wherein the injury complained of occurred, or wherein the defendant resides, may be found, or has its principal office. For the purposes of this section, the fund shall reside in the District of Columbia.

PREEMPTION

SEC. 110. (a) Except as provided in this Act—

(1) no action may be brought in any court of the United States, or of any state or political subdivision thereof, for damages for an economic loss described in section 103(a), a claim for which may be asserted under this Act, and

(2) no person may be required to contribute to any fund, the purpose of which is to pay compensation for such a loss, nor to establish or maintain evidence of financial responsibility relating to the satisfaction of a claim for such a loss.

(b) Nothing in subsection (a) shall prohibit an action by the fund, under any other provision of law, to recover compensation paid pursuant to this Act.

PENALTIES

SEC. 111. (a)(1) Any person who fails to comply with the requirements of section 105, the regulations promulgated thereunder, or any denial or detention order, shall be sub-

ject to a civil penalty of not more than $10,000.

(2) Such penalty may be assessed and compromised by the President or his designee, in connection with section 105(a)(1), and by the Secretary, in connection with section 105(a)(3) and section 105(b). No penalty shall be assessed until notice and an opportunity for hearing on the alleged violation has been given. In determining the amount of the penalty or the amount agreed upon in compromise, the demonstrated good faith of the party shall be taken into consideration.

(3) At the request of the official assessing the penalty, the Attorney General may bring an action in the name of the fund to collect the penalty assessed.

(b) Any person in charge who fails to give the notification required by section 106(a) shall, upon conviction, be fined not more than $10,000, or imprisoned for not more than one year, or both.

APPROPRIATIONS

SEC. 112. (a) There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this title.

(b) The Secretary is hereby authorized to incur indebtedness on behalf of the United States, as provided in section 102(f), to the extent provided, in appropriation Acts, for that purpose.

TITLE II—EFFECTIVE DATES: CONFORMING AMENDMENTS

SEC. 201. (a) This section and all provisions of title I authorizing the delegation of authority or the promulgation of regulations shall be effective on the date of enactment of this Act.

(b) Title I, the regulations applicable thereto, and sections 202 and 203 shall be effective on the one hundred and eightieth day after the date of enactment of this Act.

SEC. 202. (a) Subsection (b) of section 204 of the Act of November 16, 1973 (87 Stat. 586), the Trans-Alaska Pipeline Authorization Act, is amended, in the first sentence, by inserting, after "any area", the words "in the State of Alaska", by inserting, after "any activities", the words "related to the Trans-Alaska Oil Pipeline", and by inserting, at the end of the subsection, a new sentence to read as follows: "This subsection shall not apply to removal costs resulting from oil pollution as that term is defined in section 101(m) of the Comprehensive Oil Pollution Liability and Compensation Act of 1977.".

(b) Subsection (c) of section 204 of the Act of November 16, 1973 (87 Stat. 586), the Trans-Alaska Pipeline Authorization Act, is hereby repealed. The Trans-Alaska Pipeline Liability fund is hereby abolished. All assets of that fund as of the effective date of this section shall be transferred to the Comprehensive Oil Spill Liability Fund established by section 102 of this Act. The Comprehensive Oil Spill Liability Fund hereby assumes any and all liability of the Trans-Alaska Pipeline Liability Fund under the terms of subsection (c) of section 204 of the Trans-Alaska Pipeline Authorization Act.

(c) Section 17 of the Act of February 5, 1974 (88 Stat. 10), the Intervention on the High Seas Act, is amended to read as follows:

"SEC. 17. The fund established under section 102 of the Comprehensive Oil Pollution Liability and Compensation Act of 1977 shall be available to the Secretary for actions and activities taken under section 5 of this Act."

(d) Section 311 of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1321), is further amended as follows:

(1) Subsection (a) is amended by replacing the period following clause (14) thereof with a semicolon and adding a new clause (15) to read as follows:

"(15) 'person in charge' means the individual having immediate operational responsibility.".

(2) Paragraph (1) of subsection (c) is amended by (A) deleting the comma after the words "contiguous zone" and inserting in lieu thereof the words "or from an artificial island or fixed structure operating under authority of the Outer Continental Shelf Lands Act" and (B) adding after the word "vessel," the words "artificial island or fixed structure,".

(3) Clause (II) of paragraph (2) of subsection (c) is amended by inserting after the words "of this section" the words "or the fund established under section 102 of the Comprehensive Oil Pollution Liability and Compensation Act of 1977, as appropriate,".

(4) Subsection (d) is amended by deleting all after the words "incurred under this subsection" and inserting in lieu thereof "shall be reimbursed from the fund established under subsection (k) of this section or the fund established under section 102 of the Comprehensive Oil Pollution Liability and Compensation Act of 1977, as appropriate. Any expense incurred thereunder for which reimbursement may be had from the fund established under subsection (k) of this section shall be recoverable from the owner or operator of the vessel in accordance with subsection (f) of this section.".

(5) Paragraph (5) of subsection (b) and subsections (f), (g), (h), (i), and (o) are amended by inserting after the word "oil" wherever it appears the words "(other than petroleum, crude oil, or any fraction or residue therefrom)".

(6) Subsection (f) is further amended, in the last sentence of paragraph (1), by inserting a comma after the word "vessel" and by adding immediately thereafter "or against the person furnishing financial responsibility under section 105 of the Comprehensive Oil Pollution Liability and Compensation Act of 1977".

(7) Subsection (g) is further amended, by inserting in the last sentence, after the word "party" the words "or against the person providing financial responsibility for that party under section 105 of the Comprehensive Oil Pollution Liability and Compensation Act of 1977".

(8) Subsection (k) is amended to read as follows:

"(k) There is hereby authorized to be appropriated to a revolving fund to be established in the Treasury not to exceed $35,000,000 to carry out the provisions of subsections (c), (d), (i) and (l) of this section respecting discharges or imminent discharges of oil (other than petroleum, crude oil, or any fraction or residue therefrom) and hazardous substances. Any other funds received by the United States under this section respecting such discharges shall also be deposited in this fund for these purposes. All sums appropriated to, or deposited in, the fund shall remain available until expended.".

(9) Subsection (l) is amended by deleting the period at the end of the second sentence and by inserting in lieu thereof the words "respecting discharges or imminent discharges of oil (other than petroleum, crude oil, or any fractions or residue therefrom).".

(10) Paragraph (1) of subsection (p) is amended by deleting the words "Any vessel over three hundred gross tons, including any barge of equivalent size, but not including any barge that is not self-propelled and that does not carry oil or hazardous substances as cargo or fuel," and inserting in lieu thereof "Any non-self-propelled barge over three hundred gross tons that carries oil (other than petroleum, crude oil, or any franctions or residue therefrom) or hazardous substance as cargo or fuel,".

(11) Subsection (p) is amended by deleting the words "vessel" or "vessels", wherever they appear, and inserting in lieu thereof "barge" or "barges", respectively.

(e) The Deepwater Port Act of 1974 (P.L. 93-627, 88 Stat. 2126) is amended as follows:

(1) In section 4(c)(1) strike "section 18(1) of this Act;", and insert in lieu thereof "section 105 of the 'Comprehensive Oil Pollution Liability and Compensation Act of 1977';".

(2) Subsections (b), (d), (e), (f), (g), (h), (i), (j), (l), (n), and clause (1) of subsection (m) of section 18 are deleted.

(3) Clause (3) of subsection (c) of section 18 is amended by striking "Deepwater Port Liability Fund established pursuant to subsection (f) of this section.", and inserting in lieu thereof "fund established under section 102 of the Comprehensive Oil Pollution Liability and Compensation Act of 1977.".

(4) Subsection (k) of section 18 is amended to read as follows:

"(k) This section shall not be interpreted to preclude any State from imposing additional requirements, not inconsistent with the provisions of the Comprehensive Oil Pollution Liability and Compensation Act of 1977, for any discharge of oil from a deepwater port or a vessel within any safety zone.".

(5) Subsections (c), (k), and (m) of section 18 are redesignated (b), (c), and (d), respectively, and clauses (2), (3), and (4) of subsection (m) are redesignated (1), (2), and (3), respectively.

SEC. 203. If any provision of this Act or the applicability thereof is held invalid, the remainder of this Act shall not be affected thereby.

THE SECRETARY OF TRANSPORTATION,
Washington, D.C., March 17, 1977.

Hon. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed herewith is a draft of a proposed bill "Comprehensive Oil Pollution Liability and Compensation Act of 1977."

This legislation would establish a comprehensive and uniform system for fixing liability and settling claims for oil pollution damages in U.S. waters, adjacent land, and other areas. This legislation is of high national importance as we seek to meet our energy needs in an environmentally sound manner. Those energy needs require accelerated development of our offshore oil and gas resources and the increased use of tankers and deepwater ports. This proposal would provide a broad range of protection against the potential oil spills necessarily associated with these activities.

During the 94th Congress, the House Merchant Marine and Fisheries Committee held hearings on oil pollution liability and compensation. When President Carter took office he directed an executive task force to consider a far-reaching legislative and executive program to prevent oil spills, to combat them effectively when they occur, and to compensate those damaged by oil pollution. The task force examined the various bills which had been introduced in both the 94th and the 95th Congress during its study

In recent years, we have taken significant steps to limit and control oil pollution in the waters of the United States. Yet, as the incidents involving the SS ARGO MERCHANT and the SS OLYMPIC GAMES so forcefully demonstrated, oil spills continue to occur. One-third of the oil spilled is from unidentified sources, where compensation cannot be obtained under existing law. Current Federal and State liability laws are inconsistent, and the multiplicity of compensation funds at both levels of government result in duplication of administration and in fee payment by

producers. These problems create severe confusion and impose unnecessary costs on taxpayers and consumers.

This legislation would help protect our environment by establishing strict liability for all oil pollution damages from identifiable sources and by providing strong economic incentives for operators to prevent spills. Equally important, the bill will provide relief for many oil-related environmental damages which in the past have gone uncompensated. For example, State governments will be able to claim compensation for damages to natural resources under their jurisdiction.

This legislation would replace a patchwork of overlapping and sometimes conflicting Federal and State laws. In addition to defining liability for oil spills, it would establish a uniform system for settling claims and would assure that none will go uncompensated, such as in cases where it is impossible to identify the source of the spill. The legislation provides for a fund of up to $200 million derived from a small fee on oil transported or stored on or near navigable waters.

The International Convention on Civil Liability for Oil Pollution Damage, 1969, and the International Convention for the Establishment of an International Fund for Compensation of Oil Pollution Damage, 1971 also provide for remedies for oil pollution damage from ships. The President supports the concept of these conventions but because they set low liability limits for shipowners he has elected to establish a domestic oil pollution liability and compensation scheme which does not include participation in the international mechanisms. Meanwhile, we will press in international negotiations for revisions to these conventions.

The past efforts and extensive deliberations of Congress in formulating a comprehensive oil pollution liability and compensation scheme were carefully considered. Our bill utilizes the format of H.R. 3711 with amendments as detailed in an enclosure to this letter. The Congress is urged to adopt these changes, whch are proposed only after a thorough and far-reaching consideration of the problems involved. I am convinced that the enclosed legislative proposal will provide a comprehensive compensation system which will work with maximum flexibility and minimum Federal involvement.

It would be appreciated if you would lay this proposal before the Senate. A similar proposal has been submitted to the House of Representatives.

The Office of Management and Budget advises that this legislative proposal is in accord with the program of the President.

Sincerely,

BROCK ADAMS.

AMENDMENTS TO H.R. 3711

Section 101(c): The definition of person has been amended to include government entities.

Section 101(m): The definition has been amended to avoid further assertions of jurisdiction over activities on the high seas.

Section 101(bb): A new definition has been added since the National Contingency Plan is referenced in the bill as amended.

Section 102(a): Amended to more formally establish the fund and to provide that it may sue and be sued in its own name.

Section 102(d): This is a new subsection to provide that the fund shall bear all costs of administration including damage assessment in certain instances.

Section 102(e)(2): Language has been added to the end of this subsection to ensure that modifications to the fees collected are not unduly delayed pending judicial review. This could become necessary to ensure that the fund remains under the $200 million dollar level.

Section 103(b): Changes have been made to almost all clauses to clarify eligible claimants, especially foreign claimants. Under clause (1) the class of claimants was broadened to include foreign claimants in the case of removal actions. Clause (2) was amended to clarify that a claimant directly utilizing natural resources, need not meet the 25% threshold for loss of income. Clause (3) was amended to broaden the definition of the natural resources for which a state could make a claim. Clause (4) was amended to conform to the change previously made in clause (2). Clause (6) was amended to allow a foreign claimant to recover for damages sustained within the navigable waters of the United States and when the source of the oil is a facility under the jurisdiction of the United States. It was also amended to waive the requirement for a treaty, for Canadian claimants damaged by Trans-Alaska Pipeline oil.

Section 104(b): Language was added to clarify that removal costs incurred by the discharger are counted towards his liability limit. The liability limits for ships (any vessel carrying oil in bulk) have been changed to $500,000 or $300 per gross ton, whichever is greater, with no upper limit.

Section 104(c): The defense of liability based on the act of a third party has been eliminated, and the defenses of act of war or act of God have been limited to those which are the sole cause of an incident.

Section 104(f)(1): Amended to allow additional compensation in the event the claimant is self-insured.

Section 105(a)(1): Has been amended to clarify that public vessels are not required to have evidence of financial responsibility. The section has also been amended to clarify that the method of providing financial responsibility is subject to regulation.

Section 106(b)(2): Language has been added giving the Secretary discretion to waive requirements for advertising for minor discharges. Conforming amendments have been made to subsections (c) and (d) and section 107(b).

Section 107(e): Modified to provide for transmittal of the claim file from the discharger to the fund.

Section 107(g)(2): Amended to authorize the use of state agencies for claims adjusting services and to clarify that advance payments can be not only for facilities and services but also to provide funding to pay claims.

Section 202(b): Amended to provide for termination of the fund established under Section 202(c) of the Trans-Alaska Pipeline Authorization Act and transfer of claims to the fund established by this Act.

By Mr. MAGNUSON (for himself and Mr. LONG):

S. 1188. A bill to amend the Interstate Commerce Act, the Rail Passenger Service Act, and the Harter Act in order to provide for expeditious claim-settling procedures to facilitate the flow of freight in interstate commerce, to provide shippers with greater security against monetary loss, and for other purposes; to the Committee on Commerce, Science, and Transportation.

CARGO CLAIMS ADJUSTMENT ACT

Mr. MAGNUSON. Mr. President, I introduce for appropriate reference a bill to create expeditious and fair claims-settling procedures for loss and damage sustained in the interstate transportation of property, and for other purposes.

Existing methods of settling loss and damage claims do not adequately protect the shipper who has only a small claim. While our existing law imposes a strict standard of liability on carriers for loss or damage to goods transported, these requirements offer little real protection for many shippers who have legitimate small claims which are not paid. Oftentimes, litigation costs are so high as to make the recovery of relatively small claims by shippers unprofitable: court costs outweigh the recovery of loss or damages. Carriers are, therefore, sometimes tempted to ignore entirely claims for small amounts, or to arrange settlements with shippers which are inequitable, for the carriers are relatively sure that a person will not go to the expense of litigating his claim. There is a great need for an expeditious and inexpensive procedure to assure fair resolution of these disputes. The bill I am introducing will more effectively serve the needs of shippers and Government by promoting more equitable settlements, by serving as an incentive for carriers to develop expeditious claims-settling procedures, and in the long term by decreasing the incidence and unnecessary utilization of litigation.

This bill would achieve these results largely through two devices, both of which are applicable only to claims for less than $2,000. One device is the development by carriers of informal dispute settlement procedures—including arbitration—subject to approval by the Interstate Commerce Commission. Informal dispute settlement procedures are preferable for these small claims, because they reduce the time and expense required for resolution of the claim. The ICC will approve and may investigate dispute settlement procedures in accordance with minimum standards which are set forth in the bill.

The bill strongly encourages the development of such informal dispute settlement procedures. However, the shipper continues to retain his right to take his claim to court, and such legal recourse relates to the second device in the bill. If a carrier establishes an informal dispute settlement procedure but a shipper refuses to use it, the shipper may recover attorney's fees if he wins his case in court, but may be liable for the carrier's attorney's fees if he loses. If the carrier does not create an approved dispute settlement procedure, the shipper may be awarded attorney's fees if he wins in court; if he loses, he may be liable for the carrier's attorney's fees only if he brought the action in bad faith.

These provisions will act as an incentive for both carriers and shippers; they will encourage carriers to develop informal dispute settlement procedures, and they will encourage shippers to utilize such procedures.

Additionally, shippers must assess carefully both the merits of their claims and use of arbitration or other claims-settling procedures where they exist. When no such procedures are available, the shipper should receive more bargaining power in settlement negotiations through the attorney's fees provisions, since the carrier is confronted with the possibility of having to pay attorney's fees of the shipper if the shipper is successful in a court action. The provisions do not encourage—and indeed, discourage—a shipper from bringing a claim which is unjustified, for not all litigation costs are removed—for example, the

claimant's time spent in court remains uncompensated. In short, the attorney's fees provisions and the informal dispute settlement procedures should lead to a more expeditious and fair settlement of claims.

The amount of attorney's fees to be awarded is left to the discretion of the court. The intention of the bill is to provide full reimbursement for reasonable attorney's fees, except in two situations: First, where an offer of settlement made prior to commencement of the suit exceeds the amount of the recovery; and second, where the plaintiff could conveniently have brought the suit in a small claims court but chose instead to bring it in a court of general jurisdiction. In these situations the award of fees to the shipper may be less than the reasonable attorney's fee. The purpose of these provisions is to encourage settlement, or, if litigation is required, to encourage the commencement of a suit in a small claims court, where it is available.

There is one final situation where attorney's fees may be awarded. If a carrier does not abide by the decision reached in a claims settlement procedure or by a court and the shipper must go to court to recover an award, attorney's fees may be granted the shipper in that situation.

The Interstate Commerce Commission is charged with approving the informal dispute settlement procedures, and to see that these procedures are simple and concise, inexpensive, and convenient. It would obviously not make sense to encourage the utilization of dispute settlement procedures unless they are available and easily understandable by the average person. Additionally, each shipper will receive information regarding these procedures in advance of contracting for shipment, so that both parties are aware of the availability of fair procedures to resolve claims for loss or damage.

Mr. President, this bill addresses a problem that has been with us for too long. The users of freight transportation still do not receive the full benefits of the liability provisions of the Interstate Commerce Act because they cannot afford to pursue their unpaid claims in court. The measure which I am introducing today will provide incentives for establishing and using inexpensive and fair claims-settling procedures in lieu of the courts. This bill minimizes the potential for abuse of the attorney's fees award, while simultaneously improving the shipper's bargaining position for an equitable settlement.

The committee will schedule hearings on this measure in the future. Several issues that interested parties may wish to address are:

First. What aspects of an "approved claims settling procedure" should be specified in the legislation and which should be left to the Commission's discretion? For example, should the legislation specify whether an arbitrator can charge the fees of arbitration and/or attorney's fees to either party? What is "adequate notice" to a shipper regarding the availability of an alternate forum? Should attorneys be allowed to represent parties in arbitration?

Second. Should the ICC be given authority to adjudicate small claims? Should such authority be given only after carriers have been given a chance to create their own mechanisms for dispute settlement?

The Senate has acted favorably on a previous measure to remedy the plight of the shipper of freight in interstate commerce. I am hopeful that the committee will receive opinions from parties interested in this proposed solution and that the 95th Congress will enact a measure to deal with this long standing problem. The enactment of this legislation parallels similar efforts of the Congress to improve dispute resolution mechanisms for the average citizen, through the enactment of S. 957, the Consumer Controversies Resolution Act.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1188

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Cargo Claims Adjustment Act".

SEC. 2. Section 20 of the Interstate Commerce Act (49 U.S.C. 20) is amended by adding thereto the following new paragraphs:

"(13)(a) An action at law for loss, damage, or injury under section 20(11) of the Interstate Commerce Act for an amount less than $2,000 may include a claim for the recovery of attorney's fees, if the shipper prevails in the action, unless—

"(1) the defendant common carrier, railroad, or transportation company shall have filed with the Commission, printed and kept open to public inspection tariffs or schedules giving notice that, upon the complainant's agreeing to be similarly bound, it shall accept as final, without further judicial proceedings, an adjudication of liability and of the amount of loss, damage, or injury to be arrived at under informal dispute-settlement procedures, including arbitration, as shall have been published in such tariffs or schedules and approved with or without modification or alteration by the Commission pursuant to subparagraph (c) of this section; and

"(2) the shipper, as part of a contract for the shipment of goods, agrees to claims determination under the carrier's approved informal dispute-settlement procedure.

The award of attorney's fees may be allowed only if the shipper has filed a claim with the carrier and the carrier has not paid it within 120 days after receipt of the claim: *Provided, however,* That the award of attorney's fees may be allowed in accordance with this section if suit is filed after a carrier has made a final denial of a claim.

"(b)(1) The Commission shall review and approve the dispute-settlement procedures established in accordance with this Act, and shall insure that such procedures conform to the requirements of subsection (c) below.

"(2) The Commission shall approve each procedure which meets the requirements outlined in subsection (c) for a period of up to 3 years, subject to renewal for an additional period upon proof of satisfactory performance.

"(3) The Commission may investigate at any time the functioning of any approved dispute-settling procedure and may suspend or revoke its approval for failure to meet the requirements of the Commission.

"(c) No dispute-settling procedure shall be approved by the Commission for use by a carrier or carriers unless it substantially fulfills the following objectives:

"(1) The dispute-settling procedure shall be simple, expeditious, effective, inexpensive, and convenient for the use of any person shipping or sending property that is transported by a carrier. Such a procedure shall be designed so as to prevent a carrier from having any special advantage in any case in which the claimant resides or does business at a place distant from the carrier's principal or other place of business.

"(2) The dispute-settling procedure shall provide for adequate notice of the availability of such procedure, including a clear, easy-to-read, accurately written summary of the steps involved in using the procedure and of any forms or information necessary for initiating and prosecuting a claim. Such summary shall be given to shippers before any contract becomes binding and in adequate time to allow for an informed decision as to whether the shipper will agree to be bound by such procedure.

"(3) Each individual who is authorized, pursuant to an approved dispute-settling procedure to arbitrate or otherwise settle claims, shall be independent of the carrier or carriers sponsoring the procedure. The procedure shall insure that such person or persons chosen to settle the claims shall be authorized and able to obtain any material and relevant information to the extent necessary to proper decisionmaking and to the extent necessary to collect and preserve sufficient statistical and other information about claims to facilitate continuous oversight by the Commission and periodic Commission investigations.

"(4) With the approval of the Commission, two or more carriers may join together in creating, maintaining, and sharing the costs of a dispute-settling procedure.

"(d) The amount of the attorney's fee to be awarded shall be determined by the court and shall be no more than the reasonable fee for services necessarily performed, except that the court may award less than the reasonable fee if—

"(1) the recovery is less than the amount offered in a written offer of settlement made by the carrier to the shipper prior to commencement of the suit, or

"(2) the action was brought in a court of general jurisdiction when it could conveniently have been brought in a small claims court.

"(e) Where an informal dispute settlement procedure as described in subparagraph (a) is available and the shipper brings an action in court in lieu of such procedure, the defendant carrier who successfully defends an action for loss, damage, or injury under section 20(11) of the Interstate Commerce Act may be awarded attorney's fees. Where an informal dispute-settlement procedure as described in subparagraph (a) is not available, the defendant carrier who successfully defends an action for loss, damage, or injury under section 20(11) of the Interstate Commerce Act may be awarded attorney's fees only if the shipper brought an action in bad faith.

"(f) An action to enforce an award of an arbitrator or a court, for claims subject to subparagraph (a) of this section may include a claim for the recovery of attorney's fees incurred in the enforcement action.".

SEC. 3. Section 219 of the Interstate Commerce Act (49 U.S.C. 319) is amended by deleting therefrom the words "and (12)," adding a comma after the words "section 20(11)," and inserting after that comma the words "(12), and (13),".

SEC. 4. Section 413 of the Interstate Commerce Act (49 U.S.C. 1013) is amended by deleting therefrom in the two places in which they appear in the first sentence the words "and (12).", adding a comma after the words "section 20(11)," and inserting

after that comma the words "(12), and (13).".

SEC. 5. Section 306 of the Rail Passenger Service Act of 1970 (45 U.S.C. 546(a)) is amended by deleting therefrom the words "section 22(1)," and adding in lieu thereof "sections 20(13) and 22(1),".

SEC. 6. Section 20 of the Interstate Commerce Act (49 U.S.C. 20) is amended by adding at the end thereof the following new paragraph:

"(14) The Commission is authorized to establish necessary or appropriate requirements to assure that claimants who are entitled to recover for damage to or loss of property, arising out of or in the course of performance of a transportation service subject to this part, do in fact recover for such damage or loss. Such requirements may include, but are not limited to, filing requirements, insurance requirements, prerequisites to qualifying as a self-insurer, and requirements for bonding, surety, and other security arrangements.".

SEC. 7. Section 304 of the Interstate Commerce Act (49 U.S.C. 904) is amended by adding at the end thereof the following new paragraph:

"(f) The Commission is authorized to establish necessary or appropriate requirements to assure that claimants who are entitled to recover for damage to or loss of property, arising out of or in the course of performance of a transportation service subject to this part, do in fact recover for such damage or loss. Such requirements may include, but are not limited to, filing requirements, insurance requirements, prerequisites to qualifying as a self-insurer, and requirements for bonding, surety, and other security arrangements.".

SEC. 8. The Harter Act (46 U.S.C. 190–196) is amended by adding a new section at the end thereof, as follows:

"SEC. 197. (a) All actions for an amount less than $2,000 brought to recover the value of property lost, damaged, or injured while being transported by a carrier subject to part III of the Interstate Commerce Act may include a claim for the recovery of attorney's fees, if the shipper prevails in the action, unless—

"(1) the defendant common carrier or transportation company shall have filed with the Commission, printed and kept open to public inspection tariffs or schedules giving notice that, upon the complainant's agreeing to be similarly bound, it shall accept as final, without further judicial proceedings, an adjudication of liability and of the amount of loss, damage, or injury to be arrived at under informal dispute-settlement procedures approved by the Commission, including arbitration, as shall have been published in such tariffs or schedules and approved with or without modification or alteration by the Commission pursuant to paragraph 13(c) of section 20 of the Interstate Commerce Act (49 U.S.C. 20); and

"(2) the shipper, as part of a contract for the shipment of goods, agrees to claims determination under the carrier's approved informal dispute-settlement procedure.

"The award of attorney's fees may be allowed only if the shipper has filed a claim with the carrier and the carrier has not paid it within 120 days after receipt of the claim: *Provided, however,* That the award of attorney's fees may be allowed in accordance with this section if suit is filed after a carrier has made a final denial of a claim. The amount of the attorney's fee to be awarded shall be determined by the court pursuant to paragraph 13(c) of section 20 of the Interstate Commerce Act (49 U.S.C. 20).

"(b) Where an informal dispute-settlement procedure as described in subparagraph (a) is available and the shipper brings an action in court in lieu of such procedure, the defendant carrier who successfully defends an action for loss, damage, or injury may be awarded attorney's fees. Where an informal dispute-settlement procedure as described in paragraph (a) is not available, the defendant carrier who successfully defends an action for loss, damage, or injury may be awarded attorney's fees only if the shipper brought an action in bad faith.

"(c) An action to enforce an award of an arbitrator or a court, for claims subject to subparagraph (a) of this section, may include a claim for the recovery of attorney's fees incurred in the enforcement action.".

SEC. 9. The provisions of section (2) through (8) above apply to claims arising after the date of enactment of this Act.

By Mr. RANDOLPH (for himself, Mr. STONE, Mr. DURKIN, Mr. MATSUNAGA, Mr. STAFFORD, Mr. THURMOND, and Mr. HANSEN):

S. 1189. A bill to amend title 38 of the United States Code in order to revise and improve the program of making grants to the States for construction, remodeling, or renovation of State home facilities for furnishing hospital, domiciliary, and nursing home care for eligible veterans, and for other purposes; to the Committee on Veterans' Affairs.

Mr. RANDOLPH. Mr. President, I am today introducing for myself and Senators STONE, DURKIN, MATSUNAGA, STAFFORD, THURMOND, and HANSEN a bill which would amend title 38 of the United States Code. Its purpose is to revise and improve the program of making grants to the States for construction, remodeling, or renovation of State home facilities for furnishing hospital, domiciliary, and nursing home care for eligible veterans.

Presently the Veterans' Administration grants to the State homes, up to 65 percent of the estimated cost of a project that has received the Administrators' approval for remodeling, modifying or altering existing hospital or domiciliary facilities in State homes providing care and treatment for veterans.

The bill would authorize, if it become law, the use of funds in the same manner as now provided with a new provision providing funds for the construction of new facilities. This measure authorizes and appropriates $15 million for fiscal year 1978, and a like sum for fiscal year 1979.

ADDITIONAL COSPONSORS

S. 4

At the request of Mr. DOLE, the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of S. 4, to amend the Internal Revenue Code of 1954.

S. 126

At the request of Mr. CRANSTON, the Senator from Washington (Mr. MAGNUSON) was added as a cosponsor of S. 126, to reduce the hazards of earthquakes, and for other purposes.

S. 223

At the request of Mr. INOUYE, the Senator from Iowa (Mr. CLARK) was added as a cosponsor of S. 223, to amend part B of title XI of the Social Security Act.

S. 233

At the request of Mr. INOUYE, the Senator from Iowa (Mr. CLARK) was added as a cosponsor of S. 233, a bill relating to the medicare and medicaid programs.

S. 514

At the request of Mr. RIBICOFF, the Senator from Indiana (Mr. BAYH) and the Senator from South Carolina (Mr. HOLLINGS) were added as cosponsors of S. 514, to amend title XVIII of the Social Security Act.

S. 701

At the request of Mr. PELL, the Senator from New Jersey (Mr. WILLIAMS), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Maine (Mr. HATHAWAY), the Senator from New York (Mr. JAVITS), and the Senator from Vermont (Mr. STAFFORD) were added as cosponsors of S. 701, the Emergency Educational Assistance Act.

S. 708

At the request of Mr. CLARK, the Senator from Florida (Mr. CHILES) was added as a cosponsor of S. 708, to amend title XVIII of the Social Security Act.

S. 712

At the request of Mr. STEVENSON, the Senator from North Dakota (Mr. YOUNG) was added as a cosponsor of S. 712, to authorize the construction of a replacement lock and dam for locks and dam 26, Mississippi River.

S. 845

At the request of Mr. DOLE, the Senator from Hawaii (Mr. MATSUNAGA) and the Senator from South Dakota (Mr. ABOUREZK) were added as cosponsors of S. 845, the Dole-McGovern Food Stamp Act of 1977.

S. 916

At the request of Mr. LAXALT, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 916, to amend certain medicare provisions.

S. 991

At the request of Mr. RIBICOFF, the Senator from Massachusetts (Mr. BROOKE) and the Senator from Rhode Island (Mr. CHAFEE) were added as cosponsors of S. 991, to establish a Department of Education.

S. 995

At the request of Mr. WILLIAMS, the Senator from Vermont (Mr. LEAHY) and the Senator from Hawaii (Mr. MATSUNAGA) were added as cosponsors of S. 995, to amend title VII of the Civil Rights Act of 1964.

S. 1150

At the request of Mr. HUMPHREY, the Senator from Alaska (Mr. GRAVEL) and the Senator from Colorado (Mr. HART) were added as cosponsors of S. 1150, the Rural Housing Act of 1977.

AMENDMENT NO. 42

At the request of Mr. CRANSTON, the Senator from New Jersey (Mr. WILLIAMS) and the Senator from Arizona (Mr. DECONCINI) were added as cosponsors of amendment No. 42, intended to be proposed to S. 11, to provide for the appointment of additional district court judges and for other purposes.

SENATE RESOLUTION 128—ORIGINAL RESOLUTION REPORTED AUTHORIZING ADDITIONAL EXPENDITURES

Mr. CANNON, from the Committee on Rules and Administration, reported the following resolution, which was ordered placed on the Calendar:

S. RES. 128

Resolved, That the Committee on Rules and Administration is authorized to expend from the contingent fund of the Senate, during the Ninety-fifth Congress, $20,000 in addition to the amount, and for the same purposes, specified in section 134(a) of the Legislative Reorganization Act of 1946.

AMENDMENTS SUBMITTED FOR PRINTING

SUPPLEMENTAL APPROPRIATIONS, 1977—H.R. 4877

AMENDMENTS NOS. 167, 168, AND 169

(Ordered to be printed and to lie on the table.)

Mr. ALLEN (for himself and Mr. SPARKMAN) submitted three amendments intended to be proopsed by them jointly to the bill (H.R. 4877) making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes.

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977—H.R. 3477

AMENDMENT NO. 170

(Ordered to be printed and to lie on the table.)

Mr. HANSEN submitted an amendment intended to be proposed by him to the bill (H.R. 3477) to provide for a refund of 1976 individual income taxes and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

CODE OF OFFICIAL CONDUCT—S. RES. 110

AMENDMENTS NOS. 171 THROUGH 176

(Ordered to be printed and to lie on the table.)

Mr. HANSEN submitted six amendments intended to be proposed by him to the resolution (S. Res. 110) to establish a Code of Official Conduct for Members, officers, and employees of the U.S. Senate, and for other purposes.

NOTICE OF MOTION TO SUSPEND THE RULE

Mr. JOHNSTON submitted the following notice in writing:

In accordance with rule XL of the Standing Rules of the Senate, I hereby give notice in writing that it is my intention to move to suspend paragraph 4 of rule XVI for the purpose of proposing to the bill (H.R. 4877), making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes, the following amendment, namely: on page 6, line 12, strike the figure $1,200,000 and insert the following: $10,700,000, of which $9,500,000 shall be available only for the Uniformed Services University of the Health Sciences, this $9,500,000 to remain available for obligation until September 30, 1978.

NOTICE OF MOTION TO SUSPEND THE RULE

Mr. JOHNSTON submitted the following notice in writing:

In accordance with rule XL of the Standing Rules of the Senate, I hereby give notice in writing that it is my intention to move to suspend paragraph 4 of rule XVI for the purpose of proposing to the bill (H.R. 4877) making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes, the following amendment, namely: on page 5, after line 10, insert the following:

MILITARY PERSONNEL

MILITARY PERSONNEL, ARMY

For an additional amount for "Military personnel, Army", $1,167,000, to remain available for obligation until September 30, 1978.

MILITARY PERSONNEL, NAVY

For an additional amount for "Military personnel, Navy", $888,000, to remain available for obligation until September 30, 1978.

MILITARY PERSONNEL, AIR FORCE

For an additional amount for "Military personnel, Air Force", $910,000, to remain available for obligation until September 30, 1978.

NOTICES OF HEARINGS

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. TALMADGE. Mr. President, on behalf of the Committee on Agriculture, Nutrition, and Forestry, I wish to announce confirmation hearings on Wednesday, April 6, beginning at 10 a.m. to consider the nominations of Malcolm Rupert Cutler to be Assistant Secretary for Conservation, Research, and Education of the U.S. Department of Agriculture; Dale Ernest Hathaway to be Assistant Secretary for International Affairs and Commodity Programs for USDA; and, Robert Haldeman Meyer to be Assistant Secretary for Marketing Services for USDA. In addition, the committee will consider their nominations as members of the Board of Directors of the Commodity Credit Corporation along with that of Howard W. Hjort who has already been appointed to be Director of Agricultural Economics by Secretary Bergland.

If the committee does not conclude action on these nominations in 1 day, the hearings will continue on Thursday, April 7.

The hearings will be held in room 324 of the Russell Senate Office Building. Oral testimony will be limited to 10 minutes, but written statements may be of any length and will be inserted in the official record in their entirety. Anyone wishing to testify should contact the hearing clerk of the committee at 224–2035.

ADDITIONAL STATEMENTS

FIFTH ANNUAL REPORT OF FEDERAL ADVISORY COMMITTEES

Mr. METCALF. Mr. President, the fifth annual report of Federal advisory committees, covering calendar year 1976, was prepared by the General Services Administration and transmitted to the Congress by the President on March 29—2 days ahead of the reporting date specified by the Federal Advisory Committee Act.

Here are the highlights:

First. As of December 31, 1976, there were 1,159 advisory committees, a decrease—albeit partly illusory—of 108 from the total a year earlier. During the year 180 new committees were formed and 287 committees were merged or abolished or expired.

Second. Total Federal costs to operate and support advisory committees in 1976 were $59,726,365, which is 12 percent above the $53,327,900 the Office of Management and Budget had anticipated in the fourth annual report would be needed for the expenses of advisory committees in 1976. It is more than 15 percent above the $51,769,400 reported as having been spent on advisory committees in 1975. For calendar 1977 OMB recommends $65,057,766 as necessary for the expenses of advisory committees, an amount incorporated in the President's budget recommendations to the Congress.

Third. Advisory committees held 4,694 meetings during the year, counting a meeting held on 2 or more consecutive days as one meeting, which is 515 more meetings than they held in 1975. Of these meetings, 2,779, or 59 percent, were open to the public, 845, or 18 percent, were wholly closed to the public, and 1,070, or 23 percent, were partially closed.

Mr. President, GSA, its National Archives and Records Service, and Linda K. Boutselis, the committee management report coordinator, deserve commendation for producing the most accurate, comprehensive, and timely annual report yet. The 184-page publication includes a brief written report, 5 pages of summary data and footnotes, an alphabetical list of advisory committees in existence at the end of 1976, a list of those same committees grouped according to the agency or department responsible for them, annotated to show new or terminated committees, a roster of agency committee management officers, and a four-part appendix which includes the text of the Federal Advisory Committee Act and relevant Presidential and agency documents.

The Senate Subcommittee on Reports, Accounting and Management and the House Subcommittee on Government Information and Individual Rights have copies of the fifth annual report for distribution to congressional offices. Agencies may obtain copies of the report from OMB. The Superintendent of Documents is selling the report for $2.60, a reduction of $30 cents from the price of the fourth annual report.

In the coming weeks, the thousands of pages of agency supporting documents from which the fifth annual report was compiled will be microfilmed and placed on public sale. These documents carry the names, addresses and occupations of all advisory committee members, provide information on each committee's origins and purposes, give meeting dates and reports issued, and more.

COMMITTEE TOTAL ARTIFICIALLY LOW

While the year-end total of 1,159 committees is an accurate inventory, the

number is artificially low, due in large part to the unintended termination of about 55 Bureau of Land Management multiple-use advisory boards. While BLM may well decide or have decided not to seek renewal of all of those, it would probably be fairer in measuring the progress of the Carter administration campaign to reduce the advisory committee population to think of 1977 as having begun with more than 1,200 committees on the books.

In terms of openness, advisory committees did better in 1976 than they had in 1975 but not nearly as well as law and public policy would lead one to expect. Last year 60 percent of advisory committee meetings were open to the public, up from 52 percent in 1975 and 55 percent in 1974, and 18 percent were wholly closed, down from 20 percent wholly closed in 1975.

Partially closed meetings are counted negatively because so many of them—for example, of the peer review groups at the National Institutes of Health—are open for only an hour or so, then closed for the balance of the day and perhaps for one or more additional days. Last year 23 percent of all advisory committee meetings were partially closed, down from 28 percent in 1975.

The best record for openness last year was set by the Department of the Interior, whose advisory committees held 271 open meetings and no closed or partially closed meetings, although this performance was abetted by the fact that some of its committees which have held closed meetings in prior years did not meet at all in 1976.

The worst record for openness—and several agencies were bad to mediocre on this score—belongs to the National Endowment for the Humanities, which held one open meeting, 104 closed meetings and 5 partially closed meetings among its 7 advisory committees.

Finally, the substantially higher cost figures for 1976 and 1977 probably represent more accurate cost-reporting as much or more than they represent increased costs. In other words, the figures for 1975 and prior years probably understated the true costs of advisory committees. I applaud the efforts of OMB, the General Accounting Office and the agencies to achieve more accurate cost-reporting.

Mr. President, as I noted a year ago, one way to reduce the cost of advisory committees is to reduce their number. Another is to hold more open meetings, since it is cheaper and simpler to conduct an open meeting than a closed one.

The Subcommittee on Reports, Accounting and Management will continue to oversee the Federal Advisory Committee Act with the aim of eliminating all committees except those that are necessary, fairly balanced, active and open, and to assure that all committees undergo rigorous annual review by agencies, OMB and the Congress.

OSHA

Mr. HATCH. Mr. President, OSHA is a statute which is in desperate need of revision. We in the Congress can, with sufficient determination and grassroots support, change this act so that it is capable of fulfilling its mandate of protecting worker safety and health. By all objective accounts, OSHA has not done the job Congress expected. I expect to devote a good deal of my time toward improving the act, recognizing, however, that the amendatory process will not be an easy task.

Unfortunately, one of the things which now appears beyond the control of Congress is the administration and enforcement of OSHA by Labor Department officials and compliance officers. I am afraid that in the main, and my mail so reflects, there is generally adhered to a "mickey-mouse" approach in enforcing the act by those who have this responsibility. In my view, we have to rely on voluntary compliance if this program will work and "nit-picking," "heavy handedness," and/or "bureaucratic bungling" by compliance inspectors jeopardizes any chance for OSHA's success with these employers covered by the act.

Prior to Dr. Morton Corn's resignation as the OSHA Administrator, he recognized these pitfalls and instituted a training program for compliance officers which concentrated on many areas including improving their public relations responsibilities. I hope that the current OSHA Administration continues this type of training because it is a definite step in the right direction.

Mr. President, a Utah business constituent recently sent to me a rather humorous letter describing his OSHA visit which underscores what I have been saying. While it may give some of my colleagues a chuckle, it should be remembered that this is, in essence, a serious response to serious enforcement problems which if not sufficiently corrected will continue to imperil OSHA's survival chances.

I ask unanimous consent that this constituent letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Recently a dedicated representative of the Office of Safety and Health Administration (OSHA) visited our premises and has, without doubt, saved our staff and guests from a multitude of injuries and ailments beyond our wildest imagination! May we thank you for your concern and beneficent intervention? Certainly all that we have we owe to you and the IRS.

It embarrasses us to confess the perils we tolerated through the years due only to our sheer stupidity!

For instance, we had ignorantly not placed "EXIT" signs over the huge ten foot overhead doors in our warehouse, forgetting that in any sort of emergency people would never think of exiting through such portals, but would burn to death, be trampled underfoot, or be crushed by falling beams while seeking a normal thirty inch doorway. It's all so obvious now that we've been enlightened.

Then, too, our aisles through the stacked merchandise in our warehouse were not labeled "AISLE" and were not painted brightly 38 inches wide! What could we have been thinking of in our fool's paradise? It's amazing that people seemed to move through these broad openings almost instinctively, traversing the length and breadth of the building without once mistaking an eighteen foot wall of cartons for an aisleway and smashing their faces into a stack of cartoned merchandise. Our luck to date has been phenomenal!

Would you believe that on the north side of our warehouse, where only three huge overhead doors permit egress onto the adjacent railroad tracks, we don't even have a single thirty inch exit door to permit a four foot drop onto the tracks for anyone wishing to leave in that direction! How many dozens of people have been seriously inconvenienced by not being permitted this handy route out of the structure we may never know!

Then our office was a literal mine field of concealed dangers, and we didn't even know it as we went blindly along our way year after year! How we survived is a challenge to reason! For instance, we actualy had desks only 34 inches from the file cabinets instead of a safe 38! It's a wonder that every edge and corner isn't blood stained and draped with impaled victims of our foolishness!

Luckily however, your inspector arrived in the nick of time. Doubtlessly the death toll would have sky-rocketed momentarily to say nothing of the broken minds and shattered nerves. In insurance liability premiums alone, he will save us thousands. As I perceive our secretaries safely spread at 38 inch intervals with painted lines to guide them to the narrow fire exit . . . and all the working day protected from flying pencil tips by shatterproof goggles and from invading seagulls by concussion-proof hardhats, I must again salute our great leaders and their endless concern for our well being. Certainly we have nothing to fear . . . neither birth, death, unemployment, illness, inflation, nor athletes foot while Uncle Sam has us in his loving care and keeping. We need not worry, work, plan for the future, nor even watch our step. All is under control. May I say, "Thanks a million!"

THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, two major objections repeatedly brought up against the Genocide Convention are that it would be self-executing and that it might infringe upon the first amendment guarantee of free speech and press. The American Bar Association's Standing Committee on World Order Through Law, in 1970, made a report that dismissed both of these objections.

Regarding the self-executing argument, the standing committee points out that the Genocide Convention itself requires the participating nations to enact enabling legislation.

As for the area of first amendment guarantee of free speech, it must be remembered that only Congress can make a crime punishable under U.S. law. Also there is an important distinction between advocacy, which is protected by the first amendment, and incitement, which is not protected by the Constitution.

In the words of the standing committee's report:

Another objection to the ratification asserted is that the treaty would be self-executing. The result, it is claimed, would be to impose a law upon the citizens of this country without the Congress having enacted any implementing legislation. Article I does designate Genocide as "a crime under international law." But Article V requires the parties "to enact, in accordance with their . . . Convention and . . . to provide effective penalties . . ." Could anything be clearer?

Even in the absence of the requirement of Article V, a treaty cannot support a criminal prosecution in the absence of Congressional action.

Because Article III makes "direct and public incitement to commit Genocide" a crime,

it is claimed the treaty would constitute an infringement of First Amendment Constitutional Guarantees of free speech and press. It should be noted again that the convention is not self-executing and does not make any act punishable under U.S. law. Only Congress can do this.

Mr. President, I urge the Senate to give this treaty their utmost consideration and ratify it at once.

PENNSYLVANIA FARMERS SET LEGISLATIVE GOALS

Mr. HEINZ. Mr. President, Mr. Eugene Thompson recently delivered an address in which he set forth the legislative goals of the Pennsylvania Farmers Association. Mr. Thompson is the president of PFA, and I had the personal privilege of hearing his remarks when he spoke during the association's annual meeting here in Washington on March 9th.

The Pennsylvania Farmers Association is the largest farm organization in my home State. I know that many of the concerns that Mr. Thompson raised in his speech are shared by many other farm groups in my State and across the country. While each Member of this body may not agree with all the stands Mr. Thompson has taken, his speech provides those of us who represent rural areas with a better feeling for the hopes and needs of America's farmers.

Mr. President, I am certain my colleagues will appreciate knowing the priorities of this thoughtful and dedicated association of our citizens. For that reason, I ask unanimous consent that the text of Mr. Thompson's speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

ADDRESS BY EUGENE THOMPSON

Good evening, distinguished guests at the head table, Members of Congress, farmers and wives and friends of Pennsylvania agriculture.

Although I'm new in this position of PFA—the largest general farm organization in the keystone state—I am fully aware of the traditional short speech presented annually at these affairs.

Have no doubt, I plan to keep that tradition for at least one more year.

The 20,814 farm family members of our organization and the more than 2.6 million family members of the American farm bureau Federation take seriously our responsibilities as agricultural producers and as citizens of our country, state and community.

It is as a farmer-citizen that I stand before you this evening.

But, as president of this farmer organization and even more so as a dairyman, I have some strong convictions about legislation now before the Congress.

I want to discuss three very briefly: (1) federal farm programs; (2) secondary boycotts by organized labor, and (3) the contemptible mess we find ourselves in in the area of federal controls of farm chemicals.

Recognizing that a number of important farm program laws were scheduled to expire in 1977, our organization—PFA and farm bureau—conducted an extensive review of government farm programs in our policy development program.

For the record, PFA favors a five-year extension of the Agriculture and Consumer Act of 1973.

We further recommend that the loan rate, target price and escalator provisions of the 1973 act be extended without change. The escalator clause of the 1973 act should not be replaced with a different formula for reflecting changes in production costs.

We continue to believe that Government programs with respect to agriculture should be designed to create conditions which will permit farmers to operate under the market system. We favor a market-oriented agriculture because we believe that farmers will fare better under the market system than under any type of Government-managed system.

Government programs to improve farm income should be designed and administered to enhance market opportunities to the end that farmers will earn higher incomes in the marketplace and will not be dependent on government payments for a portion of their income. Farm income has increased substantially since the market was relieved of the surpluses accumulated under previous programs. The market system is working. We have confidence that it will continue to work.

The act of 1973 is moving us toward a market-oriented agriculture. In the area of feed grains, wheat and cotton, let's not amend the act in ways which would (1) make farmers dependent on Government payments on a continuing basis, or (2) establish a Government-controlled stockpile of agricultural commodities.

The target price provisions of the act of 1973 were developed for the express purpose of permitting commodity loan rates to be set at levels which would not price U.S. commodities out of the world markets, or pile up surplus stocks in Government warehouses. It would be inconsistent and counter productive to continue the target price program and at the same time raise loan rates to levels that would price our commodities out of world markets.

Any formula which requires that loan rates be adjusted on a mechanical basis—without regard to current and prospective supply-demand relationships—is likely to interfere with the market system. A fixed relationship between loan rates and target prices—such as a rule that loan rates must be 75 percent of target prices—is likely to lead to problems unless the relationship between loan rates and target prices is effectively designed to prevent loan rates from exceeding competitive prices in the world market.

The loan provisions of the 1973 act were designed to avoid the accumulation of surplus stocks in Government warehouses. We are aware that some people think that the present relationship between the loan rates on wheat and corn is out of balance. They may be right; however, the Secretary has authority under the present provisions of the act of 1973 to adjust this relationship.

In our opinion, the escalator clause of the 1973 act is superior to the cost-of-production approach to adjustments in target prices. The reason for this is that the escalator clause is insulated from the effects of government farm programs while cost-of-production figures are not.

We favor continuation of the authority for acreage set-aside programs contingent upon an extension of the act of 1973, and the effective use of this authority, if necessary, to avoid burdensome surpluses. Farmers should the 1973 act is superior to the cost-of-programs through per acre payments for performance.

Let's take a look at secondary boycotts now being proposed by the common situs—House Resolution 3500.

The U.S. Congress has determined secondary boycotts to be unfair labor practices, and the U.S. Supreme Court has upheld these labor laws approved by Congress.

Legalization of secondary boycotts would lead to:

Greater imbalance in labor-management relations.

Periodic total stoppage in all union projects because of varying labor contract expiration dates.

Forced unionization of employees working for other contractors on the same project with union employees of another employer.

Bankruptcy for small construction firms by numerous and/or lengthy picketing activities in secondary boycotts.

A complete revision of the relationship and structure of the construction industry.

We are opposed to the legalization of secondary boycotts in the construction business. We know its results in agriculture. We strongly oppose any legislation that increases the monopoly power of organized labor, and we oppose any legislation that would promote union membership by coercion.

The old cliche "farmers are their own worst enemy" might be true. But, believe me, the U.S. Environmental Protection Agency is at least second or maybe first on the "enemy lists" in the minds of farmers.

Let me give you some idea of what farmers think about EPA by quoting the policies adopted at our national convention in January.

Quote No. one:

"We believe EPA's implementation of the amended FIFRA has been unreasonable and detrimental to environmental quality and the American public."

Quote No. two:

"We support the transfer of EPA's administration of agricultural chemicals to USDA."

Quote No. three:

"We support Federal legislation to exempt family farms from regulations of EPA. . . ."

Those are strong resolutions . . . even for our organization, but our farmer delegates have good reasons.

The 1972 amendments to the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) gave EPA some new authorities and responsibilities for pesticide regulation and use:

(1) Requiring certification for all users of restricted pesticides under penalty of law, and

(2) Requiring reviews of all pesticide registrations and, if appropriate, extended for 5-year periods.

Part of the re-registration process charged to EPA was a classification of pesticide uses in two categories—general or restricted.

All of this was to be accomplished by October, 1976—later extended by Congress to October, 1977.

Today, 4½ years after the enactment of the amendments to this act, 45 States have "certification of applicators" plans and over 300,000 private applicators are certified to use restricted use pesticides. By October, 1977, twice that number will be certified, and by the 1978 crop year it is anticipated that nearly all private applicators wishing to use restricted use pesticides will be certified.

Farmers are concerned about safety and health associated with the use of pesticides. We believe that farmers' record on the certification of applicators program is ample proof of their concern and their willingness to accept responsibility for the judicious use of pesticides. Farmers and ranchers have met the challenge of the amended FIFRA. EPA has not.

Congress charged EPA with the responsibility to register pesticides. Registration has not been achieved and, by EPA's estimate, will not be achieved for another 5 to 7 years. EPA was charged with the responsibility of classifying pesticides. Classification has not been achieved.

In view of the record we find it incredible that EPA is spending 12 times what USDA spent for the registration of pesticides in 1970 and that a 50 percent increase in funding is contemplated.

We could detail other incidents where EPA

has failed: issuing conflicting regulations; citing lack of funds and manpower, while forcing mounds of paper work and costly regulations on State government.

It is time to bring to a halt EPA's mockery of the law. EPA has proven that it does not understand, nor is it capable of carrying out the charge it received from the Congress.

OK, there you have it.

To summarize quickly, we are seeking extension of the Agricultural and Consumer Act of 1973.

We oppose legislation of secondary boycotts.

And finally we believe that USDA is better equipped and should be given the responsibility for pesticide use regulations.

Before closing I wish to thank all of you—Congressional Members and farmers—for taking time from your busy schedules to be here tonight.

I also thank the members of the Pennsylvania congressional delegation for their support on important agricultural issues.

Thank you and good night.

INDIAN ISSUES

Mr. McGOVERN. Mr. President, the ongoing discussion and debate in both the public and private sector on Indian rights has all too frequently ignored the problems faced by local governments who are attempting to meet their legal responsibilities to their citizens—Indian and non-Indian alike. The patchwork system of jurisdiction has created serious problems in the areas of law enforcement, delivery of essential public services, potential inequity in grant and loan programs, local budgets, and the general ability of Indian and non-Indian to meaningfully participate in the Government process.

Addressing these concerns, the Corson County, S. Dak., board of commissioners has authored a challenging review of the specific problems for one county in what some would identify as "Indian country." This paper, while informative, constitutes in my view a challenge to the Congress, the courts, and the country to come forward with a workable and realistic program that will heal the growing breach between Indians and non-Indians and ultimately work to the benefit of both.

I ask unanimous consent that this report by the Corson County commissioners be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

INDIAN ISSUES

Like many other states in the nation where there are Indian reservations, South Dakota is beset with deep-seated problems of a complexity and magnitude which defy resolution. In the past, the South Dakota legislature and the Governor have created groups to bring together Indian and State interests to research problems of mutual concern, to propose methods of resolution through various means, or to negotiate agreements. The Corson County Commissioners support these efforts and their continuance. It is their view, however, that although there have been some tangible benefits obtained, these have been too few and too slow in coming. Further, for all intents and purposes, no major effect has been felt at the county level. The effectiveness and viability of county government continues to erode at a rate much faster than the rate of achievement of substantive gain in problem resolution.

In the past ten years, the unified Indian voice has become louder, and its words have been followed by actions which are told in headlines throughout the nation with greater and greater frequency. In Massachusetts, a tribe now claims that it owns the town of Mashpee; in Washington, a district court has ruled that half of the State's commercial and sport fisheries are owned by the Puget Sound Tribes and that the State's previous fisheries policies violated treaty rights; in Wisconsin, the Lac Court Tribe claims total jurisdiction over both Indians and non-Indians within the reservation; in Utah, the Ute Tribe is attempting to extend tribal jurisdiction, including the power to license and tax, over non-Indians living within the original reservation boundaries; in New York, the Oneida Indian Tribe has gone to court to obtain farmland owned by non-Indians, on the basis that the land was illegally taken from the Tribe more than a century ago; in Maine, the Passamaquoddy and Penobscot Tribes are claiming twelve million acres of land; and in South Dakota the Rosebud Sioux Tribe now has a case before the Supreme Court of the United States to settle the Tribe's claims that its jurisdiction should encompass the entire area, whether Indian or non-Indian owned, which lies within the orilgnal 1889 exterior boundaries of the reservation. The outcome of this case will affect not only those counties originally within the boundaries of the Rosebud Reservation, but also parts of Bennett, Dewey, Ziebach and Corson Counties in South Dakota which lay within original boundaries of other reservations in the State; if the case is won by the Tribe, these counties would also be considered once more to be under tribal jurisdiction.

Lost somewhere in the shouting, and feeling trampled both by Indian feet and the collective feet of Federal Government agencies are units of local government located in areas where there are reservations. One such unit of local government in our state is Corson County.

It is the intent of the Corson County Commissioners in presenting this brief paper, to show from their perspective as local elected officials, in a "reservation county," the deleterious effect that continued non-resolution of Indian-non-Indian questions has had and is having on county government in South Dakota, and to ask State and Federal officials for help. The Commissioners have summarized what they feel to be the problems of most immediate concern, and have stated means which they believe would be steps toward achieving problem resolution.

Through a joint effort of the Commissioners, the County Planning Commission, local law enforcement officers, and many other people involved in county government, five crucial problem areas were defined. These are: 1) law enforcement, 2) diminishment of the county tax base, 3) disproportionate demands for county services in relation to county income, 4) inequity in distribution of grant and loan funds by the Federal Government, and 5) inequitable opportunities for cross-participation in government.

LAW ENFORCEMENT

The average citizen of the United States, if the victim of, or witness to, a crime, generally knows that if the crime occurs in a city, it is a matter for the city police, if it occurs in a county the sheriff should be contacted, or if the crime is committed on the highways, a state trooper can be summoned. He knows that each jurisdiction has certain powers which are based upon the category of crime committed, and that any city, county or state law enforcement officer will be capable of dealing with a criminal action either by means of exercising his own legal authority, or by turning the matter over to another level of authority. Simply stated, in most cases, the appropriate law enforcement authority is determined by the site where the unlawful act is committed. Throughout the United States, the system is reasonably understandable and reasonably uniform, notwithstanding the variations from state to state, and within states, from county to county and city to city, and everyone has equal protection under the law.

Although this basic system applies also to "reservation areas," because of the superimposition of Federal and tribal jurisdiction over those lands which belong to the tribes, or in some cases, which formerly belonged to the tribes, the race of a person committing a crime must also be considered, and the determination of who has jurisdiction over whom for what crime and where, is changed from a relatively simple question to one which is not only complex in terms of its interpretation by the average citizen, but for law enforcement officers as well.

Additionally, the geographic area encompassed by a tribe's jurisdiction, may further complicate an already confusing picture. First, in the South Dakota counties which, because of various court decisions, are considered to be in real Indian reservations, which include all land within exterior reservation boundaries, certain conditions exist which guide law enforcement actions in determining whether a crime is dealt with by tribal/BIA officers, or by non-Indian officers. Second, in counties where courts have judged that only the Federal Government or a tribe has jurisdiction over those lands which presently are in tribal trust or trust allotment, and the tribe has no legal jurisdiction over non-Indian lands, the circumstances and conditions under which law enforcement officers function is quite different.

Both conditions exist in Corson County. The western portion of the County, where non-Indian lands were previously under State jurisdiction for many years, is once again within reservation boundaries, because of a 1973 court decision (Condon V. Erickson, 478 F. 2d (8th Cir. 1973)). In the eastern portion of the County, where reservation boundaries are disestablished, those lands which are non-Indian, are legally under State jurisdiction as the result of another court decision made in 1976 (U.S. V. Long Elk 410 F. Supp. 1174, 1976).

To illustrate a practical aspect of this difference, assume that a crime is committed in Corson County in the western portion, within reservation boundaries, (where, regardless of its ownership, all land is considered to be in Indian country),[1] and the County Sheriff has been summoned. He must first determine whether the offender is Indian or non-Indian. This in itself is a difficult task. Presumably, an Indian is any person of Indian descent who is enrolled in any tribe. Often, however, his lineage may not be apparent, and certainly there is no way of telling at a crucial time when a quick decision must be made, if he is an enrolled tribal member. Further, it is not uncommon for persons to claim to be Indians when they are not, to escape state jurisdiction.

If it is determined that the offender is an Indian, and practically speaking, the law officer has little choice but to accept any such claim, the Sheriff has no legal authority to detain him, i.e., he must be detained by Federal or tribal authorities. If the Sheriff is cross-deputized by BIA/tribe, he can take the person into custody, but still must subsequently turn him over to Federal or tribal authorities for prosecution.

If it is determined that an offender is not

[1] As defined in 18 U.S.C. § 1151, Indian Country means "... all land within the limits of any Indian reservation under the jurisdiction of the United States Government, notwithstanding the issuance of any patent, and including rights-of-way running through the reservations."

an Indian, he can be arrested by the Sheriff. Even then, however, if an Indian was involved in the crime, it would be a Federal case.

If the situation is reversed, and a tribal or BIA officer, rather than the Sheriff, arrives first at the scene of a crime, if the person who has committed the crime is an Indian, he is processed through tribal court, or Federal court (if the offense is beyond the scope of tribal judicial powers). If the person is white, and the Indian officer is cross-deputized and thus enabled to enforce State law, he may make an arrest. He then must turn the person over to the appropriate non-tribal police authority. If the white person has committed a serious crime involving a victim who is an Indian, he may be arrested by the officer and prosecuted by the Federal Government.

Procedures for apprehension and prosecution are still complex although considerably less troublesome when a crime is committed in the eastern portion of Corson County. There, the reservation has been disestablished, and thus Indian country consists of only those lands which are in Indian ownership.

In general, the County Sheriff would have jurisdiction over both Indians and non-Indians on non-Indian land. In the case of serious crimes committed on Indian land, if the offender was an Indian, or if an Indian was involved, the entity having jurisdiction would be the Federal Government. In misdemeanor situations occurring on Indian land, Indian offenders would go to tribal courts, and non-Indian offenders would go to State courts. However, because various Indian tribes are now raising claims to total jurisdiction for misdemeanors occurring in Indian country, whether the offender be Indian or non-Indian, certain constitutional questions have been brought forth. Practical implications for local law enforcement officials stemming from this issue, are that in all misdemeanor cases, an absolute determination must still be made not only of race but also the site of a crime.

The above is essentially a rough sketch of the riddles and frustrations of day-to-day law enforcement in Corson County. It is pointed out that circumstances and procedures from area to area within the state depending on "reservation boundaries," and other factors.

There are many problems associated with civil as differentiated from criminal matters. For instance, in Indian country, the non-Indian court system has no jurisdiction to subpoena Indians or to require them to appear in court. If a law officer locates an Indian person on fee patent/deeded land and is thus able to serve a subpoena, the Indian may simply remove himself physically to tribal or individual allotment land, and the subpoena cannot be enforced. The non-Indian criminal justice system is thus rendered helpless to provide avenues of legal recourse to county citizens whose rights have been violated. Consequently, storeowners are unable to collect, or prosecute for bad checks or unpaid bills, banks are unable to collect loan or mortgage payments, ad infinitum. Many offenses go unpunished with no justice provided for the victims.

Another negative aspect of the phenomenon of separate judicial systems for tribes and the State, relates to the extensive incompatibility of procedures in the courtrooms themselves. For example, in most instances, penalties for the same crime are substantially different, depending upon whether a crime is tried by a tribe or by the State, i.e., sentences tend to be significantly more lenient in tribal courts. Obviously, justice is not equal for all Americans in this instance. Many other differences between tribal and State courts exist which will not be dealt with here.[2]

The conditions discussed in the preceding paragraphs affect non-Indians and Indians alike who must depend for protection on two separate law enforcement and criminal justice systems which, because of differences related to jurisdiction, are frighteningly inefficient and inadequate. In-depth treatises have been written on the matter of jurisdiction as relates to law enforcement, and the interested reader could spend weeks, even months, examining studies, reports, court decisions and legal briefs enumerating the subject. The foregoing discussion is by no means exhaustive, indeed it is grossly oversimplified; however, its intent is not to reiterate all that has already been said, but to make the point that the practical problems associated with jurisdiction are of a proportion so great, that they are beyond the scope and legal authority of county government to solve. Citizens in "reservation counties" must manage to survive without the benefit of "justice for all" which is a presumed right of all American citizens. In Corson County, justice is not blind—it is forced to see racial differences and go by a different set of rules according to skin color and geographic location.

DIMINISHMENT OF COUNTY TAX BASE

The largest source of income for counties in South Dakota, is, as a rule, their revenue from real and personal property taxes. In Corson County, 42 percent of the total 1,580,000 acres of land is owned by the Standing Rock Sioux Tribe or Indian allottees (542,000 acres) and State and Federal agencies (135,000 acres).

Under ordinary circumstances, county government could be reasonably assured that those lands presently in private hands, and thus taxable, would provide a constant and reliable source of income which could be counted upon in budget planning for the future. In Corson County there is no stability of this sort. Indeed, there is a very real erosion of the tax base through continued conversion of fee patent or deeded land to tribal trust land, which automatically removes it from the tax roles.

Removal of land from the tax roles in this manner can occur through the sale of privately owned land to a tribe or to Indian individuals, or through placement of orginally non-Indian-owned land into an Indian spouse's name. All are avenues for placement of land in tribal trust, which renders it untaxable and which under the Indian Reorganization Act of 1934, prohibits its sale unless approved by the Secretary of Interior. Further, Indian tribal government may place a moratorium on the sale of any individual Indian allottees' land to anyone except the tribe. This device essentially precludes the possibility that tax income lost by a county through sale or transfer of privately-owned land to tribal trust, could be supplanted by placement on the county tax roles of land sold by Indians to non-Indians.

A matter of grave concern to county governments in "reservation areas" throughout the state is the encouragement of tribal purchase of land through loans provided by the Farmers Home Administration (FmHA). (This is especially serious because there is no provisio for payment in lieu of taxes lost.) The reason for this concern is clearly shown in these figures:

*FmHA loans to tribes—1971–75**

Rosebud	$2,502,000
Pine Ridge	7,000,000
Crow Creek	1,240,000
Yankton	800,000
Sisseton-Wahpeton	4,250,000
Cheyenne River	1,000,000
Total (SD)	16,792,000
Standing Rock (ND)	$3,000,000

*No estimate of fee patent/deeded land purchased by the tribes in this time period could be obtained from either the FmHA or BIA.

The Corson County Commissioners believe that taxpayers' money should not be used to unify tribal landholdings. They are cognizant that it is not necessarily the intent of the Farmer's Home Administration or of other Federal Agencies with similar programs, to promote consolidation of tribal holdings, or to diminish county tax bases. Nevertheless, it must be recognized that the policies of these agencies should be evaluated in terms of their effects on county government. "Reservation counties" have no protection against programs such as FmHA's which have the potential for causing financial collapse to county governments.

DISPROPORTIONATE DEMANDS FOR COUNTY SERVICES IN RELATION TO TAX INCOME

Tied to the reality of decreasing property tax revenues, is the fact that it is becoming alarmingly more difficult for "reservation counties" to provide services required or authorized by South Dakota law, such as highway construction and maintenance, care for the poor, mentally ill, and mentally retarded, civil defense, county extension programs, law enforcement, and the services of various county employees.

Corson County's services are at a bare minimum. There is no county nurse, no county fire protection program. The Sheriff has very little assistance in carrying out his duties. The roads receive barely adequate maintenance.

Inflation has placed stress on service delivery in the County, as it has on local jurisdictions throughout the Nation; however, a significant amount of stress has been placed on county government in "reservation areas" because of gradually decreasing tax income, and the need to provide services for Indian residents who do not contribute tax support for these services. These counties have been able to maintain only a low level of service delivery, and as stresses on their budgets increase, as they are increasing, the level of services will diminish.

Almost solely by means of 100% federally-funded programs, service delivery programs for the Indian people have been developed on the reservations. Because of conditions of poverty, joblessness, rural isolation and other factors, these programs have been of substantial benefit to the tribal population.

Non-Indians, who constitute 70 percent of Corson County's population, are almost wholly excluded from these programs, even though they are supported by tax dollars. In at least one instance, for example, white persons living in a city where an Indian hospital is located are not allowed to use this facility, except in case of extreme emergency, even though these citizens are willing to pay for medical services. The nearest hospital they can use is eighty miles away. For those living in isolated rural areas on the reservation, health care is frequently even farther away. Discrimination comes in many forms and in this case, "non-Indians" are those being discriminated against.

Non-Indians living in reservation counties are understandably bitter that their tax dollars are being used to provide health care and other basic social and economic services needed by all county residents, only to those

[2] See the following reference for further information. Brakel, Samuel J. 1976. "American Indian Tribal Courts: Separate? 'yes,' Equal? 'probably not'." American Bar Association Jrnl., Vol. 62, pp. 1002–1006.

residents who are members of Indian tribes. Their frustration is intensified when they also see the quantity and quality of services available to non-Indians, which are also available to Indian residents, being constantly diminished from their present inadequate level, partially because of a lack of tax support by the Indian people.

These factors combined with a loss of tax income from recent and extensive withdrawal by the Standing Rock Tribe of lease lands from non-Indian ranch operators, which has resulted in cattle herd diminishment, on top of cattle sell-downs and crop losses resulting from the effects of a severe and extended drought in South Dakota, will soon bring Corson County to a point of severely reduced financial ability.

INEQUITY IN DISTRIBUTION OF GRANT FUNDS BY THE FEDERAL GOVERNMENT

In roughly the past decade, Federal policy has undergone a shift in approach to the distribution of grant monies. In numerous programs, emphasis has been given to funding tribal applicants. Indeed many agencies in the Federal Government have established special staff persons to handle Indian applicants and to act as Indian advocates.

This type of favoritism circumvents any standard of fair competition among applicants. A particularly unfortunate consequence has been that units of local government serving both Indian and non-Indian residents, have time after time had the doors closed in their faces by Federal funding agencies—regardless of the fact that their projects would have benefited large numbers of Indian persons, and regardless of the fact that because of dwindling financial resources due in part to the very presence of Indian tribal populations, these local governments had no other source of funds.

Grants received by Indian tribes are used exclusively for development of facilities and programs for tribal members. Further, there are many special Federal funding programs in which tribes compete only with each other for grant monies. Funds received through these programs are intended for use solely for tribal benefit. Thus, local units of government which are mandated by law to provide certain services, and additionally have had placed upon them requirements to comply with a proliferation of federal and state regulations, are having tremendous difficulty in fulfilling their obligations.

A specific example of the manner in which a federal grant program can work against non-tribal governments is the 1976 Local Public Works Capital Development and Investment Program, which was administered by the Economic Development Administration (EDA).

Ten million dollars, the minimum state allotment as specified by the Public Works Employment Act, was made available to the State of South Dakota. The purpose of the program, essentially, was to provide for public works construction projects which would (1) provide jobs for the unemployed on a short-term basis; (2) allow local governments to construct facilities which otherwise could not be afforded; and (3) provide some measure of economic benefit to local jurisdictions, including Indian tribes.

Criteria were set forth on which the applications would be evaluated. One of the most important of these was the rate of unemployment in the applicant's jurisdiction. Another crucial determining factor in awarding grants, was EDA's desire to establish some means of logical geographic distribution of the grant monies.

The ten million dollar allocation was separated into two parts to be awarded on the basis of an applicant's unemployment rate. If the unemployment rate was in excess of the national unemployment rate (both rates being based on the most current 3-month averages available at the time of application), an application was placed in competition for the 70 percent "pot" of money. For South Dakota this consisted of 7 million dollars. The remaining 30 percent, or 3 million dollars, was to be awarded, first, to applicants whose unemployment average fell between the national rate and 6.5 percent unemployment and, second, to applicants whose unemployment rate was below 6.5 percent.

Local and state government applicants were required by EDA to use only those data supplied by and certified in writing by the S. D. Department of Labor's Division of Research and Statistics. These data were derived using a complex formula which the United States Bureau of Labor Statistics requires in order to establish uniformity of unemployment data reporting throughout the nation. The raw data upon which the formula is based are drawn primarily from claims for unemployment insurance, and are considered to be representative of those unemployed who show willingness to work. Only those persons are reflected in state and national unemployment rates.

The Indian tribal applicants used to establish their unemployment rates, information collected by the Bureau of Indian Affairs (BIA). These data show the total number of persons unemployed on "reservations" as a percentage of the total labor force, and bear no relationship to willingness to work. Moreover, the unemployment rates for each "reservation," which included both Indians on the "reservation" and those within commuting distance, were based on data collection conducted once each year in the spring, rather than the most current three-month averages used by the State.

It is obvious that the two sets of data—that of the State and that of the BIA were incredibly disparate. The BIA rates for "reservations" and corresponding State Department of Labor rates for the counties in each "reservation area," were as follows:

Reservation	BIA unemployment rate	Corresponding counties	State unemployment rate
Cheyenne River	27.8	Dewey	8.9
		Ziebach	8.2
Crow Creek	35.7	Buffalo	8.7
Lower Brule	20.6	Lyman	6.7
Pine Ridge	47.4	Bennet	4.2
		Shannon	13.5
		Washabaugh	
Rosebud	52.2	Gregory [1]	3.0
		Mellette	7.1
		Todd	6.8
		Tripp [1]	3.5
Sisseton-Wahpeton	55.6	Codington [1]	3.9
		Day [1]	4.1
		Marshall [1]	3.2
		Roberts	5.8
Standing Rock (South Dakota portion)	55.6	Corson	9.6
Yankton	65.7	Charles Mix	4.2

[1] County contains small portion of reservation population.

In addition to the fact that BIA unemployment rates as given in the table above were subject to serious question, their validity as used in the LPW applications is even more questionable, since some tribal applicants claimed even higher rates, presumably based on house-to-house surveys. These new rates were certified by the BIA for purposes of the applications.

Even for those county and city applicants in "reservation areas" whose projects, if selected, would have provided employment to Indians, the EDA refused to accept BIA data, unless as one EDA staff person stated, a way could be found to combine this data with the State data. This alternative offered little to non-Indian applicants, since the State data formulation consists of more than 70 steps, and the two sets of data were thus incompatible. It was further stated by EDA representatives that BIA data could be used by non-Indian applicants if they could obtain certification from the BIA superintendent. The possibility of this occurring was negligible since the tribes sought to exclude non-Indian applicants from using BIA data in order to control or limit competition with their own applications.

Only one non-Indian applicant succeeded in obtaining a grant by using BIA data. In this case, the BIA agreed to certify the data for the applicant's use only because the application was for a hospital which would be available for use by tribal members, and the applicant would be applying for 30 percent monies, thus not in direct competition with tribal applicants.

Consequently, the entire 70 percent monies, or $7 million was granted to four tribal governments. The grants awarded are as follows:

Cheyenne River Sioux Tribe	$620,337
Sisseton-Wahpeton Sioux Tribe	631,800
Crow Creek Sioux Tribe	995,000
Oglala Sioux Tribe (Pine Ridge)	4,918,303
Total	7,165,440

A second important factor used by EDA for determination of grant awards was the goal of spaced geographic distribution of projects. Since the 70 percent monies were granted to tribal governments, no further funds in this category were available to applicants with an unemployment rate in excess of the national rate. Cognizant that this might happen, many applicants requested and obtained, from the State Department of Labor, adjusted unemployment rates based on averages for two or more jurisdictions from which they felt project employees would be drawn. The purpose of using these averages was to *lower* the applicant's overall unemployment rate so that it fell in the 30 percent category.

This technique removed these applicants from direct competition with the tribes and placed them in competition with other non-Indian applicants. Although the 30% category contained only $3 million, it nevertheless was the only realistic opportunity for non-Indian applicants to have a chance to obtain funding. Some applicants, because of relatively high unemployment rates in adjacent jurisdictions, were unable to use combined unemployment rates to advantage.

The methods used by EDA to determine grant recipients under the Local Public Works Capital Development and Investment Program are not atypical. Although the requirements vary from agency to agency in the Federal government, the tribes are allowed to use BIA data, carte blanche, with few attempts on the part of these agencies

to require or even to encourage them to develop data which is more valid with regard to unemployment, poverty, or any other criterion upon which grant awards are based. When such funds are granted to Indian tribes, it is perceived as undesirable by these agencies to channel any more dollars into the same geographic areas. Thus, revenue-poor city and county governments are denied the opportunity to find an alternative avenue for providing services and facilities, because of the coincidence of their location in "reservation areas."

INEQUITABLE OPPORTUNITIES FOR CLASS-PARTICIPATION IN GOVERNMENT

A fifth area of major concern to the Corson County Commissioners is the existence of lopsided opportunities for citizen cross-participation between tribal governments, and Federal, State, and local governments. As citizens of the United States, Indians have full rights to participate in all units of government, both as voters and as elected officials. Yet county residents who are non-Indians living in "reservation areas" are not allowed to vote in tribal elections or to hold tribal office because of provisions in treaties and tribal constitutions approved by the Federal Government. This, even though the actions of these tribal governments can have great impact on their lives.

If this Indian country had not been opened to settlement, and the tribes today had consolidated and continuous land ownership, perhaps two separate governmental systems could function autonomously in the same general geographic area. But the cold reality is that this Indian country, and the land areas called counties are *not* separate. Because of homesteading, former reservations in South Dakota consist of a checkerboard pattern of Indian land interspersed with fee patent and deeded lands. Conflict and resentment inevitably ensue when non-Indian persons must live with tribal decisions which affect them, like it or not, with no voice in the decision making—particularly when Indian tribal members, conversely, have full rights and privileges to participate in all levels of government, and even to approve taxes they will never have to pay themselves.

Although this discussion specifically expresses the perspective of the Board of Commissioners of Corson County, the problems enumerated are the same ones characterizing all counties in "reservation areas", with few exceptions. These are of grave concern to many county governing officials throughout the State.

It is the stand of the Corson County Commissioners that a great inequity is being visited upon certain counties in South Dakota. It is their opinion that the viability of these counties as units of government is gravely threatened and that their deterioration has indeed been steadily occurring for many years. The Commissioners believe that the financial capabilities of the counties are in imminent danger now, even more so than in the past, due to unusual additional stresses placed upon them by inflation and drought.

The Commissioners firmly support the concept of, and believe in the need for, county government to protect the constitutional rights of residents, both Indian and non-Indian, who have a stake in the county's future—those who have invested their resources and their labor, and who want to live in harmony with their neighbors, without fear of being disenfranchised. Pursuant to this belief, the Corson County Board of Commissioners respectfully requests that the following actions be taken:

1. That the United States Congress enact legislation to bring all of the State of South Dakota, including Indian Country, under State law.

2. That the government of the State of South Dakota actively support this legislation.

3. That the U.S. Congress pass legislation that essential services, such as social and health programs, provided with Federal monies, be made available to Indians and non-Indians alike.

4. That a congressional inquiry and investigation be made into discriminatory practices of Federal agencies in administering grants and loans to Indian individuals and tribes, and non-Indian individuals and units of local government, and that steps be taken to correct discriminatory practices.

5. That the U.S. Congress pass legislation to provide that fee patent and deeded land, if placed into tribal trust through purchase or transferral, shall retain its status as property taxable by county government, with the exception of land trades between a tribe or Indian allottee with a private landowner, in which case the land traded to the private landowner shall be subject to county property taxes.

6. That an agency or independent group on the State level be authorized and funded by the Legislature to investigate in depth the conditions in Indian country counties in South Dakota, and to recommend legislation to preserve and strengthen county government.

For the Corson County Board of Commissioners:

EDWARD BADER, *Chairman.*

ACCOMPLISHMENTS OF TED OSBORN AS PRESIDENT OF KIWANIS INTERNATIONAL

Mr. FORD. Mr. President, as a past national president of the U.S. Junior Chamber of Commerce, I have the highest admiration for the voluntary civic organizations of our country. Therefore, it is with much pride that I bring to your attention the outstanding accomplishments of one of my constituents, Ted R. Osborn of Lexington, Ky., who recently concluded a term as president of Kiwanis International.

Ted has long been active in civic affairs and is a former member of the Kentucky House of Representatives. His administration as president of Kiwanis International was one of the most innovative and productive in the organization's 62-year history.

Ted Osborn's vision led him to establish the "president's project" program in which clubs all over the world were asked to originate new projects during his administration—projects never undertaken before—and report them for evaluation and credit. An astounding 8,217 new projects were undertaken in carrying out this program with nearly 2,500 Kiwanis clubs involved.

In my own State, Kiwanis clubs were especially active. The Kiwanis Club of Lexington, for example, set up a transportation program to take senior citizens to doctors' offices, dental clinics, drug stores, and other necessary destinations. They established a dispatching center open from 8 to 5 each day, Monday through Friday, to coordinate the rides furnished by club members.

The Kiwanis Club of Corbin cleaned up and refurbished an old L. & N. railroad station and made it a senior citizens' center—complete with a hot lunch program for those in need.

In St. Matthews, Ky., Kiwanians—answering the call from the Louisville Oral Deaf School for help in replacing worn out building blocks, which are vital to the training of the youngsters—completely refurbished the blocks themselves in home workshops over a period of a month.

The Kiwanis Club of the Blue Grass, Lexington, the home club of Ted Osborn, sponsored a weekend summer camp for 135 boys and girls of the urban 4-H Club in Lexington, furnishing transportation, paying expenses, and sending three men to the camp with the boys and girls for the entire duration of the session.

In Mount Sterling, the Kiwanians organized and carried out Operation Identification, providing engraving tools to nearly 1,000 homes and businesses and establishing an identification program for all household goods as a crime resistance measure.

And the Kiwanis Club of Southtown, Owensboro, planned, arranged and conducted a series of five seminars on "preparation for retirement" for the people of Owensboro and environs. They involved 15 panelists in the program and served 54 prospective retirees.

These are but a few examples, and all are new projects never undertaken before by their respective clubs.

Ted Osborn also suggested and took the leadership in organizing an entirely new youth-serving program for Kiwanis. Called "Builders Clubs," the new junior organization provides leadership and service opportunities for boys and girls of junior high school age. To date, 148 of these clubs have been built around Kiwanis, with more being added every day.

His term of office was the best growth year in Kiwanis history, with 399 new clubs added, and 52,380 new Kiwanians placed on the rolls. Both these figures were the highest in the 62-year history of Kiwanis International. Five districts also set new growth records during his term.

Kiwanis has a program in which it acknowledges its district governors who meet or exceed rigid leadership standards. As a result of Osborn's leadership, 16 district governors were named outstanding governors for 1976—double the number for any previous year.

In overseas activities, he was especially effective as a leader. Ted and his wife, Della, traveled to nearly all of the 54 nations which have Kiwanis clubs, conferring with heads of state in many of these and bringing the message of world-wide goodwill through Kiwanis clubs everywhere he visited. A highlight of the recognition Ted received was an award in Italy from the Society of European Journalists for his personal contribution to world peace and understanding.

These many achievements graphically express Ted's concern for his fellow man and his personal efforts touched many lives. On behalf of the people of my State and Kiwanians everywhere, I congratulate Ted on his outstanding tenure as president of Kiwanis International and wish him continued success in the years ahead.

NOMINATIONS OF GUY R. MARTIN AND ROBERT L. HERBST

Mr. JACKSON. Mr. President, the Committee on Energy and Natural Resources today completed hearings on the

nomination of Guy R. Martin to be Assistant Secretary of the Interior for Land and Water Resources. The committee has also completed hearings on the nomination of Robert L. Herbst to be Assistant Secretary for Fish and Wildlife and Parks.

I ask unanimous consent that the statements of these nominees to the committee and their sworn financial statements be printed in the RECORD.

I also ask unanimous consent to have printed in the RECORD a memorandum by Steven P. Quarles, counsel to the committee, which analyzes the questions raised about Mr. Herbst's record and which were considered by the committee.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF GUY R. MARTIN

Mr. Chairman: It is a distinct honor for me not only to appear before a committee with which I have worked for several years, but to do so under the present circumstances, which may afford me a unique opportunity to serve the Nation on issues about which I care deeply. I view the decade ahead as a watershed for the country on the issues of natural resource management, energy and the environment, and I believe the beginning of the new Administration represents high potential for mutual accomplishment.

The theme for this period should be cooperation between the new Administration and Congress, and a high level of public and State and local involvement. In the last Congress, the BLM Organic Act and the Coal Leasing Act were passed. Other measures, such as the Outer Continental Shelf Bill and the Strip Mining Bill were not completed but certainly can be in a cooperative atmosphere this year.

This legislation is a good indication of the charter I perceive for the next few years in the national resources arena. I anticipate that I will bring to the task not only my recognition of the importance and timeliness of the issues, but the benefits and scars of my previous experience at the State level and in Congress.

From that perspective, I draw the conclusion that our best approach to current problems of energy and the environment is to keep in focus the concept of unified resource management, balancing numerous values, diverse ownerships, and a host of legitimate competing interests for our land and its resources. Few of us would dispute, I believe, that present energy and environmental problems might well have been solved years ago with proper policy and management actions at the time.

The Congressional Acts and legislation I cited earlier are solutions to tomorrow's problems then, and I regard them as extraordinary opportunities which are part of the position for which I have been nominated. I welcome the opportunity to take a role in these issues and to work with you and a dynamic new Administration on them.

[U.S. Senate Committee on Interior and Insular Affairs]

INFORMATION REQUESTED OF PRESIDENTIAL NOMINEES

Rule 9 of the Rules of the U.S. Senate Committee on Interior and Insular Affairs requires that each Presidential nominee considered by the Committee shall submit a financial statement sworn to by the nominee as to its completeness and accuracy. Under the rule all such statements must be made public by the Committee unless the Committee in executive session determines that special circumstances necessitate a full or partial exception to this requirement. Rule 9 also provides that at any hearing to confirm a Presidential nomination, the testimony of the nominee and, at the request of any member, any other witness shall be under oath.

In order to assist the Committee in its consideration of nominations, each nominee is requested to complete the attached Financial Statement and Statement For Completion By Presidential Nominees.

The original and twenty (20) copies of the requested information should be made available to Honorable Henry M. Jackson, Chairman, Committee on Interior and Insular Affairs, U.S. Senate, Washington, D.C. 20510 (Attn: Staff Director) as soon as possible.

STATEMENT

1. List sources, amounts and dates of all anticipated receipts from deferred income arrangements, stock options, uncompleted contracts and other future benefits which you expect to derive from previous business relationships, professional services and firm memberships or from former employers, clients, and customers. Deferred Income—State of Alaska, $9,800 (payable during 1977).

2. Are any assets pledged? (Add schedule.) None.

3. Are you currently a party to any legal action? None personally. I am a party in several suits in the official capacity of Commissioner of Natural Resources, State of Alaska.

4. Have you ever declared bankruptcy? No.

STATEMENT FOR COMPLETION BY PRESIDENTIAL NOMINEES

Name: Martin, Guy.

Position to which nominated: Assistant Secretary for Land and Water, Department of Interior.

Date of birth: 25–4–42.

Place of birth: Denver, Colorado.

Marital status: Married.

Full name of spouse: Nancy Jane Martin.

Names and ages of children: None.

EDUCATION

Institution, dates attended, degrees received, dates of degrees:

Lakewood High School, 1956–1960, Graduated, 1960.

University of Colorado, 1960–64, B.A., 1964.

School of Law, University of Colorado, 1964–1967, J.D., 1967.

Honors and awards: List below all scholarships, fellowships, honorary degrees, military medals, honorary society memberships, and any other special recognitions for outstanding service or achievement:

University of Colorado Athletic Scholarship, 1960–64.

University of Colorado School of Law, Academic Scholarship, 1964–67.

Winner, 1966 Rothgerber Competition, University of Colorado School of Law (Appellate argument qualifying for National Moot Court Competition).

Memberships: List below all memberships and offices held in professional, fraternal, business, scholarly, civic, charitable and other organizations:

Organization and dates.—

Alaska Bar, 1968.

D.C. Bar, 1973.

Colorado Bar, 1967.

Employment record: List below all positions held since college, including the title and description of job, name of employer, location, and dates:

Student Assistant—University of Colorado Athletic Department, Boulder, Colorado (C/o

Athletic Trainer Lloyd Williams) part-time from 1963–67.

Trail Crewman—U.S. Forest Service, Arapahoe National Forest, Golden, Colorado—Summer, 1965.

Law Clerk, Mobilization for Youth Legal Unit (O.E.O.) New York City, Ray Narral, Esq., Summer 1966.

Associate Professor of Political Science and University Attorney, Alaska Methodist University, Anchorage, Alaska, 1967–1971.

Practicing Attorney, Law Firm of McGrath, Wohlforth and Flint, Anchorage, Alaska, Allen McGrath, 1968–1970.

Legislative Assistant to Alaska Congressman Nick Begich, Washington, D.C., January, 1971 to March, 1973.

Practicing Attorney, Washington Counsel for State of Alaska, Washington, D.C., April, 1973 to March, 1975 (Contact—Former Alaska Attorney General John Havelock).

Commissioner of Natural Resources, State of Alaska—Juneau, Alaska, March, 1975 to present.

Government experience: List any experience in or direct association with Federal, State, or local governments, including any advisory, consultative, honorary or other part-time service or positions:

Legislative Assistant to Alaska Congressman Nick Begich—Washington, D.C., January, 1971 to March, 1973.

Practicing Attorney, Washington Counsel for State of Alaska—Washington, D.C., April, 1973 to March, 1975.

Commissioner of Natural Resources, State of Alaska—Juneau, Alaska, March, 1975 to present.

Published writings: List the titles, publishers and dates of any books, articles, or reports you have written:

New Tribes for New Times, chapter for comprehensive text on the Alaska Native Land Claims Settlement Act published by the Institute for Social, Economic and Government Research of the University of Alaska, Spring, 1975.

The Politics of Passage, chapter for same publication.

The Alaska Environment and the Land Claims, same publication.

Reform of the Alaska Legislature, Series, Anchorage Daily News, Feb., 1970.

A Unified Policy of Offshore Oil and Gas Development for Alaska, Guest Editorial, Alaska Construction and Oil, November, 1975.

Alaska's Land—The Crucial Years, Forty-First North American Wildlife Conference.

Challenges of the North Slope, Engineering and Beyond, Pacific Northwest Council of the American Society of Civil Engineers, April 30, 1976.

The Philosophies and Policies Concerning Resource Management on State Lands, Conference on Land Policies and Mineral Development in Alaska, May 12, 1976.

Resource Development in the Circumpolar North, The Alaskan Perspective, 27th Alaska Science Conference, August 4, 1976.

Qualifications: State fully your qualifications to serve in the position to which you have been named. (2 sheets attached):

Future employment relationships: 1. Indicate whether you will sever all connections with your present employer, business firm, association or organization if you are confirmed by the Senate. Yes.

2. As far as can be foreseen, state whether you have any plans after completing government service to resume employment, affiliation or practice with your current or any previous employer, business firm, association or organization. No plans.

3. Has anybody made you a commitment to a job after you leave government? No.

4. Do you expect to serve the full term for which you have been appointed? Yes.

Potential conflicts of interest: 1. Describe any financial arrangements or deferred compensation agreements or other continuing dealings with business associates, clients or customers who will be affected by policies which you will influence in the position to which you have been nominated. Deferred (previously earned) Compensation Program—State of Alaska.

2. List any investments, obligations, liabilities, or other relationships which might involve potential conflicts of interest with the position to which you have been nominated. None.

3. Describe any business relationship, dealing or financial transaction (other than tax-paying) which you have had during the last 10 years with the Federal Government, whether for yourself or relatives, on behalf of a client, or acting as an agent, that might in any way constitute or result in a possible conflict of interest with the position to which you have been nominated.—

During the past five years, I have served in three positions which relate to the State of Alaska and to a broad range of natural resources issues. The positions are: Legislative Assistant to Alaska Congressman, Washington, Counsel for the State of Alaska, Commissioner of Natural Resources, State of Alaska. As a consequence, I have been involved to one extent or another in most of the issues within the Federal Administration and before Congress which relate to Alaska and natural resources, land, or energy. Assuming the objective of this question relates to disclosure of conflicts which might exist as a result of this work, I believe that no activity in which I engaged on legislation or public policy during the past five years would create problems in this regard.

4. List and describe any lobbying activity during the past 10 years in which you have engaged for the purpose of directly or indirectly influencing the passage, defeat or modification of any legislation at the national level of government or for the purpose of affecting the administration and execution of national law or public policy. See response to No. 3. No.

5. Explain how you will resolve any potential conflict of interest that may be disclosed by your responses to the above items.—

It is my belief that no conflicts exist from any prior or present relationship, but should any be identified to be of concern, I would have no reluctance to undertake whatever procedure is acceptable to the President to resolve it.

QUALIFICATIONS

The attached resume of my education and experience, in addition to the other material forwarded to the Committee, should provide a detailed profile of my qualifications for the position of Assistant Secretary of Interior for Land and Water Resources. The following is intended as a summary of that material highlighting, from my perspective, those elements which provide the best qualifications for the position.

As an individual who grew up in the Rocky Mountain area, no Federal agency was more familiar to me than the Department of Interior, largely through the Bureau of Land Management, Park Service and Bureau of Reclamation. By the time I want to the University of Colorado, and subsequently to Law School at Colorado, I was relatively set on pursuing an education in public administration, with my greatest interest focused in the resources area. This interest was an increasingly strong one throughout college and law school, with my final years at each level concentrating on studies in land-use planning, resource administration, water law, oil and gas and others.

Upon leaving law school, my decision to leave Colorado for Alaska was influenced by the same interest, and my subsequent professional progression has certainly justified my choice at that time. I believe an objective reading of my record will indicate nearly a decade of increasingly responsible experience in the natural resource area, and wide coveraged of the different types of roles one can take in this area. This experience includes work at all government levels (local, State and Federal); experience with numerous Federal issues; experience both in the legislative sector (Congressional staff) and the executive (Alaska Cabinet); and present Cabinet rank assignment in the Alaska State Government, which has extensive substantive, policy and administrative responsibilities in the resource area.

I believe my basic legal skills have been broadened substantially by this experience, and represent the sort of background which is thoroughly applicable to resources policy at this point in our history. In conclusion, I would only add that my enthusiasm for the work continues to grow, and my concern for this Nation's resources and their proper management will undoubtedly keep me in this area for some time.

GUY RICHARD MARTIN

Personal: Age 34, married, no children.

Education: University of Colorado: B.A., 1964, University of Colorado School of Law: J.D., 1967.

Experience: Commissioner of Natural Resources, State of Alaska, March, 1975, to present—Juneau. Cabinet-level position in the Administration of Governor Jay Hammond. Direct responsibilities, under Alaska law, for management of all State natural resources with exception of fish and game, and for Federal-State policy issues emerging therefrom.

RESPONSIBILITIES

Administration—Department has approximately 500 employees, seven major divisions, and several boards and sub-agencies. Budget approximately $20 million.

Land—Management of 40 million acres of State land (soon to be 68 million).

Water—Responsible for State water inventory and allocation programs.

Timber—All State timber management.

Minerals—Management and leasing of all State minerals, including oil and gas.

Agriculture—Agricultural land programs and policy.

Parks—Responsible for State Park System, one of the largest in the United States.

Energy, oil and gas—Responsibility for State energy programs.

Oil and gas leasing programs, coal leasing, and other energy resources, including geothermal and uranium.

Policy coordination with Federal energy programs, including OCS, Pet. 4, coal development, pipelines (gas and oil), and energy pricing and supply issues (i.e., West Coast surplus).

Responsible for bringing Prudhoe Bay oil and gas royalties, whether taken in kind or value. Chairman of State Royalty Board.

Responsible for State oil and gas conservation and regulation of oil and gas activities.

Washington Counsel, State of Alaska, March, 1973, to March, 1975, Washington, D.C. Established and supervised law office in Washington, D.C., for the purpose of representing the Governor's Office and Office of the Attorney General for Alaska. Served as legal counsel for the State as registered Congressional lobbyist. (Focus on natural resource issues. Areas of emphasis included: Trans-Alaska Pipeline Act transportation of North Slope natural gas, OCS development, land use planning.

Legislative Assistant to Alaska Congressman Nick Begich (D), January, 1971, to January, 1973. (During passage of historic Alaska Native Land Claims Settlement Act.)

Associate Professor of Political Science, Alaska Methodist University, 1967–1971. Anchorage, Alaska. (Constitutional Law, American Government, Resources and Land Law.)

University Attorney, Alaska Methodist University, 1968–1971.

Practicing Attorney, Law Firm of McGrath, Wohlforth and Flint, 1969–1971. Anchorage, Alaska.

STATEMENT OF ROBERT L. HERBST, NOMINEE, ASSISTANT SECRETARY FOR FISH AND WILDLIFE AND PARKS

Mr. Chairman and distinguished members of the Committee. I deem it an honor to appear before this Committee as the President's nominee for the position of Assistant Secretary of the Interior for Fish and Wildlife and Parks.

It is a significant responsibility and personal challenge to be considered for this important position.

I number myself among many American citizens who attribute their destiny in life to vital influences experienced during the green and growing years. In my youth, my mother and father, my church, my affiliation with the Boy Scouts of America, and adult citizens encountered along the way were enormously influential. And yes, the conservation cause was also an inherent factor in motivating me to pursue an education in forestry and wildlife at the University of Minnesota.

You have before you a brief resume. I shall use the education and experience I have, combined with all the energy and dedication I can muster, to live up to the faith and trust Secretary Andrus and President Carter have placed in me to serve our environment and the citizens of our great country.

For almost 24 years, I have devoted my energy and life to the environment as a professional conservationist. It has been my fortune to have held professional positions with private industry; the Federal Government (U.S. Forest Service); the University of Minnesota School of Forestry; two nonprofit conservation corporations (Keep Minnesota Green, Inc. and the Izaak Walton League of America); and the State of Minnesota (Department of Natural Resources).

I have had natural resource field, management, and administration experience. My most recent administrative experience has been as the department head of the Minnesota Department of Natural Resources, one of the largest State conservation agencies.

Five times by four different Governors, I have been appointed as Deputy Commissioner and Commissioner in Minnesota. In this regard I have enjoyed a close working relationship during the past six years as an appointee of the former Minnesota Governor—now Senator—Wendell Anderson. The Minnesota Department of Natural Resources, a composite resource agency, included Divisions of Fish and Wildlife, Forestry, Waters, Minerals, Parks and Recreation, and Enforcement. In addition to being responsible for each of these Divisions, I supervised the Soil and Water Conservation Board, eleven Bureaus, and six Regional Offices.

The Minnesota Department of Natural Resources administers 8½ million acres of State land which includes 56 State Forests, 970 Wildlife Management Units, and 96 Parks. It was also responsible for 10 million acres of State mineral rights, 4⅓ million acres of public water, all fish and wildlife resources, over 2000 buildings, several thousand vehicles, fish hatcheries, rearing ponds, three nurseries, research centers, repair centers and supply depots.

As Commissioner I was responsible for a biennial budget of over $150 million, 1265 permanent employees, 2500 seasonal employees, 7–8000 volunteers, and over 50 advisory committees. My experience includes service on many State Commissions and Boards; Interstate Commissions; and on the State, Regional and National Committees and organizations.

In addition my responsibilities required close work with the Governor's office and the Minnesota legislature to develop, pass, and implement some of the most innovative and far-reaching environmental laws in the nation.

Examples of these programs include:

An Environmental Education Act which provided environmental education in our schools.

The passage of the "Leech Lake Indian Agreement" which ratified into law an honorable agreement that was negotiated with the Indian Community on hunting, fishing, trapping and the harvest of wild rice.

The establishment of an Environmental Quality Council along with a State Environmental Impact Statement procedure.

A Critical Areas Act which as a forerunner program established the zoning of critical environmental areas of the State.

The Minnesota Wild and Scenic Rivers Act, patterned after the Federal act, and under which I have designated three rivers for inclusion, with four additional ones in the process of designation.

Flood Plain Management and Shoreland Management Acts which were implemented and carried out well.

An Outdoor Recreation Act, which classifies the recreation system of our State and provides for planning and utilization of our recreation units.

A program to strengthen Minnesota's mining and water laws which resulted in a Mineland Reclamation Act among other laws.

Endangered Species legislation and legislation to give management protection to four species of wildlife formerly unprotected. (Bear, lynx, wolverine, and raccoon;)—The fox is now under consideration for protection as well.

The prohibition of mining and peat harvesting in the Boundary Waters Canoe Area, our famous pristine recreational area in Minnesota.

Legislation creating the Voyageurs Park and providing for funding to make the donation of 36,000 acres of land to the National Park Service.

A greatly accelerated acquisition program for Parks, Forests, Wildlife areas and Scenic Rivers with proposed funding of $100,000,000 over a six-year period. The first phase—$20,000,000 is already under way.

Throughout my career there has been a consistent theme—concern for the environment—and I trust an ability to convert that concern into administrative and conservation achievement.

The record shows the interest, dedication and energy which I would bring to the vital work of the Department of the Interior.

My philosophy is best reflected in these words:

"Your creator has made all things necessary to sustain you and found them to be good.

While you dwell among the mortals you may partake thereof.

Use them wisely and judiciously.

Guard them closely—squander them not.

For if you are untrue to this sacred trust Mankind shall not be perpetuated but shall perish from this earth." (Dick Doerr).

Secretary Andrus, in his confirmation hearing, said: "I believe that conservation is no longer a pious ideal. It is an element of our survival. Many resources are limited and precious. My efforts will be focused on curbing old habits of over consumption and misuse, seeking instead to use less and to use better. I share the deep concerns of our citizens who want to know what our nation will be like when our children and grandchildren reach adulthood."

I share the Secretary's convictions and will work closely with him to achieve his goal of protecting and enhancing the environment of our nation.

The programs afforded by the National Park Service, the Fish and Wildlife Service, and the Bureau of Outdoor Recreation are a trust we hold for the enjoyment of all this nation's people.

The treasures they have provided must be protected, and we must continually be vigilant to protect additional treasures.

I look forward to this new opportunity and challenge with great enthusiasm. To the best of my ability, I will vigorously strive to manage and protect our natural resources for the benefit of all Americans—as I have during my entire professional career. In carrying out this responsibility, I will look forward to working with each of you. I will welcome your advice and counsel—and at this time will welcome your questions.

ROBERT L. HERBST—BRIEF PERSONAL RESUME

Born: Minneapolis, MN, October 5, 1935.

Marital status: Married, wife Evelyn, three children.

Present position: Commissioner, Minnesota Department of Natural Resources, 301 Centennial Office Building, St. Paul, Minnesota 55155. Phone: 296 2549.

Home address: 10444 Fifth Avenue Circle, Bloomington, MN 55420. Phone: 884 4559.

Education: Graduate, Central High School, Minneapolis, MN University of Minnesota, Bachelor of Science, 1957 Forest Management; minor: Wildlife Management.

PROFESSIONAL EXPERIENCE

1953: Served with Forest Industry.

1954–1955: U.S. Forest Service.

1956–1957: Instructor, University of Minnesota in Dendrology and Mensuration.

1957–1963: Forester, Minnesota Conservation Department.

1963–1966: Executive Secretary, Keep Minnesota Green, Inc.

February 15, 1966: Appointed Deputy Commissioner, Minnesota Conservation Department.

July 16, 1966 to February 14, 1967: Served as Acting Commissioner, Minnesota Conservation Department.

February 14, 1967: Reappointed Deputy Commissioner.

April 1, 1969: Appointed National Executive Director, The Izaak Walton League of America.

January 4, 1971: Appointed Commissioner of Natural Resources, State of Minnesota by Governor Wendell Anderson.

January 31, 1975: Reappointed Commissioner of Natural Resources by Governor Wendell Anderson.

PROFESSIONAL ORGANIZATIONS

Numerous National, State and Local professional and civic organizations and associations—active participation including chairmanships.

CITATIONS AND AWARDS

Numerous awards from National, State and Local organizations ranging from plaques of appreciation to distinguished service.

[U.S. Senate, Committee on Interior and Insular Affairs]

INFORMATION REQUIRED OF PRESIDENTIAL NOMINEES

Rule 9 of the Rules of the U.S. Senate Committee on Interior and Insular Affairs requires that each Presidential nominee considered by the Committee shall submit a financial statement sworn to by the nominee as to its completeness and accuracy. Under the rule all such statements must be made public by the Committee unless the Committee in executive session determines that special circumstances necessitate a full or partial exception to this requirement. Rule 9 also provides that at any hearing to confirm a Presidential nomination, the testimony of the nominee and, at the request of any member, any other witness shall be under oath.

In order to assist the Committee in its consideration of nominations, each nominee is

requested to complete the attached Financial Statement and Statement For Completion By Presidential Nominees.

The original and twenty (20) copies of the requested information should be made available to Honorable Henry M. Jackson, Chairman, Committee on Interior and Insular Affairs, U.S. Senate, Washington, D.C. 20510 (Attn: Staff Director) as soon as possible.

FINANCIAL STATEMENT

Provide a complete, current financial net worth statement which itemizes in detail all assets (including bank accounts, real estate, securities, trusts, investments, and other financial holdings) and all liabilities (including debts, mortgages, loans, and other obligations) of yourself, your spouse, and other immediate members of your household.

Assets:	
Cash on hand and in bank	$510.27
U.S. Government securities—add schedule (75 bonds)	
Real estate interests, including mortgages—add schedule	99,300.00
Personal property	45,500.00
Life insurance—cash value	4,170.00
(For further itemization see attachment)	
Children's savings accounts	631.21
Real estate script	186.38
Minn. Pension Fund	21,328.00
Tax refund due in 1977	1,429.00
Total assets	173,594.86
Liabilities:	
Notes payable to banks—secured (autos)	6,680.00
Chattel mortgages and other liens payable	35,397.00
Other debts—itemize:	
Insurance	2,000.00
Charges	1,562.17
(For further itemization see attachment)	
Total liabilities	45,639.17
Net worth	127,955.69

FINANCIAL STATEMENT—ROBERT L. HERBST, FEBRUARY 7, 1977

BANK ACCOUNTS

Richfield Bank & Trust—Richfield, MN checking account (balance), Estimated assets: $373.06, February 3, 1976.

H&M Retreat account, Kanabec State Bank Mora, MN, checking account, estimated assets: $70.00 (approx.).

State Capitol Credit Union Savings, estimated assets: December 31, 1976, $67.21.

Savings Bonds (3–$25 bonds), estimated assets: $75.00.

Eric, None.

Amy, Home Federal Savings, estimated assets: December 31, 1976, $97.97.

Peter, Home Federal Savings, estimated assets: December 31, 1976, $533.24.

INSURANCE POLICIES

$10,000 life—Travelers (self), cash value, (cash value $1,830–$1,000 loan equals $830), estimated assets: $1,830.00, approx.; debts, $1,000.

$10,000 Life, Accidental (self), cash value (cash value $1,790–$1,000 equals $790), estimated assets: $1,790, approx.; debts, $1,000.

$1,000 Life, National Mutual Benefit (Eric, cash value) estimated assets: $550., approx.

Real Estate Script, cash value, $186.38.

Investments: 60 shares American Microsystems, Inc., stock value (value October 8, 1976) estimated assets: $465.

REAL ESTATE

Home, 10444 Fifth Avenue Circle, Bloomington, MN, (Mortgage-Richfield Bank & Trust, Richfield, MN), estimated assets: $85,000 (est. value); mortgage: $35,397. December 28, 1976.

One-half Interest-40 acres (Tree Farm & Wildlife Preserve) Isanti County, MN (Est. value, $12,000) My one-half interest equals $6,000, estimated assets: $6,000 (est. value).

One-third cabin on Fish Lake (ownership 30%), Kanabec County—Mora, MN one-third of estimated value $25,000, $8,300, estimated assets: $8,300.

Household goods: 2 Autos, 1975, Toyota Corolla, est. $4,000, Estimated assests: $4,000.00; 1976 Chevrolet Blazer, est. $7,000, Estimated assets: $7,000.00; loan, State Capitol Credit Union Dec. 31, 1976, $6,680.00.

Household items: Furniture, etc., Estimated assets: $25,000.00 (est. value) (See Attachment No. 1).

Boats, sporting goods: Guns, fish tackle, outboard motors, golf clubs, fish house, etc. Estimated assets: $8,000.00 (est. value).

Artwork: Plaques, medallions, carvings, etc. (priceless to me) Estimated assets: $1,500.00.

Pension funds: State Employees and Retirement Fund, January 1, 1977, cash value, Estimated assets: $21,328.00.

Income Tax Refund Due in 1977: Federal, $2,311.00, State, $118.00.

LIABILITIES

Gabberts (furniture), January 31, 1977, $323.49.

Dayton's, January 11, 1977, $178.65.

Cedric's (clothes), January 20, 1977, $128.10.

Shopper's Charge, January 8, 1977, $273.35.

American Express, January 6, 1977, $262.44.

Donaldson's, December 9, 1976, $21.04.

Sears, January 9, 1977, $50.86.

Target, January 11, 1977, $42.36.

Union Oil, November 10, 1977, $281.88.

Total Assets: $173,594.86.

Total Debts: $45,639.17.

Total assets of $173,594.86 minus, total debts of $45,639.17 equals net assets of $127,955.69.

Household value estimates

(Furniture, clothes, pictures, books, other material goods)

Credit Union interest	3.00
Richfield Bank interest	49.00
National Systems honorarium	100.00
State income tax refund	432.00
Total	34,071.00
1976:	
State of Minnesota wages	33,230.00
Credit Union interest	4.59
Richfield Bank interest	19.10
National Systems honorarium	100.00
Saving Bonds interest	9.25
State income tax refund	325.00
Total	33,688.00

STATEMENT

1. List sources, amounts and dates of all anticipated receipts from deferred income arrangements, stock options, uncompleted contracts and other future benefits which you expect to derive from previous business relationships, professional services and firm memberships or from former employers, clients, and customers.

(1) I own 60 shares of American Microsystems, Inc. with a value of $465 on 10/8/76. I will sell.

(2) The North American School of Conservation is the only organization that I serve as an advisor on for which payment is received. "The National Systems Honorarium" $100.00. This advisory position will be dropped.

(3) My pension fund with the State of Minnesota as of 2/1/77 has a cash value of $21,328. This fund will be left with the State of Minnesota Employees Retirement Association.

2. Are any assets pledged? (Add schedule.) No.

3. Are you currently a party to any legal action? As a State of Minnesota Public Official I have been involved in court cases as either the Plaintiff or Defendant on material related to that Department's Constitutional and Statutory Responsibilities.

4. Have you ever declared bankruptcy? No.

STATEMENT FOR COMPLETION BY PRESIDENTIAL NOMINEES

Name: Herbst, Robert L.

Position to which nominated: Assistant Secretary for Fish and Wildlife and Parks.

Date of birth: May 10, 1935.

Place of birth: St. Mary's Hospital, Minneapolis, Minnesota.

Marital status: Married.

Full name of spouse: Evelyn C. Elford Herbst.

Name and ages of children: Eric Herbst, born 1957; Peter Herbst, born 1959; Amy Herbst, born 1965.

EDUCATION

Institution, dates attended, degrees received—

University of Minnesota, 1954–1957, BS Forest Mgt.

Central High School, 1950–1954, High School.

Bryant Jr. High, 1946–1950, Jr. High.

HONORS AND AWARDS

List below all scholarships, fellowships, honorary degrees, military medals, honorary society memberships, and any other special recognitions for outstanding service or achievement.

(1) Named "Outstanding Forester on Tree Farm Program 1962."

(2) "Outstanding Field Forester" in Minn., Univ. of Minn. Forestry Club 1963.

(3) Governor's Award "Conservationist of the Year" sponsored by Nat. Wildlife Federation, Minn. Conservation Federation and Sears Roebuck Foundation—1968.

(4) Univ. of Minn. Forestry School Yearbook dedication 1968.

(5) "Outstanding Dedication to Conservation and Recreation" Minn. Legislative Resources Commission 1969.

(6) "Outstanding Conservationists Award" NW Boat, Sports and Travel Show 1969.

(7) "Distinguished Service Award" Univ. of Minn. Alumni Assoc. 1971.

(8) Received Nat. Recognition Plaque Izaak Walton League of Am. 1971.

Many additional 3 awards and honors.

Memberships: List below all memberships and offices held in professional, fraternal, business, scholarly, civic; charitable and other organizations.—See attached.

Employment record: List below all positions held since college, including the title and description of job, name of employer, location, and dates—

Served with Forest Industry 1953.

U.S. Forest Service 1954 and 1955.

Instructor, University of Minnesota in Dendrology and Mensuration 1956 and 1957.

Minnesota Conservation Department 1957–1963 Forester.

Executive Secretary, Keep Minnesota Green, Inc. 1963–1966.

Appointed Deputy Commissioner, Minnesota Conservation Department, February 15, 1966.

Served as Acting Commissioner, Minnesota Conservation Department, July 16, 1966–February 14, 1967.

Reappointed Deputy Commissioner, February 14, 1967.

Appointed National Executive Director, The Izaak Walton League of America, April 1, 1969.

Appointed Commissioner of Natural Resources, State of Minnesota by Governor Wendell Anderson, January 4, 1971.

Reappointed Commissioner of Natural Resources by Governor Wendell Anderson, January 31, 1975.

Government experience: List any experience in or direct association with Federal, State, or local governments, including any advisory, consultative, honorary or other part-time service or positions. See attached.

Published writings: List the titles, publishers and dates of any books, articles, or reports you have written—

I have prepared about 2,000 Forest Management Plans, edited, Keep Minnesota Green Newsletter in 1963 and 1966 prepared several hundred magazines articles and newspaper stories and prepared well over 2,000 speeches, a number of which have been published. Looking Forward To A Career In The Environment by Robert L. Herbst. Published by Dillon Press in 1975.

GOVERNMENT EXPERIENCE

List any experience in or direct association with Federal, State, or local governments, including any advisory, consultative, honorary or other part-time service or position—

Environmental Quality Council appointment by Governor Anderson in 1973 by Statute—elected Vice-President of Council—1973.

Rural Development Council appointment by Governor Anderson.

St. Croix Management Commission Upper appointment by Governor Anderson.

St. Croix Management Commission Lower appointment by Governor Anderson.

Iron Range Resources Commission—member by statute.

Legislative Committee—International Association of Game, Fish and Conservation Commissioners.

Land Resources Committee International Association of Game, Fish and Conservation Commissioners.

Indian Affairs Commission—by statute.

"State Trail Council" member—appointed by Governor Anderson September 1973 (executive order).

Legislative Committee International Association of Game, Fish and Conservation Commissioners—appointed Chairman October 1973.

Legislative Committee for the Association of Midwest Fish and Game Commissioners—1975.

Elected Vice Chairman "Indian Rights Committee" International Association of Game, Fish and Conservation Commissioners 1976.

International's representative on the National Coordinating Committee for Water Resources—1976.

Governor's Trail Advisory Committee appointment by Governor Anderson GAC appointment by Governor Anderson—appointed chairman employee relations committee.

Governor's Management and Personnel Development Committee appointment by Governor Anderson.

Minority Hiring Committee appointment by Governor Anderson.

Ex Officio Member Minnesota Environmental Education Council appointment by Governor Anderson.

State Advisory Council on Fire Service Education and Research appointment by Governor Anderson.

Member National Association of State Liaison Offices Land and Water Program—elected Board of Directors—1973 appointed chairman of organization committee 1973.

FUTURE EMPLOYMENT RELATIONSHIPS

1. Indicate whether you will sever all connections with your present employer, business firm, association or organization if you are confirmed by the Senate. Yes, see attached copy of letter to Governor Perpich.

2. As far as can be foreseen, state whether you have any plans after completing government service to resume employment, affiliation or practice with your current or any previous employer, business firm, association or organization. No.

3. Has anybody made you a commitment to a job after you leave government? No.

4. Do you expect to serve the full term for which you have been appointed? Yes.

POTENTIAL CONFLICTS OF INTEREST

1. Describe any financial arrangements or deferred compensation agreements or other continuing dealings with business associates, clients or customers who will be affected by policies which you will influence in the position to which you have been nominated. See Attached Conflict of Interest Statement.

2. List any investments, obligations, liabilities, or other relationships which might involve potential conflicts of interest with the position to which you have been nominated. See Attached Conflict of Interest Statement.

3. Describe any business relationship, dealing or financial transaction (other than tax-paying) which you have had during the last 10 years with the Federal Government, whether for yourself or relatives, on behalf of a client, or acting as an agent, that might in any way constitute or result in a possible conflict of interest with the position to which you have been nominated See attached Conflict of Interest Statement.

4. List and describe any lobbying activity during the past 10 years in which you have engaged for the purpose of directly or indirectly influencing the passage, defeat or modification of any legislation at the national level of government or for the purpose of affecting the administration and execution of national law or public policy. See Attached Statement on Legislation and Laws on State-Federal levels.

5. Explain how you will resolve any potential conflict of interest that may be disclosed by your responses to the above items. See Attached Conflict of Interest Statement.

MINNESOTA DEPARTMENT
OF NATURAL RESOURCES,
St. Paul, Minn. February 9, 1977.

Hon. RUDY PERPICH,
Governor, State of Minnesota,
State Capitol Building,
St. Paul, Minn.

DEAR GOVERNOR PERPICH: As I advised you recently, I had anticipated meeting with President Carter relative to a possible federal position. I had the privilege of conferring with the President yesterday. Our meeting was most cordial and, of course, a great honor for me.

I anticipate that President Carter will nominate me to the Senate of the United States for appointment to the position of Assistant Secretary, Department of the Interior, in the administrative area of Fish and Wildlife, Parks and Recreation.

I view the prospect of service to our nation in this capacity as a great and rare privilege. Granting formal approval of Congress, I have, accordingly, decided to accept the appointment.

Such a decision is not easy. As you know, Governor, my wife and I have decidedly mixed emotions as we contemplate the possibility of leaving our beloved home state. In addition, I have come to regard our Department of Natural Resources as a family in itself. With our personnel in various disciplines, I have experienced over the past six years a series of complex confrontations on critical resource management issues—all of which have served to create bonds of admiration and respect which are most difficult to sever.

I can also honestly reaffirm that, because of your deep, personal commitment to environmental concerns, I had looked forward in a most positive way to serving your administration. Your personal reassuring comments to me have reflected a reciprocal regard.

In light of the foregoing considerations, however, and pending Congressional action, I most respectfully submit to you my resignation as Commissioner of the Minnesota Department of Natural Resources.

I do so subject to the prerequisite procedural steps, and on the basis of precedent established for such appointments, as exemplified most recently by that of Congressman Bob Bergland.

In the event of unforeseen problems, your acceptance of these qualifications would provide me with reassurance regarding my current position.

To enable me to go to Washington and prepare for confirmation and transition, I will be taking vacation time, effective February 14, 1977. I will, of course, advise you at the earliest possible time on the decision-making process.

Until then, permit me to express my deepest gratitude for the honor of serving you, and for your personal friendship, faith and trust in my abilities.

Respectfully,

ROBERT L. HERBST,
Commissioner of Natural Resources.

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., February 18, 1977.

DEAR MRS. MCDONALD: As a part of my confirmation process it is desirable and necessary to terminate all memberships to eliminate any possible conflicts of interest.

Please advise in writing the following organizations of my resignation effective immediately:

Minnesota Conservation Federation
Izaak Walton League of America
Muskies Inc.
Ding Darling Foundation
North American School of Conservation
"Kids" Inc.
Society of Mining Engineers
Viking Council Boy Scouts
Wildlife Heritage Foundation
Society of American Foresters
International Association of Game and Fish Agencies
Midwest Association of Game and Fish

Thank you.

Sincerely,

ROBERT L. HERBST.

STATEMENT OF ROBERT L. HERBST REGARDING CONFLICT OF INTEREST CONCERNS, FEBRUARY 7, 1977

It is my sincere conviction that I do not have any problems in areas involving so-called conflicts of interest, as associated with a potential position with the Department of Interior. I can and shall be objective and professional in the discharge of my duties, as evidenced by the history of my career as a State of Minnesota official.

Should any of my private or professional affiliations with various organizations constitute possible conflicts, I shall disassociate myself from such affiliations.

Should any of my stock holdings present problems, I shall immediately dispose of such holdings.

I am advised that two issues have been brought to the attention of the Department of the Interior, as related to my status as a State of Minnesota official; specifically:

(1) A petition in consideration of reclassification of the eastern timber wolf:

"If, in serving as Assistant Secretary of Interior I should be involved in a ruling on said position, as brought by myself as a state official, I would disassociate myself from the decisionmaking process and abide by the judgment of the present director of the U.S. Fish and Wildlife Service."

(2) Formal requests of past and present Governors of the State of Minnesota involving adjustments of the boundary of Voyageurs National Park (minor change): I would not interfere with decision of the National Park Service; namely: "they will not administratively change the boundary."

Should any other areas involving possible conflicts of interest arise, I would immediately refer such areas to the Secretary of Interior for his assessment, and action, together with any recommendations I may have to preclude and resolve conflict problems.

STATEMENT OF ROBERT L. HERBST REGARDING PERSONAL RESPONSIBILITIES, LEGISLATION, AND LAWS ON STATE-FEDERAL LEVELS, FEBRUARY 7, 1977

As a State of Minnesota official, I propose and prepare legislation for introduction, and I formally testify on bills and positions related to the various disciplines of the Minnesota Department of Natural Resources. I am also responsible for administering laws and activities associated with the responsibilities of this Department.

With the exception of the 1969–70 session, I have served in administrative capacity at every legislative session since 1966.

I have personally directed the most comprehensive reorganization in the history of the Minnesota Department of Natural Resources, involving the implementation of major changes designed to economize and more efficiently utilize personnel in program management.

As a state official, I prepare, submit and testify on the comprehensive budget of the Department of Natural Resources.

My duties encompass maintaining close communication and consultation with the Minnesota Congressional delegation, including providing technical advice on legis'ation pending in the Congress of the United States, related to the resource concerns of the Minnesota Department of Natural Resources. I have formally testified on many occasions before Congress, and have delegated witnesses to appear before Congress.

As a member of the International Association of Game and Fish Agencies, I have served on the Legislative Committee, and have been frequently consulted for recommendations on federal legislation. I also served as chairman of this International Committee in 1974.

As National Executive Director of the Izaak Walton League of America (1969–70), I formally testified before Congress on environmental legislation as supported by the League.

I have maintained an "open door" to citizens organiaztions in order to foster and promote public participation and involvement in the environmental decision-making process.

FEBRUARY 1, 1977.

HON. JIMMY CARTER,
President of the United States,
Washington, D.C.

DEAR SIR: Sharing your determination to assure the American people of the integrity of your Administration and appreciating the confidence you have shown in me by proposing to nominate me to be Assistant Secretary, Fish and Wildlife and Parks, Department of the Interior, in addition to complying with applicable federal laws and regulations relating to conflicts of interest, if I am nominated, confirmed and take office, I agree that:

(1) I have already filed or will file within 30 days of taking office with those persons you specify, the following information which may be made available to the public as you may direct:

(a) a complete current net worth statement itemizing all assets and liabilities of myself, my spouse, my minor children, and other members of my immediate household; and

(b) a sources of income statement for the year 1975 and for the period of time ending no earlier than 60 days before the above date listing all sources and amounts of all items of value received by me, my spouse, my minor children, and other members of my immediate household including, but not limited to, salaries, wages, fees, honoraria or other compensation, dividends, interest, rents, royalties proceeds from the sale or exchange of property and gifts.

(2) While in office, in addition to complying with 18 U.S.C. § 208, I will similarly refrain from participating in any particular matter, as that term is used in § 208, in which any party as hereinafter specified had a direct and substantial interest:

(a) any party with which I am associated for financial gain within the year prior to taking office as officer, employee, director, trustee, partner, or owner of more than 1% of value of the outstanding equity ownership; or

(b) with which I am negotiating or have an arrangement whether as a consultant, employee, partner, or any other position to be held for financial gain; has a direct and substantial interest.

(3) In addition to complying with the restrictions which will be imposed on me by federal law after termination of my government service, including those contained in 18 U.S.C. § 207, I will not for two years following such termination engage in any activity from which § 207(b) will bar me during the first year after such termination. Also for two years following termination of government service I will not, for compensation or financial gain, on behalf of any party other than the United States, make any formal or informal appearance before, or contact with, any officer or employee of the Executive Branch with respect to any particular matter as defined in § 207 which was within my official responsibility as defined in 18 U.S.C. § 202(b) during the twelve months preceding termination of my government service.

(4) For one year following termination of my government service I will not, for compensation or financial gain, on behalf of any party other than the United States, make any formal or informal appearance before, or contact with, any officer or employee of the Department of Interior.

(5) I will, while in government service and for two years after leaving government service, file periodically in accordance with regulations to be promulgated by you statements of sources of income more particularly described in subparagraph 1(b) above.

(6) In accepting the position for which you propose to nominate me, it is my intention to serve for the entire term for which you appoint me and, if my term is indefinite, it is my intention to serve as long as you wish me to serve.

Very truly yours,

ROBERT L. HERBST.

[From the Committee on Energy and Natural Resources]

U.S. SENATE,
Washington, D.C., March 28, 1977.

MEMORANDUM

To: Members of the Committee.
From: Steven P. Quarles, Counsel.
Re: The Nomination of Mr. Robert L. Herbst to be Assistant Secretary of the Interior for Fish and Wildlife and Parks

On March 8, 1977, the Energy and Natural Resources Committee and the Environment and Public Works Committee jointly received the nomination of Robert Herbst, Commissioner of Natural Resources for the State of Minnesota, to be Assistant Secretary of the Interior for Fish and Wildlife and Parks.

On March 9, 1977, the Chairman transmitted to Committee members a memorandum which discussed the arguments of those witnesses who were expected to oppose Mr. Herbst's nomination at the hearing the following day. The Chairman asked me to revise that memorandum on the basis of the testimony received on March 10 and 11, 1977. The revised memorandum is attached.

[From the Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C., March 28, 1977]

MEMORANDUM

To: Senator Henry M. Jackson, Chairman.
From: Steven P. Quarles, Counsel.
Re: The nomination of Mr. Robert L. Herbst to be Assistant Secretary of the Interior for Fish and Wildlife and Parks: A Review of Issues Raised Before and During the Confirmation Hearings.

Mr. Herbst would appear to possess professional qualifications which exceed those of any recent holder of the post of Assistant Secretary for Fish and Wildlife and Parks. (A brief summary of Mr. Herbst's qualifications and a resume are attached as Appendices A and B.) These qualifications and his general credentials as an "environmentalist" (an additional, unwritten qualification which has been applied to the holder of this Assistant Secretaryship in recent years) were endorsed in the testimony of the witnesses of the numerous environmental organizations which favor Mr. Herbst's nomination [1] and were not seriously challenged by the witnesses for those members of the conservation community which oppose, or share concerns over, his nomination.[2]

The opponents of Mr. Herbst's nomination point, instead, to certain actions taken personally by him in his position as Commissioner of Natural Resources or by State officials under his authority which, these opponents maintain, disqualify him for the particular environmental duties of the post to which he has been nominated. They argue that these actions were directly detrimental to, and thus display a disregard for, the missions of the two principal agencies he would supervise: the National Park Service and the United States Fish and Wildlife Service. These actions concern the status of the eastern timber wolf under the Endangered Species Act administered by the Fish and Wildlife Service and the boundaries of the Voyageurs National Park managed by the National Park Service.

---

[1] These include the National Recreation and Parks Association, National Wildlife Federation, Wildlife Management Institute, Wildlife Society, Appalachian Mountain Club, and American Asociation of Zoological Parks and Acquarium.

[2] These include the Fund for Animals, Defenders of Wildlife, Sieraa Club, Wilderness Society, Environmental Defense Fund, and National Parks and Conservation Association.

In addition, the issue of convicts of interest was discussed in the March 9, 1977, memorandum and during the hearings. Also during the hearings, issues were raised concerning the degree of frankness with which the nominee addressed the committee and the manner in which he would, in the future, represent the programs and agencies under his purview both upon Capitol Hill and within the Department.

These issues are discussed below:

I. VOYAGEURS NATIONAL PARK

The opponents of Mr. Herbst's nomination raise one issue concerning the Voyageurs National Park.

Issue 1. Did Mr. Herbst attempt to delete approxmiately 1,000 acres from the Voyageurs National Park by administrative action and to assert State jurisdiction over 80,000 acres of the Park in a suit against the United States, and do these actions manifest a lack of commitment to the integrity of the National Park System?

On April 8, 1976, Mr. Herbst wrote Secretary of the Interior Thomas S. Kleppe and requested that the boundaries of the Voyageurs National Park be altered to remove from the Park the Black Bay area on the northeastern side to permit waterfowl hunting and reduce local citizens' opposition to the park. Assistant Secretary Nat Reed responded in a letter to Herbst, dated April 30, 1976. The letter read in part:

"It has been and still is the professional judgment of the National Park Service that the area in question is every bit as important from a resource standpoint as any other part of the Voyageurs. . . . We question whether the proposed boundary change would significantly satisfy those who oppose the park. We envision that one concession made would simply lead to more concessions asked."

The letter concluded that Congressional action would be necessary to achieve the requested boundary alteration. Such action was sought by a letter in June, 1976 to Congressman Nolan from then Governor Wendell R. Anderson.

On August 19, 1976, the State of Minnesota presented oral arguments as amicus curiae in a case before the District Court concerning the conviction of a Mr. Carl E. Brown in Magistrate's Court for violating National Park Service regulations while duck hunting on the waters of Black Bay. The State argued that hunting could not be controlled by the Federal government on the navigable waters within the Voyageurs National Park because the State never surrendered its sovereign jurisdiction to regulate exclusively such waters. On November 16, 1976, District Court Judge Miles W. Lord entered an opinion in favor of the right of the Park Service to regulate hunting on the navigable waters within the Park despite their ownership by the State. An appeal has been taken.[3]

Analysis: Clearly, Mr. Herbst sought administrative alteration of the boundaries of the National Park and at least acquiesced in the suit to assert exclusive State jurisdiction over all the navigable waters of the Park. The only real issue is whether this can be regarded as a lack of commitment on his part to the integrity of the National Park System. On the basis of available documents and hearing testimony counsel cannot reach this conclusion.

Mr. Herbst's letter to Secretary Kleppe and a statement on Voyageurs National Park submitted by Mr. Herbst to the Committee refer to two maps of the Park which show the Black Bay area to be excluded from the Park and the views of local citizens who guided the National Park survey team that the team meant to exclude the waters of the Bay. Mr. Herbst, thus, argued for the deletion of 1,000 acres from a 219,000 acre park on the basis of map error and misunderstanding. Counsel believes that when (1) the assurances from Mr. Herbst that he vigorously advocated the creation of the Park with full protection (while local hunting interests were lobbying for special statutory language permitting hunting in the Park or, in the alternative, the designation of the area as a national recreation area where hunting is permitted), (2) Mr. Herbst's successful efforts to achieve passage of a complementary State bill to permit the State to donate 37,000 acres of State land to the Park, and (3) his agency's prompt transfer of those lands, are weighed against the Herbst request for a 1,000 acre deletion, the request cannot be viewed as a serious threat to the integrity of the National Park System or as an indication of a cavalier attitude of Mr. Herbst toward the protection of that System.

The lawsuit raises more serious questions in that it involves a much higher percentage of the Park's area and can be viewed as precedent for attacks on the authority of the Park Service over navigable waters in other units of the National Park System. In response to a question concerning the suit posed to Mr. Herbst by counsel, Mr. Herbst stated that he had never truly favored this approach and that he was told by the State Attorney General that the State must enter Mr. Brown's lawsuit. Although during the hearing Mr. Herbst did not repeat his personal opposition to the lawsuit (even though asked if he was opposed to it) he did confirm that the State Attorney-General did advise him that "as the State public official having responsibility for the public waters of the State . . . I had a constitutional and statutory responsibility to enter that case as amicus curiae to protect whatever interests the State had in the ownership of waters" (Hg. transcript 87–88). When asked what his present views were, Mr. Herbst supported (without specifically stating so) the position of the judge in his decision in favor of the defendant that the State had only concurrent jurisdiction over the waters within the Park (Hg. transcript 88).

II. THE EASTERN TIMBER WOLF AND THE ENDANGERED SPECIES ACT

The opponents raise three issues concerning this subject:

Issue 2: In permitting the taking of wolves after passage of the Endangered Species Act of 1973, did the Minnesota Department of Natural Resources (DNR) under Commissioner Herbst's direction knowingly violate the Endangered Species Act? Was the DNR threatened with Federal suit for violation of the Act in a letter from the Interior Department in which both the criminal and civil sanctions of the law were cited?

DNR did violate the provisions of the Act and such a letter (Appendix C) was sent to Commissioner Herbst on September 5, 1974, by Lynn A. Greenwalt, at that time Special Assistant to the Director of the Fish and Wildlife Service.

The letter contained the following language:

"In telephone discussions had on September 4, 1974, between Associate Director Schreiner, of the U.S. Fish and Wildlife Service, and Mr. Milo Casey, Director, Minnesota Game and Fish Division, we have been informed that the Department has specifically authorized the taking of timber wolves in a least two, and possibly three, Regions of the Minnesota Department. If this is the case, such action may be in violation of Federal law, enforceable by criminal and civil sanctions, and such State authorization is void, by force of section 6(f) of the Act. . . . You are hereby notified of this alleged violation of the Act."

Set forth in the letter were three actions which the DNR would have to take to comply with the 1973 Act and avoid suit, among them certification to the U.S. Fish and Wildlife Service within five days of receipt of the letter that all licenses for the taking of wolves had been revoked.

On September 10, 1974, Mr. Herbst sent a letter (Appendix D) to Mr. Greenwalt informing him that the revocation of the licenses had occurred.

The principal issue which is not fully resolved is whether Mr. Herbst knew that the State and his department were violating the Act prior to receipt of the Interior Department's letter. This issue is of particular concern to the environmental organizations supportive of the Endangered Species Act because the Interior Department letter is regarded by many of them as the high point in an otherwise less than vigorous departmental effort to implement the Act.

Analysis: The Endangered Species Act was the victim of much confusion in the first few months after its enactment in December 18, 1973. The principal reasons for this were the complexity of its provisions and the failure of the Act to provide for any waiting period for the promulgation of regulations (its effective date was the date of enactment). Section 6(g) did provide for a fifteen-month transition or "establishment" period during which each State was to enter into a cooperative agreement with the Federal government for the management of endangered and threatened species. If no agreement was reached, the State would lose the authority to take or regulate the taking of endangered or threatened species. With exceptions set forth in paragraph (2) of section 6(g), the States were permitted to continue to manage all resident wildlife species during the establishment period. The principal exception of revelance to Mr. Herbst's nomination removed from State management during the establishment period any species listed in "the Convention on International Trade in Endangered Species of Wild Fauna and Flora or otherwise covered by any other treaty of Federal law."

At the time the Act was signed, the Interior Department and State wildlife agencies believed State authority over the eastern timber wolf was not preempted during the establishment period because the species was not listed in the Convention. Accordingly, DNR continued to regulate the taking of eastern timber wolves in the initial months of the establishment period.

With additional research, however, it was discovered that the eastern timber wolf was covered by an "other treaty": the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere (Pan Am Treaty) which was not implemented until authorized by Congress in section 8(e) of the 1973 Act.

A background memorandum on eastern timber wolf and the DNR prepared by the Interior Department and submitted to the Committee reports the subsequent developments as follows:

"Thus, in last August or early September of 1974, it was recognized that the eastern timber wolf might be protected under the Endangered Species Act of 1973 regardless of the transition period allowed. When it was reported that Minnesota might be taking wolves for depredation control, a call was made to the Director of the Minnesota Game and Fish Division to inquire about this action. We were informed that the State was taking wolves in two and possibly three regions of the State. The next day (September 5, 1974), the Minnesota Department of Natural Resources was officially notified that the taking of wolves without a permit was a violation of Section 9 of the Act. On Septem-

[3] The State's case may be weakened by the provision in P.L. 94–458, enacted on October 7, 1976, which provides the Interior Secretary with authority to "promulgate and enforce regulations concerning boating and other activities on or relating to waters located within areas of the National Park System, including waters subject to the jurisdiction of the United States. . .". (90 Stat. 1976)

ber 10, 1974, a reply was received saying that the Department would comply with our request to revoke all authorizations to take timber wolves even though they felt that it would not be in the best interest of the wolves in the long term.

"The Minnesota Department of Natural Resources and the Minnesota Game and Fish Division acted in a legal and responsible manner to our request to stop their wolf control program. Furthermore, it is unlikely that the Minnesota Department could have known they were potentially in violation of the Act prior to receiving our letter."

Lou Regenstein of the Fund for Animals testified that the Interior Department knew that the eastern timber wolf was covered by the Pan Am Treaty and that no further wolf kills could be permitted by the DNR. He also stated that DNR was so informed by the Interior Department as early as June (and not late August or September as the Interior Department maintains in the above-quoted memorandum). Mr. Regenstein based his position on interviews he conducted with Interior Department personnel during the summer of 1974 in preparation for his Master of Arts thesis on the Endangered Species Act of 1973.

Upon review of available documents and testimony at the hearing, counsel finds that the Interior Department did know of the coverage of the timber wolf by the Pan Am Treaty and did inform the DNR of that fact prior to the late August or September date referred to in the Interior Department's memorandum. Counsel, however, does not find any clear indication that the DNR was informed that the establishment period was not applicable to the wolf and that the DNR must desist from issuing licenses for the taking of wolves.

According to a transcript of the Symposium on Endangered and Threatened Species of North America, held in Washington, D.C., June 11–14, 1974, Mr. Regenstein announced in a speech that Dr. David Mech, a wildlife research biologist for the U.S. Fish and Wildlife Service, stationed in Minnesota, had informed him that the Interior Department was aware that the wolf was listed on the Pan-Am Treaty and that the Department was interpreting this fact to mean that no more wolf kills could occur even during the transition period. Despite the suggestion to the contrary in a statement of Mr. Regenstein in his prepared testimony for the Committee, there is no indication in the transcript that it was publicly announced that no further wolf killing permits would be terminated because there were "other interpretations" of the effect of the coverage of the eastern timber wolf by the Pan Am Treaty.

In his testimony, Mr. Regenstein also said he met with Mr. Mech; Mr. Keith Schreiner, Associate Director, Fish and Wildlife Service; and E. U. Curtis Bohlen, Deputy Assistant Secretary for Fish and Wildlife, after his speech and that they "made it crystal clear that the wolf now enjoyed virtually total protection in Minnesota." However, here again there was no public announcement of that fact nor was there any indication that the DNR had been so informed.

Mr. Regenstein's thesis contains the statement based on a July 1974 discussion with Mr. Schreiner as follows: "In June, the Interior Department informed Minnesota's Department of Natural Resources (DNR) that it could no longer permit the killing of wolves. According to Keith Schreiner . . . DNR gave assurances that no further permits for the taking of wolves would be issued." As will be noted below, Mr. Schreiner, who appeared before the Committee on March 11, 1977, at the request of the Acting Chairman, denied any memory of having informed the DNR that it must stop issuing licenses for the hunting of the wolves or having received assurances to that effect from the DNR. Furthermore, the August 29, 1974, letter discussed below also appears to at least partially contradict the thesis statement and, unlike the thesis statement, the letter and the Symposium transcript were written contemporaneously with the discussions.

On August 29, 1974, Mr. Regenstein wrote a letter to Mr. Keith Schreiner, Associate Director of the Fish and Wildlife Service, (Appendix E) in which he states that he had talked to Mr. Dave Vesalle of the DNR and that Mr. Vessale told him he was aware of the coverage of the wolf by the Pan Am Treaty but that the State was continuing to issue licenses for the taking of wolves. However, again there is no indication in that letter that the DNR was informed that coverage of the wolf by the Pan Am Treaty meant the agency must immediately cease issuing licenses. In fact, in the letter, Mr. Regenstein indicates that Mr. Vesalle maintained that while he was "aware that the eastern timber wolf is on the Pan Am Treaty . . . a transition period was still in effect, and would remain so for several months, until the . . Act . . . took effect". Furthermore, the letter would appear to indicate that Mr. Regenstein's view that the DNR had been notified by the Interior Department of the preemption of its authority to issue licenses for the taking of wolves during the establishment period and of the requirement that it cease issuing such licenses was based on this assumption only.[4]

During the hearings, Mr. Herbst argued that, although the DNR was informed in June of the coverage of the eastern timber wolf in the Pan Am Treaty, it was not told that the effect of that was to prohibit the DNR from issuing licenses for the taking of wolves. A June 26, 1974, letter to the U.S. Fish and Wildlife Service's Game Management Agent in St. Paul from the DNR (the Deputy Commissioner on behalf of Mr. Herbst) definitely discloses that the coverage of the wolf in the Treaty was known by June 1974 (contrary to the above-quoted memorandum of the Department of the Interior prepared for the nomination hearing which placed the discovery of the Treaty's coverage in August or September) and suggests that the DNR was not informed as to what the coverage meant to the State.[5]

Further evidence of Mr. Herbst's position is found in a July 31, 1974, memorandum by him to DNR employees on "New Rules on the Timber Wolf". The memo reads as follows:

Beginning on August 1, the new Minnesota law on endangered species is in effect. A news release describing the new regulations will be released August 5.

"The new rules are based on state law. The federal regulations regarding the taking of wolves doing damage is unclear. Although we have asked the federal government for clarification, no guidelines have been received.

"Obviously we cannot wait any longer before informing the public that the timber wolf has a new status in Minnesota.

"Any questions regarding the taking of wolves under federal regulation should be referred to the Regional Office of the U.S. Fish and Wildlife Service 612–725–3505."

The most definitive official statement by Mr. Herbst to the effect that the DNR was not informed during the summer of 1974 that it could not issue the licenses is found in his September 10, 1974, letter to Mr. Greenwalt agreeing to comply with the Endangered Species Act. In reading the following excerpt from the letter, however, it should be kept in mind that the excerpt was written as an after-the-fact explanation of the State's actions to a Federal official who had just threatened suit over those actions:

"Some areas have been opened to the taking of timber wolves among other species. This has been done in the absence of any official interpretation by your office of the status of the establishment period so far as the timber wolf is concerned. Having been informally notified that your office might take the position that the prohibitions contained in the Endangered Species Act of 1973 already apply to the wolf in Minnesota, this department applied for a permit to continue to authorize the taking of timber wolves under our predator control program.

At the time of that application, this department was informed by officials of the Fish and Wildlife Service that because of the confusion involving the establishment period, no action would be taken to halt Minnesota's predator control program pending the disposition of the permit application."

Mr. Schreiner, associate director of the U.S. Fish and Wildlife Service, was invited to testify and his statement was more supportive of Mr. Herbst's position than that of Mr. Regenstein. He noted that the Pan Am Treaty was difficult to interpret because the Department's copy was in Spanish and did not list the wolf (the eastern timber wolf had been added later at the request of a previous Director of the Fish and Wildlife Service). He further stated that although he did believe he talked with the DNR concerning the listing of the wolf he did not think he had told DNR that it could not permit the taking of wolves during the establishment period. He did admit that he likely told Mr. Regenstein that no wolves were being taken in Minnesota, but apparently this was an assumption on his part. Mr. Schreiner added that, because of this assumption, Mr. Regenstein's August 29, 1974, letter informing him that the State was continuing to license the taking of wolves came as a surprise and immediately prompted the strong Greenwalt letter of September 5, 1974, threatening suit if compliance with the Act did not occur.

Upon review of these documents and testimony, counsel can find no clear indication that the DNR was informed that it could not issue licenses for the taking of eastern timber wolves prior to the telephone call of September 4, 1974, mentioned in the Interior Department memorandum and the letter from the Department to Mr. Herbst of September 5, 1974. Counsel does agree with Mr. Regenstein that it seems somewhat unusual for the Interior Department to send such a "tough" letter threatening suit unless compliance occurs within five days on only one day's notice by telephone. However, counsel does not find this to be persuasive of the position that DNR had been told to desist issuing licenses much earlier given the absence of any documentation to that effect.

Consequently, as the DNR promptly complied with the request in the Department's letter, counsel cannot state with any degree of certainty that Mr. Herbst or the DNR ever knowingly violated the Endangered Species Act of 1973.

Issue 3: Did Mr. Herbst press for the removal of the eastern timber wolf from the

---

[4] The letter reads "This contradicts your assurances to me that Minnesota was no longer able to issue such permits, and that the wolf in Minnesota was now completely protected by law, since its listing by the Treaty abolished any such transition period. I asume, of course, that your views were expressed to me in good faith, and were based on your conversations with Minnesota officials". (Emphasis added.)

[5] The letter notes that the wolf is on the Pan-Am Treaty and contains an application to the U.S. Fish and Wildlife Service for a "permit to continue taking . . . nuisance animals . . . pending the development of a cooperative agreement with the U.S. Department of the Interior pursuant to the Endangered Species Act".

endangered species list and, thus, attempt to subvert the purposes of the Endangered Species Act of 1973?

Although, the DNR promptly complied with the Interior Department's September 5, 1974, letter, Mr. Herbst and his department did continue to press for State authority to issue licenses for the taking of wolves. They did so within the procedures provided by the Endangered Species Act of 1973, although apparently the possibility of pursuing an amendment to the Act was considered.

On October 4, 1974, Mr. Herbst sent a letter, together with supporting documents, to Mr. Greenwalt petitioning that the eastern timber wolf not be classified as either endangered or threatened under the 1973 Act. (The letter is attached as Appendix F.) The November 21, 1974, Federal Register contained an announcement of Mr. Greenwalt (by then Director of the Fish and Wildlife Service) that a review of the classification of the eastern timber wolf in Minnesota would take place.

On January 27, 1976, the Regional Director of the Fish and Wildlife Service requested information from the State wildlife officers (including Mr. Herbst) in the region concerning the critical habitat of the eastern timber wolf and six other species listed on the endangered species list. Mr. Herbst responded in a rather blunt manner in a letter as follows:

"The only species on the list in your correspondence of January 27, 1976, that inhabits Minnesota is the Eastern Timber Wolf.

"You are aware, of course, that the Minnesota DNR does not regard the timber wolf as endangered within this state.

"Since 'critical habitat' is a concern regarding endangered species, we can have no applicable response to your request."

Analysis: Clearly, Mr. Herbst did try to have the eastern timber wolf in Minnesota removed from the endangered species list. The only issue to be addressed is whether such an effort could be regarded as an attempt to subvert the purposes of the Endangered Species Act of 1973.

On the basis of available documents, counsel believes this conclusion cannot be reached. Mr. Herbst appears to have engaged in the declassification effort on the basis of his firm belief that the wolf population must be managed, that proper management included the necessity of State-licensed wolf kills, and that such management would insure the long-range protection, not the demise, of the eastern timber wolf in Minnesota. Furthermore, this belief appears to be based on sufficient scientific information so as to not be unreasonable.

In a memorandum submitted to the Committee and printed on pages 6356–6357 of the March 4, 1977, Congressional Record, Mr. Herbst points out that between 1966 (when he first became Deputy Commissioner of DNR) and today the wolf has increased in number from 600 to 1200–1500 in Minnesota and that its main range is now saturated. (Opponents argue that the 600 figure is erroneous and was based on crude estimates and that whatever increase in numbers which did occur was not a result of State management or a State policy to permit that increase. However, opponents do not appear to dispute either the 1200–1500 figures or the fact that the main range is well-used, if not saturated.)

Mr. Herbst, in his letter to Mr. Greenwalt, not only cited these figures but also provided additional information in support of his request for declassification. The draft report of the Eastern Timber Wolf Recovery Team appointed by Mr. Greenwalt corroborated those figures and most of the information which the State provided in its declassification justification. The report of the team is particularly important in that, of its eight members, five are Federal employees (representing the Fish and Wildlife Service, Park Service, and Forest Service; the other three represent the States of Michigan, Wisconsin, and Minnesota).[6]

The principal evidence cited by opponents that Mr. Herbst's position unnecessarily diminished the effectiveness of the 1973 Act is the Recovery Team's recommendation by a vote of 7 to 1 that the eastern timber wolf in Minnesota be reclassified from "endangered" to "threatened" (the dissenting vote was for complete declassification). Although this recommendation evidences the Recovery Team's concurrence in Mr. Herbst's contention that the wolf requires management, it can be argued that the Team's position of reclassification is the only responsible position to be taken under the 1973 Act and that Mr. Herbst's position of total declassification is, therefore, irresponsible. Counsel believes that such an argument is not persuasive. Clearly, the evidence suggests that a vigorous population of eastern timber wolf does exist in Minnesota and, because of that, Federal experts as well as Mr. Herbst and the DNR have proposed that it be removed from "endangered" status. The degree of removal is all that is in question and counsel suggests that that is a matter of responsible, if differing, opinion.

Counsel does note that Mr. Herbst on four occasions during the hearing (Hg. Transcript 78, 83, 106, and 107) stated to the Committee that he asked for "reclassification" of the eastern timber wolf to threatened status. Twice the Acting Chairman had to correct Mr. Herbst and remind him that he petitioned for total declassification of the wolf from operation of the 1973 Act (Hg. transcript 83 and 110). Mr. Herbst also stated on several occasions both during the hearing and in an interview with Committee counsel that his "personal" position was in favor of reclassification, but that he petitioned for declassification as a matter of strategy, not strongly held conviction: i.e. the DNR declassification request was made in the hope that Interior would take the middle ground of reclassification, an action which the State would find to be acceptable.

However, this present assurance of Mr. Herbst that by personal conviction he favored reclassification appears contrary to actions taken by him as Commissioner after the Federal Recovery Team had recommended reclassification. With the Team's recommendation, it appeared that Mr. Herbst's "strategy" had worked, yet he continued to push for declassification. He even discussed the possibility of amending the 1973 Act to achieve that result. (See discussion under issue 7 of problems raised by these responses of the nominee during the hearing.)

Issue 4. Did the DNR under Mr. Herbst's direction oppose enactment of the Endangered Species Act of 1973; and, if so, does this represent the present position of the nominee?

In March, 1973, Mr. Mike Casey, director of the Minnesota Department of Fish and Game, testified on behalf of the DNR in opposition to several bills which later evolved into the Endangered Species Act of 1973.

Evaluation: The testimony of Mr. Casey was not against the purpose of the legislation. It was instead against those provisions which proposed to permit Federal classification as "endangered", and Federal management, of any resident wildlife species without the concurrence of the affected State. This position was commonly-held among virtually all State officials responsible for wildlife. That the States possess the authority to manage resident wildlife species and the Federal government has the responsibility only for the management of the habitat of such species on Federal lands is a hoary but valid legal axiom. The States have traditionally zealously guarded this States' right. The DNR, as a State agency and Mr. Herbst as a State official, were no exception.

Although, in his testimony Mr. Smith spoke of being "opposed" to "any legislation", a careful reading of the statement makes it clear that he was testifying only against those provisions which did not require State concurrence. He specifically invoked the States' right to wildlife management as his reason for opposition. Mr. Herbst also worked actively against any such provisions in his capacity as Chairman of the Legislative Committee of the International Association of Game Fish and Conservation Commissioners. State wildlife officials constitute a large proportion of this group's membership (fish and game officials from the U.S., Mexico, and Canada) and Mr. Herbst was representing their position in favor of the same States' right.

That the position of the DNR and Mr. Herbst concerned only the locus of authority over wildlife and not necessarily the degree of protection to be afforded endangered species of wildlife can be deduced from the strong statement in favor of passage of the 1969 endangered wildlife bill (Act of December 5, 1969, 83 Stat. 282) in a September 26, 1968 letter to the Congressional delegation from the Director of the Division of Game and Fish, DNR, and from Mr. Herbst's statements that he supported the 1973 Act once the offending provisions were removed. As noted above, subsequent to the passage of the 1973 Act, the DNR and Mr. Herbst did not oppose the Act itself. They simply disagreed with certain decisions taken pursuant to it. They expressed that disagreement through the procedures provided by the Act.

III. ADDITIONAL ISSUES

Issue 5. As the issues concerning status of the eastern timber wolf under the Endangered Species Act of 1973 and the boundaries of the Voyageurs National Park have not been resolved will Mr. Herbst divorce himself from decisionmaking concerning those issues to avoid any appearance of, or actual, conflict-of-interest?

In a February 7, 1977, statement "Regarding Conflict of Interest Concerns" submitted by Mr. Herbst to the Committee, Mr. Herbst stated the following:

I am advised that two issues have been brought to the attention of the Department of the Interior, as related to my status as a State of Minnesota official; specifically:

(1) A petition in consideration of reclassification of the eastern timber wolf:

"If, in serving as Assistant Secretary of Interior, I should be involved in a ruling on said position, as brought by myself as a state official, I would disassociate myself from the decisionmaking processs and abide by the judgment of the present director of the U.S. Fish and Wildlife Service.

"(2) Formal requests of past and present Governors of the State of Minnesota involving proposed adjustments of the boundary of Voyageurs National Park (minor change):

"I would not interfere with decision of the National Park Service; namely: 'they will not administratively change the boundary.'"

Counsel believes this response to be admirably specific and sufficient to remove any questions of conflict of interest concerning those specific issues.

Issue 6. Mr. Herbst's request for declassification of the eastern timber wolf as an endangered species, his request for deletion of acreage from the Voyageurs National Park, and his participation in the suit to assert exclusive State jurisdiction over all the navigable waters in the Park are typical of many instances in which States dispute the extent of the Interior Department's authority to protect wildlife and wildlife habitat and to

[6] The Recovery Team's Report is on file and available at the Committee.

forcefully manage units of the National Park and Wildlife Refuge Systems. As Assistant Secretary, Mr. Herbst will be required to address such Federal-State disputes. Are the positions Mr. Herbst took on the wolf and on the Park considered by him to have been incumbent upon him by virtue of his responsibilities as a State official or do they reflect a fundamental, philosophical position in favor of the States' viewpoint which will prevail whenever he is called upon to make decisions concerning conflicting Federal and State rights and prerogatives?

In the February 7, 1977, statement "Regarding Conflict of Interest Concerns" submitted to the Congress, Mr. Herbst stated:

"Should any other areas involving possible conflicts of interest arise, I would immediately refer such areas to the Secretary of Interior for his assessment, and action, together with any recommendations I may have to preclude and resolve conflict problems."

Although no specific question similar to those set forth above were posed to Mr. Herbst during the hearing, Mr. Herbst affirmed on numerous occasions that he proposes to forcefully defend the programs and agencies under his jurisdiction. He stated that his positions as Commissioner of the DNR in which he defended the State against Federal interests were taken in fulfillment of his constitutional and statutory duties as a State officer.

Counsel believes that, if confirmed, Mr. Herbst would feel a concomitant duty as a Federal officer and would assert Federal rights and authority in his new office as vigorously as he protected States' rights and authority in his former office.

Issue 7. Do Mr. Herbst's responses during the nomination hearings raise questions concerning the degree of frankness with which the nominee addressed the Committee and the manner in which he would, in the future, represent the programs and agencies under his aegis both upon Capitol Hill and within the Department?

Discussion and analysis: As previously noted, on four occasions during the hearing (Hg. transcript 78, 83, 106, and 107), Mr. Herbst stated to the Committee that he asked for "reclassification" of the eastern timber wolf from "endangered" to "threatened" status under the Endangered Species Act of 1973. Twice the Acting Chairman had to correct Mr. Herbst and remind him that he had, in fact, petitioned for total declassification of the wolf (and, thus, its removal from the operation of the 1973 Act) (Hg. transcript 83 and 110). Mr. Herbst also stated on several occasions both during the hearing and in an interview with Committee counsel that his "personal" position was in favor of reclassification but that he petitioned for declassifcation as a matter of strategy, not strongly held conviction: i.e., the DNR declassification request was made in the hope that Interior would take the middle ground of reclassification, an action which the State would find to be fully acceptable.

However, this present assurance of Mr. Herbst that by personal conviction he favored reclassification appears contrary to actions taken by him as Commissioner after the Federal Recovery Team had recommended reclassification. With the Team's recommendation, it appeared that Mr. Herbst's "strategy" had worked, yet he continued to push for declassification. He even discussed the possibility of amending the 1973 Act to achieve that result.

"On March 1, 1976, Mr. Herbst wrote the Recovery Team's leader in response to the Team's recommendations in its draft plan (Appendix H). In this response, Mr. Herbst disputed the reclassification recommendation and continued to press for "complete declassification of the wolf in Minnesota". In a letter unavailable to the Committee at the time of the hearings, Mr. Herbst wrote to a State Representative on December 23, 1976, (Appendix G) that "We are in favor of total declassification. If completely declassified, all management would revert back to the state. We do not know at this time what the rules would be under the threatened category". He proceeded to address alternatives if a Federal decision is not forthcoming. One such alternative was "Amend the 1973 Endangered Species Act to change the limitations giving the Secretary of Interior wider latitude and to provide for taking of animals which are a threat to persons, property or species. If we go this route, our Congressional Delegation should be requested to assist and the legislature could memoralize Congress to change the 1973 Act."

"Counsel suggests that these two letters, written after the Recovery Team's recommendation of reclassification, raise serious questions concerning (1) how deeply held were Mr. Herbst's personal views favoring reclassification, and (2) how real was the State's secret strategy to obtain reclassification, both of which Mr. Herbst has asked the Committee to accept. The latter letter particularly, in that it was addressed not to the Federal Government but to an elected State official, appears to contradict the assertion of Mr. Herbst that the declassification position was only taken for the strategic purpose of influencing the Interior Department to adopt the middle ground position or reclassification.

"Counsel also notes that these questions have raised further questions concerning Mr. Herbst's future performances within the Department and on Capitol Hill. These questions were expressed during the hearing, as follows:

"Senator Abourezk. It seems very, very strange to me that after a group which was retained by the Interior Department to make recommendation makes a recommendation with you personally agree and you continue, however, in writing, to press for something else. It is very mystifying and very strange.

"It seems to me you have gone beyond any kind of bargaining position. In fact, it seems to me you are reflecting your own personal position because you are pressing it so hard according to the correspondence and documents we have available.

My question now is why were you not able to support the Recovery Team's position if that is indeed what you felt?

"Mr. Herbst. We felt we would continue to make the recommendation so they would end up with that position of threatened.

"Senator Abourezk. I have to say, Mr. Herbst, that is a very lame explanation, very lame. It does not square with the reality of the situation.

Now, in response to questioning yesterday, you informed the Committee that on two different occasions you took, as the Commissioner of the Department of Natural Resources, positions which you personally did not favor, but positions which you took nevertheless. One was the petition to remove the eastern timber wolf from the operation of the Endangered Species Act entirely, rather than just reclassification under that Act. The other was the suit to assert exclusive State jurisdiction over all navigable waters in Voyageurs National Park. I can find no evidence to the effect you either vigorously resisted the taking of these positions or that you were compelled by any Federal or State authority or statutes to do so. To me this is not a very encouraging trait for a high Federal official. I have to say I have visions of you appearing at a hearing or making a statement to the press at some future time, long after you left the Assistant Secretaryship, that you really would have preferred to provide better protection to a national park or wildlife refuge or better conserve the habitat of a particular wildlife species, but you felt "compelled" to take a different stand or you took a different position "for strategic reasons."

"To be honest, the post of Assistant Secretary to which you aspire is one that requires a strong advocate of wildlife and wild lands protection. That Assistant Secretary must speak forcefully for those purposes directly to the Secretary if the Secretary is to obtain a balanced picture of resource development versus resource protection issues. The Assistant Secretary must forcefully express his personal views and not hide behind them for strategic reasons or for some notion of duty not required by law.

"That is precisely how I feel about this question. I think personally it would have been better had you answered the questions posed to you differently. I could have accepted some kind of commitment on your part either for or against the timber wolf itself, but I think it is much more important you try to be fair and honest in this committee.

"Mr. Herbst. Mr. Chairman, I am being fair and honest. I have indicated the management of the timber wolf has been one of trying to protect it. In the case of the water question on the Voyageurs Park, that was a constitutional and statutory responsibility. I had to protect whatever interest the state had in the public waters of the state. I think my record does show I have been a strong advocate and very active in protecting wildlife habitat and wildlife programs for both the huntable species, as well as the non-game species.

"I have been a very strong advocate of the acquisition of key natural resource areas, park areas, wilderness areas, scenic and scientific areas in the State of Minnesota. . . .

"Senator Metzenbaum. Mr. Herbst, I am having some of the same difficulties the Senator from South Dakota is having . . ."

APPENDIX A

Mr. Herbst earned a Bachelor of Science degree in forest management, with a minor in wildlife management, from the University of Minnesota. After more than a decade's employment in the Forest Service and the State Conservation Department, the forest products industry, and the faculty of the University, Mr. Herbst served four Minnesota governors as Deputy Commissioner, Acting Commisioner, and Commissioner of the State Department of Natural Resources (DNR). In addition he has served as the leader of both a statewide and a national conservation organization (executive secretary of Keep Minnesota Green, Inc. and national executive director of the Izaak Walton League of America) and as member and chairman of numerous national, State and local professional and conservation organizations and associations. Mr. Herbst has provided the Committee with documents (available to the Members at the Committee office) setting forth his accomplishments in the conservation field in both his public and private capacities. The documents contain a lengthy list of Federal and State legislation enacted, and State administrative actions, under Mr. Herbst's authority or with his encouragement for the purposes of protecting wildlife and its habitat and of establishing parks and preserving open space, preventing pollution, providing environmental education, and achieving other conservation objectives. Numerous citations and awards he received for his conservation efforts are also listed.

APPENDIX B

Robert L. Herbst, 10444 Fifth Avenue Circle, Bloomington, Minn. 55420, B. October 5, 1935—A. 41.

Education: 1957, B.S. University of Minnesota.

Experience:

1971–present, Commissioner of Natural Resources, State of Minnesota.

1969–71, National Executive Director, The Izaak Walton League of America.

1966–71, Deputy Commissioner, Minnesota Conservation Department.

1966–67, Acting Commissioner, Minnesota Conservation Department.

1963–66, Executive Secretary, Keep Minnesota Green, Inc.

1957–63, Minnesota Conservation Department.

1956–57, Instructor, University of Minnesota in Dendrology and Mensuration.

1954–55, U.S. Forest Service.

1953, Forest Industry.

Publications: "Careers in Environment," Dillon Press, 1974.

Organizations:

Minnesota Conservation Federation.

Society of American Foresters.

National Geographic Society.

Delegate from U.S., First International Conference on Human Environment in Northern Regional World, Sapporo, Japan, 1974.

Executive Board, Natural Resource Council of America.

Advisory Committee, Camp Courage.

Honors and Awards:

Bureau of Outdoor Recreation Award of Minnesota, 1974—for Outstanding Outdoor Recreation Planning.

Izaak Walton League of America, Plaque for Appreciation for Conducting American Youth Conference on Environment, July, 1975.

Conservation Educational Association (National) Department Award for Boat and Water Safety Program, June, 1975.

Recognition Plaque from Minnesota's Governor Anderson for efforts to preserve St. Croix River.

Personal:

Born: Minneapolis, Minnesota.

Wife: Evelyn Elford B. 1935.

Son: Eric Herbst B. 1957.

Son: Peter Herbst B. 1959.

Daughter: Amy Herbst B. 1965.

APPENDIX C

U.S. DEPARTMENT OF THE INTERIOR,
FISH AND WILDLIFE SERVICE,
Washington, D.C., September 5, 1974.

In Reply Refer To: FWS/D.

Commissioner ROBERT L. HERBST,
Department of Natural Resources, Cedar Street, St. Paul, Minn.

DEAR MR. HERBST: The Endangered Species Act of 1973, 16 U.S.C. §§ 153.–1543, presently prohibits the taking, or causing the taking, of timber wolves (*Canis lupus lycaon*) within the State of Minnesota, except under a permit issued by this Department under authority of section 10 of the Act. No such permit has been issued to any citizen or governmental entity of the State of Minnesota.

In telephone discussions had on September 4, 1974, between Associate Director Schreiner, of the U.S. Fish and Wildlife Service, and Mr. Milo Casey, Director, Minnesota Game and Fish Division, we have been informed that the Department has specifically authorized the taking of timber wolves in at least two, and possibly three, Regions of the Minnesota Department. If this is the case, such action may be in violation of Federal law, enforceable by criminal and civil sanctions, and such State authorization is void, by force of section 6(f) of the Act.

You are hereby notified of this alleged violation of the Act. You are respectfully requested (1) to provide this Department with the names and addresses of all persons authorized by your Department to take timber wolves, (2) to revoke any State authorization to take timber wolves, and (3) to deliver to the Regional Director of the U.S. Fish and Wildlife Service, in Twin Cities, Minnesota, a certification of the fact of such revocation within five (5) days of your receipt of this notice. If such certification is not received, we will have no choice but to refer this matter to the Department of Justice for appropriate action.

Sincerely yours,

LYNN A. GREENWALT,
Special Assistant to the Director.

APPENDIX D

SEPTEMBER 10, 1974.

Mr. LYNN A. GREENWALT,
USDI, Fish and Wildlife Service, Washington, D.C.

DEAR MR. GREENWALT: The Minnesota Department of Natural Resources has continued to operate a predator control program pursuant to Minnesota Statutes, Section 97.487 (1971). Under this authority, specific areas are opened to previously appointed predator controllers after it has been determined that such predators are causing damage to domestic livestock in the area. Within the open area, controllers are allowed to take specified predators, which may or may not include timber wolves.

Some areas have been opened to the taking of timber wolves among other species. This has been done in the absence of any official interpretation by your office of the status of the establishment period so far as the timber wolf is concerned. Having been informally notified that your office might take the position that the prohibitions contained in the Endangered Species Act of 1973 already apply to the wolf in Minnesota, this department applied for a permit to continue to authorize the taking of timber wolves under our predator control program.

At the time of that application, this department was informed by officials of the Fish and Wildlife Service that because of the confusion involving the establishment period, no action would be taken to half Minnesota's predator control program pending the disposition of the permit application.

Your letter directing the Minnesota Department of Natural Resources to revoke any authorization to take timber wolves under the state's predator control program, therefore, appears to reflect a change of position. As we understand it, the Fish and Wildlife Service now takes the position that the prohibitions of the Endangered Species Act of 1973 currently apply to the timber wolf in Minnesota. Furthermore, we take your letter as an indirect denial of our recent permit application, a copy of which is attached.

Your letter says nothing about either of these issues. We, therefore, respectfully request written clarification of your position in regard to the status of the establishment period and this department's application for a permit to continue taking wolves under the state predator control program.

We will, of course, comply with your directive to revoke all authorization to take timber wolves under the state predator control program. A copy of a letter I have sent today to all applicable Regional Administrators directing them to amend all outstanding predator control authorization to exclude timber wolves, is attached.

I take this action reluctantly. It remains our firm belief that taking of nuisance animals is necessary to protect both domestic livestock and the wolf population in general. Without a directed predator control program, considerable damage will be done to domestic livestock in the northern part of the state. If no action is taken to prevent such losses, reprisals against wolves in general are a real possibility.

In the past, only about ninety wolves have been taken per year under the predator control program. The best evidence currently available clearly shows that a taking of this magnitude, has no adverse effects on the wolf population.

I am forwarding a copy of this letter and its attachments to the Regional Director, United States Fish and Wildlife Service, Twin Cities, as certification of our compliance with your direction to revoke authorization to take timber wolves. I trust it will be satisfactory for that purpose.

Very truly yours,

ROBERT L. HERBST,
Commissioner of Natural Resources.

C. B. BUCKMAN,
Deputy Commissioner of Natural Resources.

APPENDIX E

WASHINGTON, D.C.,
August 29, 1974.

Mr. KEITH SCHREINER,
Associate Director, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C.

DEAR KEITH: The purpose of this letter is to reiterate our conversation the other day on the timber wolf situation in Minnesota.

On Wednesday, 14 August, 1975, I had a short conversation with a Mr. DiSalle or Vesall (phonetic spelling), who is with the Department of Natural Resources, Fish and Game Division, of Minnesota. You have had several conversations with him on the wolf situation. During our talk, he informed me that Minnesota was continuing to issue licenses for the taking of timber wolves, and expected to issue about 90 or 100 a year. While he admitted to being aware that the eastern timber wolf is on the Pan American Treaty, he maintained that a transition period was still in effect, and would remain so for several more months, until the Endangered Species Act of 1973 took effect.

This contradicts your assurances to me that Minnesota was no longer able to issue such permits, and that the wolf in Minnesota was now completely protected by law, since its listing by the Treaty abolished any such transition period. I assume, of course, that your views were expressed to me in good faith, and were based on your conversations with Minnesota officials.

However, since Minnesota now appears to be openly flouting the law, and is showing no intention of abiding by it, much less enforcing it, it would seem imperative that Interior take some sort of immediate action. As you know, the law provides for $20,000 fines for violations of this sort.

I would be grateful if you would let me know, as soon as possible, what action you plan to take on this matter. I am enclosing copies of some pertinent documentation, including a copy of Minnesota's 31 July, 1973 regulations for the taking of wolves and other endangered species. Please note that the regulations are laughably weak, and allow permits to be issued for the taking of wolves for the purpose of "bringing populations in a given ecosystem into balance with the carrying capacity thereof." The rules also permit the selling of furs made from wolves and other endangered species. These regulations will not protect these wolves, but will rather perpetuate their killing.

I know that you favor cooperating with the states to the greatest extent possible, but Minnesota's refusal to recognize this law leaves you no choice but to take unilateral action to protect this endangered species.

Hoping to hear from you soon, I am,

Sincerely yours,

LEWIS REGENSTEIN.

APPENDIX

OCTOBER 4, 1974.

Mr. LYNN A. GREENWALT,
Special Assistant to the Director, U.S. Fish and Wildlife Service, Washington, D.C.

DEAR MR. GREENWALT: After carefully reviewing all the data available on the eastern timber wolf (*Canis lupus lycaon*), we have concluded that, so far as Minnesota is concerned, the species should not be classified as either endangered or threatened under the Endangered Species Act of 1973.

Therefore, we hereby respectfully petition the Secretary of the Interior, acting through your office, to exclude Minnesota from the range over which the eastern timber wolf is considered endangered.

The Endangered Species Act of 1973 defines an "endangered species" as one "which is in danger of extinction over all or a significant portion of its range" and further defines a "threatened species" as one "which is likely to become an endangered species." There is simply no evidence to support the contention that the eastern timber wolf falls within either of these definitions in Minnesota.

On the contrary, none of the factors listed in Section 4 of the act as indicative of an endangered or threatened status is operative in the case of the eastern timber wolf in Minnesota.

First, neither timber wolf habitat nor range is "threatened with destruction, modification or curtailment." Habitat modification, specifically maturation of the forest in Northeastern Minnesota, has been a problem for the wolf because it results in a declining deer herd, but the recent change in timber demand is reversing this trend. Obviously, protection of the wolf will not resolve the problem, only habitat management will. However, studies by Dr. L. David Mech and Dr. Victor VanBallenberghe indicate that protection of the wolf could cause a further decline in its own food supply in some areas by excessive predation on the very low deer population.

Second, the timber wolf is certainly not being over-utilized "for commercial, sporting, scientific, educational or other purposes." All evidence is to the contrary. Dr. L. David Mech reports a population of about one timber wolf per 10 square miles on the Superior National Forest (Mech, 1973). Dr. V. VanBallenberghe in a monograph currently being published by the Wildlife Society (p. 29 Ecology of the Timber Wolf in Minnesota), gives wolf populations of over one per 6 square miles along Minnesota's North Shore of Lake Superior—higher than any timber wolf population ever reported.

An average of 65 timber wolves per year has been taken under our Directed Predator Control Program from 1969 through 1973. During the last thirteen years prior to 1965 the bounty system was in effect 2,440 timber wolves were bountied, an average of 188 per year. Every population estimate by professional wildlife people indicates that the timber wolf population has increased in Minnesota since 1965. These same professional opinions and our control program records indicate a substantial expansion in the timber wolf range in Minnesota to the west and south.

The sustained annual harvest under the bounty system, the continued need for predator control outside of the main wolf range and the general timber wolf population increase in Minnesota since 1965 indicate a thriving wolf population.

Third, it can be safely inferred from VanBallenberghe's data that disease is not a significant factor affecting the Minnesota timber wolf population.

Fourth, existing regulatory mechanisms, both legal and biological, are adequate. Since August 1, 1974, the wolf has been a protected animal in Minnesota and the Commissioner of Natural Resources has full power to effectively manage the species. From a biological standpoint the principle that predator numbers are dependent upon prey numbers applies here because wolf predation in some areas appears to be a factor in depressing the white-tailed population. However, the wolf population is utilizing moose and beaver and, in settled area, livestock. Deer and livestock will be affected to unacceptable levels before the wolf population is threatened. The wolf is not suffering from man-induced regulatory mechanisms but could become threatened if unrealistic management practices make local residents intolerant.

Finally, "other natural or man-made factors" are likely to affect the continued existence of the eastern timber wolf only if overprotection allows the timber wolf population to reach unreasonably high levels, thereby destroying its food supply and causing conflicts with people.

The Minnesota Department of Natural Resources proposes to engage the timber wolf according to a realistic appraisal of the ecology factors. Where wilderness conditions make it possible, we will establish a sanctuary and attempt to maintain an optimum wolf population. When human activities conflict with maximum wolf populations, we will strive for a reasonable balance between all interests. (The Minnesota Volunteer, March-April 1974, pp. 51–61).

We are hopeful that after reviewing this petition and the attached supporting material you will agree that the eastern timber wolf is neither endangered nor threatened in Minnesota. However, should you require additional information or wish to discuss this matter with us, please don't hesitate to contact me directly.

Sincerely,

ROBERT L. HERBST,
Commissioner,
Department of Natural Resources.

APPENDIX G

MINNESOTA DEPARTMENT
OF NATURAL RESOURCES,
St. Paul, Minn., December 23, 1976.

Representative IRVIN N. ANDERSON,
International Falls, Minn.

DEAR IRV: As a follow-up to our meeting on December 10 on timber wolves, I wish to suggest consideration of the following alternative courses of action:

(1) Wait for federal administrative action.

(a) The situation regarding the status of the timber wolf as we described it may be significantly altered as a result of a statement reportedly made by Assistant Secretary of the Interior Nathaniel Reed to the effect that he would declassify the timber wolf very soon. If this happens there may be an administrative ruling favoring our position. If not favorable, we can appeal. We expect that environmental groups will appeal but we would, of course, support the federal decision if it is favorable.

We are in favor of total declassification. If completely declassified, all management would revert back to the state. We do not know at this time what the rules and regulations would be under the threatened category.

(b) If Assistant Secretary Reed does not follow through, Regional Director Jack Hemphill plans to submit the Recovery Plan for the Eastern Timber Wolf and his socio-economic report and recommendations to Washington by late February and formal action to reclassify or declassify the timber wolf should follow.

(c) If neither of these actions happen, we can bring a mandamus action in federal court to compel the Department of Interior to make a decision.

(2) Initiate a suit against the Secretary of Interior seeking declaratory and injunctive relief. We believe that this should not be pursued now because of the pending federal action which Secretary Nathaniel Reed announced was imminent.

(3) At our meeting, it was reported that Alaskan (western) wolves have been coming into Minnesota. If our state adopted legislation to authorize the taking of this subspecies, the provision in the Federal Endangered Species Act pertaining to similarity of appearance would very likely be applied by the Federal Government. Therefore, we do not recommend this course of action.

(4) Amend the 1973 Federal Endangered Species Act to change the limitations giving the Secretary of Interior wider latitude and to provide for taking of animals which are a threat to persons, property or species. If we go this route, our Congressional Delegation should be requested to assist and the legislature could memorialize Congress to change the 1973 Act.

We recommend that for now, the first alternative be followed. If this does not produce results by July 1, 1977, our position should be re-evaluated in light of the above alternatives and the situation then existing. Also, we will continue to press our case with the U.S. Fish and Wildlife Service and our Congressional Delegation.

Sincerely,

ROBERT L. HERBST,
Commissioner of Natural Resources.

APPENDIX H

MINNESOTA DEPARTMENT
OF NATURAL RESOURCES,
St. Paul, Minn., March 1, 1976.

Mr. RALPH BAILEY,
Leader, Eastern Timber Wolf Recovery Team, Marquette, Mich.

DEAR MR. BAILEY: Our compliments to the Eastern Timber Wolf Recovery Team for a thorough and well done job in completing a most difficult assignment. It is obvious that many hours of hard work went into the plan.

In general, the Minnesota Department of Natural Resources agrees with the plan. I am especially pleased with the emphasis given to habitat management. Obviously the future of the wolf depends primarily upon the deer herd and the deer herd depends upon good forest management practices.

Following are changes that the Minnesota DNR recommends in the plan.

1. Complete declassification of the wolf in Minnesota.

2. Deletion of the northwestern sanctuary

3. Clarification of chronology regarding habitat management programs, timber wolf control and recommendations to close the deer season.

1. Complete declassification of the timber wolf in Minnesota is recommended. Most biologists agree that the wolf population is not in danger (threatened) in Minnesota. As the plan points out, "wolves have survived for so long in Minnesota despite bounties and year-around hunting and trapping, there may be a question as to why any restrictions need now be placed on the taking of the wolf." It further states "However, future circumstances are unpredictable and those that now exist could change drastically" and goes on to cite "widespread industralization, mineral exploitation and general development".

Although the future is uncertain, the trend in northeastern Minnesota is toward more environmental protection, not less. The very fact that much of the land is in public ownership and under agency protection rules out any significant changes in land use without drastic changes in policy and/or law. If these changes were forthcoming the eastern timber wolf could then be returned to the appropriate list.

Retention on the list because "prudence dictates a conservative approach" is not a valid reason. The credibility of the entire en-

dangered species program will suffer if decisions are made on anything other than biological facts.

The problem of funding to implement the Endangered Species Act must also be considered. Minnesota would, of course welcome a large habitat program but not at the detriment of the many species that are truly endangered or threatened and urgently in need of funding. Considering the charisma of the wolf nationwide and the general misunderstanding the public has regarding its status, it might be difficult to relegate programs for wolf management to second place.

2. The request for deletion of the sanctuary is based on the fact that most of the area adjacent to the sanctuary (including nearby lands in Canada) is a livestock growing area. Raising the present wolf population to 1 per 30 square miles (Mech, page 35) to 1 per 10 square miles as recommended in the plan would greatly intensify depredation on livestock and other domestic animals as well as depress the now stable deer population. Public support will be the key element to a successful wolf management program. The adverse public reaction that would ensue because of the northwest sanctuary and substantially increased depredation problems would hurt the overall cause of the timber wolf in Minnesota.

Let us not forget that the timber wolf is a large and effective carnivore with a high reproductive capability. If the livelihood of our northern residents as well as the deer hunting opportunity of many citizens is jeopardized, the attitude of the majority, now cautiously supportive or at least noncommital, could be pushed into the anti-wolf ranks and 25 years of progress would be lost.

From the management standpoint it is highly questionable that sanctuaries are needed to manage wolves. They were not necessary to the wolf's survival in the past and, with strictly controlled taking, should not be in the future. The concept of refuges is, of course, an old one and is still popular with the public and would be of considerable comfort to many people who fear for the welfare of the wolf. However, the northeastern sanctuary should be adequate in size and location and would not cause the "backlash" against the wolf that the northwestern sanctuary would.

Regarding the northeastern sanctuary consideration should be given to making it inviolate with no taking of wolves allowed. To accomplish this, boundaries should be aligned so that wolf depredation will be insignificant within the sanctuary. If any taking is allowed in the sanctuary, confusion and suspicion could result particularly amongst the concerned public from other states where our control program would be misunderstood.

3. If possible the recovery plan should spell out the chronological order of the habitat development program, the wolf control program and the need to close the deer season. The plan has caused considerable concern in Minnesota because of misinformation released by the press that the major thrust of the plan is to "close the deer season to feed wolves". Obviously a massive habitat program is a prerequisite to the other actions. It also follows that a wolf reduction program may be necessary in areas where they are exterminating their supply of deer. Only if a habitat program and a timber wolf reduction program, for some unforeseen reason, should fail, could the closure of the deer season be considered. Closure of the deer season can only be considered on the basis of the deer population itself and is, of course, a state decision.

The opportunity to present the Minnesota Department of Natural Resources' views on the recovery plan is very much appreciated.

Your truly,

ROBERT HERBST,
Commissioner, Department of Natural Resources.

WATER DEVELOPMENT

Mr. McGOVERN. Mr. President, on March 21 a field team from the President's Water Projects Review Panel held public hearings at the State Capitol in Pierre, S. Dak., on the Oahe irrigation project.

Despite protestations that the review would be objective and realistic, there is a growing feeling in my State that this is not the case. It is difficult to argue for the project when those in the administration who object to it are unwilling or unable to detail the specific elements of the project on which they find fault.

Project proponents are left to argue against vague allegations of adverse environmental impact and a benefit/cost ration that is in a negative balance.

Many South Dakotans who participated in this field hearing came away with the feeling that they were simply going through the motions—and that a decision against the project had already been made.

That view is reflected in an editorial from the March 23 edition of the Rapid City Journal.

I ask unanimous consent that this editorial be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OAHE REVIEW PANEL JUST WENT THROUGH THE MOTIONS

A charade, window dressing, a dog and pony show. Those are some of the terms used to describe Monday's review hearing on the Oahe Irrigation Project.

It was obvious that the five-member review panel which received oral and written testimony from proponents and opponents of the project were just going through the motions. They were carrying out a Jimmy Carter promise that each of the 19 federal water projects on which he has decided to withhold funds would be reviewed.

The manner in which the hearing was conducted and the makeup of the review panel suggests it was held for the same reason many federal agencies hold hearings—because they are required by law or as a gesture of appeasement.

The panel asked few, if any, probing questions as more than seven hours of oral testimony went into the record. That testimony and hundreds of pages of written testimony that was submitted contributed nothing new to the case for or against continued development of the Oahe project.

Sifting through that testimony and that which the same panel received in a similar hearing on the Garrison project in North Dakota on Tuesday will be a monumental, if not impossible, task if the review panel is to deliver its findings a month from now.

We find it particularly disconcerting that a member of the panel, an acting assistant Secretary of Interior, could not say what kind of system would be used to weigh the evidence.

That indicates to us that the administration's position is already set in concrete and Monday's hearing was an exercise in futility, particularly for those who want to see the Oahe project continue.

We also find it strange that even after the hearing concluded the background and qualifications of the review panel, some of whom were appointed as late as last Friday, were unknown even to the congressional representatives or Gov. Richard Kneip. The "going-through-the-motions" attitude that prevailed lends credence to suspicions that the panel was stacked against Oahe.

South Dakota has had a long-standing promise from the federal government for assistance in developing water resources in return for the half-million acres of Missouri River bottomland taken for four dams in the state—dams which provide flood control for states downstream and hydroelectric power for export to other states. In fulfillment of that promise, years of planning and study have gone into the Oahe project. We recognize some of those plans can and should be modified to correct financial, social and environmental impacts. Those changes can be made without scuttling the project.

But stopping Oahe irrigation to carry out a campaign promise to reduce spending and then seeking to justify the action with a predetermined judgment by a third-string review panel is demeaning to the office of the President of the United States.

THE WORLD WAR II WOMEN'S AIR FORCES SERVICES PILOTS

Mr. HATHAWAY. Mr. President, there are between 850 and 900 women who flew with the Army-Air Corps during World War II in the Women's Air Forces Service Pilots, WASP, and who would benefit from this bill, S. 247, introduced by my distinguished colleague from Arizona, Senator GOLDWATER.

These women ferried and tested aircraft and trained other pilots to relieve their male counterparts for combat.

They flew 60 million miles altogether.

WASP was a test program initiated by Gen. "Hap" Arnold. At the time, it was supposed to become a permanent part of the military services if successful. And it was successful. But male civilian pilots objected to bringing the women pilots into the military service.

The women fully expected to be commissioned after the completion of the test program. A bill seeking to militarize the WASP was sent to the Congress during the war and was narrowly defeated in the House.

An amendment offered by Senator GOLDWATER last fall to provide VA benefits to the WASP passed the Senate but was rejected by the House.

The WASP were military in every sense during their service. They were paid at the rate of second lieutenants. They wore uniforms and lived on military reservations and were subject to military discipline. They did not enjoy the benefits of hospitalization, health or life insurance, or death benefits. Thirty-eight women died in service.

S. 247 would cost $90,000 a year to provide VA benefits. There are no retroactive provisions. The bill extends to the women the benefits to which they would have been entitled, if the promise of commissioning during the war had been fulfilled.

I am pleased to join in cosponsoring

this measure and I urge its speedy passage.

ENERGY ACTION NO. 11: CRUDE OIL PRICE CEILINGS

Mr. JACKSON. Mr. President, today is the last day of the statutory review period for the President's proposal, transmitted by the Federal Energy Administration on March 15, to continue the present 10-percent rate of escalation in the ceiling price for the composite of all domestic crude oil production. Documents supporting the President's proposal were printed in the RECORD of March 17 at page 7956.

If this proposal becomes effective, 10 percent will be the minimum rate of increase in domestic crude oil costs which will prevail over the next 2 years. The President will have the opportunity to raise prices faster through several mechanisms, some of which are not subject to congressional review. Only an act of Congress can establish a lower rate.

I have strong reservations about energy action No. 11. I am deeply concerned about the crude oil cost inflation to which U.S. consumers may be subjected later this year. By setting a minimum rate of increase in crude oil prices now we are locking in an important feature of the national energy pricing policy without a chance to look at all the facts. We are enacting a pricing policy on a piecemeal basis, when within a very few weeks we will have a much clearer picture of the available options and the impacts of these options.

Briefly, the background with respect to this proposal is as follows:

In energy action No. 11, the Congress is being asked to permit the establishment of a lower limit of 10 percent on the rate of increase in the ceiling price for the composite of domestic crude oil production. If the President's proposal becomes effective, this rate of increase will prevail until May 1979 and can only be lowered by an act of Congress. On the other hand, whether the current proposal is rejected or not, the President may in the future propose further acceleration of the rate of increase of crude oil prices.

Significant uncertainties with respect to the impact of the President's policy for crude oil prices now exist. However, many of these uncertainties will be clarified within the next month because of statutory requirements and also because the President has promised to present his energy program on April 20.

The present uncertainties in the domestic crude oil pricing situation involve:

Deficiencies in the ability of FEA to monitor and enforce crude oil price ceilings and the present freeze on upper and lower tier prices;

The impact of the price policy adopted for Alaskan production on the domestic average composite price; and

The crude oil pricing provisions of the President's April 20 energy proposal.

THE CRUDE OIL PRICE FREEZE

At the time the Energy Policy and Conservation Act—EPCA, Public Law 94-163—was enacted the FEA had only a very rough idea of the prices and volumes of domestic crude oil production which actually characterized first sale transactions. FEA's estimates of these parameters made at the inception of the EPCA program proved to be significantly in error.

Average "new" oil prices were actually higher than FEA thought, "old" oil prices were slightly lower than expected and the proportion of "new" oil in the domestic composite was higher than estimates made by FEA as the act was implemented. As a result of these incorrect estimates—and also perhaps because of less than complete compliance by producers in the field—the actual domestic composite average price exceeded the statutory price for the first several months of the program.

In response to this, FEA instituted a freeze on upper and lower tier prices in June 1976, in hopes that if actual prices remained fixed, the statutory composite would "catch up" to the actual composite. This has not been the case.

Matters were made worse when FEA promulgated and made effective in September 1976 a revision in its definition of a crude oil producing property. This clarification of the definition resulted in a significant shift in volumes of oil from lower to upper tier categories. As a result, domestic crude oil producers as a whole moved further out of compliance with the law.

In an attempt to correct this, FEA has continued the freeze instituted in June 1976, and twice rolled back the price of upper tier oil, first by 20 cents per barrel and most recently by 45 cents per barrel. FEA maintains that these actions will result in under recovery between now and July 1977, by the industry which will compensate for the over recovery which took place when the domestic average composite price was above the statutory ceiling.

FEA further maintains that rejection of energy action No. 11 will exacerbate the agency's problems with crude oil producer noncompliance. However, because domestic producers face the freeze in any event and further rollbacks not required by law, rejection of the energy action need actually have no effect at all on prices presently being received.

THE IMPACT OF ALASKAN OIL

On April 15, 1977, the President is required by EPCA to submit a report to the Congress on the pricing of crude oil to be produced on the North Slope and shipped through the Trans-Alaska Pipeline. This report will begin the debate on the establishment of policy governing both the pricing and disposition of Alaskan oil.

The transportation of this oil to domestic refineries will involve unprecedented costs. Depending on various decisions with respect to the destination of the oil, costs of from $6 to $8 per barrel could be absorbed in pipeline tariffs and shipping charges. In addition, the price actually paid by U.S. refineries for Alaskan oil will be influenced by the treatment of the oil in the FEA crude oil entitlements program and by the reaction of the market to the surplus of oil of quality similar to Alaskan oil which will prevail in important domestic refining centers. These additional uncertainties could reduce Alaskan wellhead prices by another $1 to $2 per barrel.

Thus, when the 600,000 b/d of initial Alaskan production begins flowing this summer—moving up to 1.2 million b/d by the end of the year—a substantial volume of crude oil will be added to the domestic average composite at relatively low wellhead prices. These prices could be as low as $5 per barrel or as high as $7 or $8 per barrel. In any case the "first sale" price of Alaskan oil for statutory purposes will almost certainly be below the average price of non-Alaskan domestic crude oil production.

The addition of significant volumes of oil to the composite at prices below the statutory ceiling for the average will grant FEA flexibility—potentially a very large amount of flexibility—to raise ceiling prices for domestic oil produced outside Alaska. The lower wellhead prices for oil produced on Alaska's North Slope can be balanced by higher wellhead prices for oil produced in Texas, Louisiana, and elsewhere in the Lower 48 States. This increased flexibility may well permit crude oil price increases to U.S. consumers which are at least as significant as the increases sought by FEA in energy action No. 11. The "incentive" associated with the increases made possible by the inclusion of Alaskan oil in the composite may well exceed the "production incentive" at issue in the energy action proposal.

For example, continuation of the 10-percent rate of increase in the composite would give the FEA approximately $2.2 billion in additional revenues to distribute to domestic crude oil producers over the next 2 years relative to the flexibility available if the allowed rate of increase is only 5.5 percent per year—5.5 percent is FEA's forecasted inflation rate. If Alaskan oil is included in the composite at a first sale price of $6 per barrel—a not unlikely figure—the FEA would be able to distribute extra revenues of approximately $2.5 billion to producers in the lower 48 States in the form of higher prices over the period between start up of production in Alaska and the termination of price control authority in May 1979. This would, in effect, double the production incentive of energy action No. 11. If the wellhead price of Alaskan oil is lower these producer benefits would increase still further.

THE PRESIDENT'S APRIL 20 ENERGY MESSAGE

President Carter has promised to send a comprehensive energy policy proposal to the Congress on April 20, 1977. This proposal will, of course, deal with many features of the energy situation. It may also deal with crude oil pricing. Press reports indicate that proposed amendments to the present crude oil price policy are definitely among the options under consideration for inclusion in the President's message.

A second option available under present law would permit the President to propose at 90-day intervals—and subject to congressional review—higher rates of increase in the composite. The

President could announce his intention to utilize this authority at some later date in the April 20 message.

The present uncertainty with respect to the President's intentions concerning crude oil pricing policy makes evaluation of the need for continuation of the full 10 percent rate of escalation all the more difficult.

In view of these concerns, I asked FEA Administrator O'Leary to withdraw energy action No. 11. In addition, last week I introduced Senate Resolution 125, which, if adopted by the Senate, would disapprove the energy action.

The FEA has indicated that they will not withdraw this energy action. Instead they have submitted a clarification of the terms and conditions under which the pricing flexibility being made available to the administration will be used. Mr. President, I ask unanimous consent that the texts of my letter of March 28 to Administrator O'Leary, his reply of March 29, and the clarification to energy action No. 11 be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE, COMMITTEE ON ENERGY AND NATURAL RESOURCES,
Washington, D.C., March 28, 1977.

Hon. JOHN F. O'LEARY,
Administrator, Federal Energy Administration, Washington, D.C.

DEAR MR. O'LEARY: On March 15 you sent energy action numbered 11 to the Congress. This proposal would establish a minimum 10 percent rate of escalation in the ceiling price for the domestic crude oil composite for the next two years. If such a proposal were not submitted, the provisions of section 8 of the Emergency Petroleum Allocation Act of 1973, as amended, provide that the permissible rate of escalation in this ceiling would automatically be set at the level of general inflation. Section 8 further authorizes the President at a later date to propose an increase in this rate of escalation.

I respectfully ask that you withdraw energy action numbered 11. I believe very strongly that the Congress should have an opportunity to review crude oil pricing policy options with the most complete available knowledge of the relevant components of this issue. Several key elements of our near-term crude oil pricing policy, not available now, will be available within the next few weeks.

The uncertainty which the Congress faces because of unknown factors with respect to crude oil pricing is relatively great now. By the end of April, much more information will be available concerning the Administration's intentions with respect to the pricing of the substantial volumes of oil to be produced on the North Slope of Alaska later this year. We will have the President's April 20 energy message available, including his proposals concerning pricing of crude oil and refined petroleum products. We will know what the President recommends with respect to energy taxes and use of the authority available under current law to further increase the rate of escalation in domestic crude oil prices.

I feel strongly that decision-making in the critical area of energy pricing should be made on a comprehensive basis with access to the fullest possible range of relevant information. If energy action numbered 11 becomes effective, it will establish a minimum rate of escalation for domestic crude oil prices. The President may later propose to increase this rate further. Only an Act of Congress may lower it. I believe an issue of this importance should be a part of the debate which will begin after April 20. It should not be locked in before that time.

In summary, I believe that there are compelling reasons to defer the debate on the rate at which domestic crude oil prices may escalate for at least a month. This can be most efficiently accomplished by the withdrawal of energy action numbered 11. Ample opportunity exists to evolve a comprehensive crude oil policy utilizing the provisions of existing law once all the relevant energy proposals of the Administration are available.

I urge your immediate attention to this question.

Sincerely yours,

HENRY M. JACKSON,
Chairman.

FEDERAL ENERGY ADMINISTRATION,
Washington, D.C., March 29, 1977.

Hon. HENRY M. JACKSON,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Thank you for your thoughtful letter of March 28 concerning Energy Action No. 11. I appreciate the concern you have expressed over Energy Action No. 11 becoming effective without Congress having a better understanding of the pricing framework under which it would be applied. I share your concern that any added pricing flexibility which may result from Alaskan oil production not be applied indiscriminately so as to increase producer revenues beyond what was intended when the Energy Policy and Conservation Act of 1975 was enacted.

You have raised several serious questions and issues. I believe, however, that in view of the recent roll-back in crude oil prices, it would not be in the best interests of maintaining domestic oil production to incur the further reductions in ceiling prices which could result from withdrawal or disapproval of Energy Action No. 11. The Administration must address itself to the concerns that you and other members of Congress have expressed with regard to future oil pricing policy prior to the time that Energy Action No. 11 becomes effective.

The enclosed letter has, therefore, been forwarded to Vice President Mondale and Speaker O'Neill as a clarification to Energy Action No. 11. It outlines the Administration's intent and commitment with regard to the current crude oil pricing tiers through May 1979. This letter makes it clear that the Administration will not use any of the flexibility which may result from the combined effects of Energy Action No. 11 and Alaskan oil production for increasing either the current lower or upper tier categories of oil at a rate faster than the rate of inflation.

I hope you will share with me the view that the enclosed letter adequately addresses your concerns, while enabling the Congress and the Administration to work together to avoid the further disincentives which could result if Energy Action No. 11 is disapproved and the nation becomes involved in a lengthy debate over the future of national energy policy.

I look forward to working with you on the entire range of energy questions in the weeks and months ahead.

Sincerely,

JOHN F. O'LEARY,
Administrator.

FEDERAL ENERGY ADMINISTRATION,
Washington, D.C., March 29, 1977.

Hon. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: This letter is a clarification of the explanatory materials accompanying Energy Action No. 11.

Energy Action No. 11 recommends continuation of a production incentive adjustment to the maximum weighted average first sale price (the legal composite price) for domestic crude oil. This adjustment as a production incentive, when combined with the inflation adjustment as measured by the adjusted GNP deflator, results in a 10% annual increase in the legal composite price.

The Federal Energy Administration is preparing a report, for submission to the Congress in April, on whether the crude oil price regulations will provide positive incentives for the development of North Slope Alaskan crude oil production without lessening needed incentives for sustaining or enhancing crude oil production in the remainder of the United States. Preliminary data indicate it is likely that the transportation costs for North Slope crude oil will be at a level which will produce wellhead prices for such oil which will be less than the legal composite price. One consequence of this circumstance is that greater flexibility will be afforded to increase prices for other domestic crude oil. Depending upon a number of factors, including the Trans-Alaskan oil pipeline tariffs, the degree of potential pricing flexibility which will be afforded by inclusion of North Slope crude oil prices in the computation of the actual composite price varies substantially. There is the possibility that inclusion of North Slope crude oil prices in the computation of the actual composite price will afford flexibility to increase prices for other domestic crude oil in excess of the 10% per year rate of increase which is currently applicable to domestic crude oil prices and which Energy Action No. 11 proposes to continue. This is obviously a consideration which the House and Senate should evaluate before permitting Energy Action No. 11 to be implemented.

In response to the concerns which have been raised regarding the potential for crude oil price increases which may be afforded by the still uncertain pricing of North Slope crude oil, I wish to clarify Energy Action No. 11 by indicating the manner in which the Federal Energy Administration intends to use any increased pricing flexibility which may result from inclusion of North Slope crude oil prices in the calculation of the actual crude oil composite price.

It is the Administration's view that the crude oil price regulations applicable to crude oil now being produced should, through May of 1979, limit receipts by producers on the average to $5.05 per barrel of lower tier crude oil and $11.28 per barrel of upper tier crude oil in February 1976 real dollars. Thus, prices to producers for crude oil under existing lower tier and upper tier categories will not increase faster than the rate of inflation, as measured by the adjusted GNP deflator, even if the legal composite price would permit greater price increases. The Administration will include in the President's April 20 energy message proposed regulations, and any legislation which may be necessary to implement these policies with respect to lower tier and upper tier crude oil. It should be understood that this commitment respecting the level of crude oil producer receipts does not deal with other aspects of the April 20 energy message which may affect prices of petroleum products.

Any pricing flexibility that remains after adjusting lower tier and upper tier crude oil prices for existing domestic production by not more than the rate of inflation, as measured by the adjusted GNP deflator, will be used to address matters of high priority as determined by existing law, such as adjustments for gravity differentials and incentives for application of enhanced recovery techniques, or to produce incentives for domestic production from new fields. In addition, there may be other categories of high cost or high risk crude oil production with

respect to which additional price incentives would be appropriate. Such incentives would be provided, however, only after consultation with jurisdictional Committees of the House and Senate. The FEA would, of course, continue to grant relief from the crude oil price regulations on a case-by-case basis through the exceptions process.

I trust that the foregoing is responsive to Congressional concerns regarding the relationship to Energy Action No. 11 of the potential for crude oil price increases produced by the manner of pricing of Alaskan North Slope crude oil.

Sincerely,

JOHN F. O'LEARY,
Administrator.

Mr. JACKSON. Mr. President, I want to emphasize the view—which I continue to hold—that the best solution to this problem is withdrawal of energy action No. 11. FEA's clarification is not, in my opinion, an adequate response; it does not resolve my problems with the current proposal:

The clarification has no force in law.

We still do not know what crude oil pricing proposals the President will make on April 20.

We still do not know what the policy will be—or the impact of that policy—with respect to Alaskan oil.

Despite these concerns, I do not believe that anything useful will be accomplished by seeking a Senate vote on Senate Resolution 125, disapproving the energy action. This administration needs to work with, and not against, the Congress if a workable national energy policy is to be enacted.

The responsible way to develop such a policy is to lay out all the options, to assess them and to permit a full and open dialog on the issues. With respect to the critical issue of crude oil pricing, this is not the procedure this administration has chosen, and I am disappointed in them for it. I hope this episode does not indicate the manner in which future energy policy initiatives will be presented to the Congress.

ENERGY POLICY

Mr. JAVITS. Mr. President, last week I attended a breakfast at which Charles Luce, the chairman of the Board of Consolidated Edison, the largest utility in the Nation, made a comprehensive and thoughtful statement on the energy reorganization plan and energy policy.

Mr. Luce made the point that while the energy reorganization plan includes all of the direct energy functions of the Federal Government, it leaves out the related safety and environmental decisions that impact fundamentally on energy policy. These functions are left within the Nuclear Regulatory Commission, the Environmental Protection Agency, and the Interior Department. Although there may be certain overriding reasons for not including these functions in the new energy department, there must be strong liason and policy interface that permits all Federal decisionmaking on energy to reflect common goals.

Mr. Luce argues for the establishment of national production and conservation goals, and specific goals in each of the major producing sectors.

There are many other important points in this speech which I commend to the committee's attention. Among them are the absolute need to cut consumption drastically in the automobile sector; vastly to increase our use of coal; and to establish mandatory appliance efficiency standards. I hope the President considers these recommendations as he prepares his energy policy.

I ask unanimous consent that the remarks of Charles F. Luce be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF CHARLES F. LUCE, CHAIRMAN OF THE BOARD, CONSOLIDATED EDISON COMPANY OF NEW YORK, INC.

Today I will talk principally about legislation before the Congress which would reorganize the executive branch with respect to energy, and about the comprehensive statement of proposed national energy policy that President Carter plans to announce on April 20. I will do so from the perspective not only of chief executive of a large urban utility, but also from that of a former administrator of a large federal power agency and former Undersecretary of the Department of Interior. I will not talk that much about Con Edison, whose performance has greatly improved, although I would be pleased to answer questions about our operations.

ENERGY CRISIS—THE EARLY WARNINGS

Let me, then, discuss the energy program that the Congress is about to consider and enact. Our nation has had two dramatic early warnings that have told us how serious the energy problem is: first the oil embargo of 1973–1974, and then the natural gas crisis of this last winter which caused many schools to close for weeks at a time, and hundreds of thousands of men and women to lose work.

Last year there occurred a third and silent warning that may be even more ominous than the gas crisis. In 1976 energy usage in the United States rose about 4½ percent. Electric usage nationwide went up more than 6 percent. There probably is some "catch up" in these growth rates because of the "slow down" after the oil embargo and the economic adjustments that followed. Nevertheless they are serious signals because the economy was not all that healthy in 1976. There was still a high level of unemployment.

In the two years following the oil embargo, energy usage in the United States declined. But now it is trending upward again. And the upward trend began in a year which was not a boom year as far as the economy is concerned.

So we have had these two dramatic warnings of an impending energy crisis and a silent one which is a more subtle indication that problems lie ahead.

Yet from the time the oil embargo was imposed, we have done virtually nothing to reduce energy consumption. Large, heavy automobiles are selling very well; smaller more efficient automobiles are not selling well. Oil imports have gone from 30 to 40 percent of our total oil usage, but we have not opened the Atlantic shelf to oil and gas development, nor begun large-scale synthetic fuels-from-coal projects. And this has been during a period when our stated national policy—Project Independence—was to reduce our dependence on OPEC countries!

More significantly perhaps, or at least just as significantly, the foreign exchange required to pay for oil imports has risen from 2 billion dollars in 1972 just before the oil embargo to more than 30 billion dollars in 1976. We are buying oil, and paying for it in large part with huge arms exports. I suggest this as another important reason we need a strong domestic energy program that will cut down oil imports.

THE PRESIDENT AND CONGRESS ADDRESS THE PROBLEM

As you know, the President is addressing the energy problem in two stages: first organizationally and second programatically. First he has sent up his organizational bill. Our Company has great interest in the bill for a variety of reasons. For one, our Company depends so heavily on oil—especially imported oil—to keep the lights on in New York City and Westchester. Beyond that, we are interested in what the bill might change in regard to the licensing procedures that we and the other utilities have to follow to build new plants.

We think the President's energy reorganization bill is a good start and generally we support it. It establishes a Department of Energy which concentrates in four agencies responsibility for energy matters now spread among 15 or 20 agencies. These four agencies are the Energy Department, the Interior Department, the Nuclear Regulatory Commission, and the Environmental Protection Agency.

Let me make some general comments about the bill. By no means does the bill create a strong Energy Department. I assume that it creates as strong an Energy Department as the President believes the Congress would approve. But the fact is that the head of the Energy Department will be powerless to assure that domestic energy resources are tapped, or new energy facilities built, unless the Interior Department, the EPA, and, in the case of nuclear facilities, the NRC concur in his decisions.

Thus the proposed reorganization bill leaves with the Interior Department an essential aspect of an effective energy program: the administration of public lands with regard to leasing for energy development. It is essential because most of our undeveloped domestic energy probably lies beneath public lands, and most of such lands are administered by the Interior Department.

Nor would the head of the new Energy Department have the authority to implement his decisions on what is needed in the way of new nuclear plants. Let us assume that the new head of the Energy Department in implementing the President's policy concludes that by 2000 we need 450 more nuclear plants. Under the proposed structure, the NRC is not included in the new energy agency. Other than to express a hope, there is not much that the Secretary of Energy can do except wait to see what the NRC, not responsible to him, decides it is going to license and permit to be built.

Similarly, the fourth agency—the EPA—which is looking at all of these energy decisions from an environmental standpoint, still retains the authority to veto or slow up substantially most of the major energy programs that the Energy Department would undertake.

So it seems to me that this bill, while a step in the right direction, does not really give the cabinet officer—the Secretary for Energy—the power to put an energy program across unless he has strong and continual support from the President, who may be too busy to provide it. If the Secretary of the Interior decides that for grazing or recreational reasons or other "non-energy" reasons, a certain tract of coal should not be mined, he does not have to sign the lease. All the Energy Secretary can do is request that the Interior Secretary sign it. If he refuses, they must both go over to the White House to get the President to resolve the dispute. The Energy head probably should take with him the EPA head as well because he will have to pass on the environmental impact of the lease, and set impact standards that control mining, transport, and use of

the coal. If the lease involves uranium, he should also take with him the Chairman of NRC. The potential difficulty inherent in such a structure is staggering because it is estimated that Interior handles some 300–400 energy leases per year.

Even if the President finds the time to settle the lease dispute, and brings the four agency heads together, the courts will still review their decision. We can predict a time lag of one, two, or three years for this court review. In the case of a project that we are all too familiar with, the Cornwall (Storm King) project, it is now 12 years that the Federal Power Commission's license to construct has been in the courts. So far as I can tell, the energy reorganization bill now before the Congress does nothing to reduce the scope of judicial review of executive energy decisions and the consequent inevitable delay in carrying out those decisions.

There are some other problems with the bill. I am most concerned that the Energy Secretary does not have the sole power to determine the need for a given project. If the Energy Secretary could settle the question of whether a given project—coal or nuclear or any other type—is required in the national interest, it would expedite the licensing processes considerably. There would be a great advantage if the Secretary of Energy could say to the licensing agencies—EPA or NRC or the proposed Independent Appeals Board—the following: "Now in a certain region we need so many new kilowatts of generating capacity. That is the need which I have determined in a national survey. You can and should look at the other things that you are supposed to look at in setting the license conditions for the proposed project, but the need for the project has been determined."

Today we spend so much time in the process of getting a new power plant licensed just arguing over whether or not the plant is needed. Is conservation a better answer? Should it be coal-fired instead of nuclear? Or solar power? If we are going to have a national energy policy that will get the job done, we must have a cabinet officer responsible to the President who can set goals and determine needs and then let the regulatory bodies take it from there on such issues as safety.

As I read it, the bill doesn't give the Energy Secretary authority to set conservation and production goals that are binding on the several regulatory bodies. Until such authority is clearly in the bill, I fail to understand the relationship of the Independent Appeals Board and NRC to the new agency, and I do not see the advantages of merging the FPC into the new Energy Department.

THE PRESIDENT'S SUBSTANTIVE ENERGY PROGRAM

Only in very broad outline have we heard about the substantive energy program that the Administration is going to send to the Congress. It is said that the program will call for conservation and coal to meet as much as possible of the growth in energy needs. and that nuclear generation will fill the "gap." This is for the remaining years in this century. It also will call for concentration on research to develop alternate, more exotic means of producing energy that could be productive in the next century.

What will the role of conservation be in the nation's energy future? To begin, I'd like to cite a statistic or two on gasoline. It is important because oil is the nation's principal energy source (47 percent), and gasoline consumption is the key to oil conservation.

If by 1985 the average gas mileage achieved by the American car could be lifted from the present 14½ to 19 to 20 miles per gallon, we would save the equivalent of about 25 percent of the oil imported in 1976. If we insulated every house in the United States to acceptable standards we would save about 8 percent, or only about ⅓ of the saving from smaller cars. We would do the insulation too, of course. But the point is that the really big savings are in transportation and the automobile. Unless we are willing to attack that, the talk about conservation as an important element of our energy program is going to be just talk.

If we are really serious about solving our energy crisis through conservation, I believe that conservation is going to be the toughest political aspect of the whole program. The litmus test of whether we are serious about energy conservation is the passenger automobile. Look at the immediate reaction when someone, I presume at the White House, recently floated the idea of a 25c-a-gallon gasoline tax. Congressional comment immediately was negative. No one got up and said that if we are serious about conservation, we have to give people a price incentive not to buy or use big cars, or to drive them at high speeds. The idea of increasing the gas tax by a modest amount (if one considers the gasoline taxes imposed by other countries) was disavowed by the President within 24 hours after the trial balloon went up. The already mandated improvement in miles-per-gallon performance will of course by 1985 reduce gasoline consumption in new cars by about 40 percent. However, increased gasoline taxes are also necessary in order to reduce gasoline usage by cars already on the road. The potential for energy saving by vehicles—which now use 40 percent of all the petroleum products used in this country—is so great that it is a saving that should be approached from two directions: raising the price of gasoline (with appropriate tax relief to relieve unavoidable economic hardship), and improving the efficiency of new automobiles.

Similarly in the case of prices of natural gas and oil. We now have a price control system that is an incentive to usage—not an incentive to conservation at all. For elected officials to say that we will let the marketplace fix the gas price and oil price is politically very difficult, indeed up to now seemingly impossible. And yet that is what is required to get prices up to the point where consumers will conserve. We need a combination of taxes and market forces to achieve higher prices, and give the public an incentive to conserve gasoline and natural gas. We must at the same time have tax laws to be sure that windfall profits are not reaped by producers and distributors at the expense of the consumer. But we can do that, too. We did it during World War II.

The result of all this would be higher consumer prices to achieve conservation. It will work, but it is politically very difficult. I think it is going to be more difficult, politically, than building new power plants. But I think we have to do it.

I would hope that the Congress also would address legislation establishing mandatory efficiency for appliances. In the course of time, it would make a big difference in New York City and Westchester, as far as Con Edison's summer peak requirements are concerned, if only the most efficient air conditioners that can be built were allowed to be sold. Manufacturers of appliances say that as long as any manufacturer can build a cheap, inefficient model, many people are going to buy the cheap one. This is so even though it is more costly in the long run—even though over the life of the air conditioner it would cost the purchaser more because of its higher electric consumption than if he put his money into the more expensive efficient cooler. Consequently, the way to achieve reduction in energy usage of air conditioners is to not allow any inefficient ones to be sold. This is also a problem politically, but I think that, like higher gasoline prices, it is something the Congress should require. I hope that the President will come out with meaningful proposals in these areas.

Where does coal stand in the nation's energy plans? We are going to need a lot of coal regardless whether we expand nuclear power. If we give up the nuclear option, we are going to require an enormous amount of coal. Here is some idea of the dimension of the problem. According to the head of the Electric Power Research Institute, Dr. Chauncey Starr, if we can hold gas and oil consumption to where it is now (in total, oil and gas now provide 75 percent of all energy in this country), and in addition reduce energy consumption by 20 percent through conservation, we will need to increase coal and nuclear production by six times by the year 2000 to meet the demand. Let me remind you that the year 2000 from a planning standpoint is very close. If we keep the nuclear option open, by 1990 which is what we are planning for now, we are going to need to double coal production. If we don't, we will have to triple coal production by 1990. That means many more new mines, coal trains, and trackage, and it means reexamining the sulfur environmental requirements for burning coal.

If we expand coal as much as can be reasonably expected, and factor in 20 percent conservation in total energy use, by the year 2000 we will still need about 450 additional thousand-megawatt nuclear plants to fill the "gap" that the President's energy program may assign to nuclear power. We are just kidding ourselves if we think that we can do all this with coal.

I'm aware of the great concern about nuclear waste. Those of you who follow this closely know that the nuclear waste problem is on our doorstep, and has been there for 30 years. It was put there by the nuclear weapons program. Approximately 99 percent of the nuclear waste which presents us with the problem today is not the result of commercial power reactors. It is the result of making atomic weapons and the nuclear Navy. Even if we proceed to build the additional nuclear plants I have indicated would be required by the year 2000, more than 80 percent of the waste that exists in that year will be military waste. It would not be the result of commercial production of electricity. The point here is that we have to solve the problem regardless of whether we keep the nuclear option.

Fortunately, nuclear waste disposal is technically solvable. It is politically very, very difficult. State after state is objecting to having the nuclear waste stored within its boundaries. But technically this waste can be solidified and can be placed under or above ground in a safe manner.

We did a little calculation as to what the increase in predictable deaths in coal mines would be if we forgot about nuclear power and filled the so-called "gap" with coal. If you assume the mine safety record is going to continue to improve quite substantially, and that the fatality rate in coal mines will decline from the last ten-year average of 0.3 to 0.2 per million tons, filling the gap with more coal would result in about 1,000 more men being killed in mines in the next 15 years.

The point is that there is no absolutely safe way to produce the energy this country requires, any more than we can have a transportation system without injuries and deaths. My own judgment is that if you look at energy production from a safety or environmental standpoint, nuclear will turn out to be both safer and environmentally preferable. In the final analysis, our national economy and domestic security will need both coal and nuclear energy. So perhaps the question of choice is really moot.

SOME PROPOSALS FOR OUR NATIONAL ENERGY PROGRAM

Finally a few observations on what I think must be done to put into operation a successful program for national energy.

First, we must establish national production goals and conservation goals all can agree on, or at least can achieve consensus on. We must decide what we can do in the way of conservation and subtract that figure from production requirements. The net will then become the nation's production goal. That goal should then be translated into specifics: coal, new oil, new gas, synthetic fuels, uranium, etc. on year-by-year timetables.

We must achieve these goals as we did in World War II. In tough conservation and energy production programs, we must duplicate the effort that went into the rubber program, the aluminum program, the aircraft program, and other programs that were necessary to defend our nation after Pearl Harbor.

In addition to setting specific national conservation and production goals, the Energy Department must ultimately be given more authority to achieve those goals than it is given in the present bill. In particular, whoever is making the energy decisions must have the authority to make the environmental decisions as well; also the price policy decisions that are so vital to both production and conservation. You can't have the environmental decision being made by somebody who has no responsibility for the energy program. It just won't work. This doesn't mean that environmental or safety considerations should be thrown out the window or ignored. A Secretary of Energy, or a Secretary of the Department of Resources and Energy (which I think would even make more sense), could and must do the environmental balancing and weighing. You can't have one scale weighing environment and another scale weighing energy needs. You will never achieve a balance. You must have one scale—and one scale-master, if you will.

There are ways to review whether the Energy Secretary is doing a good job on both energy development and environmental protection. Certainly Congress has ways to do it. Authorities have to be granted. Appropriations have to be made. And oversight hearings are always available. There is, further, always the power of the President who can see that the national interest is focused on conservation of energy, and on environmental goals, as well as on energy production goals.

In addition to giving one presidentially appointed cabinet officer the power to do this balancing, we are going to have to limit judicial review to questions of Constitutional due process and statutory authority. We can't accomplish an energy program if after an administrative agency examines all questions, and the President confirms its decision, we then move to a federal district court where much of the procedure is duplicated, and then go to the Circuit Court of Appeals and review the entire decision a third time. The result is delay and more delay. The man to whom the President is looking for an energy program will be defeated by this repetitious and unnecessary review. More seriously, the national interest will be diffused and defeated. It simply isn't necessary to give everyone a second and a third day in court when they already had their say before the administrative agencies.

The oil embargo of three years ago—as crippling and traumatic as it was to our entire nation—was not enough to get us moving on the hard decisions that are essential to a sane and realistic national energy program. As spring approaches, there may likewise be a tendency to forget the suffering caused by the severe natural gas shortages of this past winter, and to ignore the sharp climb in last year's energy consumption.

We must fight this tendency. We must finally begin to take those steps that will free our nation's energy supplies from the twin vagaries of international politics and weather. Three warnings should be enough.

GAS SERVICE CUTOFFS IN OHIO

Mr. METZENBAUM. Mr. President, Ohio has had a very rough winter. Now with spring finally coming some of my people are faced with an added burden to the ravages of winter. On April 4 thousands face the cutoff by the utilities of gas and electric service for nonpayment of unprecedented bills.

While this is a State matter, I want the Senate to recognize the devastating problems these people face. Many of them are on public assistance and simply cannot eke out their moneys to cover the staggering bills from a long, hard winter.

I ask unanimous consent that a Post story of March 28 detailing the problem be printed in the RECORD for the information of the Senate.

There being no objection, the story was ordered to be printed in the RECORD, as follows:

GAS SERVICE CUTOFFS MAY BE MADE FRIDAY

(By Nancye Moncrief)

The next person who rings your door bell may be a Cincinnati Gas & Electric Co. employe reminding you that you owe money to the utility company.

Unless you pay up, or make arrangements to pay, you may have a chillier reminder Friday—your service will be stopped.

CG&E employes, on Saturday, went to the homes of customers who owe the company more than $300 in past due gas and electric bills.

This week, they'll visit the homes of all customers who owe less than $300.

CG&E officials refused to disclose exactly how many homes will be visited or how many outstanding bills the company has, saying the number fluctuates daily.

Bruce Stoecklin, assistant news supervisor, said "several thousand customers" were visited Saturday. If no one was home, Stoecklin said, the company representative left a notice.

All persons contacted must make arrangements through CG&E's credit office to pay the entire bill within five working days or make arrangements to pay the bills over a period of time—up to six months.

If customers refuse to comply, Stoecklin said, the company will begin disconnecting service Friday.

Stoecklin said delinquent customers received at least one mailed reminder (with monthly bills) before company representatives were sent.

"The unusual thing about this is that the PUCO (Public Utilities Commission of Ohio) ordered that no gas utility could cut off service until after March 31," said Stoecklin.

"Although the order did not include electric service, we extended the policy to include electric customers as well."

Stoecklin said the same policy was used in Northern Kentucky.

Delinquent customers are being asked to pay the entire overdue bill immediately. If they can't, Stocklin said the credit department and the customer will make "agreeable arrangements" to pay the bill over several months.

"The repayment will be extended over no more than six months," Stocklin said, "because then we'll be starting into the heating season again and the same problems would start to recur."

There is no interest charge other than the first month's overdue charge—the difference between the net and gross amount of the bill. The gross amount represents a five per cent increase over the net amount.

Because of the extremely cold winter and a 25 per cent increase in the price of gas that went into effect last fall, CG&E officials estimated that this year's gas bills would be double what they were last year.

If the company disconnects gas and electric service, customers will be required to pay the entire bill before service is reinstated. There will also be a $6 reconnection charge for gas and electric service. And if the customer does not have a security deposit on file, he will have to make a deposit. The amount is based on a PUCO formula of ¼ plus 30 per cent of ¼ of the annual fuel consumption.

Seth Staples, Hamilton County Welfare Department director, said the department is starting to receive calls from people needing assistance in paying their utility bills.

He said all welfare checks—Aid for Dependent Children or general relief—contain a provision for making the normal payments to the utility companies. Instead of making the regular monthly payments as required, apparently some welfare clients did not pay anything and now face two and three months overdue bills.

He said all clients must talk with CG&E representatives and work out a plan of repayment. He said the department can only extend emergency assistance if the person has received a cutoff notice.

Emergency assistance amounts to no more than 50 per cent of a monthly assistance check, and emergency assistance is only given one time a year to an individual.

He said some people with low incomes may be eligible for emergency assistance.

As long as the people show good faith in working out a repayment plan, their utilities won't be cut off, Staples said.

HARPERS FERRY, W. VA., IS FEATURED BY READER'S DIGEST

Mr. RANDOLPH. Mr. President, Thomas Jefferson loved his native Virginia and, in particular, one of its most picturesque settings, Harpers Ferry, located in what is now West Virginia's Eastern Panhandle. It was in 1944, as a Member of the House of Representatives, that I introduced the legislation which created the Harpers Ferry National Historical Park. It has attracted millions of visitors since its establishment.

The National Park Service took over the operation of the park in 1954 and, since that time, approximately 12.5 million persons have visited this charming and historic area. During our Nation's Bicentennial, about 1,050,000 citizens visited there.

Much is being done to enhance the town's aura of a pre-Civil War period, including the refurbishing of buildings, a replica of John Brown's Fort, a lovely old hotel, the Hillside House, which overlooks the historic downtown area and the beautiful Potomac and Shenandoah Rivers.

Thomas Jefferson was impressed with the beauty of Harpers Ferry and his words are part of the April Reader's Digest pictorial article on this community.

Jefferson said:

The passage of the Potomac through the Blue Ridge is, perhaps, one of the most stupendous scenes in nature. You stand on a very high point of land.

He continued:

On your right comes up the Shenandoah, having ranged along the foot of the mountain a hundred miles to seek a vent.

On your left approaches the Potomac, in quest of a passage also.

In the moment of their junction, they rush together against the mountain, rend it asunder, and pass off to the sea. The first glance of this scene hurries our senses into the opinion that this earth has been created in time, that the mountains were formed first, that the rivers began to flow afterwards, that in this place they have been dammed up by the Blue Ridge of mountains and have formed an ocean which filled the whole valley; that continuing to rise they have at length broken over this spot, and have torn the mountains down from its summit to its base.

The piles of rock on the Shenandoah, the evident marks of their disrupture and avulsion from their beds by the most powerful agents of nature, corroborate the impression.

For the mountain being cloven asunder, she presents to your eye, through the cleft, a small catch of smooth bue horizon, at an infinite distance in the plain country, inviting you from the riot and tumult roaring around, to pass through the breach and participate of the calm below. Here, the eye ultimately composes itself. It is a scene worth a voyage across the Atlantic.

But the distant finishing which nature has given to the picture is of a very different character. It is as placid and delightful as that is wild and tremendous.

Mr. President, the photography by William A. Bake is stupendous. I congratulate the Reader's Digest for selecting the unique and spectacularly scenic community—Harpers Ferry—steeped in history as the picture feature for April.

TRIBUTE TO JULIUS HOBSON

Mr. LEAHY. Mr. President, according to both his adversaries and admirers, Julius Hobson, Sr., was a great citizen who never tired of waging battles to further the cause of civil rights and to advance the cause of good government for all the people of the District of Columbia. The entire community has suffered a loss as a result of the death of Julius Hobson last Wednesday.

While I was a law student here in Washington, D.C. in the early 1960's I remember the unprecedented series of marches and demonstrations led by Mr. Hobson, then president of the local Chapter of the Congress of Racial Equality. When I returned to Washington as a U.S. Senator in 1974, Mr. Hobson was still very noticeably continuing his worthwhile campaigns as a member of the City Council.

Mr. Hobson, upon learning that he was dying of cancer in 1971 is reported to have said:

I don't want to go on my knees, I would like to go standing up.

And literally until the last days of his life Mr. Hobson continued his active career, taking part in a City Council debate on the day before his death. The courage he demonstrated both by the unflinching vigor and humor with which he pursued his causes and by the way he continued the fight standing up until the last days of his life is an example to us all.

THE FUTURE VIABILITY OF THE ALL-VOLUNTEER FORCE

Mr. HARRY F. BYRD, JR. Mr. President, the future viability of the All-Volunteer Force—AVF—is a matter of concern to many Americans both inside and outside of Government.

Only 4 years after the end of the draft the All-Volunteer Force is encountering problems which raise serious doubts as to whether such a force can adequately meet the needs of our peacetime defense posture at a tolerable cost.

The able Senator from Georgia, Mr. NUNN, has spent a great deal of time studying this important matter as chairman of the Manpower and Personnel Subcommittee of the Senate Armed Services Committee. I believe he can rightly be called an expert on the matter of the All-Volunteer Force.

Senator NUNN has written an article on this important topic which appeared in the March 26 Washington Post.

I ask unanimous consent that the text of that article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ANOTHER LOOK AT THE ALL-VOLUNTEER FORCE

(By Sam Nunn)

I believe the All-Volunteer Force (AVF) may be a luxury that the United States can no longer afford. The AVF has lived up to few of the expectations of its early proponents, despite an economic and demographic environment highly conducive to its success. This environment has included high unemployment, especially among teenagers; mushrooming military pay, particularly recruit pay; declining military force levels and peak numbers of young people in military-age groups.

Yet, during the coming decade unemployment is likely to drop. Military pay probably will be stabilized. Force strengths will level off, and the military-aged population will shrink steadily into the 1990s.

The AVF has encountered significant problems since its inception in 1973, and I believe these problems will worsen in the future. In the last quarter of 1976, the Army was 6 per cent under its recruiting objectives; the Marine Corps fell short by 15 per cent; and the first time, the Air Force is beginning to experience difficulties in recruiting. The Selective Reserve is now 52,000 below its authorized strength, and our Individual Ready Reserve today suffers a shortfall of 180,000, which is expected to increase even further.

Navy personnel chief Admiral Watkins testified before the armed services subcommittee recently that the Navy's AWOL and desertion rates are higher now than even during the Vietnam War. When asked why, Adm. Watkins candidly remarked that unfortunately "the concept of an All-Volunteer Force 'in'" psychologically "implies to an individual the possibility of an All-Volunteer Force 'out'."

General David Jones, chief of staff of the Air Force, also testified recently that the advent of the All-Volunteer Force has transformed the concept of military service "from a profession and a calling to a job or occupation." Our nation must question whether economic benefits are beginning to outweigh "duty, honor and country" in terms of military motivation.

In my view, it is this transformation of the concept of military service that has fueled pressures for unionization within the enlisted ranks. These pressures are growing despite increases in enlisted pay since 1967 far exceeding the rate of inflation and pay increases in the private sector.

Some students of the AVF claim that it can be salvaged through managerial innovations. Martin Binkin of the Brookings Institution recently proposed in these pages that greater utilization of women and a reduction in physical standards of selected occupational specialties, as well as several other management changes, would provide the military with sufficient numbers of otherwise qualified personnel.

Although I agree that these and other proposed administrative remedies must be undertaken if the AVF is to remain viable in the short term, I believe the AVF's problems are much more fundamental than these proposals would suggest. Short-term tinkering is no substitute for long-term solutions.

The time has come for our nation to take a long hard look at the AVF, and I reject the notion that the only alternative to the AVF is a Vietnam-style draft.

I believe that both the executive and legislative branches of the government should begin now to explore possible alternatives to the AVF, such as a national service program for all our nation's young people. It makes little sense for a nation, on the one hand, to pay large bonuses to entice its young people to serve in its defense and to pay further bonuses to these same young people to serve in the combat arms while, on the other hand, it must count costly job-training and summer programs to address the serious unemployment problem so prevalent among young Americans. A minimally coercive national service organization might require each young person to register at 18 years of age and attend an orientation program designed to encourage participation in some form of national service, such as the Job Corps, VISTA, environmental reclamation, or the armed forces.

In peacetime, I believe that national service as well as the military option could remain a matter of free choice if this concept enjoyed the vigorous support of governmental leaders in the executive and legislative branches of government and by the citizens of this country.

This is but one of several options our nation should consider as alternatives to the AVF. We have an opportunity to prove that our nation can reflect on the AVF objectively and search for viable alternatives before we are forced to make ill-conceived decisions in a crisis atmosphere.

AMERICA'S STRENGTH—THE FAMILY

Mr. McCLURE. Mr. President, I have recently been made aware of some very fine remarks made by Ezra Taft Benson, president of the Council of the Twelve Apostles, Church of Jesus Christ of Latter-day Saints at the national family night program in the Seattle World's Fair Colosseum November 23, 1976.

The theme of Elder Benson's remarks centered around the family being America's strength; and with the home as the foundation, he gives some excellent advice on strengthening the Nation.

Inasmuch as National Family Week was established in the last session of Congress, I strongly recommend that my colleagues take time to read Elder Benson's remarks on the family's role in the Nation, which I ask unanimous consent be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

AMERICA'S STRENGTH—THE FAMILY

(By President Ezra Taft Benson)

My fellow Americans, humbly and gratefully I stand before you tonight, humbled by your generosity and kindness, but grateful to be in your presence.

In behalf of the Church of Jesus Christ of Latter-day Saints, I too pay tribute to you, Governor Evans, your lovely wife, and fine children. We honor you for your exemplary lives—your family example—before the citizens of this great state. In the presence of your proud parents, may I say that more important than all the success which you have attained in public life, is the success that you have attained in your private family life. We pay deserving tribute to your parents for their obvious teachings and examples. Thank you for your presence with us tonight.

I discuss with you on this impressive occasion the timely theme: America's Strength—The Family.

It is most appropriate that during this Bicentennial year the President of the United States has signed a proclamation that National Family Week be observed this year. As a nation we have recently celebrated our 200th birthday, but our observance of Thanksgiving Day is 353 years old. Our homes are among our many bounteous blessings for which we should offer gratitude to our Heavenly Father.

The home is the rock foundation, the cornerstone of civilization. The church, the school and even the nation stands helpless before a weak and degraded home. No nation will rise above its homes, and no nation will long endure when the family unit is weakened or destroyed. If we accept the truth of these statements, then we must conclude that the American family has serious problems.

All is not well with this most basic institution, the American home. In fact, it is in grave danger, if not in deadly peril. There is convincing evidence that a creeping rot of moral disintegration is eating into the very vitals of this temple of American civilization. It gives cause for serious concern.

The facts are not reassuring as we soberly appraise them. Far reaching changes, resulting from industrialization, concentration of populations, commercialization of recreation, and other activities once performed in the home, all tend to lead away from home associations.

Accompanying these changes, and in some measure resulting from them, has been a marked increase in pleasure seeking; the mad rush for money and other material things; the unwarranted indulgence of personal gratifications; the insidious inroads of tobacco, liquor, gambling, and many other tendencies in our complex modern civilization. All these have exerted a pulling power away from the home and have weakened its structure.

There seems to be a tendency for many married people to become soft and to seek a life filled with ease and the pleasure of the moment. They invite the pleasure of conjugality but often refuse to shoulder the responsibility of parenthood.

Divorce today is epidemic. The father's place at the head of the home is being challenged, and mothers have, in many instances, left the hearth to join the work force, which weakens the stability of the home. Children, growing up without strong parental guidance and spiritual influence, are allowed to roam freely. Not only does this permissiveness and lack of training sponsor indolence, but many of these youth, out of boredom, have turned to drinking, drugs, delinquency, or crime.

One great Church leader has wisely said, "No other success can compensate for failure in the home." If this nation is to endure then the home must be safeguarded, strengthened, and restored to its rightful importance. The home is the bulwark of the nation—our most fundamental and basic institution.

MARRIAGE AND FAMILY MEANT TO BE ETERNAL

Marriage, the home, and family are more than mere social institutions. They are divine, not man-made. God ordained marriage from the very beginning. In the record of that first marriage recorded in Genesis, the Lord makes four singificant pronouncements: first, that it is not good for man to be alone; second, that woman was created to be a help mate for man; third, that they twain should be one flesh; and fourth, that man should leave father and mother and cleave unto his wife. (Genesis 2:18, 24.)

Later, as though to reinforce the earlier statement, the Lord said: "What therefore God hath joined together, let not man put asunder" (Matthew 19:6), also, "Thou shalt love thy wife with all thy heart, and shalt cleave unto her and none else." (D&C 42:22.)

This first marriage, instituted by God, was between two immortal beings. Marriage was thus intended to be eternal. Following the consummation of this marraige, God gave Adam and Eve important instruction about the perpetuation of the family, instruction which has never been rescinded: "Be fruitful," God said, "and multiply, and replenish the earth . . ." (Genesis 1:28.)

The scriptures teach that man was created in the image and the likeness of his Creator. (Genesis 1:26–27.) Fundamental to the theology of The Church of Jesus Christ of Latter-day Saints is the belief that the purpose of Man's whole existence is to grow into the likeness and image of God. We accept quite literally the Savior's mandate: "Be ye therefore perfect, even as your Father which is in heaven is perfect." (Matthew 5:48.)

We believe God to be the personal Heavenly Father to all mankind, that all mortal beings are literally His spirit offspring. We worship God as as a personal, all-knowing, all-powerful Being, endowed with all the attributes of perfection. As God's literal offspring, we believe man to be His only creation blessed with His image and His likeness. Our children sing a song from the time they learn to talk which impresses upon them their celestial as well as mortal heritage:

I am a child of God,
And He has sent me here,
Has given me an earthly home
With parents kind and dear.

I am a child of God,
And so my needs are great;
Help me to understand His words
Before it grows too late.

I am a child of God,
Rich blessings are in store;
If I but learn to do His will,
I'll live with Him once more.

CHORUS

Lead me, guide me, walk beside me,
Help me find the way.
Teach me all that I must do
To live with Him some day.
("Sing With Me," No. B76.)

Yes, we believe marriage was ordained by God for a wise eternal purpose. The family is the basis for the righteous life. Divinely prescribed roles to father, mother and children were given from the very beginning. God established that fathers were to preside in the home. Fathers are to procreate, provide, love, teach, and direct. A mother's role is also God-ordained. Mothers are to conceive, bear, nourish, love, and train. She is the helpmate and counselor to her husband.

Children are likewise counseled in holy writ in their duty to parents. Paul the Apostle wrote: "Children, obey your parents in the Lord: for this is right. Honor thy father and mother;" (which is the first commandment with promise), "That it may be well with thee, and thou mayest live long on the earth." (Eph. 6: 1–3.) When parents, companionship, love, and unity, fulfill their heaven-imposed responsibility, and children respond with love and obedience, great joy is the result.

Did the God of heaven who created and intended marriage and family to be the source of man's greatest joy, his dearest possession while on this earth, intend that it end at death? Do marriage and families pertain only to this transitory state? Are all our sympathies, affections, and love for each other a thing of naught, to be cast off in death? Another distinctive teaching of Latter-day Saint theology is our belief in revelation from God to latter-day prophets. We testify that Joseph Smith was a prophet raised up by God to restore many great truths which had been lost because of the absence of revelation. Through him God revealed the eternity of the marriage covenant and the timelessness of the family. The effect that this teaching has upon Church members is most pronounced. One of the early Apostles in the Church recorded his feelings about this doctrine in these words:

"I received from (Joseph Smith) the first idea of eternal family organization, and the eternal union of the sexes in those inexpressibly endearing relationships which none but the highly intellectual, the refined and pure in heart, know how to prize, and which are at the very foundation of everything worthy to be called happiness.

"Till then I had learned to esteem kindred affections and sympathies as appertaining solely to this transitory state, as something from which the heart must be entirely weaned, in order to be fitted for its heavenly state.

"It was Joseph Smith who taught me how to prize the endearing relationships of father and mother, husband and wife; of brother and sister, son and daughter.

"It was from him that I learned that the wife of my bosom might be secured to me for time and all eternity; and that the refined sympathies and affections which endeared us to each other emanated from the foundation of divine eternal love. It was from him that I learned that we might cultivate these affections, and grow and increase in the same to all eternity.

"It was from him that I learned the true dignity and destiny of a son of God, clothed with an eternal priesthood, as the patriarch and sovereign of his (family). It was from him that I learned that the highest dignity of womanhood was, to stand as a queen and priestess to her husband . . .

"I have loved before, but I knew not why. But now I loved with a pureness—an intensity of elevated, exalted feeling, which would lift my soul from the transitory things of this grovelling sphere and expand it as the ocean. I felt that God was my heavenly Father indeed; that Jesus was my brother, and that the wife of my bosom was an immortal, eternal companion; a kind of ministering angel, given to me as a comfort, and a crown of glory for ever and ever. In short, I could now love with the spirit and with the understanding also." (Parley P. Pratt, "Autobiography of Parley P. Pratt," (SLC: Deseret Book Company, 1968), pp. 297–298.)

Perhaps, my friends, you will now understand why The Church of Jesus Christ of Latter-day Saints views the family as the most important organization in time and all eternity; why all things should center in and around the family. Perhaps you can appreciate why we believe that the preservation of family life in time and eternity takes precedence above all other interests; why we venerate parental and filial love and duty. Because of this confidence in the perpetuity of the home and family into the

eternities, we build our most elaborate and expensive structures—temples of God (one of which will soon be erected in Seattle) so that man, woman, and their children may be bound together by covenant in an everlasting union which will transcend all the limitations of this mortal sphere. It is because of this belief that the Church decries divorce, why we are actively engaged in teaching fathers that their most important duty is within the walls of their own home, and that mothers should be full-time mothers in the home. It is why we encourage parents to teach their children fundamental spiritual principles which will instill faith in God, faith in the family, and faith in their country. There is no other institution that can take the place of the family, nor fulfill its essential function.

Yes, families are intended to have joy. A former Church president once said, "In the well-ordered home, we may experience on earth a taste of heaven." (President David O. McKay, Conference Report, 1969, p. 4.) How true that is!

THE JOYS OF FAMILY LIFE

Would you pardon some nostalgia from a grandfather, and soon to be great-grandfather, who has lived more than three-score years and ten and experienced a little taste of that heaven? Some of the sweetest, most soul-satisfying impressions and experiences of our lives are those associated with home, family, children, brothers and sisters. My heart fills with gratitude as I recall the joys of our rich family life when all six children were at home. We set our goal for twelve. My wife laments, "If we could just have had twins each time we'd have made it." May I mention just a few things that have enriched our lives and continues to do so.

Prayer has been and is the ever-present anchor for strength and a source of direction in our family activities. I remember kneeling at the bedside of our young children, helping them with prayers in their younger years, and later seeing the older brothers and sisters helping the younger ones.

We had family prayer night and morning, with children given the opportunity to lead, and had special prayers to meet particular problems. Mention was made in family prayer, for instance, of children with assignments such as a 2½ minute talk in Sunday School or a new teaching assignment in the Church auxiliaries. We asked for help when one of the children faced a difficult examination in high school. Special mention was made of members of the family away at girls' camp, Scout camp, school, or working. This special mention of particular concerns in our family prayers gave confidence, assurance, and strength to members of the family facing difficult problems and assignments.

How precious are the memories of daily devotion in the home, the simple but powerful practice of family prayer, secret prayer, and the old-fashioned practice of the singing of hymns and the reading of scriptures.

The inspired home evening and family council program, which carries such promise and which dates back more than fifty years, has provided many happy hours and great joy together. It has built faith, strengthened testimonies, and created a family solidarity and unity that will endure throughout all eternity.

When the children were young, we enjoyed personal, intimate visits with them at their own bedsides or curled up before the fire. Later it was a joy to have them travel with me on Church and business trips throughout the state of Idaho and later throughout the nation. Sometimes these trips were a reward for achievement. Our oldest son, Reed, was taken on a trip from Washington, D.C., to the west coast when he became the first Eagle Scout in the state. His achievement was followed a year later by that of his brother, Mark. It was on a day during this trip with Reed that I was called to a position of leadership in the Councils of the Church. The intimate conversation and experience of that day will remain a precious memory always.

Another family joy was to have guests in our home. At such times we always tried to arrange to have the children at the table also, to participate in the delightful conversation of the evening. The impression made on a judge and national farm leader as our daughter, Barbara, age nine, led in family prayer at our dinner table was reported later by this beloved leader at a meeting of farm, labor, and business leaders in Florida.

It seemed that the family happiness increased as the children advanced in years. It was a joy to see daughters Beverly and Beth teaching in Sunday School, as they each in turn prepared for marriage. Their classes of girls came to the home where our daughters displayed and talked about their trousseaus, and their plans for marriage. What a joy to hear the young girls pledge that they would follow the examples of their teachers and also be married in the temple.

Another source of family joy was the correspondence that came from the children when they were away. We would gather around the kitchen table and enjoy together letters from sons and brothers at Scout camp or on missions, letters from our son Reed while he was a chaplain in the Air Force, or news from the older sisters away at college. Joy came to the home when recordings were received at Christmastime or on birthdays, recordings filled with faith-promoting experiences, expressions of love, testimony, and gratitude for the gospel. These we shall never forget.

There were difficult and challenging days also, like the one when I returned from a distant trip to find my faithful and ever-courageous wife directing our sons with boxing gloves on their hands, sparring with each other. One son had challenged the high school bully, who had been teasing and trying to make fun of younger classmates. The coach had set a time for the fight. Preparations were on—training, diet, and prayer were all a part of making ready. Our prayers were answered. The outcome brought increased respect and strong friendship, even with the bully.

Even when I was a busy Cabinet member serving as Secretary of Agriculture, we kept close together through picnics in the park, travel into the country, and exploration in jeeps and on horses into the hills of Virginia.

The invitation to appear on "Person to Person," the popular Edward R. Murrow show on CBS, to present a typical Mormon home evening, was a serious challenge. The eyes of the nation would be focused on this popular show. Not only the family but, to some extent, the Church would be on trial before the people. There was some reluctance on the part of the wise mother. She did not want her daughters publicized; but with the persuasion of her missionary sons, she consented. There followed prayer and fasting, but no rehearsing. It was to be an informal Mormon home evening. The Lord heard our prayers, and afterwards letters came in by the hundreds. Later, in a national magazine article, Mr. Murrow expressed his pleasure and surprise when he received more fan mail on the Mormon home evening with Secretary Benson's family than on any other program of his years-long "Person to Person" series. I mention this not to glorify our own family, but to underscore the truth that Americans are great lovers of homes.

As I traveled on trade trips to many nations of the world as Secretary of Agriculture, family joys were still an important part of our lives. Whenever all the space was not taken by members of the press and my staff, President Eisenhower urged me to take members of my family along with me so that "the people of the world might see an American family in action." Although space on the government plane was provided, meals, hotels, and other expenses were borne by the family.

Yes, these were busy trips, but always family joys were realized. Members of the family traveling with me would be assigned various jobs, such as keeping a diary, making memoranda, keeping a record of letters of thanks to be written later, checking carefully the ever present questions of protocol, and always, trying to live the example of what we knew to be right.

And now, with all six children happily married in the temples of God and with families of their own, and 33 grandchildren, the joys continue and are multiplied. Weekly contacts are made by telephone or letter. Birthday cards are sent to each one. Family reunions are held with 100 percent attendance, and we join together in prayer and fasting as the signal goes out of illness or serious problems facing any member of the family.

So much more could be said. Thank God for the joys of family life. I have often said there can be no genuine happiness separate and apart from a good home. The sweetest influences and associations of life are there. Life cannot be fully successful, no matter what goals we attain in the material world, no matter what honors of men come to us in our lives, if we fail as fathers, mothers, and children.

My plea to you tonight is that we strengthen our families so that our memories of home may be happy ones, that our home life may be a foretaste of heaven.

Tonight, I would not dwell on the problems affecting homes and families in our beloved land. We all know there is too much divorce, that the undermining of home and family is on the increase. We are aware that in many instances father and mother have abdicated divinely-given assignments, that children have become rebellious, that Federal, State, and local governments—out of interest in preserving the home or solving the problems of broken homes—have legislated measures to compensate for failure in the home. We also know that there has never been and there never will be a satisfactory substitute for a well-ordered home. If the nation is to endure, the home must be safeguarded and strengthened.

We feel, as a Church, that everything we can do to strengthen the family will not only build helpful and needed relationships to meet all the challenges in the world, but will be the single most important thing to strengthen and fortify our nation. Within the next two weeks the Church is sponsoring a one hour television show on the importance of the family. Next Tuesday evening, November 30, 1976, at 8:00 p.m., a special program will be telecast over one of your local stations. We invite you all to see this special program to help to acquaint you with our deep concern for building strong, eternal family bonds.

As citizens of this Republic, what can we do? What can be be done? As I have thought about this, I am convinced that there are some fundamental things we might well give attention to in our nation if the family is to be preserved. May I suggest five simple things that I believe we might well give attention to in strengthening the American home.

First: I feel one of our greatest needs is more time of parents in the home. Youth of the Church and of the nation need more than physical comforts. We will need to leave them more than lands and stocks. They need more than a modern automobile and a lovely modern building to live in. There is no satisfactory substitute for

mother, and no one can take care of her children as she can. No so-called social obligations, social enticements, or outside interests should impel any mother to neglect the sacred charge that is hers of caring for her own flesh and blood. Her first loyalty in the eyes of God is to her church and her family. I feel confident that while civic and social activities may return much good, she will serve her community and her nation best if she first devotes herself to the needs of her own children.

Second: We need daily devotion in the home. We need to return to the practice of family prayer, secret prayer, the old-fashioned practice of devotion in the home, daily, night and morning; the singing of hymns; the reading of scriptures. How much more happiness there would be, how many fewer divorces there would be, if these simple practices were followed as was the custom in the western pioneer home, as well as in the early days of this country, according to the diaries of our early founders.

Third: I think one of the great needs is more parental instruction in life's problems. I know there is a tendency for parents to shrink from this responsibility, the instructing of their own children in the problems of sex, the relationship with other young people, the problems of dating, and all of the many temptations that confront a growing boy and girl. These instructions should not be left to the school or to a class in sociology. The safest place, the best place, to give this vital counsel, these sacred instructions in matters of moral purity, should be in the home on a basis of confidence between parent and child. As parents, we should instruct our children. The sacred books of the ancient Persians say: "If you would be holy, instruct your children, because all the good acts they perform will be imputed unto you."

Fourth: I believe there is a great need for family recreation and cultural activities together. We should do things together as a family. It may mean a reduction in participation in women's clubs, in men's clubs, but if families could only seek their recreation and cultural activities more as a family unit, I am sure that untold benefits and blessings would accrue. A little boy was asked, after he said he was going to a summer camp, "What is a summer camp?" And he answered, "Those places where little boys go for mother's vacation." Let us take more of our vacations together as families.

Years ago, The Church of Jesus Christ of Latter-day Saints admonished all parents to hold a weekly family home evening. Today, that admonition has been institutionalized in the homes of Church members. Monday night has been set aside as an evening for the family together. No Church activity or social appointments may be sponsored on this night.

I hold in my hand a current Family Home Evening Manual. In this attractively prepared manual, parents have many kinds of activities and spiritual teaching outlined for them. May I heartily commend to all—whether or not you are a Latter-day Saint—to gather your family about you on a once-a-week basis for a family home evening night. Such evenings where scriptures are read, skits acted out, songs sung around the piano, games played, special refreshments enjoyed, and family prayers offered, like links in an iron chain, bind a family together with pride, tradition, strength, and loyalty to each other. Recently we rejoiced as we read the minutes of home evenings of over thirty years ago.

In 1915, the First Presidency of the Church inaugurated the home evening program by a letter. I recall when my own father read that letter to the family at the supper table on the farm. When he concluded the letter, he said, "The Presidency has spoken, and this is the word of the Lord to us!" From that time forward, we diligently held family home evenings in my boyhood home. I testify out of this experience and later, the experience of family nights in my own home, that great spiritual blessings can result. We rejoice as we visit the homes of our children to find they are holding their home evenings each Monday night.

And fifth: We need a closer parent-child relationship. This is closely related to the other four needs. One of the greatest needs of our young people is a closer, more frequent companionship with father and mother. There is no satisfactory substitute. I was thrilled some time ago, as I picked up a paper in the East and read an account of a letter that a rich industrialist had sent to his son, his sixteen-year-old boy, as a Christmas present. This man could have given his son anything that money could buy—an automobile, a yacht, I guess, if he wished. But when the boy came down from his room on Christmas morning and went over to the mantle where he usually found his present, there was a plain envelope with his name on it, and he opened it and read:

To my dear son: I give to you one hour each weekday and two hours of my Sundays to be yours to be used as you want, without any interference of any kind whatsoever.

Lovingly,

DAD.

As I read that, I thought, what a wise father, and what a fortunate son! Yes, that is what they need.

As parents, might we seriously consider whether or not too many activities and other interests draw us away from our families, our children, from those whom God gave us to love, nourish and teach.

God bless us that we may give personal attention now to these vital matters:

1. More time of parents in the home.
2. Daily family devotion in the home.
3. Parental instruction in life's problems.
4. Family recreation and cultural activities together.
5. A closer parent-child relationship.

A poem which captures the sentiment of what real home life ought to be was written by Edgar A. Guest. It's a favorite in our family, and all of us love to hear Mother recite it. I thought you would enjoy it too. (Recited by Sister Benson, "Home," by Edgar A. Guest.)

It takes a heap o' livin' in a house t' make it home,
A heap o' sun and' shadder, an' ye sometimes have t' roam
Afore ye really 'preciate the things ye lef' behind,
An' hunger fer 'em somehow, with 'em allus on yer mind.
It don't make any difference how rich ye get t' be,
How much yer chairs an' tables cost, how great yer luxury;
It ain't home to' ye, though it be the palace of a king,
Until somehow yer soul is sort o'f wrapped round everything.

Home ain't a place that gold can buy up in a minute;
Afore it's home there's got t' be a heap o' livin' in it;
Within the walls there's got t' be some babies born, and then
Right there ye've got to' bring 'em up t' women good, an' men;
And gradjerly, as time goes on ye find ye wouldn't part
With anything they ever used—they've grown into yer heart:
The old high chairs, the playthings, too, the little shoes they wore
Ye hoard; an' if ye could ye'd keep the thumbmarks on the door.

Ye've got to' weep t' make it home, ye've got to' sit an' sigh
An' watch beside a loved one's bed, an' know that Death is nigh:
An' in the stillness o' the night to' see Death's angel come,
An' close the eyes o' her that smiled, an' leave her sweet voice dumb.
Fer these are scenes that grip the heart, an' when yer tears are dried
Ye find the home is dearer than it was, an' sanctified:
An' tuggin' at ye always are the pleasant memories
O' her that was an' is no more—ye can't escape from these.

Ye've got to' sing an' dance fer years, ye've got to' romp and play,
An' learn t' love the things ye have by usin' 'em each day;
Even the roses 'round the porch must blossom year by year
Afore they 'come a part o' ye, suggestin' someone dear
Who used to' love 'em long ago, an' trained 'em jus' t' run
The way they do, so's they would get the early mornin' sun;
Ye've got to' love each brick an' stone from cellar up to' dome:
It takes a heap o' livin' in a house to' make it home.

Thank you, dear. That expresses so well, I'm sure, the sentiments that all of us share. So let's strengthen our families. Family and individual prayers morning and evening can invite the blessings of the Lord on our households. Mealtime provides a wonderful time to review the activities of the day and to not only feed the body but to feed the spirit as well, with members of the family taking turns reading the scriptures.

Night time is a great time for the busy father to go to the bedside of each of his children, to talk with them, answer their questions, and tell them how much they are loved. In such homes there is no generation gap. This deceptive phrase is another tool of the devil to weaken the home and family. Children who honor their parents and parents who love their children can make a home a haven of safety and a little bit of heaven.

Does this poem describe your family gatherings?

We are all here:
Father, mother
Sister, brother,
All who hold each other dear.
Each chair is filled, we are all at home.
Tonight, let no cold stranger come;
It must be often thus around
Our old familiar hearth we're found.
Bless, then, the meeting and the spot,
For once be every care forgot;
Let gentle peace assert her power,
And kind affection rule the hour,
We're all—all here.

(Adopted from a poem by Charles Sprague.)

God intended the family to be eternal. With all my soul, I testify to the truth of that declaration. May He bless us to strengthen our homes and the lives of each family member so that in due time we can report to our Heavenly Father in His celestial home that we are all there—father, mother, sister, brother, all who hold each other dear. Each chair is filled. We are all back home.

In this, the greatest of all nations, in this land choice above all others, I pay humble tribute to the home. It is America's greatest strength.

God bless us to strengthen our homes. And God grant that the love and unity in all our homes will be preserved to transcend the bounds of this mortal life. In the name of Jesus Christ, Amen.

MARC J. MUSSER

Mr. CRANSTON. Mr. President, it is with the deepest regret that I rise to inform my colleagues of the death yesterday of Dr. Marc J. Musser, the former Chief Medical Director of the Veterans' Administration's Department of Medicine and Surgery, one of the kindest and most compassionate men I have ever known.

From 1971 to 1974, during my tenure as chairman of the Veterans' Affairs Subcommittee on Health and Hospitals, Jim Musser served as chief administrative officer of this country's largest unified system of health care facilities. It was my privilege to work closely with him on legislation to expand and update the VA medical program. His 4 years of service as Chief Medical Director corresponded to a period of significant growth in that program. The Department of Medicine and Surgery's operating budget grew 75 percent during the 4-year period, from $2 billion in Jim's first year to $3.5 billion in his last. He supervised this period of dynamic growth with wisdom, good sense, and impeccable attention to the thousand little crises that come with the territory.

It is difficult to put into words what this one man meant to the veterans of this Nation, and to the men and women who worked with him at the VA and on Capitol Hill. His concern for the morale of the employees in D.M. & S. was conscientious and deep seated. His compassion never waivered. His commitment to the betterment of treatment for the severely disabled never faltered. At a time when congressional relations with the executive branch were frosty, he commanded a degree of respect and admiration in this body that would have been unusual even in less fractious times.

He was a man of principle. In 1974 he chose to resign from the VA after 13 years of service rather than tolerate what he felt were unwarranted intrusions on his statutory responsibilities to run the VA medical program in the most effective and efficient way possible.

He was my friend, Mr. President. But more importantly, he was an extraordinary and dedicated friend to the veterans on whose behalf he worked for so many years. He served his Nation well, and with great dignity and purpose.

To his wife, Alice, and his children, David, William, and Barbara, I express my sincere sympathies. I want them to know how deep was our respect and fondness for Jim Musser, and how much we will miss his wisdom and his very good company.

Mr. President, I ask unanimous consent that an article from today's Washington Post describing the life and accomplishments of this remarkable man be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DR. MARC MUSSER, FORMER CHIEF OF MEDICINE FOR VETERANS UNIT

Dr. Marc J. Musser, 66, former chief medical director of the Veterans Administration, died Tuesday at the VA Hospital in Washington after a long illness.

He had served as VA medical chief from 1970 until he retired in 1971. Since then he had been a consultant to Smith, Kline & French Laboratories, with offices here.

Born in Terre Haute, Ind., Dr. Musser graduated from the University of Wisconsin, where he also received a medical degree. He took residencies in neuropsychiatry and internal medicine at the Wisconsin General Hospital in Madison and joined the faculty of the University of Wisconsin School of Medicine in 1938.

During World War II, Dr. Musser commanded the 135th Army Medical Group in the Southwest Pacific.

He then returned to the University of Wisconsin School of Medicine, where he attained the rank of professor. He also did research on the threshold of pain and endocrinology.

Dr. Musser joined the VA in 1957 as a member of the hospital staff in Houston, and served as professor of medicine at the Baylor University College of Medicine.

He transferred to VA headquarters here in 1959 to direct medical research, was promoted in 1962 to administer both research and medical education programs, and was named deputy chief medical director in 1964.

He left the VA in 1966 to serve for four years as executive director of the North Carolina Regional Medical Program.

During this period, Dr. Musser also was chairman of a steering committee that coordinated all the nation's 55 regional medical programs.

He also was a professor of medicine at the medical schools of Duke and Wake Forest universities and adjunct professor of medicine and public health administration at the University of North Carolina School of Medicine.

Dr. Musser was a fellow of the American College of Physicians and a diplomate of the American Board of Internal Medicine. He has been a trustee of the American Hospital Association and was past president of the Association of Military Surgeons.

He is survived by his wife, Alice Dryden Musser, of the home in Arlington; three sons, David, of Madison; Steven, of Minneapolis, and William S., of Arlington; a daughter, Barbara Billek, of Madison; a brother, Robert, of Joliet, Ill., and six grandchildren.

The family suggests that expressions of sympathy be in the form of contributions to the Arlington Hospital Association or Children's Hospital.

(This concludes additional statements submitted by Senators today.)

CONCLUSION OF MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask that morning business be closed.

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

EMERGENCY UNEMPLOYMENT COMPENSATION EXTENSION ACT OF 1977

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of H.R. 4800, which the clerk will state.

The assistant legislative clerk read as follows:

Calendar No. 56, a bill (H.R. 4800) to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such act, and for other purposes.

The Senate proceeded to consider the bill, which had been reported from the Committee on Finance with amendments.

UNANIMOUS-CONSENT AGREEMENT THAT THERE BE NO ROLLCALL VOTES PRIOR TO 12:30 P.M. TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent, if there is a rollcall vote ordered prior to the hour of 12:30 p.m. today, that with the exception of a rollcall vote in connection with the establishment of a quorum, such rollcall vote not occur until 12:30 p.m., so as to accommodate committee meetings.

The PRESIDING OFFICER. Without objection, it is so ordered.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 11:30 A.M.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the Senate stand in recess until 11:30.

There being no objection, the Senate, at 11:19 a.m., recessed until 11:30 a.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. ANDERSON).

Mr. LONG. Mr. President, what is the pending business?

The PRESIDING OFFICER. H.R. 4800.

Mr. LONG. Mr. President, on March 31 the Emergency Unemployment Compensation Act will expire. This act was originally passed in 1974 to provide a somewhat longer duration of unemployment benefits than is available under permanent law. The regular and extended programs provide up to 39 weeks of unemployment benefits and the emergency program now provides as much as 26 weeks, for an overall total of 65 weeks.

The emergency program was enacted in response to a crisis situation—the extraordinarily high rates of unemployment we have experienced over the past few years. It was intended to be a temporary program when we first enacted it and when we extended it in 1975. As an emergency program, it was clearly understood that it would be phased out as soon as unemployment levels declined and other measures to deal with long-term unemployment were developed.

The bill we are considering today represents, I believe, the final extension of this program. The program would be continued under the bill through September 30, 1977 with a phaseout through December 31, 1977. It reduces the maximum duration of benefits under all programs from 65 to 52 weeks. It retains the State triggering provisions under which the additional emergency benefits are

payable only in States with at least a 5-percent insured unemployment rate.

The cost of benefits under this program for its remaining months will be financed from general revenues rather than payroll taxes. Persons claiming emergency benefits will be required to look for and accept any reasonable job that is available.

The bill before us also modifies the requirements of the regular unemployment program with respect to the payment of benefits to teachers and permits States 2 additional years within which to repay loans they have obtained from the Federal unemployment trust fund in order to meet State benefit costs.

Mr. President, I ask unanimous consent that a more detailed summary of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF THE BILL

Extension of emergency program.—H.R. 4800, as passed by the House, would extend the Emergency Unemployment Compensation Act for 1 year to March 31, 1978. It would modify the act to provide a maximum of 13 weeks of emergency benefits (which combine with the 39 weeks of regular and extended benefits for a total of 52 weeks of unemployment benefits). Under the Finance Committee bill, the program would continue in operation until December 31, 1977. No new applications for payments would be taken after September 30, 1977. However, individuals who qualified for payments prior to that time could continue to receive payments until their eligibility period ends, but not later than the end of the year.

State and labor market area triggers.—The House bill would retain the requirement that the program be in effect only where the insured unemployment rate equals or exceeds 5 percent, and it would make that trigger applicable on a labor market area basis as well as on a State-by-State basis. Under the Finance Committee bill, benefits would be paid only in States where the insured unemployment rate is more than 5 percent.

General revenue financing.—The committee bill includes, with a technical amendment, the provisions of the House bill under which the cost of emergency unemployment compensation paid after March, 1977 would be met from the Federal Unemployment tax.

Refusal of suitable work.—The committee bill includes provisions requiring an individual to accept suitable employment. The committee provision would prohibit the payment of emergency compensation to an individual who refuses a job unless:

(1) the job is vacant solely because of a labor dispute;

(2) as a condition of being employed the worker would have to join a company union or refrain from joining any bona fide labor organization;

(3) the wages or conditions of work are substantially less favorable than those which prevail in the locality for similar work;

(4) the job poses an unreasonable threat to the individual's health, safety, or morals;

(5) the job involves traveling an unreasonable distance to work;

(6) the job pays a lower gross wage than the individual's unemployment compensation; or

(7) the applicant is in an approved training program.

These provisions substitute for provisions of the House bill related to the acceptance of employment.

Active job search.—The committee bill, like the House bill, would prohibit the payment of emergency compensation for any individual who cannot show that he is actively seeking work. To meet this requirement an individual would have to provide tangible evidence that he has engaged in a systematic and sustained effort to obtain work during the week for which he is claiming benefits.

Teachers.—The committee bill would allow States to deny unemployment compensation to teachers during brief mid-year vacation periods in cases where the teacher was employed by the school system immediately before the start of the vacation and has reasonable assurance of that employment continuing at the conclusion of the vacation. (Present law prohibits payments for periods between school years when the teacher has reasonable assurance of a job for the following year.

In addition, employment as a substitute teacher would not qualify an individual for unemployment compensation if the individual is not employed as a teacher on at least 45 separate days.

Repayment of State loans.—The cost of regular State benefits for the first 26 weeks of unemployment and half of the cost of extended benefits for the next 13 weeks are met through State unemployment taxes. The Federal unemployment trust fund, however, includes a loan account against which States may draw advances if they are unable to meet their benefit costs out of the State accounts. Permanent law requires that these advances be repaid within approximately two years. If a State has an outstanding loan on January 1 of two successive years and does not repay that loan by November of that second year, the Federal Government automatically begins to recoup the loan by raising the effective Federal unemployment tax rate on employers in the State.

Legislation enacted in 1975 provided a moratorium (effective for 3 specific years, 1975, 1976 and 1977) in the case of States which satisfy certain conditions which show that they have taken the necessary action to enable them to repay the loans within a reasonable period of time. The committee bill, like the House-passed bill, would add 1978 and 1979 to the years which may be disregarded in applying the repayment provisions for such States.

Other amendments.—The committee bill also includes several additional amendments which would:

(1) reduce from 26 to 13 weeks the minimum period of time for which an emergency benefit period would be in effect;

(2) provide that an individual's entitlement to emergency compensation would end 2 years after the end of the benefit year for which regular benefits were paid;

(3) clarify the provisions of present law which prohibit the payment of unemployment compensation to aliens who work illegally in the United States;

(4) defer until 1979 the time when States would have to bring their laws into conformity with the requirements of the Unemployment Compensation Amendments of 1976 if the State legislature does not meet in regular session during 1977;

(5) clarify the provision of present law which relates to the right of groups of local governments to elect to meet the cost of unemployment compensation on a reimbursement basis; and

(6) defer for 6 months the reporting dates for the National Commission on Unemployment Compensation.

Mr. LONG. Mr. President, I ask unanimous consent that Frank Crowley of the Congressional Research Service be granted privilege of the floor during Senate consideration of this bill, H.R. 4800.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc and considered as part of the original text.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I have had some discussion with those on the other side of the aisle and they would like to modify the unanimous-consent agreement we just agreed to on the committee amendments.

Mr. President, I ask unanimous consent that the committee amendments, except for sections 101 and 104, be agreed to en bloc.

The committee amendments agreed to en bloc are as follows:

On page 3, beginning with line 1, strike through and including page 8, line 6, and insert in lieu thereof:

SEC. 102. THIRTEEN-WEEK MAXIMUM FOR EMERGENCY BENEFITS AND EMERGENCY BENEFIT PERIOD.

(a) EMERGENCY BENEFITS.—Section 102(e)(3) of the Emergency Unemployment Compensation Act of 1974 is amended by inserting after "(as defined in section 105(5))" the following: ", or which end after March 31, 1977,".

(b) EMERGENCY BENEFIT PERIOD.—Section 102(c)(3)(A)(ii) of such Act is amended by striking out "26 consecutive weeks" and inserting in lieu thereof "13 consecutive weeks".

(c) EFFECTIVE DATE.—The amendment made by this section shall be effective with respect to weeks of unemployment which end after March 31, 1977.

On page 8, beginning with line 22, strike through and including page 9, line 14, and insert in lieu thereof:

(a) GENERAL RULE.—Section 104(b) of the Emergency Unemployment Compensation Act of 1974 is amended—

(1) in the first sentence thereof, by striking out "as repayable advances (without interest),"; and

(2) by amending the second sentence thereof to read as follows: "Amounts appropriated and paid to the States under section 103 with respect to weeks of unemployment ending prior to April 1, 1977, shall be repaid, without interest, as provided in section 905(d) of the Social Security Act.".

On page 10, beginning with line 3, strike through and including line 7, and insert in lieu thereof:

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall be effective on April 1, 1977.

On page 17, line 5, strike "(c)(1)";

On page 17, line 13, strike "(A)" and insert "(1)";

On page 17, line 18, strike "(B)" and insert "(2)";

On page 17, line 20, strike "(2)(A)" and insert "(b)(1)";

On page 18, line 4, strike "(i)" and insert "(A)";

On page 18, line 7, strike "(ii)" and insert "(B)";

On page 18, line 9, strike "(B)" and insert "(2)";

On page 18, line 23, strike "(C)" and insert "(3)";

On page 19, line 3, strike "(3)" and insert "(c)";

On page 19, at the beginning of line 4, strike "paragraph (1) or (2)" and insert "subsection (a) or (b)";

On page 20, beginning with line 1, insert:

SEC. 107. TERMINATION OF INDIVIDUAL ENTITLEMENT.

(a) GENERAL RULE.—Section 102(b)(2) of the Emergency Unemployment Compensation Act of 1974 is amended—

(1) by striking out the period at the end thereof and inserting in lieu thereof a semicolon; and

(2) by adding after subparagraph (B) thereof the following: "except that no payment of emergency compensation shall be made to any individual for any week of unemployment which begins more than two years after the end of the benefit year for which he exhausted his rights to regular compensation.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to weeks of unemployment ending after the date of enactment of this Act.

On page 21, line 5, strike "TECHNICAL AMENDMENTS TO" and insert "OTHER";

On page 21, line 8, strike "OF 1976";

On page 23, line 16, strike "CLARIFYING" and insert "ADDITIONAL";

On page 23, line 17, strike all through and including line 22, and insert in lieu thereof:

(a) ILLEGAL ALIENS.—Subparagraph (A) of section 3304(a)(14) of the Internal Revenue Code of 1954 (relating to denial of unemployment compensation to illegal aliens) is amended to read as follows:

"(A) compensation shall not be payable on the basis of services performed by an alien unless such alien is an individual who was lawfully admitted for permanent residence at the time such services were performed, was lawfully present for purposes of performing such services, or was permanently residing in the United States under color of law at the time such services were performed (including an alien who was lawfully present in the United States as a result of the application of the provisions of section 203(a)(7) or section 212(d)(5) of the Immigration and Nationality Act),".

On page 24, line 21, strike all through and including page 25 line 2, and insert in lieu thereof:

(c) DISQUALIFICATION OF TEACHERS.—Section 3304(a)(6)(A) of the Internal Revenue Code of 1954 (relating to approval of State unemployment laws) is amended—

(1) in clause (i)—

(A) by striking out "instructional research" and inserting in lieu thereof "instructional, research"; and

(B) by striking out "two successive academic years" and inserting in lieu thereof "two successive academic years or terms";

(2) in clauses (i) and (ii) by striking out the word "and" at the end thereof; and

(3) by adding at the end thereof the following new clauses:

"(iii) with respect to any services described in clause (i) or (ii), compensation payable on the basis of such services may, if the State law so provides, be denied to any individual for any week which commences during an established and customary vacation period or holiday recess if such individual performs such services in the period prior to such vacation period or holiday recess, and there is a reasonable assurance that such individual will perform such services in the period following such vacation period or holiday recess, and

"(iv) with respect to services performed by substitute teachers in an instructional, search, or principal administrative capacity for an educational institution to which section 3309(a)(1) applies, compensation payable on the basis of such services may be denied to any individual who is paid on a per diem basis and is employed for less than 45 days in a base period (as defined by State law), and".

On page 26, line 13, strike out through and including line 14, and insert in lieu thereof:

(d) EFFECTIVE DATES.—

(1) The amendment made by subsection (a) shall become effective upon the date on which paragraph (14) of section 3304 of the Internal Revenue Code of 1954 becomes effective, as provided in section 314 of the Unemployment Compensation Amendments of 1976.

(2) The amendments made by subsections (b) and (c) shall apply with respect to weeks of unemployment which begin after the date of enactment of this Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. That would leave section 101 as the pending committee amendment.

The PRESIDING OFFICER. The first committee amendment would be the amendment of section 101.

Mr. LONG. That is right.

The PRESIDING OFFICER. Unless unanimous consent is granted to reverse it.

Mr. LONG. Mr. President, H.R. 4800 as passed by the House would extend the Emergency Unemployment Compensation Act for 1 year to March 31, 1978. It would modify the act to provide a maximum of 13 weeks of emergency benefits, which combined with the 39 weeks of regular and extended benefits provide for a total of 52 weeks of unemployment benefits.

Under the Finance Committee bill, the program would continue in operation until December 31, 1977. No new applications for payments would be taken after September 30, 1977. However, individuals who qualified for payments prior to that time could continue to receive payments until their eligibility period ends, but not later than the end of the year.

In view of the circumstances that exist today, we believe that that would be a more appropriate termination date.

Senator JAVITS, I believe, is opposed to this provision. He is not here at this time. He suggested that other Senators might wish to offer their amendments. I was told, for example, that Senator BARTLETT wishes to offer an amendment which is not germane to the bill, but I would be glad to consent to his offering it.

I would suggest that those on the other side of the aisle contact him and see if he wishes to offer his amendment at this time.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. CURTIS. It is my information that the distinguished Senator from Oklahoma (Mr. BARTLETT) has been sent for.

May I inquire what arrangement has been made in reference to committee amendments?

Mr. LONG. I asked unanimous consent that they be agreed to en bloc. I was told that Senator JAVITS is concerned with regard to two amendments, and he asked that the committee amendments to section 101 and section 104 should be excepted from the request to accept the amendments en bloc. I obtained unanimous consent that we would not agree to those two amendments en bloc, and that would make them the next amendments in order.

Mr. CURTIS. The only interest of this Senator is that Mr. JAVITS' rights be taken care of. I am not familiar with the sections in which he is interested.

Mr. LONG. We will accommodate him. I am told that he is concerned about section 101 and section 104.

I have asked and obtained consent that the unanimous-consent request be modified so that those two amendments will not be agreed to en bloc. That would make the committee amendment to section 101 the pending amendment. Senator JAVITS is busy at this time. He will return here later. He was led to believe that Senator BARTLETT wanted to go ahead with his amendment. If that is the case, I wish the Senator from Oklahoma (Mr. BARTLETT) would make himself available and offer his amendment, so that we can get that much of our business done.

Mr. CURTIS. Mr. President, the measure before the Senate is a continuation of emergency type unemployment compensation.

Basically, our unemployment compensation is on a State-by-State basis. For most of the States, the entire cost of their regular unemployment compensation is borne by the employers. This State unemployment compensation is for a period of 24 weeks. A few years ago, when unemployment was in the minds of Congress and was one of the problems before us, Congress passed a measure providing for 13 weeks more, half of the cost of which was paid for by the Federal Government. At a later time, an additional 13 weeks was added, which could be extended into a total of 65 weeks.

The bill before us would extend the emergency program to the end of this calendar year. It would provide, however, that applications would be cut off on September 30 but payments could continue through this calendar year. This would indicate a termination of the emergency part of the program.

There is one very decided change in this law that should be brought to the attention of the Senate. The House bill provided, and the Senate committee bill concurs with a technical amendment, that the cost of the emergency unemployment compensation paid after March 1977 would be met from general revenues without the present law requirements that the cost ultimately be met from the Federal unemployment tax.

I shall not burden the RECORD at this point to explain all of the details as to how we have done it in the past—of making loans from the fund and advances—but ultimately the bill was to be paid by an unemployment tax. This shifts the burden to the general fund.

Many reasons could be cited as to why this is desirable from the standpoint of some people. Employment taxes are very high, the social security tax is high, and

the burdens upon business employers are great. On the other hand, I cannot think of any greater burden bearer than the general treasury. There is no money in there. It means that this unemployment fund will have to be paid by increasing the deficit. It is not as large as some programs, but the collective burden upon the Federal Treasury continues to mount and mount.

We used to become alarmed at a deficit of $2, $3, $4, $5, or $6 billion. Now our sight and our hearing are becoming deadened to the notice that our deficits are $60 or $66 or $68 or $70 or $75 billion a year.

Therefore, I regard any change in any program which shifts the burden to the General Treasury as a very serious move on the part of Congress. It denotes a trend that will be most difficult to stop.

We also go around in circles in this whole process of thinking about employment and unemployment compensation when we finance things with Federal deficits.

There is not any dispute that deficits cause inflation. Inflation is one of the biggest causes of unemployment. When we have wild inflation it takes practically all many families can earn to provide the bare necessities of life.

Now, it does not take very much of a work force in this country to provide only the necessities of life. It is when workers and other people have some money left from their income, their wages and income, that they can buy things beyond the bare necessities of life that we have full employment. It may be carpets, it may be drapes, it may be automobiles, it may be new houses, it may be an addition to the house, it may be skis, it may be a television or many, many things. If they have money to buy those things, we have full employment. It is that simple.

With the efficiency we have in this country it does not take but a small part of our labor force to provide the necessities of life.

So whenever we pursue a course in this Chamber and in Congress generally that adds to the deficit and adds to inflation, we add to the unemployment. That is what makes all of the predictions and hopes become disappointing so often.

So, Mr. President, I hope the entire membership will take note of this material change in this law of shifting a burden from the Federal unemployment tax to the general fund.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. ANDERSON). The question is on agreeing to the first committee amendment.

The first committee amendment, to section 101, as follows:

On page 2, beginning with line 5, strike through and including line 8 and insert in lieu thereof:

(a) GENERAL RULE.—Section 102(f)(2) of the Emergency Unemployment Compensation Act of 1974 is amended to read as follows:

"(2) No emergency compensation shall be payable to any individual under an agreement entered into under this Act—

"(A) for any week ending after September 30, 1977, or

"(B) in the case of an individual who (for a week ending before September 30, 1977) had a week with respect to which emergency compensation was payable under such agreement, for any week ending after December 31, 1977.".

Mr. BELLMON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CURTIS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, I wish to have the attention of the distinguished chairman of the committee, the distinguished Senator from Louisiana (Mr. LONG). It is the intention of the Senator now speaking to offer an amendment so that we could have a separate vote on the question of paying for emergency unemployment compensation from general funds. May we have an understanding that a motion to strike out that section will be in order notwithstanding the adoption of the committee amendments earlier?

Mr. LONG. Yes. As a matter of fact, Mr. President, the only thing that keeps that from being done at this moment is simply that we agreed to all the committee amendments except those to sections 101 and 104. It is only because we are on section 101 that the Senator could not move his amendment now. If he wishes to make the motion now I am glad to consent that his motion to strike be in order.

Mr. CURTIS. I understand there is another Senator who is supposed to go first. I ask unanimous consent that at the appropriate time it shall be in order, notwithstanding any other order, to offer a motion to strike this section from the bill before us.

Mr. JAVITS. Could we know where it is?

Mr. CURTIS. The bottom of page 8.

Mr. LONG. He is referring to section 103.

Mr. JAVITS. Let me see it. Bottom of page 8.

Mr. CURTIS. Yes, financing from general funds instead of unemployment.

Mr. JAVITS. That is under the heading, yes. That is the whole provision.

Reserving the right to object, I ask the Senator, so we may get an idea of the time, exactly when he would hope to proceed with that as I have quite a number of amendments beginning with the first amendment on page 2 of the bill.

Mr. CURTIS. I have no urgency.

Mr. JAVITS. Sometime soon.

Mr. CURTIS. I shall be happy to cooperate with other Senators on the schedule

Mr. JAVITS. I thank my colleague.

I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 111

Mr. BARTLETT. Mr. President, I ask unanimous consent that it be in order to call up my unprinted amendment, which I send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Oklahoma (Mr. BARTLETT), for himself, Mr. THURMOND, Mr. ALLEN, Mr. HELMS, and Mr. MCCLURE, proposes unprinted amendment numbered 111.

The amendment is as follows:

Section 225(1) of Public Law 90-206 is amended to read as follows:

"(1) EFFECTIVE DATE OF AND CONGRESSIONAL APPROVAL OF RECOMMENDATIONS OF THE PRESIDENT.—

(1) Within sixty (60) calendar days of the submission of the President's recommendations for the Congress, each House shall conduct a separate vote on each of the recommendations of the President with respect to paragraphs (A), (B), (C), and (D) of subsection (f) of this section, and shall thereby approve or disapprove the recommendations of the President regarding each such subparagraph. Such votes shall be recorded so as to reflect the votes of each individual Member thereon. If both Houses approve by majority vote the recommendations pertaining to the offices and positions described in any such subparagraph, the recommendations shall become effective for the offices and positions covered by such subparagraph at the beginning of the first pay period which begins after the thirtieth day following the approval of the recommendation by the second House to approve the recommendation.

(2) Any part of the recommendations of the President may, in accordance with express provisions of such recommendations, be made operative on a date later than the date on which such recommendations otherwise are to take effect.

Section 225(j) of Public Law 90-206 is amended by inserting immediately after "subsection (b) (2) and (3) of this section shall" the language ", if approved by the Congress as provided in subsection (i),".

Title II of Public Law 90-206 is amended by adding a new section 226, as follows:

"Section 226. Repeal of 1977 pay adjustments. Notwithstanding any other provision of this Act, all changes in compensation of federal employees occurring since January 1, 1977, pursuant to section 225 of this Act, are hereby repealed.".

Mr. BARTLETT. I ask unanimous consent that the amendment be divisible in two parts and that there be a separate vote on each one of them.

The PRESIDING OFFICER. Without objection, the amendment will be so divided.

Mr. JAVITS. Mr. President, reserving the right to object, may we know the nature of the amendment?

Mr. BARTLETT. The first part has to do with considering salary increases prospectively; the other is a vote on the salary increase given this year.

Mr. JAVITS. I thank my colleague. I have no objection.

Mr. President, will the Senator yield to me for one second?

Mr. BARTLETT. I yield.

Mr. JAVITS. I ask unanimous consent that Don Zimmerman and David Dunn of the committee staff, Martin Jensen of Senator WILLIAMS' staff, and Chuck Warren, of my staff, have the privileges of the floor during the debate on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. I thank my colleague.

Mr. BARTLETT. Mr. President, I ask unanimous consent that Mr. Joe Heaton and Mr. Ed King of my staff be accorded privileges of the floor during consideration of this matter and other matters on this bill and the votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BARTLETT. Mr. President, I yield to the Senator from Wyoming, without losing my right to the floor.

Mr. HANSEN. Mr. President, I thank my distinguished colleague from Oklahoma.

I ask unanimous consent that Linda Gould of my staff have the privileges of the floor during the debate and any votes on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HANSEN. I thank the Senator.

Mr. BARTLETT. Mr. President, I asked that the matter be divided with separate votes, and it is my understanding that the Chair ruled that it is divided.

The PRESIDING OFFICER. That is correct, and there is a 1-hour time limitation.

Mr. BARTLETT. Yes, 30 minutes to each side.

Mr. LONG. Mr. President, I believe that a time limitation was requested last night on condition it be agreeable to the manager of the bill, and I prefer not to agree to it. Frankly, after the proponents have made their case I really do not anticipate taking any great deal of time, and I plan to move to table the amendment after it has been discussed and explained by the Senator and the cosponsors. That being the case, since I prefer not to take all our time, I will object to the unanimous consent. We will simply go ahead and vote when it is appropriate.

The PRESIDING OFFICER. The Senator is correct, and the time limitation is withdrawn.

Mr. BARTLETT. I am correct that the Chair did rule that the question is divided and there will be separate votes on each?

The PRESIDING OFFICER. The Senator is correct.

Mr. BARTLETT. I ask for the yeas and nays on each of the two votes.

The PRESIDING OFFICER (Mr. KENNEDY). Without objection, it will be in order to order the yeas and nays on two amendments with one show of hands. Is there a sufficient second?

There is a sufficient second.

The yeas and nays are ordered on both sections of the amendment.

Mr. BARTLETT. Mr. President, this amendment pertains to the pay increases that recently went into effect and also pertains to the procedure by which any such future increases would be considered.

The future increases, I point out to my distinguished friend, the Senator from Louisiana, will be the first question for voting and the past salary increase, which has been given so much discussion will be the second question.

Let me acknowledge at the outset of my remarks that this is not an amendment which directly pertains to the pending bill. It is, however, an amendment which is particularly timely. I do believe there are very good reasons for considering this amendment in connection with the pending bill.

Mr. President, for the past several days, we have been giving in-depth consideration to the issue of senatorial ethics and conduct. Many of my colleagues on both sides of the aisle have expressed reservations not only about specific provisions of the ethics resolution, but about the whole thrust of our concern with ethics. Unfortunately, many Senators feel compelled to vote for some kind of ethics bill in order to atone for our pay increase. I therefore believe that it is appropriate that we consider directly the questions related to the pay increase at this time, before a final vote on the ethics resolution. The unemployment compensation bill, since it comes up today, is as good a place as any for us to take a hard look at some basic questions about pay increases.

The adverse public reaction to the last pay increase for Members of Congress and others was so substantial that none of us here could have failed to note it. The public criticism of the increase was due to two different reasons primarily. First, the public objected to the size of the increase. Members of Congress, for example, received an increase of $12,900 at a time when other Americans all across this country were having to tighten their belts to deal with the effects of inflation. The folks back home were understandably irritated that those of us here in Congress should insulate ourselves from the effects of inflation when, in the minds of many, we were the ones causing it in the first place.

The second cause for public indignation was the manner in which we got the pay increase. Through the provisions of law enacted in the 90th Congress, we got our pay increase without ever having to take a public stand on it. On virtually every other type of question to come before the Senate, we take a position. But on pay increases for ourselves and others, we do not. It is the same folks who pay the bills in either case. It seems to me that the same procedure should apply.

The amendment which I now offer would deal with both of these causes for concern. First, it would wipe out those provisions of law which allow for automatic or anonymous pay increases, without Members of Congress having to vote on them. It would provide that any recomendation of the Commission on Executive, Legislative, and Judicial Salaries would have to be approved by both Houses of Congress before it could go into effect. The "back-door" pay increase feature of the present law would hence be eliminated.

This amendment would also repeal the pay increase which took effect early this year for Members of Congress, the Federal Judiciary, and selected legislative and executive branch employees. I realize that some of the increases may have been justified. Regardless of that, we in Congress should have to face that issue directly. We should have to weigh the issue on the merits just like we do any other bill that takes money out of the public purse.

I believe that the changes in the law that I have proposed in this amendment will bring a new sense of responsibility to pay increase decisions. It rejects the false notion that pay increase decisions should be "nonpolitical," and recognizes that we ought to be prepared to publicly justify our actions on such decisions.

Mr. President, adoption of this amendment would be a much better means of correcting any mistakes we have made on pay increase questions than adopting a stringent code of ethics or code of conduct. Such a code ought to be considered separately, on its merits. So too should the pay increase questions be forthrightly considered on their merits. This amendment would kill two birds with one stone.

Mr. President, I urge my colleagues to adopt this amendment, and I reserve the remainder of my time.

Mr. LONG. Mr. President, it seems to me that this question has been pretty thoroughly debated. Those of us who voted for the pay raise legislation had our reasons for taking our positions. I for one do not like to be the one who determines what my pay rate should be. I would far rather that someone else would make a study and say what the level of pay should be, and if the President wants to recommend that, as far as I am concerned, I would like that to settle it. That is one situation where the conflict of interest is most apparent on behalf of a Member of Congress, when he must vote to raise his own salary.

Personally, I liked the approach that we would try to take that matter out of partisan politics by turning it over to a qualified group representing people in all stations of life, representing all the viewpoints that one could expect to find in this country, and people who ought to understand the matter—to have them say what our salary should be, and that would be all there was to it. I feel qualified to pass on the salaries of others, but I am reluctant to pass on my own.

Those who favor this approach have voted before that they prefer to have an impartial group fix our salary for us, and once this procedure is well understood by the American people, I do not think we will hear any more about it.

The amendment is not germane to the bill. The Senator certainly has a right to offer it. We have voted on the proposition before, when we voted on tabling the Allen amendment. We made our position clear that we were in favor of the recommendation of the commission being made effective when we voted to table the amendment.

Mr. President, I move that the amendment be laid on the table.

Mr. ALLEN. Mr. President, will the Senator withhold his motion for 5 minutes?

Mr. LONG. Mr. President, without waiving the motion or any of my rights, I ask unanimous consent that the Senator from Alabama be recognized for 5 minutes.

The PRESIDING OFFICER. Does the Senator withdraw his motion?

Mr. THURMOND. Mr. President, will the Senator also yield to me?

Mr. LONG. Then, under the same conditions, I ask that the Senator from

South Carolina be recognized for 3 minutes.

Mr. BARTLETT. Will the Senator include me for 2 minutes?

Mr. LONG. The amendment is not germane to the bill; but I ask that the Senator from Oklahoma be included also.

The PRESIDING OFFICER. Does the Senator withdraw his motion?

Mr. LONG. No; I ask unanimous consent that, without prejudice to my rights, the Senator from Alabama be recognized for 5 minutes, the Senator from South Carolina be recognized for 3 minutes, and the Senator from Oklahoma be recognized for 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Alabama is recognized.

Mr. ALLEN. I thank the Chair.

Mr. President, I support this amendment in both of its aspects. There will be separate votes. The first vote will be on the provision having to do with further increases in the compensation of Members of Congress. It has to do with the procedure that occurs every 4 years, where the Presidential Pay Commission makes recommendations to the President, he either accepts them or revises them, and sends them to Congress, and they go into effect unless one House or the other disapproves of the recommendation. Under that state of affairs, it is almost impossible to get an up or down vote on this issue, and if no action is taken, then the recommendations of the President would go into effect.

Under the amendment of the distinguished Senator from Oklahoma (Mr. BARTLETT), that is changed, and when the recommendations are made, it would require an affirmative vote of both Houses of Congress to accede to those changes, and further, it would provide for dividing the recommendations as to the departments of Government, Congress, the Judiciary, and the Executive Branch, so that one could be approved and the others disallowed. But whatever a majority of both Houses decide the compensation should be, that would be what it would be.

The second phase of the amendment would repeal the increase that took place, and would leave the compensation of Members of Congress at $44,600. I believe, Mr. President, if we are talking about ethics here, and the need to pass an ethics bill, that the adoption of these two amendments would do more to restore public confidence in Congress than the passage of this ethics bill on which we have spent almost 2 weeks. So I heartily approve of the amendment, both aspects of it, and I hope both amendments will be adopted.

The PRESIDING OFFICER. The Senator from South Carolina is recognized for 3 minutes.

Mr. THURMOND. Mr. President, I shall say just a few words on each part of the amendment.

The first part of the amendment provides that when the President sends up recommendations, within 60 days there will be a vote by the House of Representatives and the Senate on these matters. It seems to me that that is a fair way to do it. When it automatically goes into effect, whether it is right or not, the public gets the impression that there is something hidden going on, in that the Members have not voted and gone on record, so that they can be accountable, as to whether it is the right thing to do or not. So it seems to me that is a wise provision, and I favor it.

As to the second provision of the amendment, it provides that the raises made this year would be repealed.

I voted against the increase in salary. I have already stated that I am going to give any increase I receive to put into scholarships for worthy and needy students. But I wish to say, aside from that, that I feel we should not raise salaries at this time. If we are going to stop inflation, we have to stop spending more, and we cannot stop spending more as long as we raise our own salaries, because it appears, with us being at the top, so to speak, that when we raise our salaries that encourages everyone else in the Government to want a raise, too.

I am told now that even the staff members on the commitees and all would go up to $50,000.

We just cannot explain that to people back home. It is impossible to explain it. It is very difficult to explain to them the increase in a Senator's salary at this time when we are running in debt so much, when the budget is so high, and when we are paying $40 billion in interest on the debt. It seems to me that we ought to show the restraint necessary and set the example for the Nation, trying to reduce the budget and reducing the debt instead of increasing it.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for 2 minutes.

Mr. BARTLETT. The first part of the amendment on which there will be a vote refers to within 60 calendar days of the submission of the President's recommendations to the Congress with respect to salary increases in the various offices and positions described as A, B, C, and D. This is an amendment which many people in the Senate, and I really feel a majority, would like to see passed.

This would require a record vote and it would require a separate vote on each of the four categories: one vote on Senators and Members of the House of Representatives and the resident Commissioner of Puerto Rico; another vote on offices and positions in the legislative branch; then the judicial branch of Government, and then the executive branch.

The second part of the amendment, of course, rescinds the recent pay increase. This provides an opportunity for a Senator to record or rerecord his vote on the previous Allen motion. It is my understanding there has been a lot of speculation that perhaps that vote was not a conclusive vote. I believe this gives an opportunity, the only opportunity, for a vote after the fact. I believe these two parts of the amendment separate the issue of salary increases from the matter of the ethics bill.

I believe the two matters should be considered on their own merits, the ethics bill and salary increases, rather than having the two intermingled, as has been the case, in the debate over the last several days on the ethics resolution.

It is my hope that both parts will be adopted and that the motions to table which will be made by the distinguished chairman will be defeated.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Mr. President, I have made my motion to table and I believe we have an understanding that we will not vote before 12:30.

Mr. CURTIS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. CURTIS. Is the motion to table the entire Bartlett amendment or the first part of it?

Mr. LONG. I believe it would take two motions.

The PRESIDING OFFICER. The motion was wrong at the time the Senator yielded.

Mr. LONG. Let me address a parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. LONG. Can I, under the rules, move to table the entire amendment?

The PRESIDING OFFICER. Since it has been divided the Senator would have to make two motions.

Mr. LONG. Then I move to table the first part of the amendment.

The PRESIDING OFFICER. The question would be on the motion to table.

Mr. LONG. Mr. President, I suggest the absence of a quorum.

Mr. BARTLETT. Mr. President, I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. The yeas and nays have not been ordered.

Mr. LONG. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. LONG. A motion will be made to table the second portion, too. I ask for the yeas and nays on that.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays at this time.

The PRESIDING OFFICER. Without objection, it is in order to ask for the yeas and nays at this time.

Mr. LONG. I ask for the yeas and nays, Mr. President, on the second portion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Louisiana to table the first part of the amendment of the Senator from Oklahoma. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Hawaii (Mr. MATSUNAGA) is necessarily absent.

I further announce that the Senator from Michigan (Mr. RIEGLE) and the Senator from Delaware (Mr. BIDEN) are absent on official business.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) would vote "yea."

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD) and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "nay."

The result was announced—yeas 30, nays 64, as follows:

[Rollcall Vote No. 81 Leg.]

YEAS—30

Abourezk	Glenn	Long
Bayh	Gravel	Magnuson
Bentsen	Hathaway	McGovern
Brooke	Hollings	Morgan
Byrd, Robert C.	Huddleston	Moynihan
Case	Humphrey	Ribicoff
Cranston	Inouye	Sarbanes
Eagleton	Jackson	Stevenson
Eastland	Javits	Talmadge
Ford	Kennedy	Williams

NAYS—64

Allen	Goldwater	Pearson
Anderson	Hansen	Pell
Baker	Hart	Percy
Bartlett	Haskell	Proxmire
Bellmon	Hatch	Randolph
Bumpers	Hayakawa	Roth
Burdick	Heinz	Sasser
Byrd, Harry F., Jr.	Helms	Schmitt
	Johnston	Schweiker
Cannon	Laxalt	Scott
Chafee	Leahy	Sparkman
Chiles	Lugar	Stafford
Church	Mathias	Stennis
Clark	McClellan	Stevens
Culver	McClure	Stone
Curtis	McIntyre	Thurmond
Danforth	Melcher	Tower
DeConcini	Metcalf	Wallop
Dole	Metzenbaum	Weicker
Domenici	Muskie	Young
Durkin	Nelson	Zorinsky
Garn	Nunn	

NOT VOTING—6

Biden	Hatfield	Packwood
Griffin	Matsunaga	Riegle

So the motion to lay on the table the first part of the Bartlett amendment was rejected.

Mr. LONG addressed the Chair.

The PRESIDING OFFICER. The question is on agreeing to division 1 of the amendment. The yeas and nays have been ordered.

The Senator from Louisiana.

Mr. LONG. Mr. President, I assume, considering the 63 votes, that those who voted to table would vote for the first half of the amendment. I therefore believe that to save time we might as well dispense with the yeas and nays and that the Senator's amendment be agreed to on a voice vote, if that is all right with the Senator.

Mr. STEVENS. On the first section.

Mr. LONG. Mr. President, I ask unanimous consent that we dispense with the yeas and nays on the first section.

The PRESIDING OFFICER. Is there objection to vitiating the yeas and nays on section 1?

Mr. BARTLETT. Objection.

The PRESIDING OFFICER. Objection is heard.

The clerk will call the roll on division 1.

The second assistant legislative clerk proceeded to call the roll.

The PRESIDING OFFICER. The Senate is not in order. Senators will take their seats. The clerk will suspend until the Senate is in order and the Senate is not in order.

Mr. CURTIS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senate is not in order. The Chair will recognize the Senator when the Senate is in order.

Senators will take their seats.

Mr. CURTIS. Mr. President, my parliamentary inquiry is this: What is the question on which we are about to vote?

The PRESIDING OFFICER. Division 1 of the amendment of the Senator from Oklahoma.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Michigan (Mr. RIEGLE) and the Senator from Delaware (Mr. BIDEN) are absent on official business.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) would vote "yea."

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD) and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "yea."

The result was announced—yeas 82, nays 13, as follows:

[Rollcall Vote No. 82 Leg.]

YEAS—82

Allen	Garn	Nelson
Anderson	Glenn	Nunn
Baker	Go'dwater	Pearson
Bartlett	Hansen	Pell
Bayh	Hart	Percy
Be'lmon	Haskell	Proxmire
Bentsen	Hatch	Rando'ph
Brooke	Hayakawa	Ribicoff
Bumpers	He'nz	Roth
Burdick	Helms	Sarbanes
Byrd, Harry F., Jr.	Hollings	Sasser
	Huddleston	Schmitt
Cannon	Humphrey	Schweiker
Case	Inouye	Scott
Chafee	Jackson	Stafford
Chiles	Javits	Stennis
Church	Johnston	Stevens
Clark	Laxalt	Stevenson
Cranston	Leahy	Stone
Culver	Lugar	Talmadge
Curtis	Mathias	Thurmond
Danforth	McClellan	Tower
DeConcini	McClure	Wallop
Dole	McIntyre	Weicker
Domenici	Melcher	Williams
Durkin	Metzenbaum	Young
Eagleton	Morgan	Zorinsky
Ford	Muskie	

NAYS—13

Abourezk	Kennedy	Metcalf
Byrd, Robert C.	Long	Moynihan
Eastland	Magnuson	Sparkman
Gravel	Matsunaga	
Hathaway	McGovern	

NOT VOTING—5

Biden	Hatfield	Riegle
Griffin	Packwood	

So division 1 of Mr. BARTLETT's amendment was agreed to.

Mr. BARTLETT. Mr. President, I move to reconsider the vote by which the first part of the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LONG. Mr. President, the next vote comes on the last half of the amendment which is proposing to call off the pay raise which had been previously put into effect.

I believe it is perfectly clear why it is that Senators want to call off the pay raise, and they certainly have a right to do so. I personally do not think we should do that. I do not think we ought to debate the matter all day long. If Senators want to vote to terminate the pay raise, not to have any pay raise, then, of course, they should vote against the motion I am going to make, because I am going to move to table the pending amendment.

Mr. ROBERT C. BYRD. Mr. President, will the Senator withhold?

Mr. CANNON. Mr. President, will the Senator withhold for a question?

Mr. LONG. I withhold.

Mr. CANNON. If this amendment is approved would that mean all of those who had received the pay increase in the interim would have to refund that to the Federal Government, including the executive, legislative, and judicial branches?

Mr. LONG. Well, the amendment states "all changes in compensation of Federal employees occurring since January 1, 1977, pursuant to section 225 of this Act are hereby repealed." So I guess that is what it would mean.

Mr. CANNON. It would require a repayment then on the part of all of the executive, judicial, and legislative branches to the Federal Government.

Mr. LONG. There is no provision to forgive somebody for the higher pay he has already received, so I would assume that is the case.

Mr. ROBERT C. BYRD. Will the Senator withhold for just 2 minutes?

Mr. DURKIN. Mr. President, will the Senator yield for a unanimous-consent request, without losing his right to the floor?

Mr. LONG. Not knowing what it is, I yield for a question.

Does the Senator want a staff member on the floor?

Mr. DURKIN. Mr. President, I ask unanimous consent that Mark Coven and Steve Gordon of my staff have the privilege of the floor during the votes and discussion of the pending matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CANNON. Mr. President, may I also ask the same for William Kroger of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, the Senate has already voted on this issue several weeks ago when I moved to table the amendment by Mr. ALLEN, whose amendment would have had the effect of rejecting the proposal that was made by President Ford, supported by President Carter, and initiated by the Peterson Commission on Executive, Judicial, and Legislative Salaries.

I know it is a very popular thing back home to stand against a pay raise for Members of Congress.

This has been misnamed "the congressional pay raise." It was, instead, a Federal pay raise. It affected 2,496 high-level positions in the executive, judicial, and legislative branches. It affected, indirectly, 20,365 other Federal employees whose salaries are tied to congressional pay. In all of these instances, it involved Federal employees in the executive, judicial, and legislative branches who had not a single pay raise since 1969, with the single exception of a 5-percent comparability pay increase 2 years ago.

In that 7-year period, the cost of living had increased more than 60 percent; average private wages had increased 70 percent; and the average increase for general civil service Federal employees had increased 65 percent.

Now, Mr. President, I received a lot of mail criticizing me for that vote. But I felt it was in the best interests not only of Congress but also of the other branches of the U.S. Government that these high-level employees be given a pay increase. They have been denied a pay raise since 1969, during which time the cost of living was going up more than 60 percent, and their pay raise on February 20 amounted only to a 29-percent increase, and when combined with the 5-percent comparability increase 2 years ago, amounted to only 34 or 35 percent in 7 years. Consider the fact, also, that had the salaries of Members of Congress merely kept pace with inflation since 1968, they should now be earning $68,000 annually instead of $57,500.

We have got to, at some point, show a little bit of guts in the best interests of the Senate as an institution, and the long-delayed pay increase was not only fair but deserved.

Now, any Senator who wants to return his pay can do it. I returned the 5-percent increase through last year, and my senior colleague returned his comparability increase. But I do not intend to return this increase. I think I am entitled to it. I think the people of West Virginia believe I am worth the pay I am getting.

I am not going to admit that I am a half-time Senator or that I am a cut-rate Senator by supporting this amendment. I am not a cut-rate Senator.

The average Senator works 11 hours a day, 6 days a week. I do not think we should be cowards. I know that there are some Senators who believe sincerely that we went about it the wrong way.

We did have a vote in the Senate, contrary to what has been said about the Federal pay raise. The media has done a hatchet job on us, and the people have been led to believe that we did not have a vote on this matter in the Senate. We had a vote on it. We had a vote on my tabling motion. I voted to table the Allen amendment because I was in favor of the pay increase. And we are about to vote again on the Federal Pay increase.

Now, if we want to wipe out this increase, we had better stop and think as to what it is going to do to those Federal employees in the executive branch and in the judicial branch who have at long last received a pay increase that was due them. We are going to have some real problems on our hands.

So, I appeal to Members of the Senate to take a stand for the institution. It is in the interest of this institution that Members get paid a just wage, and it has been too long delayed. So, I am going to support this motion to table, and if Members want to blame me for it they can do that in talking with their constituents back home. But I am asking colleagues to support this motion to table. We have gone up and down this road once before. Why do we have to continue and continue and continue simply because there is a little heat from back home on a matter that is not fully understood by the majority of the American people and which has been distorted and unfairly treated by some of the critics.

There are a good many instances at least in which I have written to my constituents to explain to them the fact that the Senate did vote in relation to the Federal pay raise and the fact that we were following a procedure that was set up some years ago to get the setting of congressional salaries out of politics, and when I laid all of the facts before them, a good many of my constituents wrote back to say that now that they clearly understand the situation they support the increase.

So I support the motion to table by Mr. LONG.

Mr. BAKER. Mr. President, will the Senator from Louisiana yield to me so I may speak on this matter briefly?

Mr. LONG. I yield to the Senator. How much time does the Senator require?

Mr. BAKER. Two minutes.

Mr. LONG. I ask unanimous consent that I may yield the Senator 3 minutes without prejudice to my rights to the floor.

The PRESIDING OFFICER (Mr. SPARKMAN). Without objection, it is so ordered.

That is 3 minutes from the time of the Senator from Louisiana.

Mr. HANSEN. Yes.

Mr. BAKER. Mr. President, I commend the majority leader for his forthright stand on the pay increase; and I stand beside him. I support this pay increase. I shall support this motion to table. I have asked the Members on this side of the aisle to consider reality and the substance of the issue before us.

Maybe no one knows better than I how difficult it is to go back home and explain a congressional pay increase.

But, Mr. President, I admonish my colleagues in thinking that it is absolutely essential, under present circumstances, that we adjust our salaries to correlate to the economic reality. Such action has simply not been done until now.

It is a patent conflict of interest for Members of Congress to be required to adjust their salary. But the Constitution created that conflict of interest. We did not. No one else can adjust our salary; and if we do not, Mr. President, only those persons who can afford to make huge financial sacrifices will be able to serve as U.S. Senators. That is not the way it should be. The membership of the Senate should include a good cross section of the people of this Nation.

So, Mr. President, I reiterate what I have said before. I stand beside the majority leader in support for the motion to table this amendment. I believe the pay increase should be left intact. I believe every Member of the Senate on both sides of the aisle is entitled to that pay increase; and I think action to the contrary by any Member would be an injustice not only to himself, but to the Senate and the country as well. So, Mr. President, I urge my colleagues to vote in favor of this tabling motion.

Mr. HANSEN and Mr. MOYNIHAN addressed the Chair.

Mr. LONG. Mr. President, how many minutes does the Senator require?

Mr. HANSEN. Three minutes.

Mr. LONG. I yield 3 minutes to the Senator from Wyoming.

Mr. HANSEN. Mr. President, let me say, first of all, there is not a harder working, more dedicated person in the Senate whom I know than the majority leader. I have nothing but the greatest respect for him.

But I think Senators should not lose sight of one basic fact. When we passed this pay raise, in the manner that it was passed, what we did was to address a problem that is unique not only to Senators, Representatives or bureaucrats, but it is common to all Americans. It is the problem of inflation. It is the problem of costs rising above what salaries are. And the point that I object to in the pay raise that was given us is that all we did was to single out a way of addressing our own problems, those of the approximately 2,500 other Federal employees directly affected and some 24,000 or 23,000, however many more there might be who benefit indirectly because of the action we took. I think we failed to recognize and we failed to address the fact that every one of 217 million Americans, or however many of us there are, are equally plagued by the problems of inflation. And we did not do one thing about that.

For a long time I have stood with a number of Members of this body who have tried to do something about balancing budgets, to get a handle on inflation, so that all Americans would not be burdened down with the oppressive weight of having costs rise more rapidly than income. And I would join enthusiastically with colleagues here today—and I have no doubt at all but what this amendment will be tabled—if I had the slightest idea that the Senate was going to say:

> We will get a handle on inflation; we will bring that budget into balance so that costs will not continue to rise.

I have little belief that that will happen. And accordingly, in order to underscore my misgiving with what I think is a very selfish narrow point of view that we sought to address our own problems, while ignoring those of all other Americans, I shall vote to support my good friend from Oklahoma.

I thank our colleague from Louisiana.

Mr. LONG. Mr. President, I ask unanimous consent that Judy Heffner, of Mr. LEAHY's staff, be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered .

Mr. LONG. Mr. President, I now move to table division 2 of the pending amendment.

SEVERAL SENATORS. Vote!

Mr. LONG. I ask for the yeas and nays.

The PRESIDING OFFICER. The yeas and nays have already been ordered.

The question is on agreeing to the motion to lay on the table division 2 of the amendment of the Senator from Oklahoma.

The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. STENNIS) is necessarily absent.

I further announce that the Senator from Michigan (Mr. RIEGLE) and the Senator from Delaware (Mr. BIDEN) are absent on official business.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) would vote "yea."

I further announce that, if present and voting, the Senator from Delaware (Mr. BIDEN) would vote "nay."

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD) and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "nay."

The result was announced—yeas 53, nays 41, as follows:

[Rollcall Vote No. 83 Leg.]

YEAS—53

Abourezk	Hathaway	Metzenbaum
Baker	Hollings	Morgan
Bayh	Huddleston	Moynihan
Bellmon	Humphrey	Nelson
Brooke	Inouye	Percy
Bumpers	Jackson	Ribicoff
Byrd, Robert C.	Javits	Sarbanes
Case	Johnston	Sasser
Chafee	Kennedy	Schweiker
Cranston	Laxalt	Scott
Culver	Long	Sparkman
DeConcini	Lugar	Stafford
Eagleton	Magnuson	Stevens
Eastland	Mathias	Stevenson
Ford	Matsunaga	Weicker
Glenn	McGovern	Williams
Gravel	Melcher	Young
Hart	Metcalf	

NAYS—41

Allen	Domenici	Muskie
Anderson	Durkin	Nunn
Bartlett	Garn	Pearson
Bentsen	Goldwater	Pell
Burdick	Hansen	Proxmire
Byrd, Harry F., Jr.	Haskell	Randolph
	Hatch	Roth
Cannon	Hayakawa	Schmitt
Chiles	Heinz	Stone
Church	Helms	Talmadge
Clark	Leahy	Thurmond
Curtis	McClellan	Tower
Danforth	McClure	Wallop
Dole	McIntyre	Zorinsky

NOT VOTING—6

Biden	Hatfield	Riegle
Griffin	Packwood	Stennis

So the motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. HATHAWAY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BIDEN. Mr. President, I arrived back in Washington from Philadelphia at 1:30 this afternoon to find that I had just missed three very important votes. My office had been assured by the cloakroom that there would be no votes today before 2 o'clock this afternoon. Consequently I spent the morning in the Third Circuit Court of Appeals in Philadelphia hearing the arguments before it involving the Wilmington busing case. As the Members of this body are by now all too aware, this case is crucial to my State of Delaware. I thought it was extremely important for me to be there, and therefore canceled my morning schedule here in Washington under the assumption that there would be no votes.

To set the record straight, I would have voted against the tabling motion of the Bartlett amendment that will require all future pay increases for Congress to be voted on by the Congress.

I would then have voted for the Bartlett amendment in the up and down vote that occurred subsequent to the defeat of the tabling motion.

Finally, I would have voted against the motion to table Senator BARTLETT'S amendment to repeal the pay increase.

These votes are consistent with my position on the pay increase and other related matters in the past. I voted against the pay raise initially because I do not think that at a time when our Nation is hurting so economically that the Congress should set an example by raising our pay thus adding further to the burden of the taxpayers.

Fortunately, today, these votes were not so close that my vote would have made a difference but I am disturbed that I was not here, personally, to partake in the debate and the actual votes.

The PRESIDING OFFICER. The question is on the first committee amendment, section 101.

Mr. JAVITS. Mr. President, in just 1 day—on March 31—the Federal supplemental benefits—FSB—program is scheduled to expire. In fact, because of the definition of "week" in State unemployment insurance laws many States have already stopped taking claims for FSB compensation this week. In light of the continuing economic recession with chronically high unemployment rates, legislation to extend the FSB program must be enacted without further delay.

This program, created in December 1974 at the beginning of the current recession, provides additional compensation for workers suffering long-term unemployment who have exhausted their entitlement to compensation under the permanent unemployment insurance—UI—systems. These are the regular State UI programs, and the Federal-State extended unemployment benefits—FBS—program. FSB is designed to provide the additional income maintenance assistance necessary to permit the UI system to meet at least the minimal needs of unemployed workers during the current recession.

As originally enacted, the FSB program provided up to 13 weeks of additional benefits for workers in all States who had exhausted all other entitlements to unemployment compensation. In March 1975, Congress expanded the program to provide up to 26 weeks of extended compensation for eligible workers. Then, in June of that year, the entire program—originally scheduled to expire on December 31, 1976—was extended through March 31, 1977. In addition, a series of State triggers were added to the program. Under these provisions, workers in States where the insured unemployment rate is between 5 and 6 percent are eligible to receive up to 13 weeks of FSB benefits—providing them a maximum total of 52 weeks of unemployment compensation under all available programs. Unemployed workers in States with unemployment rates of 6 percent or greater are entitled to receive up to 26 weeks of FSB benefits for a potential cumulative total of 65 weeks of benefits.

The FSB program has been highly successful in providing income security for long-term unemployed workers. During calendar year 1976, 2,313,000 of our Nation's unemployed workers were FSB beneficiaries. An additional, but undeterminable, number of unemployed workers would have been eligible to receive benefits except for the operation of State trigger requirements which went into effect January 1, 1976. These State trigger provisions prevented thousands of long-term unemployed workers from FSB eligibility despite the fact that many of them live in high unemployment areas within ineligible States.

A recent study of FSB recipients prepared for the Department of Labor, under the mandate of the Emergency Compensation Act of 1974, indicates that the FSB program is succeeding in reaching unemployed workers most in need of additional assistance during the recession. That study, prepared by Mathematical Policy Research, Inc. of Princeton, N.J. reports that FSB recipients were found to have strong labor market attachment—an average of 17 years—including an average of 5 years of employment at their last jobs. FSB benefits were found to have had a substantial effect on household incomes. Without those benefits, 33 percent of the recipient households in 1975 would have had incomes below the Federal poverty line—$5,500 for nonfarm families of four in 1975. In other words, over a quarter million households were prevented by the receipt of FSB benefits from falling below the poverty line. In addition, the study also found that the single most important cause of an FSB recipient's job loss was the decline in business of their former employers.

FSB benefits also provide direct economic stimuli which aid in continued progress toward economic recovery. They flow directly into the mainstream of the economy from unemployed workers who use them to provide the basic essentials of food, clothing, and shelter for their families. It is important to note that the great majority of long-term unemployed workers will otherwise receive no assistance from any of the economic stimulus legislation recommended by President Carter. I have long taken the position that unemployment compensation is a poor substitute for real jobs, and I have called for the creation of 1 million public service jobs under the Comprehensive

Employment and Training Act, but the fact remains that our ability to create jobs in either the public or private sector is limited. Even if funding were available to create 1 million jobs, and all of them were taken by unemployment compensation exhaustees, hundreds of thousands of long-term unemployed workers would still be left jobless and without any other means of supporting themselves and their families.

When this program was last considered by Congress, in June 1975, it was hoped that by now the recession would have sufficiently abated so as to permit the program to expire without undue hardship accruing to large numbers of unemployed workers. Unfortunately, the economic recovery has been slower than any of us had hoped. Unemployment today remains at the intolerably high level of 7.3 percent. If the FSB program is permitted to expire, 600,000 workers will immediately be cut off from benefits. More than 1 million workers, who would otherwise collect FSB during the next 12 months will be denied such essential benefits. In New York, more than 100,000 long-term unemployed workers will be cut off.

UP AMENDMENT NO. 112

Mr. JAVITS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. JAVITS) for himself, Mr. WILLIAMS and Mr. RIEGLE, proposes an unprinted amendment numbered 112.

On page 2, in lieu of the language proposed to be inserted by the committee amendment, insert the following:

(a) GENERAL RULE.—Section 102(f)(2) of the Emergency Unemployment Compensation Act of 1974 is amended to read as follows:

"(2) No emergency compensation shall be payable to any individual under an agreement entered into under this Act—

"(A) for any week ending after March 31, 1978, or

"(B) in the case of an individual who (for a week ending before March 31, 1978 had a week with respect to which emergency compensation was payable under such agreement, for any week ending after June 30, 1978."

Mr. NELSON. Mr. President, who has the floor?

The PRESIDING OFFICER. The Senator from New York.

Mr. NELSON. Will the Senator from New York yield for a unanimous-consent request?

Mr. JAVITS. I yield.

The PRESIDING OFFICER. The Senate will be in order.

Mr. NELSON. Mr. President, I ask unanimous consent that Scott Ginsburg, a staff member of the Human Resources Committee, be granted the privileges of the floor during the course of deliberations and votes on the pending legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, we are faced with three different versions of the length of time the Federal supplemental benefits unemployment compensation program should be extended. We have the House version, which comes over to us in the bill, which is for a flat 1 year, to expire March 31, 1977. We have the Finance Committee version, contained in the committee amendment to the bill at page 2, which provides that the program shall expire in 6 months, on September 30, 1977, except that those who are already drawing any part of their 13 weeks of FSB compensation before that expiration date may continue to draw unemployment compensation—up to their maximum entitlement—for an additional period of 3 months.

The amendment which I have proposed would extend the program for 1 year to March 31, 1978, with a 3-month phaseout. That is, those who are already drawing payments before March 31, 1978, may continue to draw benefits for up to 3 additional months.

Mr. President, the difference on its face is a very substantial one because of the expectation as to unemployment. Unemployment today remains at what we all consider an intolerably high level of 7.3 percent, with an enormous number, about 7.5 million Americans, unemployed, and with some 600,000 drawing FSB payments right now. It is expected that in the course of this year, if it is extended for a year, about 1.3 million unemployed workers will, at one time or another, be forced to resort to the FSB program.

The Finance Committee proposes that we bobtail what the House has done and make it only 6 months.

No one, not the Finance Committee or anybody else, can reasonably expect any material drop in unemployment in that 6 months. What is the rationale for any such very short extension? We will have to begin to consider another extension the day after we pass this one, knowing the time it takes to do anything in this body.

Here it is one day before Federal supplemental benefits expire. Senator LONG had to get up in the Chamber the other day and say, "Do not intrude anything else on this bill because we just have 1 day or the FSB compensation checks will be cut off."

Mr. President, these are not rosy checks. In my own State, which is one of the most liberal States in the Nation, the maximum benefit is $95 a week. At present prices, that is below anybody's index of what a family of four needs just to keep body and soul together. So we are not dealing with any goldbrickers or welfare chiselers; we are dealing with Americans honestly unemployed through no fault whatever of theirs, who have caused, by their labor, vast sums to be paid into the unemployment compensation system.

I just cannot see any rationale whatsoever for the September 30 cutoff date. The House date makes more sense, because it takes us past the calendar year—that is, the year 1977—when we can get a sighting and appraise our situation in unemployment for the whole year. It gives us an opportunity to act again, because it does not cut the program off on December 31. It cuts it off on March 31, and it permits those who, because they have already begun participating in that program, to continue for the added 12 weeks.

That principle of continuing those already on benefits beyond the termination date, for up to 3 months, is also the principle adopted by the Committee on Finance here. I hardly see how it can be tested in this amendment.

All the amendment does, then, is instead of the House complete cutoff on March 31, cut off on March 31, but permits those who are already under the program to work it out in the ensuing 3-month period. That is the only difference.

The cost involved, Mr. President, is estimated at $400 million for the additional 6 months. It seems to me that, considering the policy undertaken in the last administration—and, I have no doubt, pursued in this one—that we do not want unemployed workers to go on welfare so long as we can reasonably and tolerably provide them unemployment compensation, this is fully in consonance with that principle.

Finally, Mr. President, and very importantly in terms of this particular situation, there is one other critical difference between the House and the Senate. That is the conditions under which a worker can be cut off from unemployment compensation if he does not accept another job which may be offered to him.

The Senator from New Jersey (Mr. WILLIAMS) and I, as chairman and ranking member of the Committee on Labor, think that the House formula is more appropriate than the Senate formula, which is more strict, more restrictive, and more unfair to the worker, than the House formula. We must remember that we are dealing with figures which do not represent any lush benefit, but represent very minimal income security protection. Indeed, in 15 States, the minimum wage is higher than the unemployment compensation.

Thirty-two States are currently participating in the Federal supplemental benefits program. This is a pretty healthy slice of the United States. And, Mr. President, with the most optimistic predictions into 1978 of an unemployment rate of roughly 6.5 percent, only about 1 percentage point down from where it is today, all unemployment predictions have been absolutely dashed to smithereens by this particular recession. That has been the stickiest problem of all. With the Labor Department itself predicting—this is their official forecast—that in the first 3 months of 1978 not less than 20 States will still be participating in this particular program, which we are seeking to extend here for 1 year, I think there is an ironclad case for at least the 1-year extension.

Again I emphasize, Mr. President, the difference between this and the House provision is only that, in this amendment, we are allowing those who already come under the program before the 12-month extension expires to finish out the 13-week period; whereas, the House provided an absolute cutoff at March 31, 1978. It seems to me that, the

Senate committee having itself adopted the 1-month phaseout period, we ought to adopt that, too, in respect of a 1-year extension.

For all those reasons, Mr. President, I hope the amendment will be agreed to

Mr. HATHAWAY. Mr. President, I think one good feature of the amendment offered by the Senator from New York is that it does have a 3-month phaseout period, which is something the committee did agree to. Under the committee bill, the phaseout would start at the end of September. It seemed to the committee, which defeated an amendment similar to the one offered by the Senator from New York by a vote of 11 to 5, that we should think of bringing this to a halt at a time when unemployment historically is about the lowest. That way, fewer people are going to be affected; and that is why we chose to end the program in the month of September.

The Finance Committee acted on this bill in a little over a week. The House took a little longer to do it, but I am sure the House could act more expeditiously if it had to. If we are still in serious trouble as the end of September rolls around—I am sure we are going to be still in session—I would not anticipate any difficulty in extending the benefits if the respective committee and the Congress so desire. At that time, also, we could look at which States are worse off. Maybe we would modify the bill by raising the threshold from 5 percent to a higher percentage, so that we are just getting at those States in the Union where there is high, chronic unemployment. It seems to me that the committee has worked out a very reasonable program.

As the Senator from New York stated, it is going to cost $400 million additional if we adopt his amendment. It seems if we are going to be involved in the expenditure of that much additional money, we ought to do it in stages and look at it again when September rolls around to see what the situation is. We are certainly not locking ourselves in.

The program that we are advocating seems to be a reasonable one for the time being. We are going to be enacting a tax stimulus program very shortly. By August or September, we may have some results. The economy may be bolstered by then, and, hopefully, we shall not need to extend this at all.

Mr. CURTIS. Mr. President, throughout the years, the matter of unemployment compensation has come before the Committee on Finance. This is not the first extension of this emergency program. We have considered this. The committee arrived at a conclusion very much as stated by the distinguished Senator from Maine. We felt that there could not be a sudden and total ceasing of the program on one day, that there had to be a phaseout period; that if someone qualified for the benefits and they had not begun to run at all or just barely started, they should be taken care of. So we adopted the provision in the House bill that there be a closeout time for this emergency program, with anyone on the rolls that would be paid for the next 3 months.

The question is, should this emergency program terminate on September 30 or 6 months later, as proposed by the distinguished Senator from New York? It was the collective judgment of the Committee on Finance that it should close on September 30.

Actually, if it becomes necessary for an extension of our unemployment emergency program beyond that date, I think it is important that the whole Congress take a look at it.

Our unemployment program was structured to be carried on by the States. The States have their basic 26 weeks. This addition was brought on under emergency conditions. We are told every day that the economy is improving. We also know that confidence does have some part to play in the economic well-being of this country.

If we keep on projecting too far in the future gloomy prospects as to what the unemployment situation is, we may not do any harm, but certainly we do not do any good.

I am not here to suggest that by adopting a rosy outlook all our problems will disappear. On the other hand, confidence in our economy and confidence in the future are factors in our economic well-being.

There is another reason why this program should not be extended for a full year. The bill as passed the House and reported out by the committee calls for shifting the cost from the Federal unemployment tax to the General Treasury. I do not favor that. We will get a chance to vote on that, but that vote may not prevail.

Before we launch into a program with more of the attributes of a permanent program, we should take a look at this matter of financing.

There is not any money in the general fund. What it means, we will finance it with I O U's, finance it through the deficit.

For that reason, I think it would be on the part of wisdom to extend this program for the period recommended by the Finance Committee and then take a look at it as time progresses.

My guess is that we will always be acting just before the period expires, so the fact that we will extend it for a year would not remove that, either. In all probability, it would not be reached for further consideration until the closing days of that period.

Mr. President, I urge support of the committee proposal.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. HANSEN. Mr. President, I wish to add one word that has been mentioned earlier, but I think it needs underscoring a second time.

I, too, would oppose this amendment because it seems to me, in addition to the other reasons that are persuasive in my judgment, there must be included the fact that these benefits are to be paid for out of general revenues.

One of the concerns I had, a continuing concern, that I think underscores part of the unease and the displeasure that I see evidences of nationwide in the pay raise about which we have been talking lately, is the fact that we do not do very much—in fact, not nearly enough—about trying to get a handle on inflation.

Anytime a benefit is paid for and the only provision to pay for that benefit is to draw upon otherwise unobligated funds in the general treasury, we add to that budget imbalance which adds to the inflationary pressures.

It seems that should be a concern that Senators have as they vote upon this particular amendment.

I thank my colleagues.

The PRESIDING OFFICER. The Senator from New York.

Mr. JAVITS. Mr. President, it is very interesting to hear these arguments. None of them deal with the reason why we have FSB compensation.

We have FSB compensation because we have a very hard, sticky and trying problem of unemployment. We have not yet found a way to arrest it.

We may have a youth employment bill which will target jobs for, hopefully, a million. We may try some other stratagem, like the House provision to give an employment tax concession for extra employment, for extra workers.

We hope that whatever we do about taxation is going to revive the economy. People like myself and others like me are trying for a permanent tax rate reduction as against the $50 tax rebate, and so on.

But all that is prospective. Here, the only argument made is, "Well, let's see in 6 months how things look."

But the difficulty is that it is not 6 months in which we have to see how things look. It is about 30 days, and there is going to be no change.

If we want to get this bill extended before September 30, 1977, we have to start right now in order to have the hearings and to have the economic forecasts, and so on. We have those.

It is almost inconceivable that it will be argued that we should consider this same question within the same year, twice, when there is absolutely no evidence whatever that there will be any change in the unemployment situation.

Mr. President, I have been here a long time. I realize that the House has said 12 months, the Senate is saying 6, for bargaining purposes.

The Senate does not expect to get 6 and 3. I hope the House expects to get 12, but the Senate does not expect to get 6 and 3.

This amendment will assure the 12-month extension and that is really what is at stake.

What is really at stake is what cards we are going to give our negotiators. Are we going to give them a low card so they can bring duration down, or are we going to give them a higher card so they can bring it up?

Mr. President, the lesson that ought to come out of this—and again we are not gilding lilies here, we know this place well—the very least that has to come out of it is the opportunity after the first

of the year to decide whether we do or do not want to extend. That means at the very earliest February 28, and the preferred date is March 31.

So, Mr. President, I appreciate my colleagues' arguments, the members of the committee, whatever way they voted, feel an obligation to sustain the committee. But it makes no economic sense and it makes no political sense and it makes no congressional procedural sense.

The thing to do is accept the House version at once, and I know we will not get it, unless we vote this amendment, with a cutoff date, March 31, 1978. Otherwise we are going to be cutting off hundreds of thousands of unemployed who do not deserve it, with no change in the economic situation and no change in their reason for needing unemployment compensation, which is unemployment beyond their control. There is no way they have of getting jobs under the existing economic situation until we break this hard nut which, so far, has divided us, of chronic—so far chronic—heavy unemployment which we face today.

One final point. We have had up to 65 weeks of unemployment compensation. Therefore, I say to those who have an eye to economy, et cetera, we are cutting down—no argument about it, I am not moving for that—that extra 13 weeks right in this bill.

So we are very materially, to the extent of roughly a half billion dollars, curtailing the expenditures under unemployment compensation and gambling with the fact that things in unemployment will improve. I am not talking about the general economy, I think it is going to be better, but we have not found an answer to the unemployment riddle. In terms of the general economy, I think we will improve. But in terms of unemployment, it still is and will remain for all of this year intolerably high.

And because it will, Mr. President, I think the remedy has to fit the illness with the remedy found in this amendment.

We will end up, Mr. President, with a sufficient extension only if we give our negotiators the necessary mandate on the up side instead of what the committee wants, or at least what the committee has voted for, the mandate on the very low side.

Mr. President, I urge the Senate to support this amendment.

Mr. HATHAWAY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER (Mr. MELCHER). The Senator will state it.

Mr. HATHAWAY. Is there any time limitation with respect to amendments on this bill?

The PRESIDING OFFICER. No, there is no time limitation.

Mr. HATHAWAY. I thank the Chair.

Mr. President, I point out, first of all, in answer to one of the points that the Senator from New York made, that although it may appear that the Finance Committee picked 6 months with a view of compromising with the House in 12 months to come out with 9 months, there was consideration given to the fact that at the end of September, historically, the unemployment rate has been the lowest. So we were going to do the least damage by terminating the program at that time.

It was not simply an arithmetical calculation of how we were going to arrive at 9 months by splitting the difference with the House. In fact, that argument was not mentioned out loud at all. Oftentimes, in the Finance Committee, as in other committee discussions, the kind of argument that the Senator from New York advances has been advanced openly, knowing full well what is going to happen in conference.

Second, I point out that no Member of this body or the other body is not sympathetic with people who are out of a job. We have a regular benefit program which runs for 26 weeks, and that was initially conceived to take care of the normal dips that we have in the economic activity; and we assumed that people would be out of work for awhile and then they would be able to get back into a job. In the recent past, we have extended that by 13 weeks, which we call our extended benefits; so we now have 39 weeks of what we call unemployment benefits.

The question in my mind is this: When are we going to stop kidding ourselves and stop extending the unemployment benefits? We should realize that after a person has been out of work for 39 weeks, some structural changes, some new programs, have to be initiated, if we really want to do anything. We really are not making a significant contribution by simply adding on a few more weeks or months of unemployment benefits. It seems to me that a person who has been unemployed for 39 weeks does not have a good chance of getting back into the same firm as before, or even the same industry, and we should be coming up with some retraining programs and some other measures that would get that worker into an employable position.

As long as we are going to extend benefits, we are not going to provide either ourselves with the incentive to create the new programs we should nor would we provide the unemployed worker the incentive to start looking around for some other trade or some other business.

So it seems to me that it is much better to keep the period of time as short as the Finance Committee has recommended, rather than extending it another 6 months, as the Senator from New York would have us do.

Mr. JAVITS. Mr. President, I heard two things that bring me to my feet again. One is "adding on."

Mr. President, we are not adding on; we are taking away. There is now in effect a 65-week Federal program. We are taking away 13 by this bill. I agree with that. But that does not mean you take away so much as to jeopardize the economic security of hundreds of thousands of Americans. I think that is a very important and conclusive argument.

I have heard absolutely nothing except the fact that the Finance Committee wants to take advantage of the fact that, on normal statistical curves, unemployment tends to become a little lower in September. None of us is here—I hope not—knowing full well that unemployment is going to go up again after the fall, when people can become available for jobs.

Second, I heard that we were going to come up with retraining programs. Thank heaven we are. But does my colleague tell me that they are going to be ready by September 30, 1977? I will not even embarrass him with the question, unless he wants to answer it.

Mr. HATHAWAY. Mr. President, if the Senator will yield, we have no incentive to come up with these programs when everybody knows we are going to continue the emergency benefits and perhaps run them longer than we have run them before.

Mr. JAVITS. With all respect, the Senator has not read his own bill, which says that if a training program is available and an unemployed worker does not take it, he can be cut off from unemployment compensation.

Mr. HATHAWAY. I have read the bill. I realize that provision is in there. If there is one existing. But we need more training programs.

Mr. JAVITS. I agree, and I will vote for them. But in the meantime, we do not have them.

Mr. HATHAWAY. We have plenty of time between now and September to come up with them.

Mr. JAVITS. The Senator stands there and tells me, knowing this body as he does—and we have not even begun to consider the tax bill or any employment bill—that we have plenty of time between now and September 30 to get retraining programs in place.

Mr. President, I just cannot believe it. I respect my colleague, but I have seen this body in operation a long time. We are going to have very few, if any more, training programs by September 30 than we have today. That is just common wisdom of my colleagues. I do not have to argue this.

Mr. HATHAWAY. I am basing it upon the statement of the new Secretary of Labor, that he has this on his list as a high priority; that he thinks that at the end of his 39-week period, an individual is no longer just an ordinary unemployed individual in society, and that we should be pushing him into these retraining programs so that he can get a job in a different field.

Mr. JAVITS. When, as, and if we have them, I say to my colleague——

Mr. HATHAWAY. So that if we have that kind of support from the administration, we can get some programs.

Mr. JAVITS. I rely upon the common wisdom of my colleagues that we will not have them by September 30, 1977. I think I can rely upon the fact that they have that much common sense and that much knowledge of this legislative process to know the likelihood of developing and implementing a new program that fast.

Mr. HATHAWAY. If that is the case, then we can extend this program, if that becomes necessary.

Mr. JAVITS. If we get to it, if everybody is perfectly agreeable, if it is not the last day, and if it is not whittled down again, as is being done now. Every bill that comes before us has a new battle and adds new unreliability so far as the unemployed are concerned. Right now, we

are lopping of 13 weeks, and from time to time the program may be whittled down further. The unemployed are entitled, like all other human beings, to have some reasonable assurance of economic security at last for the remainder of this year.

Mr. HATHAWAY. We are not really lopping off 13 weeks. We have to go back to the initiation of the program and realize that it was an emergency program. It is not a permanent part of our unemployment act.

Mr. JAVITS. But the emergency is still with us.

Mr. HATHAWAY. We hope that it will not be by the fall, so that at that time we can reenact it, if it is still with us.

Mr. JAVITS. There is not a person in authority in this country who predicts that it will not be with us by the fall, certainly not by September 30—not the Council of Economic Advisers, in the administration, or anyone else I know of.

Mr. President, we can argue this all night. I have no need to prop up the Finance Committee. They have done what they have done, and they will have to answer for it to the entire Senate.

I would also remind my colleagues that this program is triggered on the basis of statewide unemployment rates. If, as the committee and my distinguished colleague from Maine suggest, the unemployment picture improves radically, then the States will automatically trigger off. That is why we have a trigger mechanism in the program. If the program is not needed, it will phase itself out by means of the triggers. But I would point out that this is not the case here and now. The Department of Labor estimates that even in the first quarter of 1978, 20 States will still be participating in the FSB program. Can anyone call that a recovery?

We are talking here about desperately needed income security benefits for those Americans who have borne the brunt of the recession—the long-term unemployed. These workers will not benefit directly from tax rebates. What they need is the one thing we have been unable to provide: jobs. Failing that, we must at least assure them this minimal level of income security protection.

This is our opportunity to appeal to the Senate, as men of reason and sense, to act intelligently in the interests of millions of Americans who are unemployed and need this kind of support.

Mr. President, I am ready to vote. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BROOKE. I regret very deeply that once again there is a need for Congress to address the issue of emergency unemployment compensation benefits. I regret the human costs that these extensions represent: the loss of hope, the lack of income, and the loss of dignity and pride. I regret also the enormous fiscal impact that these continued extensions have on the deepening Federal deficit. Taxpayers are increasingly restive as we again and again expand the Federal commitment in terms of dollars, bureaucracy, and magnitude.

And yet, while I understand the political difficulties which are posed by the advocacy of large Federal programs, I believe that a true emergency exists. In my own State of Massachusetts, for example, unemployment has consistently been 2 to 3 points above the national average. At this very moment the unemployment rate in Massachusetts is hovering at 9.5 percent. We have no recourse but to accept our responsibility in this context of chronic unemployment and to vote for the much needed benefits in a manner which reflects our awareness that these unprecedented high levels of unemployment will not soon leave us.

And that is why I must dissent from the Senate Finance Committee's recommendation and support Senator JAVITS' amendment which will give another year of extended benefits as well as allowing a 3-month phaseout period. It is my strong belief that this amendment more accurately reflects the realities of our economic situation and it allows us to reflect more carefully and more thoroughly on what our long-term response to systemic unemployment must be.

I hope that the Senate will not succumb to the politically expedient recommendation of a mere 6-month extension. I hope that we will not be faced with the specter of piecemeal extensions again and again and again. Defeat of the Javits amendment would virtually insure that 6 months from now we will be back again extending benefits unless there is a marked and pronounced upturn in our Nation's economy. While I, like all of us in this Chamber, hope for better times, I think it is unrealistic to expect that those times will be with us in a scant 6 months. I urge upon my colleagues this point of view and urge that we adopt the Javits amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SPARKMAN (after having voted in the negative). On this vote I have a live pair with the Senator from Michigan (Mr. RIEGLE). If he were present and voting he would vote "aye." I have voted "no," and I, therefore, withdraw my vote.

Mr. CRANSTON. I announce that the Senator from Arizona (Mr. DECONCINI) is necessarily absent.

I further announce that the Senator from Michigan (Mr. RIEGLE) is absent on official business.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "nay."

The result was announced—yeas 37, nays 56, as follows:

[Rollcall Vote No. 84 Leg.]

YEAS—37

Abourezk	Heinz	Metzenbaum
Allen	Huddleston	Moynihan

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Sparkman, against.

NOT VOTING—6

DeConcini	Griffin	Packwood
Goldwater	Hatfield	Riegle

So Mr. JAVITS' amendment was rejected.

Mr. DOMENICI. Mr. President, I ask unanimous consent that Caroleen Silver, of my staff, be granted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment (section 101) was agreed to.

UP AMENDMENT NO. 113

Mr. JAVITS. Mr. President, I send an amendment to the desk, and I ask unanimous consent that it may be considered notwithstanding it is not on the exact order of the committee amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The second legislative clerk read as follows:

The Senator from New York (Mr. JAVITS), for himself and Mr. WILLIAMS, proposes unprinted amendment No. 113.

At the end of section 302 of the bill add a new subsection as follows:

"(e) Paragraph (15) of section 3304(a) of the Internal Revenue Code of 1954 (relating to the denial of unemployment compensation to recipients of retirement benefits) is amended by striking "September 30, 1979" and inserting in lieu thereof "March 31, 1980."

Mr. JAVITS. Mr. President, as a part of H.R. 10210, now Public Law 94-566, the conferees last year adopted a Senate amendment which requires the States to reduce the unemployment compensation of an individual by the amount of any public or private pension, including so-

cial security retirement benefits and railroad retirement annuities, based on the claimant's previous employment. The conferees, however, delayed the effective date of this provision until September 30, 1979, and stated in the conference report that this would thereby permit "the National Commission on Unemployment Compensation an opportunity for a thorough study of this issue and the Congress to act in light of its findings and recommendations."

H.R. 4800, as passed by the House and as reported by the Senate Finance Committee, provides for a 6-month extension, to July 1, 1979, of the final reporting date for the National Commission on Unemployment Compensation. The bill, however, provides no corresponding extension of the effective date for the provision denying unemployment compensation to recipients of retirement benefits. That date would remain at September 30, 1979. My amendment proposes a 6-month delay in the effective date of this provision in order to conform it to the new reporting date for the national commission.

It should be well known by now that pension plans are inadequate for millions of American workers. Congress recognized this fact only 2 years ago when it enacted pension plan reform in the Employee Retirement Income Security Act of 1974. But even ERISA does not guarantee a sufficient retirement income to provide for a retired worker's basic needs. Many older Americans, despite their receipt of some pension benefits, have no realistic alternative other than to search for gainful employment. It should also be well known that older unemployed workers experience greater difficulty in finding new jobs than younger workers, and are often the first to be laid off when business declines.

We need the national commission's views on this provision, which does not even distinguish between workers receiving pension benefits from a pension fund based upon their own contributions—which may be either voluntary or mandatory—and those who receive benefits from plans which are financed entirely or in large part from employer contributions. Indeed, the provision would exclude from UI payments persons receiving benefits under plans for the self-employed or individual retirement accounts for workers whose employers offer no pension plan at all. This is tantamount to penalizing an individual who is drawing on his own life savings.

Where an employee has contributed a significant amount toward his own pension, the receipt of such retirement income should not exclude receipt of UI payments. ERISA and many of our tax laws have been enacted to encourage workers to participate in contributory retirement plans. ERISA provides increased tax incentives for individual plans for self-employed workers, and added a new individual retirement account provision to encourage retirement savings by employees whose employers do not offer pension plans.

If a fair and effective Federal rule should be adopted to deal with possible abuses by workers simultaneously collecting UI and retirement benefits, it will first require the kind of detailed study and careful analysis which is expected of the new National Commission on Unemployment Insurance. In the meantime, most States already have provisions in their unemployment insurance laws dealing with the treatment of retirement income. These provisions establish widely varying forms of treatment for setting off, or disqualifying for, retirement income. The others are obviously free to adopt such provisions at any time.

I believe these considerations make it clear that the retirees provision adopted in H.R. 10210 should not be permitted to go into effect without sufficient opportunity for the Congress to act on the recommendations of the National Commission on Unemployment Compensation.

I hope the managers of the bill may feel that they can accept this amendment because it seems only fitting to conform these two dates.

Mr. LONG. Mr. President, I personally have no objection to the amendment. As I understand it the commission's report would be delayed 6 months under the bill and this could be regarded as a conforming amendment to delay 6 months a provision that the commission is supposed to consider. I am willing to accept the amendment.

Mr. JAVITS. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New York.

The amendment was agreed to.

UP AMENDMENT NO. 114

Mr. CURTIS. Mr. President, I send to the desk an amendment in behalf of the distinguished Senator from Oklahoma (Mr. BELLMON) and myself and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Nebraska (Mr. CURTIS) for himself and Mr. BELLMON, proposes an unprinted amendment No. 114.

On page 9, line 15, insert the following: strike all through line 2 on page 10.

On page 10 strike lines 8 and 9

Mr. CURTIS. Mr. President, this amendment would strike a committee amendment that provides that the cost of emergency unemployment compensation paid after March 1977, would be met from general revenues without the present law requirements that the costs ultimately be met from the Federal unemployment tax.

Mr. President, the supporters of the committee amendment contend that the provision would have no budget impact. Let us examine this contention.

The cost of shifting the financing responsibility from corporate and other employers to the taxpayers of the United States would be $588 million in fiscal 1977 and $300 million in 1978, a total of more than a billion dollars. Perhaps in these days of deficit financing a billion dollars is not considered as having budget impact, but the taxpayers in my State of Nebraska think otherwise.

Mr. President, what I think the proponents of this amendment mean by "budgetary impact" is that the amendment will not affect the current fiscal year. This is a shortsighted view. It is our duty to protect the Treasury and that protection is not waived merely because we are considering budgetary impacts for future years.

Mr. President, in prior years we have used employer payroll taxes to cover these costs. The general taxpayers are being asked to relieve corporate and other taxpayers of this obligation. Utilizing general revenues is grossly unfair to those States which have in the past raised revenues to meet their benefit obligations rather than borrowing from the Federal trust fund for these purposes.

Mr. President, Federal financing is disruptive of the regular unemployment compensation system. It distorts the program's operation which is premised on an insurance concept. An insurance system is not funded from general revenues, but a welfare system is. With Federal financing this bill is a welfare bill.

Mr. President, the bill as reported by the committee would shift a burden of about a billion dollars for the next 2 years from the unemployment tax fund to the general fund. There is much more at stake here than the amount of money involved, although that is very significant. If we make this move of relieving the employers from the tax and levy it on the Federal Treasury, it is a step from which we cannot retreat. We are making a very important decision here.

I see in the Chamber one of the most distinguished members of the Budget Committee, who has joined me in offering this amendment. The very dedicated men who work on the Budget Committee have many problems in seeking to bring the budget under control. The answers are very difficult and complex. But one thing we can do is quit adding to the burdens.

It is hard to stop something that is started. Winston Churchill said it rather dramatically and very clearly when he said, "You cannot unscramble eggs." When we get a program started, to unwind it and set it back where it was before is a most difficult task. That is the task that falls upon the Budget Committee. But there is one very simple rule we could follow that would help a little bit, and that is to quit adding programs that have a budgetary impact on our general revenues.

That is one reason. Another reason is that our unemployment compensation is an insurance system. The employers are taxed, and in about three States, I believe, employees are also taxed. The employers are taxed to provide a fund that pays a benefit when their men are unemployed: an insurance concept. If we change that and start paying money out of the Federal Treasury, we shift, as I say, from an insurance program to a welfare program.

I believe that would be a very bad mistake. It would be unfair to some of the recipients. The employer's tax is a cost of doing business. The American public have accepted that cost as something

fair and necessary and acceptable, in order to protect against the time when a man or a woman is told that his or her services cannot be used, because there is no work to be performed. We will do great damage to those people in taking them off of unemployment compensation and putting them on welfare.

There is another very important reason why this amendment should prevail, and we do not adopt the course of paying these benefits out of the Federal Treasury. That reason is this: As long as the employer pays the bill, it will be to his interest to see that the program is well run. It will be to the employee's interest to see that there are not abuses. In all programs, the number of honest, conscientious people far outnumbers the chislers and the schemers and those who take advantage, but as it now stands, we have the employers on our side, because it is to their economic interest to resist unjustified claims, to expose them, to report them, and so on. If the employer has no financial burden in carrying the program, he is not going to be any more alert to eliminating abuses than he takes his time to help eliminate abuses in welfare, and that does not happen.

Mr. President, this is a bad amendment for the next 2 years, but it is far more important than that. It is turning a corner. We are forswearing the course of unemployment compensation as an insurance paid by an employers' tax, and we are turning to another course, where it takes on all the aspects of welfare and is paid from the general fund.

Mr. President, there is not any money in the general fund. It used to create alarm when we would have a deficit of $2 or $4 billion, and I was alarmed, because I knew what was ahead. Now we are experiencing deficits of $40 billion, $50 billion, $68 billion, $70 billion, and so on. Where are we headed?

It will be hard to take away some programs, but it has got to be done. It is very hard to do that; but it is rather a simple thing not to add to the burdens of the Federal General Treasury. That is what we will do here if we permit the committee version to prevail. This amendment should be adopted.

Mr. President, I reserve the remainder of my time.

Mr. MOYNIHAN. Mr. President, I rise to compliment our cherished colleague from Nebraska, the ranking Republican member of the Committee on Finance, and only with some hesitation to take issue with his position, not least because I find his position unusual in the Senator from Nebraska.

This is an amendment to add $1 billion to the taxes which American employers will have to pay in years hence—$1 billion which, in the view of the Committee on Finance, they ought not to pay in the interests of the very social purpose of the bill before us, which is to alleviate the burdens of unemployment and, as much as possible, to reduce unemployment.

Mr. President, there is a history to this legislation.

It is perhaps worth recalling that the U.S. economy is now recovering not simply from another movement in the business cycle; it is recovering from the worst depression since the great depression of the 1930's when the present unemployment compensation program was authorized and began. The last recession was without precedent since the beginning of this program. In the course of that recession, Congress extended and then extended again, the number of weeks for which unemployment compensation could be received—to a total of 65 weeks.

All of those extensions were required to be paid for by employers. Each and every dollar spent in that program so far constituted a tax on employers, a tax, however, which there was no possibility of their paying at the time. Thus, every penny paid out so far has, in fact, constituted an advance from the general revenues of the Treasury to the unemployment fund.

These advances, $8.8 billion in all, will have to be repaid. Employers will be repaying them until 1981. The object of the committee's legislation before this body is to put an end to that burden when it is finally over in the 1980's.

Mr. President, last year the Committee on Finance recommended that there be general financing for Federal supplementary benefits to the degree that they are contributed. The Senate thereupon adopted the committee proposal. It went to conference and the House resisting, the Senate receded.

Now, Mr. President, the other body has come to see not so much the error of its ways, but the correctness of the position which the Senate adopted last year, and has provided for the general fund funding. It has made this cogent, simple point in its report on H.R. 4800 of March 31. It says:

> After a person has exhausted regular and extended benefits, the reason for his unemployment can no longer be attributed to his previous employers. Therefore, the financing of any additional unemployment compensation benefits should be shifted from employer payroll taxes to general revenues.

The point very simply is when extraordinary measures are in order, they ought to be national measures and not individual ones; they ought to be national burdens rather than individual ones.

The Senator from Nebraska very correctly says it is very much in the interest of the unemployment compensation program that employers have a direct interest in its correct management, in the rules, and the regulations. They will surely continue to do so under the existing arrangements whereby they will be required to pay for the periods for which they have always paid. The Senate committee has only suggested that extraordinary measures be dealt with by the general revenues of the U.S. Government rather than by employers.

Mr. RANDOLPH. Mr. President, will my colleague from New York yield at this point?

Mr. MOYNIHAN. With the greatest pleasure.

Mr. RANDOLPH. I thank the Senator.

Perhaps this is the appropriate time for the record to reflect this afternoon a fact. I am not being critical of any person or the other body, but I will state only that situation which we face.

Early today, the membership of the Environment and Public Works Committee considered very carefully what could be called a stalemate. The No. 1 priority of the Congress as well as the new administration early this year was to continue the effort which was begun last year, the creation of jobs through public works programs.

We came to the 95th Congress remembering that the money provided last year was not adequate to carry out the more than 20,000 projects throughout the country, worthwhile projects, for which applications were filed.

Today, we recall that in this body we passed the Public Works Employment Act on March 10, of this year. The Senate appointed conferees within a few minutes after the passage of the bill.

Earlier, on February 24, the House had acted on a similar measure.

As of this afternoon, the House has not yet appointed its conferees. There has been an exchange of letters between the chairmen of the respective committees—Representative BIZZ JOHNSON, of Public Works and Transportation in the House, and this Senator, as chairman of the Senate Committee on Environment and Public Works. It was to see if there is a reason—which, frankly, to me is not yet discernible or at least has not surfaced in a way in which I could discuss here—why we have not been able to have that first organizational conference, where we would sit down and assess our differences.

We are not in conference. The House has not appointed its conferees. The Senate conferees are ready and willing and, in fact, we are eager to meet. We want to discuss the differences in the two versions, to at least see where we are with reference to this legislation, which I consider a priority. I believe the votes in the Senate and in the House in the passage of these two bills indicate a very real priority.

We do have a substantial body of unemployed persons in this country. In the State of New York, construction workers are now unemployed at the rate of perhaps 45 percent. Throughout the country there is heavy unemployment among construction workers. In the legislation already passed are the jobs on which construction workers as well as many other workers in many categories will be employed.

In the State of West Virginia, it may mean 15,000 new jobs or at least that many people at work and gainfully employed developing those community projects which are very necessary to strengthen the economy for the people in the area represented.

I bring this matter to the attention of this body, because I believe it would be a legislative disaster if we continue as we are now continuing. In fact, we are not continuing. We have stalled even before we have the opportunity to blow a whistle for the beginning of a conference.

I am appreciative of the fact that the able Senator from New York (Mr. MOYNIHAN) was present at the meeting earlier today of the committee and fully understands this problem. I hope the membership of the Senate generally will realize the situation. The correspondence between Mr. JOHNSON and

myself has been in the CONGRESSIONAL RECORD where it can been read.

I believe it is a very serious situation.

I suggest that it does little credit to the legislative process here on the Hill. In stating this as a fact, I am not a carping critic of either one individual or another. I am only reflecting the concern in which I feel all of us find ourselves this afternoon.

Mr. CURTIS. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER (Mr. MATSUNAGA). Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. Mr. President, I thank the distinguished chairman, the Senator from West Virginia (Mr. RANDOLPH), for his comments, which were altogether germane to the matter before the Senate just now. If I recall correctly, the Senate adopted the Public Works Employment Act and the other measures submitted by the Committee on Environment and Public Works by a vote of 74 to 11 as a measure of urgency and concern. We can only be correspondingly concerned that a conference committee has not yet been able to meet.

Mr. RANDOLPH. Will the Senator yield again to me?

Mr. MOYNIHAN. I yield.

Mr. RANDOLPH. Senator MUSKIE also well knows that the construction of waste treatment plants is a very important part of the construction programs that might be carried forward in this country if we are able to bring out a bill.

I think it is also important for us to underscore the fact that the construction season is starting. If we wait until summer to iron out this situation, in a State like Maine, the construction season will soon be coming to an end. I think it is very, very important that the leadership of the Senate will give us its help in a time which, as I have underscored, is a very difficult one.

Mr. MUSKIE. Will the Senator yield?

Mr. MOYNIHAN. With great pleasure, I yield to the Senator from Maine.

Mr. MUSKIE. I think it might be appropriate to answer a question which has been raised with respect to the waste treatment title of the public works bill. The question has been raised as to whether or not that title is relevant to the public works jobs objective of the bill. I point out that, using the formula of 40,000 jobs per billion dollars, which would be applicable both to the accelerated public works title and the waste treatment construction title, this is what it comes to: The accelerated public works title provides $4 billion, or 160,000 jobs, in fiscal 1977 and fiscal 1978. The waste treatment construction program provides $9 billion for fiscal 1977 and fiscal 1978, or a total of 360,000 jobs. With respect to the fiscal year in which we find ourselves, with 34 States running out of waste treatment construction money, their loss in expenditure totals an estimated $3 billion, or 120,000 jobs. Those are jobs we could begin to put in place at the beginning of this construction season, whatever it is, in any State.

In my State, almost any day now, as soon as the snow disappears—and it is melting fast—we could begin the construction season, which would end in October. So there are 120,000 jobs provided by the waste treatment construction program which is close to the total of 160,000 jobs in 2 years provided by the accelerated public works part of the bill. So the two go hand in glove.

I make one other point. Whenever I talk about the justification of public works jobs in a time of recession, I find that the public responds most enthusiastically and most favorably when I connect the public works objective with the objective of cleaning up our waters. That is an argument that, to most citizens, makes about as much sense as any other public works construction in this country. So it seems to me that the leadership in both Houses ought to focus on the importance of getting that important legislation, which is ready, which the Senate has voted to go to conference on, which we could move on before the Easter recess, and on which action at this time would coincide with the beginning of the construction season. There is every conceivable reason under the sun why the Senate and the House should meet in conference, work out their differences, and get this bill to the desk of the President before the recess. I am sure he would sign it as soon as it reached his desk.

I find it incredible that the House has refused, since March 10, to go to conference with the Senate. Senator RANDOLPH said to me privately today that he has never encountered this kind of attitude on the part of the House, that they simply will not sit down with us to talk about the problem. As a matter of fact, as a condition to sitting down with us in conference, they insist that the waste treatment construction part of the bill be stricken. If ever I saw strong arm tactics used in the legislative process, this is it. I think it runs counter to the public interest and I hope that the leadership finds a way to break the impasse.

I thank my good friend from New York, who has been a strong supporter of this program in the Committee on Public Works, for yielding to me so I could raise the subject in the context of this unemployment compensation program.

Mr. MOYNIHAN. Will the Senator mind if I ask one brief question to him?

Would he not think that, by the Senate action in providing the funds that will enable 36 States to complete programs that are underway, for which they do not have the resources but which were mandated by the Federal Government, the Senate has acted to keep good faith with the people of those 36 States who, following the directions of the national Government, undertook programs for which there was to be Federal aid, but for which Federal aid is not now forthcoming?

Mr. MUSKIE. The Senator is absolutely correct. We laid down that promise in 1972. It is true that President Nixon withheld some of that promise by impounding half of that funding, but that impoundment has been lifted. The money has been spent, inflation has eroded its value. Now we need to continue the funding so that States which have these projects ready to go, and whose cost is constantly climbing under the impact of inflation, will be given the means and the wherewithal to go forward. The Senator is absolutely correct. It is a matter of a good-faith commitment.

Mr. MOYNIHAN. I thank the Senator. I thank the chairman.

Mr. President, in sum, the Senate of the United States wants to put America back to work. We have done this in our public works bill. We are doing this through the bill before us today. I regret to say that the amendment we are dealing with involves a tax of $1 billion on American employers. It is a prospective tax, but it is one that they will have to pay. It is a fact they will have to take into consideration in their present plans. It can only inhibit their plans for expansion and for the creation of jobs, which is what we truly desired when we provided insurance against the loss of jobs.

Therefore, with the greatest respect to the cherished Senator from Nebraska, I must rise to say that the Committee on Finance, on the majority side, requests that this amendment not be adotped.

I thank the Chair.

The PRESIDING OFFICER (Mr. MELCHER). The question is on agreeing to the amendment of the Senator from Nebraska. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK) and the Senator from South Dakota (Mr. MCGOVERN) are necessarily absent.

I further announce that the Senator from Michigan (Mr. RIEGLE) is absent on official business.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) would vote "nay."

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD) and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "nay."

The result was announced—yeas 24, nays 70, as follows:

[Rollcall Vote No. 85 Leg.]

So Mr. CURTIS' amendment was rejected.

COMMITTEE AMENDMENT (SECTION 104)

The PRESIDING OFFICER (Mr. SASSER). The clerk will state the next committee amendment.

The committee amendment (section 104) is as follows:

On page 10, beginning with line 10, strike through and including page 13, line 23, and insert in lieu thereof:

SEC. 104. CONDITIONS OF ELIGIBILITY FOR BENEFITS.

(a) GENERAL RULE.—Section 102 of the Emergency Unemployment Compensation Act of 1974 is amended by striking out subsection (g) and inserting in lieu thereof the following new subsections:

"(g)(1) Notwithstanding the preceding provisions of this section, emergency compensation shall not be payable to an individual for any week—

"(A) during which he is not a participant in a training program which is approved by the Secretary if—

"(i) the State determines that there is a need for upgrading or broadening such individual's occupational skills and a program which is approved by the Secretary for such upgrading or broadening is available within a reasonable distance and without charge to the individual for tuition or fees, and

"(ii) such individual is not an applicant to participate in such a program;

"(B) after the first week (in the individual's period of eligibility) during which such individual failed or refused without good cause, to apply for available employment within his capabilities or to accept any bona fide offer of employment; or

"(C) during which he fails to actively engage in seeking work.

"(2) For purposes of paragraph (1)(B), failure or refusal of an individual to accept employment shall be considered to be with good cause ony if—

"(A) the position offered is vacant due directly to a strike, lockout, or other labor dispute;

"(B) the wages, hours, or other conditions of the work offered are substantially less favorable to the individual than those prevailing for similar work in the locality;

"(C) as a condition of being employed the individual would be required to join a company union or to resign from or refrain from joining any bona fide labor organization;

"(D) the worksite of such position is located at an unreasonably great distance from such individual's residence;

"(E) such position involves an unacceptably high risk to the health, safety, or morals of the individual;

"(F) at the time such individual fails or refuses to accept such position, he is a participant in a training program approved by the Secretary or approved by the State agency; or

"(G) the gross average weekly remuneration payable to such individual for the position does not exceed the individual's average weekly benefit amount (as determined for purposes of section 202(b)(1)(C) of the Federal-State Extended Unemployment Compensation Act of 1970) for his benefit year.

"(3) For purposes of paragraph (1)(C), an individual shall be treated as actively engaged in seeking work during any week if—

"(A) the individual has engaged in a systematic and sustained effort to obtain work during such week, and

"(B) the individual provides tangible evidence to the State agency that he has engaged in such an effort during such week.

"(h) Any agreement under subsection (a) shall provide that, in the administration of this Act, States shall make provision for referring applicants for benefits under this Act to any available employment opportunities within their capabilities which are not positions of the type specified in paragraph (2) of subsection (g).".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to weeks of unemployment beginning after the date of the enactment of this Act.

On page 16, beginning with line 21, strike through and including line 23, and insert in lieu thereof:

(a) GENERAL RULE.—The Emergency Unemployment Compensation Act of 1974 is amended by adding at the end thereof the following new section:

"RECOVERY OF OVERPAYMENTS

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

UP AMENDMENT NO. 115

Mr. WILLIAMS. Mr. President, I have an amendment at the desk, and I ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Jersey (Mr. WILLIAMS), for himself, Mr. JAVITS, and Mr. RIEGLE, proposes an unprinted amendment numbered 115:

On page 8, lines 12 and 19, strike "March 31, 1977" and insert in lieu thereof "April 30, 1977".

Mr. WILLIAMS. Mr. President, this amendment is simple and straightforward. It would postpone for 4 weeks the date upon which over 120,000 recipients of emergency compensation would be abruptly and unexpectedly dropped from the rolls.

H.R. 4800, as passed by the House and as reported by the Finance Committee, provides that, effective March 31, maximum benefit duration for an individual would be 52 weeks.

In 24 States, however, the 65-week program is now in effect. In these States, the bill would abruptly terminate benefits on March 31 for individuals who are in their 52d, 53d or later week of receiving emergency compensation.

My amendment would provide up to 4 more weeks of benefits for these individuals, providing them until April 30 to continue their search for work as the weather improves and business picks up. Building tradesmen, who have no significant chance of returning to work until spring weather is firmly established, would especially welcome this amendment.

Technically, the amendment simply sets April 30 as the date for termination of the 65-week program, rather than March 31 as provided by the bill.

Although data on the number of persons affected is difficult to acquire, we estimate that approximately 120,000 FSB recipients are already in their 52d, 53d or later week of benefits. The bill would abruptly terminate their benefits after tomorrow.

This harsh prospect, as provided by H.R. 4800, would impact in the 24 States in which unemployment is so high that the law provides up to 65 weeks of benefits.

This extended duration of benefits was enacted by the Congress for good and sound reasons. Unemployment is so scandalously high in States that qualify for the 65-week program that jobless persons have great difficulty finding work. They need more time for their job search. That is the underlying philosophy of the entire Emergency Unemployment Compensation Act.

Those conditions cannot change overnight. In my home State of New Jersey, for example, the unemployment rate is nearly 11 percent. The competition for available jobs is fierce among the 350,000 New Jersey residents who are counted as unemployed—which means that they want a job, they are looking for a job, but they cannot find a job.

The prospects are no better in such States as New York, with an unemployment rate of 10.2 percent; Michigan, with 9.7 percent; California, with 9 percent; Delaware, with 9.3 percent; Pennsylvania, with 9.1 percent; Oregon, with 10.1 percent; Vermont, with 8.9 percent; and Washington and West Virginia, with that same 8.9 percent level of joblessness.

Mr. President, I believe the 65-week program should be extended for another year, so that the jobless in States with high unemployment and great competition for jobs could continue to have the minimal security that $70 or $80 per week provides them while they search for work.

However, I recognize the realities of sentiment in the Congress in opposition to a program that provides benefits for more than 52 weeks. Hopefully, economic improvements, accelerated by the economic stimulus program recommended by the administration, will make a 65-week program unnecessary in the very near future.

As my colleagues know, however, the economic stimulus legislation will not be in place until at least the first of May. The job picture in high-unemployment States will not improve perceptibly before then.

As a matter of concern and compassion, therefore, I ask my colleagues to join me in preventing the abrupt termination of FSB benefits for tens of thousands of the unemployed in 24 States.

I urge the adoption of my amendment to provide up to 4 more weeks of benefits for the long-term unemployed, providing them until April 30 to continue their search for work.

Mr. President, the equities in this matter are clear. The chairman of the Finance Committee appreciates that 24 States are affected here.

Mr. LONG. Mr. President, the Senator has explained his amendment, and I believe it has merit. It should be taken to conference, and I am happy to support the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Jersey.

The amendment was agreed to.

ADDITIONAL STATEMENTS SUBMITTED ON H.R. 4800

Mr. CRANSTON. Mr. President, I wish to call the attention of the Senate to a questionable practice being perpetuated in H.R. 4800 which is unfair to my State of California.

During the worst of the recession, California raised State unemployment taxes on its employers by some $600 million annually to meet the needs of the State Unemployment Insurance Fund.

All agree that California acted in a prudent and fiscally responsible manner.

Other States—some 22 plus Puerto Rico and the District of Columbia—chose instead to borrow from the Federal Unemployment Trust Fund Account. This is as provided by Federal law. The borrowings to date total about $4.3 billion, according to the Finance Committee report on H.R. 4800.

Federal law also requires repayment within 2 years.

If a State fails to repay advances from the Trust Fund, then Federal law requires that the net Federal unemployment tax levied on the State's employers automatically be increased until the loan is repaid.

It is understandable that during the worst of the extended period of high unemployment that Congress would be sympathetic with the emergency needs of States facing subsantial outlays and owing sums to the trust fund account.

Congress responded by providing a 3-year postponement of repayment until January 1, 1978.

H.R. 4800 continues this postponement for another 2 years, until 1980.

This postponement, Mr. President, is unfair to California and other nonborrowing States who raised taxes to meet their obligations to the unemployed workers of their States without resorting to the Federal deficit.

I can assure you, Mr. President, that in the future it will be very difficult for my State to increase its unemployment tax. Without question, it will be most difficult to avoid the easy way out by borrowing from the Federal treasury, thereby increasing the Federal deficit still further.

It appears that the continued postponement of repayment to the trust fund may be the prelude to ultimate forgiveness of the debt. Certainly, that is the fear among employers and taxpayers in California.

My office, in cooperation with the California Employment Development Department, has developed a proposal which I believe promises to solve the dilemma fairly.

Briefly, the proposal would permit States which experienced high unemployment during the recession years to be credited with a subsidy paid by the FUTA tax. Those States which borrowed would have their accounts adjusted. States, like California, would receive payments to assist the State Unemployment Insurance Fund's balancing account or to provide direct tax relief to the State's employers.

Time did not permit a full consideration of our proposal by the Finance Committee staff. I understand the problem and I recognize that there may be other equally good or perhaps better ways of solving this problem.

I hope, however, that the chairman will give urgent consideration to the problems of the unemployment trust fund. The longer we wait, the more difficult it will become to do justice to all States. Delay also will risk unnecessarily the integrity of the unemployment trust fund and the fiscal discipline that fund now imposes on the national unemployment compensation system.

Finally, all States have a mutual interest in lifting the economically depressing cloud of unfunded liabilities from the trust fund. This cloud is concentrated in a few States which, I recognize, would suffer some depressing impact on their economies should permanent law requiring repayment be suddenly implemented.

These States are customers of California as well as our competitors. But we all must exist within the framework of a national economy.

Therefore, a national solution is required. The current postponement policy, in my view, is not an adequate national policy. One is required and I urge the committee, with the administration, to act promptly on this matter.

Mr. MUSKIE. Mr. President, I rise in support of H.R. 4800, a bill extending the Federal supplemental benefits—FSB—program, which provides emergency unemployment compensation to persons who have been unemployed so long that they have exhausted their regular and extended unemployment compensation benefits. This bill would add to 1977 outlays by $488 million and to 1978 outlays by $190 million.

The FSB program was enacted in 1974 in response to the severe economic recession which the Nation was experiencing at that time. It has always been the intent of the Congress that this program be temporary, to phaseout when the economy improves sufficiently to allow the long-term unemployed to go back to work. Thus, under present law the program is due to end on March 31, 1977. H.R. 4800, as reported by the Finance Committee, would extend the FSB program another 9 months, through December 31, 1977, with a phaseout during the last 3 months. It is our firm belief that by the end of the calendar year the economy will have improved enough to eliminate the need for this program.

When the Congress acted on the second budget resolution for 1977 last September, we assumed that the economy would continue to recover at a rate that would permit termination of this emergency program at this time. The senior Senator from New York, Senator JAVITS, challenged this assumption on the floor of the Senate when we were considering the final passage of the second budget resolution. It was the Senator's contention that the economic recovery would not be as robust as we then anticipated and that allowance should be made in the congressional budget for an extension of the FSB program. I responded to the Senator by saying that if the economy did not recover as then anticipated, we would have to act on a third budget resolution for fiscal 1977, at which time we would add funds for an extension of the FSB program. Of course, that is exactly what happened. The economic recovery stalled, making a third budget resolution necessary, and in that resolution we included $0.5 billion in additional funds for 1977 which would accommodate an extension of this program.

I cite this history in part to demonstrate the flexibility of the budget process, and also to point out that the 1977 budget ceilings allow room for the additional outlays in this bill. Moreover, the increased 1978 cost of $190 million is within the guidelines offered by the Finance Committee in its report to the Budget Committee containing recommendations for the first budget resolution for 1978. I commend the Finance Committee for the budgetary discipline it has displayed in reporting a bill which stays within the 1977 budget ceilings as well as within the committee's 1978 recommendations.

Mr. President, I strongly recommend to my colleagues that they support this bill to extend the FSB unemployment compensation program. Congressional policy in favor of extending the FSB program was clearly established with the enactment of the third budget resolution for 1977. Moreover, there is room in the third budget resolution spending ceilings to accommodate this extension. Lastly, I support the provisions of H.R. 4800 which delete the requirement that general fund advances made after March 31, 1977, to the unemployment trust fund to pay FSB costs be repaid.

Mr. President, I urge support of this bill.

Mr. HANSEN. Mr. President, I voted against any favorable reporting of this bill to the floor of the Senate, and I shall vote again against final passage. To my way of thinking, there is absolutely no justification for extending this emergency unemployment compensation program. If we faced an emergency when the program was enacted, that is well and good. Now, however, we do not face an emergency, and we are continually given promises that the economy is improving and will continue to improve. Accordingly, I see no persuasive reason for extending this program.

The Federal supplemental benefits program which we here extend today was designed to extend for as long as 65 weeks. My own State of Wyoming has experienced very low unemployment rates over the last few years, so those benefits were unavailable in my State. I do not vote against an extension of the benefits, however, simply because my State does not benefit. I vote against any extension because I believe that this pro-

longed duration of benefits does nothing to solve the real problems of unemployment. Rather, these extended benefits often simply subsidize a lifestyle. Let me illustrate.

Up around my home in Jackson, Wyo., there are a lot of people whose livelihood depends on the resort industries there. Within that economic group, there are two subgroups. One subgroup includes those people who work all summer, then draw unemployment benefits and ski all winter. The other group works all winter, and then those people draw unemployment compensation and/or welfare benefits and retreat to the mountains for the summer.

I am dismayed that we use Federal funds to subsidize this kind of a life style.

But if there are those who believe that my case is weakened simply because I point to what might be a local problem, let me cite Prof. Martin Feldstein who has written extensively about unemployment insurance. Dr. Feldstein suggests that our current system of unemployment compensation is likely to have increased the average rate of unemployment. The system provides for unnecessarily long durations of unemployment.

Dr. Feldstein points out that most of us operate under a faulty premise about unemployment benefits. The most common statistic thrown about is that benefits only provide about one-third of the unemployed individual's usual pay. More accurately, unemployment insurance currently replaces two-thirds or more of lost net income. Unemployment benefits are nontaxable. An individual pays no State tax, and no social security payroll tax. In addition, he saves the expense of transportation to and from work, the cost of clothing related to employment, and in many cases, union dues are also saved.

Under these circumstances, if an individual is earning $120 per week, which is more than the minimum wage, and he is unemployed for 10 weeks, that individual loses $1,200 in gross earnings, but only $227 in net income. This level of untaxed benefits provides a strong incentive for an excessive amount of temporary unemployment. Because the costs of additional waiting time and searching time is so very low, an unemployed worker is actually encouraged to wait until there is almost no chance of a better job.

Often this unnecessarily long duration of unemployment is simply a result of a worker's willingness to succumb to the temptation to use some time for doing repairs at home or taking a short vacation. There is not a strong incentive to return to work when there will only be a $20 increase in a week's net income.

Some experiences in Massachusetts bear out Dr. Feldstein's theory, and suggest strongly to me that our Federal supplemental benefits program has actually been an incentive to people to go on unemployment. The impact of the recession was most strongly felt in 1974. In Massachusetts between 1974 and 1975, that State actually lost only 30,000 jobs, yet the unemployment rolls went up 131,600. This means that the availability of unemployment benefits brought over 100,000 people out of the woodwork and onto the unemployment rolls. These people hadn't lost their jobs. The State and Federal Government were simply offering a good deal. Prof. Milton Freedmon recently stated "a large fraction of our unemployment figure does not constitute a human problem—it constitutes people taking advantage of very good arrangements."

Mr. President, the unemployment compensation system was created to deal with the problems of short-term unemployment, and the system deals well with this problem. Longer term unemployment is simply beyond the scope of the focus of the program.

The present system was originally intended to protect workers against the financial impact of involuntary unemployment by providing them a degree of wage loss compensation for a reasonable time while they seek new employment. The payroll tax levied on employers attempted to distribute the cost of financing the program among those who theoretically caused the unemployment. However, in light of recent economic conditions, Congress has extended the benefit period and we are now proposing funding out of general revenues. Thus, Mr. President, we have gone far beyond the purpose of unemployment compensation and you may ask, where have we gone?

By providing benefit payments from general revenues, we have moved beyond an insurance program, an earned right, to another form of Federal welfare.

Further, Mr. President, while creating a new welfare program we have failed to provide adequately to protect the Federal Treasury. For example, in 1975, Congress directed that a study be done of the characteristics of persons getting benefits under the emergency program. This study shows that the average household receiving emergency unemployment benefits had substantial other income. For example, a family in which the wife was the beneficiary had average income for the year of $12,500, including her benefits—the husband's earnings in such cases averaged $8,000. One out of every five emergency benefit recipients had household income in excess of $15,000.

Mr. President, if we are going to have a welfare program by providing full Federal funding for emergency benefits, this study amply demonstrates the need for a strict means test and strict work requirement.

Absent these controls, we offer an opportunity for a full-blown raid on the Federal Treasury.

My final reason for opposing any extension in Federal supplemental benefits is that I am simply not convinced that our present unemployment situation merits that extension. During the month of January, the Bureau of Labor Statistics reported that the unemployment rate for individuals who had been out of work for 15 weeks or longer was only 2.3 percent. This percentage does not differ substantially from the percentage of the so-called hardcore unemployed. This suggests to me that we do not need to throw more money at the condition of being unemployed.

We need to address head-on the actual causes of unemployment. We need to make work desirable. Joseph Kraft, in a column in the Washington Post on March 29, 1977, pointed out that there is a growing tendency in our society, based partly on the desire for upward mobility, for individuals to be unwilling to do jobs that are deemed menial. We are all acquainted with the pages and pages of help-wanted ads which go begging. I get letters from constituents practically every day which describe situations in their communities, and often in their own businesses, where they hire people to do work and those individuals expect to be payed for performing no services at all. What we need to do is make work more respectable. We do not need to make unemployment compensation benefits so available that they are more socially acceptable than good hard work.

Mr. President, I request Senators today to ask themselves just how an extension of Federal supplemental benefits will improve our national life. We are creating a society in which it is more acceptable to take money from the Government than it is to work. We have created a system which allows individuals to take paid vacations at the expense of the Government. At the same time, we have done nothing to address the real problems of unemployment among our youth and among those who are structurally unemployable. I cannot support this extended benefits program.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. LONG. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to proceed for 1 minute before the rollcall vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF S. 1051, FEDERAL GRAIN INSPECTION AND WEIGHING PROGRAM IMPROVEMENTS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that upon the disposition of the pending measure, the Senate proceed to the consideration of Calendar No. 51, S. 1051, a bill to amend the U.S. Grain Standards Act. This meets with the approval of the other side, the minority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that any votes that may be ordered on the National Grain Standards Act prior to 5 p.m. today be delayed until the hour of 5 p.m. today because the joint leadership has

to go down to the White House with other Senators. There will be a good many Senators on both sides of the aisle down there, and this is the purpose for asking the delay in the votes, which I do not like to do.

Mr. TOWER. Reserving the right to object, Mr. President, will those of us who are going down have an opportunity to debate the grain bill, amendments, when we get back? Will there be time for that?

Mr. ROBERT C. BYRD. I am sure there will be time to debate the bill. I will try to help the Senator get consent, and I am sure the distinguished manager of the bill, Mr. HUDDLESTON will cooperate in every way to accommodate those who have to go to the White House.

Mr. TOWER. The point I am trying to make is I have some amendments, and I would like to be able to say something about them.

Mr. ROBERT C. BYRD. The Senator will have that opportunity to call up his amendments when he comes back.

Mr. TOWER. If I have that assurance, I will not object.

Mr. ROBERT C. BYRD. I thank the Senator. This meets with the approval of the manager of the bill, Mr. HUDDLESTON.

The PRESIDING OFFICER (Mr. SASSER). Without objection, it is so ordered.

EMERGENCY UNEMPLOYMENT COMPENSATION EXTENSION ACT OF 1977

The Senate continued with the consideration of the bill (H.R. 4800) to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such act, and for other purposes.

The PRESIDING OFFICER. The question is, Shall the bill pass?

The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND) is necessarily absent.

I further announce that the Senator from Michigan (Mr. RIEGLE) is absent on official business.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) would vote "yea."

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD) and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "yea."

The result was announced—yeas 84, nays 11, as follows:

[Rollcall Vote No. 86 Leg.]

NOT VOTING—5

Eastland	Hatfield	Riegle
Griffin	Packwood	

So the bill (H.R. 4800), as amended, was passed.

The title was amended so as to read:

An Act to extend the Emergency Unemployment Compensation Act of 1974, and for other purposes.

Mr. LONG. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MOYNIHAN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LONG. Mr. President, I move that the Senate insist on its amendments to the bill, H.R. 4800, and request a conference with the House of Representatives thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer (Mr. SASSER) appointed Mr. LONG, Mr. TALMADGE, Mr. RIBICOFF, Mr. HATHAWAY, Mr. MOYNIHAN, Mr. DOLE, Mr. ROTH, and Mr. LAXALT conferees on the part of the Senate.

Mr. LONG. Mr. President, I ask unanimous consent that the bill, H.R. 4800, be printed with the amendments of the Senate numbered and that in the engrossment of the amendments of the Senate to the bill the Secretary of the Senate be authorized to make all necessary technical and clerical changes and corrections, including corrections in section, subsection, designations, and cross references thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL GRAIN INSPECTION AND WEIGHING PROGRAM IMPROVEMENTS

The PRESIDING OFFICER. Under the previous order, the Chair lays before the Senate S. 1051, which the clerk will state.

The assistant legislative clerk read as follows:

Calendar No. 51, a bill (S. 1051) to amend the United States Grain Standards Act with respect to record keeping requirements and supervision fees, and to establish an advisory committee to provide advice to the administrator of the Federal Grain Inspection Service, and for other purposes.

The Senate proceeded to consider the bill.

PRIVILEGE OF THE FLOOR

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that the following staff members of the Committee on Agriculture, Nutrition, and Forestry be permitted to be present on the floor during the consideration of S. 1051, including rollcall votes thereon: Michael McLeod, Carl Rose, Phil Fraas, Dale Stansbury, Bill Taggart, and Dale Sherwin.

I also make the same request for floor privileges for Janice Wilson and Bill Seale of my staff, and Bill Motes of Senator CLARK's staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. Mr. President, the United States exports over $22 billion worth of agricultural products yearly. This produces a net balance of trade surplus for such products of $12 billion, with grain playing a major role in reaching that favorable balance.

The U.S. Grain inspection system plays a key role in facilitating the marketing and sale of grain produced by American farmers as most of the exported grain is officially inspected and sold to foreign customers on the basis of grades established by the grain inspection system. Yet, as my colleagues will recall, there have been many problems in the past few years with our grain inspection system.

In an effort to correct the irregularities in the grain marketing system and to restore integrity and confidence in American produced grain, the 94th Congress enacted the U.S. Grain Standards Act of 1976 to improve the grain inspection and weighing system.

RECORDS

During committee consideration last year of the grain inspection bill the USDA asked that the U.S. Grain Standards Act of 1916 be amended with a new subsection (D) added to section 12. The Department indicated that in order to enforce the provisions of the act language should be included to require that certain records be kept by grain elevators. Specifically the law states:

Every State, political subdivision thereof, or person who is the owner or operator of a commercial grain elevator warehouse, or other storage or handling facility or is engaged in the merchandising of grain other than as a producer, and who, at any time, has obtained or obtains official inspection or weighing services shall, within the five-year period thereafter, maintain complete and accurate records of purchases, sales, transportation, storage, weighing, handling, treating, cleaning, drying, blending, and other processing, and official inspection and official weighing of grain.

Mr. President, it was never the intent of the Senate Agriculture Committee to require these records of country elevators but this recordkeeping section of the act is being interpreted by the legal counsel of USDA to mean that if any grain elevator sends just one submitted sample to an official inspection agency for official inspection then that elevator must keep the records specified in that section.

These records would be impossible for subterminal elevators and country elevators to keep. For example, if a country operator receives three trucks in a row of soybeans and one truck is 12 percent moisture, one truck 13 percent, and one 14 percent moisture, and the elevator operator puts them in the same tank, he has blended these soybeans. And he must keep a record of how many bushels, what tank, and so on.

I think it can easily be seen that country elevators and subterminal elevators do not have the facilities to keep such records. Their only choice then is not to use any of the provisions and services of the Federal Grain Inspection Service. In my judgment, this would set grain marketing back 60 years to before the Grain Standards Act of 1916.

Section 1 of S. 1051, the bill we are considering today, amends section 12(d) of the U.S. Grain Standards Act by removing the requirement that commercial grain elevator owners or operators and grain merchandisers who use inspection or weighing services under the act keep the enumerated types of records for a period of 5 years. Users of inspection or weighing services would, instead, be required to keep, completely and accurately, such records, for such period of time, as the Administrator of the Federal Grain Inspection Service prescribes, by regulation, for the purpose of the administration and enforcement of the act.

Under this amendment, the Administrator of the Service, in prescribing recordkeeping requirements for users, could take into consideration the different sizes and purposes of firms which use services under the act. This would assure that users are not burdened by recordkeeping requirements that may be unnecessary for the effective administration and enforcement of the act and are irrelevant to the users in their businesses.

SUPERVISION COSTS

The present Federal program for supervision represents a large expansion of supervision over the levels of just 3 years ago. Prior to fiscal year 1976 the Federal supervision budget was never more than perhaps one-fifth of the amount it is today.

This expanded supervision program was initiated following revelations of corruption in the inspection service in New Orleans in 1975, and after Congress appropriated $5 million to the Department of Agriculture in September of 1975, as an emergency supplement to its fiscal year 1976 budget, for increased Federal supervision.

The authority to transfer the cost of Federal supervision from appropriations to fees was provided by the U.S. Grain Standards Act of 1976.

Pursuant to this change, the Federal Grain Inspection Service recently developed a supervision fee structure based on the volume of grain inspected or weighed. The fee rate for inspection supervision would be 80 cents per 1,000 bushels of grain inspected; for weighing supervision it would be 35 cents per 1,000 bushels of grain weighed.

The "supervision fee" provision of the 1976 act has been of much concern, not only to the inspection and weighing agencies which would have to pay the supervision fees to the Federal Government, but also to the users of the inspection and weighing services and to farmers.

To the extent that Federal supervision remains at the intensive level it is at today, the total fees will amount to over $12 million annually.

This amount would be added to the costs of original inspection and weighing borne by the grain industry and farmers, which amount to approximately $50 million annually; yet it will not provide any additional services to farmers or the grain industry.

It was brought out at the hearings held in February by the Subcommittee on Agricultural Production, Marketing, and Stabilization of Prices, which I chair, that the addition of supervision fees will increase the cost of grain inspection and weighing by roughly 25 percent overall and perhaps 50 to 100 percent in isolated instances, all of which would ultimately be absorbed by farmers through reduced prices paid them by grain elevator operators and merchandisers.

That the costs would ultimately be borne by the farmer comes about because inspection and weighing agencies would be forced to raise the fees charged grain elevator operators and merchandisers who use their services. This would, in turn, increase the costs of operation for these elevator operators and grain merchandisers. As their overhead increased, they would have to then reduce the prices they pay farmers.

Further, some State agencies do not have the authority, under present State law, to pay the fee to the Federal Government and would thus be barred, without a change in their State laws, from complying with the act.

Mr. President, there is strong and united opposition to the Federal Grain Inspection Service on the "supervision fee" issue which seriously threatens the smooth functioning of the Federal grain inspection and weighing program.

This opposition is reinforced by the fact that in other food and agriculture inspection programs operated by the Department of Agriculture, the cost of Federal supervision is borne by appropriations. In addition, many believe that the grain inspection and weighing program has become one of the most intensely supervised of the Department's marketing programs.

There is no question that there should be Federal supervision of the grain program to the extent necessary to protect American consumers and restore buyer confidence in the quality of American grain.

Because of clear indications, however, that the "supervision fee" provision may substantially reduce the effectiveness of the national grain inspection and weighing program there is a need to change the financing for this Federal supervisory activity from fees to appropriations.

Under S. 1051, the authority for the charging of fees for the Federal supervision of grain inspection and weighing would be eliminated. The supervision would be financed by direct appropriations.

The repeal of the authority for charging fees to cover the cost of Federal supervision provided for in this bill would be effective October 1, 1977. However, it is anticipated that any Federal supervisory costs for the remainder of fiscal year 1977 will be borne by appropriations. The Department of Agriculture has requested additional appropriations for this purpose.

ADVISORY COMMITTEE

Mr. President, because of the significant revisions in the law and the attendant need for the grain industry—from farmers to those who utilize the grain to produce food and feed—to adapt their practices to conform with the changes in the overall program, the Department of Agriculture was given not more than 2 years to implement the 1976 act.

The committee has found that the time period alone will not be enough to assure the orderly implementation of the 1976 act. Almost every segment of the grain industry has indicated that the improvements made in the program by the act—if not implemented with due care for the needs of farmers, grain consumers, and the grain industry—would hinder the orderly and timely marketing of grain. In this regard, section 2 of the U.S. Grain Standards Act provides that the objectives of the act are to assure the marketing of grain in an orderly and timely manner and to facilitate trading in grain.

There is, therefore, a clear need to assure that advice and assistance from all those affected by grain marketing procedures—from farmers to consumers—are received by the Federal Grain Inspection Service during the implementation of the major changes mandated by the 1976 act. The establishment of a temporary advisory committee, to be in existence only for a period no longer than that provided for the implementation of the 1976 act, is the most efficient mechanism for this purpose.

This bill would establish a temporary advisory committee to advise the Administrator of the Federal Grain Inspection Service on the implementation of the U.S. Grain Standards Act of 1976. The committee would be composed of 12 members, representing farmers, consumers, and all segments of the grain industry.

OTHER CHANGES

Mr. President, sections 4 and 5 of this legislation make several technical amendments to the U.S. Grain Standards Act as amended by the U.S. Grain Standards Act of 1976. Section 6 prohibits any person acting under a license or authorization under the U.S. Grain Standards Act from certifying or performing any analysis to determine: First, the subclass of Hard Red Winter wheat on the basis of color or on the basis of dark, hard, and vitreous kernel content; or second, the percentage of dark, hard, and vitreous kernels in Hard Red Winter wheat. This section would become effective on May 1, 1977, but such certifications or analyses may be performed after that date if required by a

contract for the sale of wheat entered into prior to the date of enactment.

Mr. President, I ask unanimous consent that a section-by-section analysis of S. 1051 be printed in the RECORD at this point.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS

SECTION 1. RECORDS

Section 1 of the bill amends section 12(d) of the United States Grain Standards Act by removing the requirement that commercial grain elevators owners or operators and grain merchandisers who use inspection or weighing services under the Act keep certain enumerated types of records for a period of five years. Users of inspection or weighing services would, instead, be required to keep, completely and accurately, such records, for such period of time, as the Administrator of the Federal Grain Inspection Service prescribes, by regulation, for the purpose of the administration and enforcement of the Act.

Under this amendment, the Administrator of the Service, in prescribing recordkeeping requirements for users, could take into consideration the different sizes and purposes of firms which use services under the Act, and assure that users are not burdened by recordkeeping requirements that may be unnecessary for the effective administration and enforcement of the Act and are irrelevant to the users in their businesses.

SECTION 2. SUPERVISION FEES

Section 2 eliminates the charging of fees for Federal supervision of inspection or weighing under the Act. Supervision would, instead, be paid for with appropriated funds.

This section amends section 7(j) and section 7A(*l*) of the United States Grain Standards Act, which (1) require the Service, when it performs original inspection or weighing, to charge fees to recover its costs and to include in its fees the administrative and supervisory costs directly related thereto, and (2) require designated official inspection and weighing agencies and States agencies to which authority has been delegated for the performance of inspection and weighing, to pay fees to the Federal Grain Inspection Service to support the cost of direct Federal supervision of their activities.

This section deletes from section 7(j) and 7A(*l*) the provisions requiring designated offical agencies and agencies delegated authority to pay supervision fees, and requiring the Service to include directly related administrative and supervisory costs in its own inspection and weighing fees.

This section amends section 21 of the United States Grain Standards Act, which provides for appropriations. The authorization for appropriations to cover certain administrative and supervisory costs would be expanded, in conjunction with the changes made in section 7(j) and 7A(*l*), to include all Federal administrative and supervisory costs related to inspection or weighing under the Act.

This section amends section 27 of the United States Grain Standards Act of 1976, which sets the effective date for that Act by deleting the reference to the payment of supervision fees by designated official agencies and State agencies delegated authority under the Act.

This section would become effective on October 1, 1977.

It is the intent of the Committee that Federal supervision for which appropriations are provided by this section should not hinder the orderly and timely marketing of grain through unnecessary disruption of the work of State and private agencies being supervised, but should serve to provide these agencies with constructive assistance and consultative services which will enable them to better provide services to farmers and the grain industry.

SECTION 3. ESTABLISHMENT OF TEMPORARY ADVISORY COMMITTEE

Section 3 provides for the establishment of a temporary advisory committee to provide advice to the Administrator of the Federal Grain Inspection Service with respect to the implementation of the United States Grain Standards Act of 1976. The committee is established for the purpose of assuring that the orderly and timely movement of grain from farmer to consumer is maintained as the 1976 Act is implemented.

The temporary advisory committee would be composed of not more than twelve members, to be appointed by the Secretary of Agriculture within thirty days following the date of enactment of this bill.

The members would be appointed so as to give representation on the committee to grain producers, consumers, and all segments of the grain industry, including grain inspection and weighing agencies. The process by which grain leaves the farmer's field and reaches the processors, millers, and other commercial and private consumers involves many persons and types of business; and it is intended that the composition of the advisory committee reflect this variety. The Secretary should, therefore, consider, among others, for representation on the committee grain producers, country elevator operators, State inspection and weighing agencies, private or board of trade inspection and weighing agencies, domestic grain firms, an expert on grain weighing, a person experienced in the transportation and weighing of grain by railroads, a person experienced in barge and truck transportation of grain, the milling and baking industry, grain exporting firms, foreign buyers of American grain, and domestic consumers.

The advisory committee would be governed by the provisions of the Federal Advisory Committee Act.

The Administrator of the Service would provide the advisory committee with necessary clerical assistance and staff personnel.

Members of the advisory committee would not receive any compensation for their work on the committee, other than travel expenses.

The advisory committee would terminate at the end of 18 months after the date of enactment of this bill. It is the Committee's intent that the advisory committee shall not be extended past the termination date except for extraordinary reasons.

Appropriations necessary to carry out the provisions of this section would be authorized.

SECTION 4. TECHNICAL AMENDMENTS

This section makes several technical amendments to the United States Grain Standards Act as amended by the United States Grain Standards Act of 1976.

Subsection (*a*)(*1*) changes the term "grain sorghum" in section 3(g) of the Act to the more commonly accepted "sorghum".

Subsection (*a*)(*2*) amends the definition of "official agency" in section 3(m) of the Act. The definition is expanded to include agencies designated to perform "official weighing" of grain, as well as those designated to perform "supervision of weighing". As a matter of clarification, a phrase is added at the end excluding appeal weighing as a possible subject of a weighing designation. The cross-reference is corrected to read "subsection (c)", rather than "subsection (b)".

Subsection (*a*)(*3*) makes a grammatical clarification to the definition of "official weighing" contained in section 3(x) of the Act. The standards under which the weighing is performed are not provided (i.e., actually contained) in the Act, but are merely provided *for*.

Subsection (*a*)(*4*) amends the definition of "supervision of weighing" contained in section 3(y) of the Act to conform it to current grain weighing practices whereby agencies which supervise weighing conducted by elevator personnel or other persons also issue weight certificates. In addition, the amendment adds to the definition a provision that the degree of supervision necessary is that which is adequate to reasonably assure the integrity and accuracy of the weighing supervised, as determined by the Administrator.

Subsection (*b*) changes the term "grain sorghum" in section 4(a) of the Act to the more commonly accepted "sorghum". Also, a comma is added for grammatical clarification.

Subsection (*c*)(*1*) designates the last sentence in paragraph (2) of section 7(e) of the Act as a separate paragraph (4) of section 7(e) for clarification.

Subsection (*c*)(*2*) amends section 7(f) of the Act to—

(1) include State agencies delegated inspection authority with official (designated) agenices in the provisions of paragraph (2) prohibiting more than one inspection agency from operating in any geographical area, and clarify that this prohibition applies to the provision of *inspection* services;

(2) delete the provision in paragraph (2) excepting inspection agencies operating in an area as of August 15, 1968, from the one agency-one area provision (this provision is obsolete because there are no longer any inspection agencies to which it could apply);

(3) correct a clerical error by inserting the words "Except as otherwise authorized by the Administrator" at the beginning of the second sentence in paragraph (2); and

(4) designate the second and third sentences of paragraph (2) as paragraphs (3) and (4), respectively, for clarification.

Subsection (*c*)(*3*) corrects a cross-reference in paragraph (1) of section 7(g) of the Act.

Subsection (*c*)(*4*) amends section 7(l) of the Act which provides for inspection of American grain in Canada (under agreement with the Canadian government) by adding a sentence at the end which would permit the Administrator to use non-Service personnel, which could include Canadian nationals, to perform inspection under the Act in Canada of American export grain being transshipped through Canadian ports.

Subsection (*d*)(*1*) amends section 7A(b) of the Act to allow the Administrator to cause "official weighing", as well as "supervision of weighing", to be performed at grain inspection points in the interior of the country.

Subsection (*d*)(*2*) amends paragraph (2) of section 7A(c) of the Act to—

(1) authorize the Administrator to delegate authority to eligible State agencies at export port locations to perform "supervision of weighing" as well as "official weighing";

(2) authorize the Administrator to designate eligible official agencies to provide "official weighing" as well as "supervision of weighing" at locations other than export port locations;

(3) correct the spelling of "under" immediately following "authority or designation" in the first sentence;

(4) delete the reference to "export elevators" in clause (A) of the second sentence to avoid a hiatus in the provisions of the Act for weighing at export port locations, since there may be nonexport elevators at such locations;

(5) authorize the Service to perform "supervision of weighing" as well as "official weighing" at export port locations if the delegated State agencies at these locations are unavailable or unqualified to perform weighing services; and

(6) authorize the Service or others to perform "official weighing" as well as "supervision of weighing" at non-export locations if the official agencies designated to perform inspection at nonexport port locations are unavailable or unqualified to perform weighing services.

Subsection (d)(3) amends section 7A(d) of the Act which provides for the official weighing of American grain in Canada (under agreement with the Canadian Government) by adding a sentence at the end which would permit the Administrator to use non-Service personnel, which could include Canadian nationals, to perform weighing under the Act in Canada of American export grain being transshipped through Canadian ports.

Subsection (d)(4) deletes the second sentence of section 7A(e) of the Act. The sentence provides that, as a condition to receiving weighing services under the Act at locations where grain inspection is not provided, a person must agree to accept the services for a period of at least one year. It also provides for a separate fee schedule at these locations. These provisions are unnecessary because time and cost problems in these situations can be adequately controlled through regulations.

Subsection (d)(5) amends section 7A(f) of the Act which establishes conditions that grain elevators must meet in order to receive weighing services under the Act. Among the conditions are two relating to personnel. Under present law these conditions apply only to personnel employed by the elevator. Under this amendment, the conditions would also apply to union employees or others not employed by the elevator but who perform the weighing functions at the elevator. Also, a phrase is added under which personnel selected for these jobs would have to be approved by the Administrator.

Subsection (d)(6) amends section 7A(g) of the Act so that weight certificates based on "supervision of weighing" as well as those based on "official weighing", would be received by all officers and courts of the United States as prima facie evidence of the truth of the facts stated therein.

Subsection (d)(7) adds local governmental agencies to those prohibited from performing unauthorized weighing under the Act in section 7A(i) of the Act. This conforms the prohibition in section 7A(i) to comparable prohibitions in sections 7(f)(4) and 7A(h) of the Act.

Subsection (d)(8) adds a sentence to section 7A(i) of the Act prohibiting more than one delegated State weighing agency or designated official weighing agency from operating in any one geographical area. This is the same provision as that in section 7(f)(2) of the Act with respect to agencies performing inspection.

Subsection (e) amends section 7B of the Act which provides for the testing of equipment used to inspect and weigh grain. The requirement for the periodic testing of equipment would be restricted to equipment used for the purpose of official inspection, official weighing, or supervision of weighing under the Act.

The prohibition in subsection (c) of section 7B against the use of equipment not approved by the Administrator would be limited to use for the purposes of the Act.

Subsection (f)(1) amends section 8(a) of the Act which provides for the issuance of licenses and authorizations for the performance of inspection and weighing under the Act by—

(1) eliminating appeal weighing from the functions that licensees may perform under the Act;

(2) clarifying that employees of the Service may be authorized to perform appeal weighing and to perform any weighing functions in the United States and for United States grain in Canadian ports;

(3) clarifying that contracts for the performance of certain services may be let to governmental agencies as well as persons; and

(4) allowing the Administrator to let contracts for the performance of "similar technical functions", as well as "sampling and laboratory functions".

Subsection (f)(2) amends section 8(e) of the Act which authorizes the Administrator to hire (without regard to the provisions of title 5 of the United States Code governing appointments in the competitive service) persons who were licensed under the Act to perform inspection, or who were performing weighing functions, as of the date of enactment of the United States Grain Standards Act of 1976. The amendment would allow the Administrator to compensate personnel hired in such manner at any rate within the appropriate grade of the general schedule as he deems necessary without regard to section 5333 of title 5 of the United States Code. Section 5333 generally provides that all new appointments will be made at the minimum rate (i.e., Step 1) of the grade applicable to the position.

Subsection (g)(1) amends paragraph (3) of section 11(b) of the Act which establishes conflicts of interest rules for official agencies and delegated State agencies. Under the amendment, the conflict of interest provision would apply to designated official agencies performing "official weighing", as well as those performing "supervision of weighing".

Subsection (g)(2) amends paragraph (5) of section 11(b) which provides for waiving the conflict of interest prohibition. The waiver authority is extended to agencies providing "official weighing", as well as those providing "supervision of weighing". Also, to correct a clerical error, the word "director" is added to the list of persons connected with an agency whose conflict of interest may be waived under paragraph (5).

Subsection (g)(3) amends section 11(c) of the Act which states that the provisions of section 11 shall not prevent an official agency from engaging in the business of weighing grain. This amendment would include States delegated authority, as well as official agencies, under section 11(c).

Subsection (h) makes several amendments to section 12 of the Act which establishes recordkeeping requirements under the Act. The recordkeeping requirements of subsections (a), (b), and (c) of section 12 which make provision for the keeping of records by official inspection and weighing agencies are amended so that they also apply to State agencies delegated authority under the Act. In addition, typographical errors in the printing of the phrase "delegated authority under this Act" in the second sentence of subsection (c) are corrected.

Subsection (i)(1) corrects a clerical error. Section 13(a)(6) of the Act, which prohibits certain false representations, is amended by adding a phrase at the end which would prohibit any false representation that any weighing services under the Act had been performed.

Subsection (i)(2) amends section 13(a)(11) of the Act which prohibits the violation of certain sections of the Act. Because section 7(f)(2), one of the sections listed in section 13(a)(11), will be redesignated as three separate paragraphs "(2)", "(3)", and "(4)" pursuant to section 4(c) of the bill, section 13(a)(11) is amended to list each new paragraph separately. Also, section 17A, which requires the registration of companies involved in exporting grain, is added to this listing.

Subsection (i)(3) substitutes the word "weighing" for "testing" in describing the type of faulty equipment the use of which is prohibited in section 13(a)(12) of the Act if it is a means of knowingly falsifying the weight of grain.

Subsection (i)(4) makes two changes in the wording of section 13(a)(13) of the Act which clarify that the prohibition against preventing or impeding persons from observing the weighing, sampling, inspection, and loading of grain is to apply only to grain in which they have a financial interest.

Subsection (j) amends section 16 of the Act which provides general authorities to the Administrator. It would amend subsection (a) to make grammatical corrections and provide the Administrator with regulatory authority to require that specified handling and weighing equipment be installed in grain elevators as a condition for official inspection or official weighing, and extend this authority to other grain storage or handling facilities as well as grain elevators.

This subsection would also correct a clerical error in subsection (f) of section 16 by striking out the word "additional".

Subsection (k) amends section 17A of the Act which provides for the registration of companies involved in exporting grain. Subsection (b) would be amended by changing the phrase "All persons registered" to "All persons required to register", to enable the Administrator to require, as necessary, the submission of information required under that subsection at the same time or before the registration is completed.

Subsection (l) amends section 17B of the Act which establishes several reporting requirements. The words "notice of" would be inserted in subsection (b) which requires the Administrator to report certain cancelled grain export contracts. With this change, the Administrator would be obligated only to report contract cancellations of which the Administrator or the Secretary of Agriculture has received notice.

Subsection (m) changes an incorrect designation of the section in the Act dealing with appropriations.

SECTION 5

Subsection (a) amends section 8(b)(3) of the United States Grain Standards Act of 1976. Section 8(b) provides for studies of inspection and weighing procedures and management practices in the interior marketing areas in the United States. Subsection (b)(3) specifically requires the Administrator of the Federal Grain Inspection Service to make certain analyses and factual findings regarding the activities of certain grain inspection and weighing agencies in the interior. This amendment would allow the Administrator to apply statistical tolerances for expected variations in performing the Administrator's analysis of inspection and weighing error rates.

Subsection (b) amends section 27 of the United States Grain Standards Act of 1976, which sets the effective date for that Act, by—

(1) conforming the prohibition against agencies performing services under the Act after the effective date without a new designation or delegation of authority, to the technical changes made in section 7A of the Act giving delegated State agencies the authority to perform "supervision of weighing" at export port locations and designated agencies and persons the authority to perform "official weighing" at other locations;

(2) eliminating unnecessary references to "export elevators at export port locations".

(3) extending the prohibition against providing official inspection or weighing service under the Act without a delegation to include agencies generally and persons, as well as State agencies; and

(4) adding references to "other authorizations under the Act" to make clear that employees of the Service and persons performing technical functions under a contract with the service need not have a delegation or designation to perform official services under the Act.

SECTION 6. HARD RED WINTER WHEAT

This section prohibits any person acting under a license or authorization under the United States Grain Standards Act from certifying or performing any analysis to determine (1) the subclass of Hard Red Winter wheat on the basis of color or on the basis of dark, hard, and vitreous kernel content, or (2) the percentage of dark, hard, and vitreous kernels in Hard Red Winter wheat. This section would become effective on May 1, 1977, but such certifications or analyses may be performed after that date if required by a contract for the sale of wheat entered into prior to the date of enactment of this Act.

Mr. HUDDLESTON. Mr. President, I yield to the Senator from Kansas.

Mr. DOLE. Mr. President, I thank the distinguished Senator from Kentucky. He has clearly set forth the reasons and the needs for changes in the grain inspection standards. I concur in what my colleague has said.

Mr. President, I would like to urge my colleagues to support this bill as it provides some needed changes in the Grain Standards Act of 1976. To reemphasize what has been so well stated, it provides:

For repeal of the fees to be charged State and private inspection agencies for Federal supervision of those official inspection agencies.

Allows the Administrator of the Federal Grain Inspection Service to require grain elevators to keep those records they believe necessary to accomplish the purpose of the act.

For the establishment of a 12-member advisory committee to assist the Administrator in the implementation of the act which will terminate when the act is fully implemented.

Mr. President, the fees for supervision were a part of the House-passed bill, and in the hearings we recently conducted, this was recommended by USDA as a means of increasing supervision whenever they might need it and also would allow them to establish whatever level of supervision they wanted without coming to Congress for appropriations. Due to circumstances at the time the act was passed, this was a good argument since there was evidence that the Grain Division of the Agricultural Marketing Service had been denied requests for increased personnel for this purpose by the budget manager for years.

We saw the other side of the proposition, however, when the first rates were revealed for these supervisory fees. When the FGIS heard the reaction to their proposed fees, they quickly reduced them, but even so, it would cost the farmers of this Nation $5.3 million in reduced grain prices to pay for this inspection.

Grain is unique in this area, for any added costs in handling the commodity is added to the margins of the grain price paid the farmer. There is no way to pass increased costs on to the consumer.

This Senator can say with great certainty that the farmers in these days are hard-pressed and they cannot afford additional charges by whatever standard.

Therefore, the repeal of this section providing for such fees for supervision is proper. I would request that the FGIS consult with its advisory committee in the next few months to determine a method or a ratio whereby they can readily identify and justify a need to increase or decrease supervision based on the volume of grain produced, marketed, types of inspection needed, et cetera, so that we can be assured of adequate supervision in the future.

The recordkeeping provisions of this bill are reasonable, and, in the report on the bill, we explained that recordkeeping should not be required of local country grain elevators, subterminals, or processors, other than those records they would ordinarily keep in order to operate their businesses. Other specific recordkeeping requirements and the period of time that they must be maintained, will be stipulated by the Administrator for export elevators and the larger terminals throughout the Nation. This will allow the Administrator access to the records needed without placing an undue burden on the marketing process.

The advisory committee should be of great help to the Administrator in the next 18 months as he works out the complexities of the weighing provisions of this act and determines the best way to approach improvement of grain standards. The committee should be helpful also in assessing the criteria for granting authorized waivers for conflict of interest provisions when it can be determined that the integrity of the system is not jeopardized by the grain exchange or other nonprofit organizations operating a grain inspection agency.

As I mentioned before, I feel it will be most helpful if the advisory committee can devise a ratio or formula to signal a need for an increase or decrease in inspection personnel or supervisory personnel so that we can avoid a situation such as we found in 1974, when the number of supervisors actually decreased while the export volume of grain tripled.

The report also related the intent that Federal supervisors should consult with original inspectors as they perform their work. This is especially important since grain inspection requires so much subjective judgment by the inspectors. Such consultation would greatly improve the uniformity of such subjective judgments and would also avoid harassment such as we have experienced through implementation of OSHA regulations.

I hope all my colleagues will support these much needed improvements in the Grain Standards Act of 1976. It was, in my view, a good bill in its original form, with some modification necessary.

It is the unanimous feeling of our committee that these amendments are necessary, that they will not in any way hinder the Federal Grain Inspection Service. They will assist in providing good, sound inspection and good, sound supervision. They will properly serve to improve the implementation of the bill.

Mr. President, there was a great deal of controversy surrounding the fees and recordkeeping provisions of the legislation. It distressed a great many farmers and those in the grain industry, State and public officials, and those who write editorials in rural areas. I ask unanimous consent to have printed in the RECORD an editorial from the Kansas City Times, entitled "Once Again the Farmer Gets Hurt in the Shuffle"; also, a letter from the late Harry Kampschroeder to the Honorable Robert Bennett, Governor of the State of Kansas, with respect to the Grain Inspection Act; and related items that may be of interest to my colleagues.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE STATE OF KANSAS,
GRAIN INSPECTION DEPARTMENT,
Topeka, Kans., January 20, 1977.

Hon. ROBERT BENNETT,
Governor of Kansas,
Topeka, Kans.

DEAR GOVERNOR BENNETT: I attended the informal meeting held by Senator Dole on Tuesday, January 18, 1977, in Washington, D.C. I feel much was accomplished at this meeting. There was representation from Kansas, Missouri, Texas, Virginia, Iowa, Illinois, Nebraska, and Tennessee which demonstrated a united front as to the dissatisfaction of the Federal Grain Inspection Service implementation of the new Act.

The objections discussed during the two-hour meeting were pretty much along the same lines as those discussed during the meeting held in your office.

Senators Robert Dole (R-Ks.), Walter Huddleston (D-Ky.), and Milton Young (R-N.D.) agreed that the language of several parts of the Act was not their intent nor what they thought they were voting for at the time of the passage of the bill.

What we accomplished most by this meeting was a need for oversight hearings and the decision to try to get Federal interim financing through the 1977 fiscal year.

A formal hearing date is set for Thursday, February 3, 1977, at the request of Senator Robert Dole to consider pushing for some Federal interim financing of federal supervision until problems at the inland points can be worked out through meetings with some kind of industry advisory committees similar to those used by the Commodity Futures Trading Commission and also to consider technical changes in the inspection law to clarify the intent of the act.

This morning, I talked to Mr. Bill Taggart in Senator Dole's office concerning strategy to be used at the February 3 meeting.

I, personally, believe that we should not operate as an unofficial agency because deliveries of grain futures contracts would have to be official weights and grades; and, at this time, we do not have a decision as to whether or not we have to be official under the commodity credit loan support program. However, I do believe we should presently continue to publicly advocate the possibility of going as an independent agency as a defense of what we are trying to accomplish.

If you have any questions regarding this meeting or if you would like to discuss it further, feel free to call me.

Respectfully yours,
HARRY KAMPSCHROEDER,
Director.

[From the Kansas City Times, Jan. 12, 1977]

ONCE AGAIN THE FARMER GETS HURT IN THE SHUFFLE

The consequences of the new U.S. Grain Standards Act of 1976 are beginning to dawn on American farmers, who see it as another financial lump on their heads. The hooker in the law, which was drawn up and enacted with undue haste before the congressional recess, is that the Department of Agriculture is required to recover through fees all inspection, weighing and supervisory costs. And where will that recovery be made? From farmers, of course, where else?

Beginning Feb. 1, every private concern,

state or trade agency authorized to inspect grain will have to pay increased inspection costs. Those costs are being estimated by USDA at $55 million a year and create a new layer of employees who will be paid $16 an hour, $20 for overtime. The law further provides those services will be charged to buyers and sellers, but as a practical matter it will be something buyers will pass back to sellers since they are in the driver's seat.

The law providing for federal inspection of all grain was deemed necessary by Congress in view of disclosures in the last two years of discrepancies in the export of grain primarily through the ports of New Orleans and, to a lesser extent, Houston. Notwithstanding that most of the grain trade appeared free of scandal, all of it must conform.

Gov. Robert Bennett of Kansas and area grainmen recently met to discuss the law. They calculated the program will cost Kansas farmers an estimated $500,000 a year, though that state apparently never has had a scandal of the kind the law is supposed to stop. Bennett urged Congress and the new administration to reconsider the legislation. He observed: "The federal government is proposing we pile bureaucrats on top of bureaucrats—and then send us the bill." The governor also indicated Kansas may take itself out of the federal system and continue to issue certificates under a state system, though that could bring on more problems than it would solve, particularly in export sales.

In a recent interview with The Star, Rep. Bob Bergland, the Minnesota farmer soon to become agriculture secretary, appeared adamant in favor of the law. He insisted that grain be as clean when it arrives at a foreign port as it was when it left U.S. farms. That, of course, is a laudable objective with which no one would argue, and Bergland's impression is that the new federal system would help achieve that goal.

Perhaps Bergland is not yet informed fully of all of the provisions of the act. Governor Bennett's letter to him should help. But from what Bergland has said to date, the grain trade and Kansas and Missouri grain farmers should not count on any help from him. Once again the farmer will be the fall guy.

WHO'LL PAY FOR GRAIN INSPECTION?

At the recent hearings in Washington, it was clear that Congress had fumbled the ball in writing the Grain Inspection Act last summer.

On Feb. 1, the Federal Grain Inspection Service (FGIS) began charging the mandated 80¢ per 1,000 bushels for supervising inspection. Yet the FGIS hadn't yet hired all the additional people it needs, let alone trained them. The grain trade was confused over who had to keep the prescribed records and who must register for the export trade. And everyone, especially farmers, was up in arms over who will pick up the $5.5 million price tag for Federal supervision of inspection.

Many at the hearings were resentful that the Congressional bill-writers didn't work out these and other details during the long stalemate last summer over a private versus a Federal system. As adjournment loomed, they rushed through a bill carrying more than the usual quandaries and confusion.

We hope they don't cripple grain inspection in the current rush to amend it. The need for reform was apparent long before the Gulf port scandals broke. Indictments for short-weighing are still being handed down, and farmers have been complaining for years about the dirty U.S. grain they've seen being unloaded at overseas ports. After all, the original inspection law was written clear back in 1916, with few changes since. In the meantime, other grain-exporting nations have matched or surpassed our quality standards.

There were hints in some of the testimony that the new law is so bad that we should chuck it and go back to the old system. We don't see it that way. The legislation is basically sound. Mostly, it needs clarification.

Some who gave testimony charge that Federal supervision of inspection would add 5¢ to 7¢ per bushel to the cost of grain. Such estimates are grossly exaggerated. Indeed, the same grain could be inspected as many as nine times between the farm and its final destination overseas. But at 80¢ per 1,000 bushels, that supervision charge still would add up to only .7 of a penny per bushel.

Besides, the only thing that could cause so many inspections would be extreme distrust of quality. Inspection upon demand is necessary for cleaning up the grain trade. So long as the cost of inspection is charged to the owners—new and old—nobody is going to ask for inspection of grain from a source that they've learned they can trust. Tighter supervision of inspection and weighing should reduce rather than increase the number of requests.

The Feds should pick up the cost supervision. It's commendable that Congress should show a sudden concern for the Federal treasury by requiring that the user should pay. Maybe this same concern will lead them to fund the FGIS so it can't build another bloated bureaucracy like the rest.

The private trade already is paying for inspection itself. It's not too much to ask the public to pick up the cost of supervising that inspection. The public certainly benefits from the foreign exchange we earn with our grain exports. And the Federal government, no less than private business, needs the discipline of the purse to force it into efficiency. If users have to pay the whole cost, no telling how big FGIS could grow.

The FGIS should have set up advisory committees to help it plan administration of the law. Instead it seemed ready to write the regulations without consulting the people who know the grain business best—farmers, elevator operators, feed processors and the like. President Carter's promise to eliminate advisory committees as part of his government reorganization effort flies in the face of his promise to bring government closer to the people.

While Congress is reviewing the whole subject again, it should build a fire under efforts to update our grain-grading standards. We can't blame the grain trade for "slugging" grain so long as our standards permit 4% foreign matter in No. 3 corn.

KANSAS HOUSE CONCURRENT RESOLUTION No. 5012

A concurrent resolution memorializing the Congress of the United States to continue stringent oversight of the Federal Grain Inspection Service, to amend the U.S. Grain Standards Act of 1976 to make it more responsive to the needs of American farmers and consumers and to fund costs of supervision of the federal grain inspection from federal appropriations rather than through fees ultimately paid by farmers

Whereas, The U.S. Grain Standards Act of 1976 was passed by Congress in response to problems at seaports; and

Whereas, The Kansas grain inspection department has been a model throughout the United States for grain inspection agencies on the state level and its program of state grain inspection has been an example of excellence which other states have strived to achieve; and

Whereas, The basic integrity of domestic grain inspection systems, especially the Kansas system, was upheld after thorough investigations by the FBI, the Internal Revenue Service, the General Accounting Office, the office of Investigation of the U.S. Department of Agriculture, and by special committees of the House of Representatives and the Senate; and

Whereas, Notwithstanding this finding and in overreaction to problems at the seaports, the U.S. Grain Standards Act of 1976 spread a vast new bureaucracy, new red tape and new costs over grain inspection programs being operated in the states; and

Whereas, In the implementation of this act the Federal Grain Inspection Service has attempted to mandate needless new record keeping on country elevators and major grain terminals alike; and

Whereas, The Federal Grain Inspection Service is attempting to charge NEW fees for supervision of grain inspection programs in the states, resulting in an estimated additional cost for grain inspection in Kansas of more than $500,000 annually and in the nation of more than $5.3 million annually; and

Whereas, This increased cost of supervision represents only a small part of the potential costs, including the unknown costs of weighing and demurrage caused by delays in the federal inspection program; and

Whereas, This additional cost of piling bureaucrats on top of bureaucrats would be passed along to the farmers of Kansas and other states at a time when they already are bearing the original costs of grain inspection and at a time when they face depressed commodity prices; and

Whereas, This needless bureaucracy, this new maze of federal red tape threatens to ensnarl the wheat harvest which will soon be beginning; and

Whereas, Governor Robert Bennett and members of the Kansas Congressional delegation are vigorously protesting this new intrusion by the federal government and are working to resolve the problems; and

Whereas, Members of the legislature of this state have become concerned about the developing problem;

Be it resolved by the House of Representatives of the State of Kansas, the Senate concurring therein: That Congress is hereby urged and requested to maintain strict oversight on the Federal Grain Ispection Service during the next eighteen months of implementation of the U.S. Grain Standards Act of 1976, to quickly amend the act to make it more responsive to farmers, consumers and those involved in the grain industry, and to appropriate funds for any cost of supervising the grain inspection programs underway in the states instead of allowing these costs to pass to our nation's farmers; and

Be it further resolved: That a duly attested copy of this resolution be immediately transmitted by the Secretary of State to the chairmen of both U.S. House and Senate Agriculture Committees and to each member from Kansas in the Congress of the United States.

The PRESIDING OFFICER. Who yields time?

Mr. HUDDLESTON. I yield time to the Senator from North Dakota.

Mr. YOUNG. Mr. President, the distinguished Senator from Kentucky (Mr. HUDDLESTON) and the distinguished Senator from Kansas (Mr. DOLE) have already explained in considerable detail the provisions of this bill. I commend them for the hard work they did in rewriting a bill that was originally well-intended but had some bad features in it.

This bill makes necessary changes in the Federal Grain Standards Act passed late last year by the Congress. The bill repeals the provisions for inspection and weighing by country elevators, as well as any payment of fees by them. The cost of weighing and inspection by Federal agencies will be by appropriated

funds to the Federal Grain Inspection Agency.

It repeals provisions of the previous law requiring local elevators to keep records for 5 years.

It will also permit State and private grain inspection to continue the same as it has in the past.

The new legislation would continue strict Federal inspection and weighing of grain for export. It establishes a 12-member advisory board for 18 months to oversee regulations and provisions established by the Department of Agriculture under this act.

I think this is a good bill now and I hope it will be approved.

Mr. HUDDLESTON. I thank the distinguished Senator from North Dakota.

Mr. President, if there is no one else present who wants to make a statement on this particular piece of legislation at the present time, I ask unanimous consent that Nelson Denlinger of the staff of Senator HUMPHREY be accorded the privilege of the floor during consideration and voting on the pending legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CLARK. Mr. President, I rise in support of S. 1051, the amendments to the U.S. Grain Standards Act of 1976. That legislation was the result of our efforts last year to deal with widespread problems in the grain trade. The background and history of the development of that legislation is well known to all of us by now.

I voted against that bill last October. I did so because I felt that its conflict of interest provisions were not strict enough—that the potential for the conflict of interest that had led so directly and systematically to the criminal activity we found, and which is so damaging to the Nation's grain trade and to the image of U.S. grain—and therefore damaging to American farmers—I felt that the provision in the law that permitted the conflict of interest rules to be waived so weakened it that it should not be passed in that form.

The bill did pass, however, and it was signed into law. It does provide major reforms. To a very important extent, it is leading to what I hope will be beneficial changes in the way of doing business in the U.S. grain trade.

This is a major and complex law, and as it has been implemented, there have been problems with it. Farmers and small elevator operators incur costs that I believe Congress did not intend for them to pay alone. And, it appears to be requiring recordkeeping systems of small elevators that are not necessary in some cases, and which are a serious burden to these small elevator operators.

Because the U.S. grain trade is so important to U.S. agriculture, and because this law is so important to the grain trade, the Senate Committee on Agriculture, Nutrition, and Forestry has moved quickly to remove these problems. Several bills were introduced to deal with the problems, and these were sponsored by a number of the members of the Senate Agriculture Committee. Hearings were held on February 3 and 4 in Washington at which over 40 farmers and grain industry representatives were heard. These witnesses were asked to comment specifically on these proposed amendments and virtually all of them supported the proposals.

Following the hearings the features of the earlier Huddleston bill and the Dole bill, were combined into S. 1051, which was unanimously reported out of committee and appears before us here today. It is a noncontroversial bill, badly needed by the grain industry. It has bipartisan support. I hope you will join me in supporting this bill.

As Senator HUDDLESTON indicated, the bill has three main provisions. The first would permit the Government to pay for Federal supervision of State and private inspectors through appropriations, rather than by user fees.

Mr. President, user fees make sense when the user enjoys most of the benefits of the service provided, and when direct collection of fees is simple and straightforward. In this case, the service provided is Federal supervision. The supervision fees impact upon the farmers and elevator operators who request Federal inspection and weighing of grain. The collection is done by the State and private inspection agencies, and there is great potential for misunderstanding of rates and charges. In short, this system is not well suited to the use of user fees to support the service. And, the user fee system has not worked well. There has been confusion over rates to be charged and widespread resentment that farmers and elevator operators should pay the full burden of the cost of supervision. In the short time the user fee system has been in operation, it has proven to be virtually unworkable. Opposition to its inequities has threatened the viability of the entire grain inspection and weighing program. Mr. President, we must change this unfair and cumbersome system as soon as possible.

The second provision of the bill would remove the onerous and unnecessary recordkeeping requirements for certain small grain elevators and merchandisers, It was the intent of the Congress to institute tough recordkeeping requirements so that the law could be enforced. But it was not the intent of the law to establish a rigid and inflexible set of recordkeeping requirements on small firms and other members of the grain trade whose records would not significantly assist the enforcement of the law. S. 1051 would give the Administrator of the Federal Grain Inspection Service sufficient flexibility so that he could take into account the size, type, complexity, and location as he specifies recordkeeping requirements for classes of firms. This is necessary to avoid imposing an unnecessary burden on small elevators.

The third provision would establish a temporary, 18-month advisory committee composed of farmers, consumers, and representatives from all aspects of the grain industry to advise the Administrator of the Federal Grain Inspection Service during the initial implementation period for the major reforms required by the 1976 act. The new act is a major and complex law. Its provisions impact on almost all aspects of the trade in major ways. Such a committee should make the implementation of the law much more smoother because it would give those affected a chance to review proposals before they become rigid rules.

Mr. President, the changes proposed on S. 1051 are important. They are timely. They are widely supported by the trade. The $12 million they would cost next year is but a very small cost compared to the increased efficiency expected in improved cooperation and smoother operation of the supervisory system. I hope this bill will be approved at the earliest possible moment.

Mr. HUMPHREY. Mr. President, I am pleased to support S. 1051, a bill to make improvements in the Federal grain inspection and weighing program. It is a noncontroversial bill with bipartisan support. It is a combination of earlier bills by Senator HUDDLESTON and Senator DOLE, which I and many other members of the Senate Committee on Agriculture, Nutrition, and Forestry cosponsored.

It was thoroughly discussed in hearings in early February. Over 40 farmers and industry representatives appeared. These changes in the Grain Standards Act of 1976 were almost unanimously supported. The combined bill was quickly reported out of committee by a unanimous vote.

The bill has three main provisions. First, it would allow the Federal Government to pay for Federal supervision of State and private grain inspectors and weighers with appropriated funds rather than by user fees. According to the Congressional Budget Office estimates, this appropriation item would cost about $12 million next year. The user fee system, which would be repealed, was developed and recommended by the previous administration and included in the U.S. Grain Standards Act of 1976.

In the short time it has been in effect, this user fee system has proven to be virtually unworkable. It requires users—farmers and elevator operators—to bear the entire cost of supervision of State and private inspection. And, it requires the State and private inspectors who are supervised to collect the user fees. It is unfair, and it is cumbersome. Opposition to its inequities has threatened the viability of the entire grain inspection and weighing program. This user fee system should be changed as quickly as possible.

Second, the bill also removes onerous and unnecessary recordkeeping requirements for certain small grain elevators and merchandisers. The 1976 act spelled out a specific list of recordkeeping requirements for all users of Federal inspection and weighing, and required that these records be kept for 5 years. There was no provision for different recordkeeping requirements depending on the size, type, or complexity of the elevator. This requirement imposes a significant and unnecessary burden on many small elevators, and it too, should be changed as soon as possible.

Finally, the bill would establish a temporary advisory committee composed of farmers, consumers, and representatives from all aspects of the grain

industry to advise the Administrator of the Federal Grain Inspection Service during the initial implementation period for the major reforms required by the 1976 act. The new act is a major and complex law. It would be helpful to the Administrator to have the assistance of such an advisory committee at the early stages of implementing the act.

The administration, in a letter to Chairman Talmadge, opposed dropping user fees as this bill would do—mainly on the grounds of cost. They did not address the question of the inequity for farmers and other users, who without the passage of S. 1051, would bear the entire burden of a program of Federal supervision which is for the benefit of the trade and the public as a whole, and not only for users.

The administration also opposed the organization of an advisory committee on the grounds that such a committee is unnecessary. However, the Senate Committee on Agriculture, Nutrition, and Forestry did not agree. The life of this committee is limited to 18 months—the period required to implement the new law. Given the difficulties faced in implementing such a complex new law, we do not agree with the administration position.

The administration supported the proposal to change the recordkeeping requirements.

The Grain Standards Act of 1976 was passed to restore the confidence and credibility of the U.S. grain trade. Investigations by the FBI, the GAO, and the Office of Investigations of the USDA has found widespread misgrading and misweighing of grain and, in addition, bribery, and other crimes. The grading and weighing system was found to be inconsistent and ineffective, and far-reaching reforms, after extensive hearings, were proposed to correct these important problems.

The House and Senate passed bills that were considerably different in approach. A very long conference was necessary to reach agreement on the bill that was finally signed into law.

In the debates in conference, many proposals were made which would have weakened the Federal inspection portion of the law by maintaining the system of private inspection at ports; and by watering down the conflict of interest prohibitions in the bill. The final agreement involved a very difficult compromise.

A number of these issues were raised once again in the February hearings which would significantly weaken the law. Amendments may be offered to permit private inspection at ports, rather than maintaining Federal and State inspection at ports as the new law requires. They also would further weaken the conflict of interest prohibitions in the new law. And, they would weaken the Federal supervision of State and private inspection and weighing.

Any such amendments would seriously change the program and should be opposed. I urge my colleagues to support S. 1051 as reported by the Committee on Agriculture, Nutrition, and Forestry.

OFFICIAL CONDUCT AMENDMENTS OF 1977

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that S. 1051 now be laid aside temporarily and that we return to the consideration of Senate Resolution 110 until the hour of 5 p.m., or at such time as the joint leadership returns from the White House to the Chamber, whichever is sooner.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate resumed with the consideration of the resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

Mr. HUDDLESTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BUMPERS). Without objection, it is so ordered.

Mr. NELSON. Mr. President, what is the pending business?

The PRESIDING OFFICER. There is no amendment pending. The resolution is open to amendment.

AMENDMENT NO. 160

Mr. DOLE. Mr. President, I call up my amendment No. 160.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an amendment No. 160:

On page 11, line 7, after "if", insert the following: "the blind trust was created by the spouse or dependent of the reporting individual as a bona fide effort to avoid conflict of interest or the appearance of conflict of interest in any Federal, State, or local governmental service, or if".

The PRESIDING OFFICER. Under the unanimous-consent agreement, there are 2 hours for debate on this amendment, 1 hour on each side, with the time to be divided between the floor manager, the Senator from Wisconsin, and the author of the amendment, the Senator from Kansas.

Mr. DOLE. I yield myself such time as I may consume.

Mr. President, the Senator from Kansas is still concerned about the anti-blind trust provision which is in the committee's resolution.

I realize that we have adopted the amendment of the distinguished Senator from Missouri (Mr. DANFORTH). In addition, we have adopted an amendment eliminating reporting requirements for assets of the reporting individual's spouse not in his constructive control. That amendment was offered by the distinguished Senator from New Mexico (Mr. SCHMITT) and the distinguished Senator from New York (Mr. JAVITS) with the concurrence of the distinguished Senator from Connecticut (Mr. RIBICOFF). But, without being totally personal, I think there is a case to be made when the blind trust was created by the spouse of the reporting individual as a bona fide effort to avoid conflict of interest or the appearance of conflict of interest.

This problem occurred to me because of a personal situation. My spouse is also a Federal Trade Commissioner and prior to that time served in Government. In 1969, as I understand it, to avoid any conflict of interest or the appearance of conflict of interest, she put her holdings in a blind trust, where they have been ever since, and she has no knowledge of the assets.

It concerns this Senator, that if we have a strict interpretation of the language, there may be some who still feel that we are required in some way to find out what is in the blind trust of any spouse and somehow report that to the Senate despite the Schmitt-Javits amendment. Knowing of the discussions that have taken place on the floor of the Senate, I can only say that this would not be a problem if the wives of all of us—wives in this case, since all the Senators are men—were mere senatorial appendages. But many wives of Senators and staff members covered by the proposed ethics code have careers of their own, and many more could hold positions in the future which could call for a blind trust.

In this instance, the blind trust was not demanded or required, but it was suggested as a way to avoid any conflict of interest or the appearance of conflict of interest. That is the route that my wife chose at that time.

So, recognizing that we have mandated a study to be made in this area, recognizing that we also have language that would indicate that unless you have constructive control there is no requirement for disclosure of assets, the Senator from Kansas, in an effort to be helpful and to clarify this one area, has offered the amendment for discussion.

The Senator from Kansas discussed it very briefly with the distinguished floor manager of the bill, Senator NELSON, and earlier with the distinguished Senator from Connecticut (Mr. RIBICOFF). The Senator has also discussed this with the distinguished Senator from New Mexico (Mr. SCHMITT).

The Senator from Kansas recognizes that there is a problem with the definition of blind trusts and that currently there are no regulations which make sure that these things are truly blind. The Senator from Kansas understands that.

It is my hope that where a spouse may have a bona fide blind trust, some mechanism will be devised whereby the assets in that trust could be reported by the trustee to the Ethics Committee, but not divulged publicly or divulged to those who have the blind trust, because it might jeopardize their ability to sit in certain cases and their ability to act in their official capacity.

The Senator from Kansas agrees that disclosure is a good approach for those of us in this body. Constituents can look and see what we own and what influences there may be. In most cases, the legislation we pass on spreads out over industries and over the entire country, and we

avoid questions of conflicts of interest by disclosure.

However, in this case, a member of the Federal Trade Commission does make rulings that affect individual corporations. They sit as judges and could be compromised if they knew what individual companies they held stock in. In such cases, disclosure creates rather than solves a conflict of interest problem.

I suggest and hope that the distinguished Senator from Wisconsin will state his views on this particular problem. Then the Senator from Kansas will withdraw the amendment.

Mr. NELSON. Mr. President, as the Senator from Kansas knows, we dealt with the question of blind trusts in the committee and concluded that there are in fact blind trusts that would meet any standard that had been created by staff members and Members of both Houses of Congress. On the other hand, there very well may be—I am not familiar with any—blind trusts which are not totally blind and there are no standards, and we do not have time to establish standards for a blind trust.

In any event, therefore, we concluded they ought to be dissolved.

But then, after reporting the resolution and giving further thought to the matter, a number of us, including myself, concluded that that decision may not be corrected; that, in fact, there may very well be an appropriate role for a blind trust under the provisions of certain standards, and I think that may very well be the case.

Therefore, we concluded that it would be unfair to require by this resolution a dissolution of blind trusts, only to reach the conclusion 6 months later, when some of this language is translated into statutory language—if we then reach a conclusion—"Well, the blind trust under these standards is a good idea," and we would have caused Members and staff to dissolve blind trusts with all that inconvenience and expense, and then suddenly a few months later they discovered we now would authorize a blind trust under certain circumstances.

So we reached the conclusion that that section that required the dissolution of blind trusts should be placed in the study section and, as the Senator from Kansas knows, we provided there that the Governmental Affairs Committee should make a study, conduct hearings, and go into this matter in some depth, and then report back within 180 days to the Senate. I believe it also provided that the Rules Committee would have the opportunity to consider it for some specific period.

So the provision does not go into effect. It may be totally replaced by the recommendations of the Governmental Affairs Committee.

There was a further complication of which the Senator from Kansas is aware, and that is we are considering—this is one of the items that the House has under consideration—now to draft a statute on blind trusts that would cover the executive branch, the judicial branch, and the legislative branch.

So we concluded we had better just postpone the effective date and wait for what is recommended.

The Governmental Affairs Committee may simply recommend that we postpone the implementation a longer time and wait until we have reached a conclusion on the three branches of Government, which would then replace any proposal that is contained in the resolution.

So I think the valid question raised by the Senator from Kansas—and there are other Members and staff that no doubt have the same kind of problem—I think will be addressed and resolved in the next 6 months.

Mr. DOLE. Mr. President, if the Senator will yield, I think the additional consideration that has been discussed on the Senate floor is this: That unless the Senator knows what his spouse may have or has constructive control, it is difficult for him in any event to know what property the spouse may have and to report it.

Mr. NELSON. Yes.

Mr. DOLE. We went through that exercise the other day.

Mr. NELSON. Yes; but I think momentarily, in speaking to the Senator from Kansas, I misstated what is in that resolution when I said the resolution would not require dissolution of the blind trust of the spouse of the Member.

I rechecked that, and, yes, it does in its current form direct the dissolution, but it could be a futile exercise so far as disclosure is concerned because if the spouse said, "All right, I will dissolve the blind trust but I am not going to disclose to my spouse, who is the Member, what assets are in that," the resolution provides that the Member does not have to disclose anything he does not know so, in fact, it would not accomplish much even if we implemented it—it might not accomplish anything in any individual case. That is one of the reasons why the case raised by the Senator from Kansas, and in other cases, is one of the reasons that persuaded me that insofar as my decision was concerned with respect to the dissolution of a blind trust, it was precipitate, and we ought to delay that until an appropriate committee, the Governmental Affairs Committee, can look into it in some detail.

Mr. DOLE. Well, the Senator from Kansas concedes it could be a loophole. Somebody could transfer his property to his wife and say, "My wife has a blind trust; I cannot disclose what I do not know."

So I understand it is a very delicate question. But, it seems to me there ought to be some guidelines, and the Senator from Kansas is certain there will be some guidelines after study and hearings. Those hearings should tell us when you can have a bona fide blind trust so that those who work in Government or whatever can be protected in their jobs, whatever they may be. We will be able to do that and still comply with the ethics code. It is a difficult question.

Mr. NELSON. Yes.

Mr. DOLE. But, based on the statements of the Senator from Wisconsin, the Senator from Kansas is perfectly willing to withdraw the amendment, cooperate with other Senators who have jurisdiction over this rather sticky question, and trust that hearings will help, perhaps, to formulate some plan.

Mr. NELSON. Yes; as a matter of fact, some Senate committee staff have been in discussions on this issue with representatives of the executive branch, so I think if Congress works its will on this question we will have input, in addition, that of the executive branch.

Mr. DOLE. Mr. President, I withdraw the amendment, amendment No. 160.

The PRESIDING OFFICER (Mr. BUMPERS). The amendment is withdrawn.

UP AMENDMENT NO. 116

(Subsequently numbered amendment 177)

Mr. DOLE. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The second assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes unprinted amendment No. 116:

On page 40, after line 7, insert the following new rule:

"Rule —

"COMMITTEE TIME AND ATTENDANCE RECORDS

"If any administrative records are kept for or by a committee containing time and attendance records, those records shall, in the case of absence, reflect attendance at other committee meetings and attendance to other official duties.".

Mr. DOLE. Mr. President, this may not seem at first blush to be of any great significance, but the Senator from Kansas discovered that some committees keep records and keep track of the hours, minutes, and seconds you spend at that committee's hearings.

The Senator from Kansas does not object to that, but many times you are attending to business of other committees, and that is not reflected.

I give you one example, that being the Committee on Finance. When you go to Committee on Finance meetings you are clocked in and you are clocked out.

The fact that you may have been at some other committee meeting for 40 minutes or for the last 3 days is not reflected on that record.

If someone could get a hold of these records they could use them unfairly against any Senator, Republican or Democrat, to indicate to the folks back home that you did not attend the Committee on Finance meetings. Those records would not reflect the fact that you were in the Committee on Agriculture every day or the Committee on Governmental Affairs every day.

All this amendment does is to say that when records are kept by any committee they should also reflect whether his absence was due to other official duties. Then, when the final summation is reported it will show whether or not the Senator was working somewhere in the Capitol.

Mr. NELSON. I agree with the Senator from Kansas. I am just wondering

whether it is an amendment we want to put on the code of conduct resolution.

Mr. DOLE. I do not know where else to put it.

Mr. NELSON. I think the best answer would be, the best resolution would be, that we do not keep the records.

I will give the Senator a case in point with respect to what he is talking about.

The Committee on Human Resources was meeting, the Committee on Finance was meeting, and I was working every single day trying to get this resolution in shape to come to the floor under the mandated deadline, so I simply concluded I could not attend the hearings and markups of the Committee on Human Resources or the hearings and markup of the Committee on Finance; notified the chairman, gave my proxy on the issues that would be voted. But the fact of the matter is all of those meetings would show me as absent. At the same time I am trying to get myself prepared in my discussions and negotiations on getting an amendment together to come to the floor.

Last year when we were marking up the tax bill, to give another personal example, I was attacked for not being present at enough Finance Committee meetings. At the same time, I had made a commitment months before that I would conduct hearings on the Humphrey-Hawkins bill and set the date before the Finance Committee markup was ever established. So for 4 solid days—I think it was 4—I was in there conducting hearings and could get no one else to take my place because Senators were conducting some other business. So I was shown as absent 4 days while I was conducting other business.

So I think what makes the most sense is they do not try to keep that kind of record.

Mr. DOLE. If the Senator will yield, the Senator from Kansas agrees with that. If we are not functioning as we should and are not going to committee sessions, perhaps it should be noted, and it probably will be noted. None of us are in any different category. I happen to be the ranking Republican on the Committee on Agriculture and Forestry. We had 70-some hours of hearings in that committee which precluded my attendance in the meetings of the Finance Committee and also the Budget Committee. Additionally, as the Senator indicated, sometimes we have official duties other than sitting in committee hearings. Perhaps we are preparing amendments or doing something else, and it is an official duty of the Senator.

It simply seems to the Senator from Kansas that we should not be regarded as being absent or not interested. Once it is published, we shouldn't have to spend the rest of the year explaining, "Well, that story is not accurate because I was doing such-and-such." Why not suggest, if they are going to keep records, that the record also reflect that the Senator from Wisconsin was at some other place or at some other committee meeting. I think that would end the unfairness associated with recordkeeping very quickly.

Mr. NELSON. I agree with the Senator. It seems to me we should be amending a rule that does now already deal with the question of committee meetings. We have rules on times that they can meet and schedules. We should amend that rather than this.

Mr. DOLE. The Senator from Kansas agrees. Keeping these records is not unethical. But their use in political campaigns by opponents only interested in part of the story, could be.

Mr. NELSON. I do not think it is unethical to miss a meeting.

Mr. DOLE. I do not suggest it is. They keep a record on someone who is at a meeting just because he is not at yours.

Mr. NELSON. I say in any event, I do think we should amend another rule. I do agree with the Senator from Kansas on the point he is raising, but I am not prepared to accept an isolated rule amending how committees operate in this code of conduct because I think we should amend the appropriate rule that sets the time when meetings, quorums, and so forth, are required for committee business.

So I would appreciate it if the Senator would not press it. However, if he wishes to, I would prefer that it be done then tomorrow. I do not wish to accept it here because I think it might create some controversy by some other Senators who did not anticipate this proposal coming up.

Mr. DOLE. The Senator from Kansas will not suggest that he wishes to press it. But it seems every committee has its own rules; some committees keep records and some do not keep records. It seems to this Senator that the best way to do it is in some general way. There have even been reports made that Democrats keep track of Republicans and some Republicans keep track of Democrats. I guess we could not stop that if they wanted to have a little activity on the side. But as far as the committee function, this Senator does not believe it is in the best interest to keep absentee records that do not reflect valid reasons for being gone.

I am happy to carry it over until tomorrow and perhaps we could figure out some way to address it to some other legislation.

Mr. NELSON. The Senator is well within his rights. All I say is I wish at least for the moment he withdraw it. If he wishes to take it up tomorrow and does not wish to defer it to some other time, all right. Some Members, as the Senator knows, have gone to the White House, and they may very well have some strong feelings about this. I do not want them to be presented with a fait accompli, although sometimes that is the best way to legislate if one wants to get something done.

Mr. DOLE. The Senator from Kansas will withdraw the amendment and hopefully between now and tomorrow we can come to some agreement without any need for an amendment to any bill. This Senator believes we should keep track of our total activities and report total activities rather than piecemeal activities that might distort the real record of any Senator.

Mr. SCHMITT. Mr. President, will the Senator yield for a comment?

Mr. DOLE. I yield.

Mr. SCHMITT. I think there is some correlation, for the purposes of tomorrow's discussion on this item, which might be brought up again, and the earlier discussions about earned income and other outside activity by a Senator detracting from the time that is spent on Senate business. The Senator's discussion relates to a false impression of the time that is spent on Senate business. I think, in the spirit of the resolution, that unfortunately is limiting outside earned income partially for that reason that the time would be spent on non-Senate business, that this should be considered in a favorable light either as an agreement or potential amendment to the resolution.

Mr. DOLE. I might say to the Senator that all members of the Finance Committee received four or five pages, rating us with other Senators as to how much time we spent on the committee and how many votes we missed on the committee. It must have taken many hundred manhours to put that together for every member of the Finance Committee. There is not one word in that report that the Senator from Kansas, Senator from Wisconsin, or Senator from Wyoming, might have been attending committee meetings elsewhere. It just seems to me that that is a distorted record and it does give a false impression which some, particularly those who might have eyes on your seat, wish to write about and distribute to the Senator's State.

Mr. NELSON. I might say to the Senator there are any number of times, as everyone here well knows, in which a hearing is being conducted and there may not be any other committee meeting but a Senator may be wishing to address himself to some other work that needs to be done, whether it is meeting with some constituents with a problem or whether it is studying some issue that he is going to deal with. I cannot believe that anyone here could read that hearing record about six times as fast as the people who are appearing at the hearing at all. So a Senator wants to go through that hearing record and pick out significant testimony. Many Members, I am sure, frequently do what I frequently do, which is to say to a staff member who is covering that:

> Mark for me the most significant testimony. I do not want all the duplication. Give me the best arguments pro and con.

And it may be a 200-page hearing record and there may be about 50 pages or 60 pages that should be read. So, even if there is not another committee meeting, there may be another priority to which a Member should be addressing himself that is more important than sitting there listening to a hearing which is going to be printed and can be read before the markup and before any legislation comes to the floor.

Mr. DOLE. There was a time not too long ago, that, if we had three committee meetings at 10 o'clock, the practice some would follow would be to report in to each committee. You would go to the

first committee where you were marked present, you would go to the next committee and be marked present, and you would go to the third committee and be productive, and stay there for the hearings.

As I have indicated, there are times when there are other things more important that sitting in some hearing listening to a witness read for 2 hours a statement someone has handed him to read to you. I can usually read a little faster than someone else can read to me.

The point I am making is that this seems to me to be a bad practice, that we should address particularly those who might be thinking about some false impression or distorted record getting back to our home States.

But the Senator from Kansas will withdraw the amendment and try to figure out some other way to present it tomorrow.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. DOLE. Mr. President, I ask unanimous consent that a Library of Congress survey of the attendance recordkeeping practices of Senate committee be included in the RECORD at this point.

There being no objection, the survey was ordered to be printed in the RECORD, as follows:

RECORDING SENATORS' ATTENDANCE AT MEETINGS OF THEIR COMMITTEES

Multiple committee and subcommittee assignments have made it increasingly difficult for Senators to attend all the meetings of committees to which they are assigned. The Staff Report of the Senate Select Committee on Committees noted that reduction of Senators' scheduling conflicts was one of the major reforms to be sought in the Senate committee system. "Increased activity at all levels has led to scheduling conflicts. As floor sessions have lengthened and as committee and subcommittee meetings and hearings have mushroomed, Senators more frequently face the daily dilemma of reconciling two, three, or more conflicting meetings or hearings, while still coping with ongoing floor debate and frequent roll call votes."[1] Although the recent Senate committee system reorganization has reduced Senators' scheduling conflicts to a degree, the conflicts still exist, and frequently prevent committees from obtaining a quorum to conduct business.[2]

Attendance of Senators at committee meetings, and the maintenance of records of such attendance, may occasionally be of importance in court decisions. In 1975, the U.S. Circuit Court of Appeals unanimously overturned the perjury conviction of California Lt. Gov. Ed Reinecke because the Senate committee before which his testimony was given had failed to print its revised rules requiring the presence of only one Senator to constitute a quorum for receiving testimony. If committee records had been available establishing the presence of a sufficient number of Senators to constitute a quorum under the former rules, the conviction could have been sustained. However, such records were not available.[3]

A survey of Senate standing and select committees reveals a wide disparity among the committees in procedures for recording the attendance of Senators at hearings, markups, and other committee meetings.[4] The most detailed committee attendance records appear to be maintained by the Senate Finance Committee. A member of the Committee's clerical staff records the time each Senator arrives at, or leaves, a Finance Committee meeting. Staff sources did not recall when the practice began, but explained that it probably predated the tenure of the current chairman (1965). Among the reasons for maintaining the records is the practice of the Committee to permit its members to question witnesses on a "first come, first served" basis, rather than by seniority on the Committee. Thus, the records form the basis for the order of questioning at hearings, and in Senator's statements in mark-up sessions.

The attendance records are maintained separately from other committee records, and are not included in transcripts or published records of hearings or markups. Committee sources were uncertain whether the records would be made available to Senators not members of the committee or to the public since no request for the records had ever been made.

Staff sources at the Committee on Foreign Relations indicated that their committee formerly recorded the arrival and departure of its members at meetings, but that the practice had not been followed in many years.

With certain exceptions, the remaining Senate committees record the names of Senators in attendance at hearings and markups, but do not record the time each Senator was present at the committee meeting. Most committees list, at the beginning of a meeting or hearing transcript, the names of the committee members who were present for any part of the meeting. Thus, committee records would make no distinction between a Senator who was present for an entire meeting, and one who appeared for only a short time.

Two committees, the Senate Commerce and Environment Committees, do not record attendance at hearings because the presence of only one Senator is required to establish a hearing quorum.

ADDITIONAL STATEMENT SUBMITTED ON SENATE RESOLUTION 110

Mr. GOLDWATER. Mr. President, for over 10 days now, in fact, for nearly 2 weeks, we have been arguing the subject of ethics on the floor of this Senate. Now I think we all know the source of this clamor for ethics. It comes from an organization known as Common Cause. I have no quarrel with them.

I have no quarrel with the idea that there should be some way of attempting to control the actions of the Members of the Senate but, Mr. President, this has become a colossal joke. I have had very few letters or telephone calls on the subject. One letter was from the League of Women Voters in my State. In answering their original questions I saw no problem in telling them that I could endorse the approach being made and would vote for it. But I have since had to write the organization and tell its members that the way this thing appears now I could not vote for it. However, I will submit a statement and I will further submit my income tax when it is completed around the middle of April.

Disclosure is something I can go along with, but this idea that you can limit the amount of money that a U.S. Senator or a Member of the House can make, to me is unconstitutional, and it is wrong. You are not going to legalize morality. We tried it with prohibition and it failed. Every time we meddle with people's morals, with laws, we face failure and the situation worsens. I have respect for the people who wrote this bill. I know they had a very difficult time. I know that there were many compromises made and they spent unusually long hours and days trying to put something together that would make it appear to the American public that the Members of the Senate were really high-classed, clean, honest individuals. Now I happen to think the great bulk of the people in any legitimate organization are honest people. I think there may be 5 percent of the American people who will take advantage of a position for their own good, and you will find this group in churches, charity groups, any organization. This has always been the case and it will always be the case.

No matter what we come up with in the way of a so-called ethics bill there will be those relatively few Members of this organization who will take advantage of their position.

I might point out that there are laws that govern many aspects of the opera-

tions of the Senate and House, but these did not deter some Members from flagrant abuses. What I am getting at, Mr. President, is that the so-called bad apples in the barrel will not be made whole, no matter what kind of restrictions are voted, either in the form of codes or statutes. I keep getting back to the point that we cannot legislate morals. If we could, the Congress long ago would have adopted a law to make all of its Members forever virtuous. Human nature being what it is there will always be in every group those who place their own avarice and greed above the good of the whole. And nothing we can do in a legislative way is going to change that.

It is my fear, Mr. President, that in this ethics exercise we may easily become the laughingstock of America unless we face this issue honestly. We are in effect beating ourselves over the head and I continue to ask myself, "Why?"

In conclusion, I should like to say that many Members of this Senate have honestly and courageously stated positions which may be difficult for them in the light of the present righteous moralizing on the part of organizations like Common Cause and many segments of the media. I salute them for their integrity on this question of ethics.

Mr. NELSON. Mr. President, I call attention to the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL GRAIN INSPECTION AND WEIGHING PROGRAM IMPROVEMENTS

Mr. ROBERT C. BYRD. Mr. President, what is the pending business before the Senate?

The PRESIDING OFFICER. The pending business is S. 1051, which the clerk will state.

The assistant legislative clerk read as follows:

Calendar No. 51, a bill (S. 1051) to amend the United States Grain Standards Act with respect to recordkeeping requirements and supervision fees, and to establish an advisory committee to provide advice to the administrator of the Federal Grain Inspection Service, and for other purposes.

The Senate resumed the consideration of the bill.

Mr. CLARK. Mr. President, I ask unanimous consent that Bill Motes of my staff be granted the privilege of the floor during the consideration of S. 1051.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum. I ask the the time be charged equally against both sides on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is S. 1051.

Mr. HUDDLESTON. Mr. President, I yield to the Senator from Texas.

Mr. TOWER. Mr. President, I ask that it be in order to ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. On which amendment?

Mr. TOWER. On amendment No. 141.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Who yields time?

Mr. HUDDLESTON. I yield to the Senator from Texas.

AMENDMENT NO. 141

Mr. TOWER. Mr. President, I call up my amendment No. 141, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Texas (Mr. TOWER) for himself, Mr. BENTSEN, Mr. LUGAR, Mr. CURTIS, Mr. MCCLURE, Mr. ZORINSKY, Mr. BARTLETT, and Mr. PACKWOOD, proposes an amendment No. 141.

The amendment is as follows:

On page 15, after line 12, insert the following new section:

SEC. 7. Section 11(b) of the United States Grain Standards Act (90 Stat. 2881-2882; 7 U.S.C. 87(b)) is amended by inserting in paragraph (5) thereof immediately following the first sentence the following: "The Administrator shall, in making a determination under this paragraph, consider—

"(A) the historical record of the organization and its employees with respect to integrity in the provision of inspection or weighing services;

"(B) whether there exists a balance of buyers and sellers on the board of directors, or other governing body of the inspection service organized under a board of trade or private exchange;

"(C) whether there exists an autonomous committee or other governing body to manage an inspection service provided by a chamber of commerce; and

"(D) such other criteria as the Administrator, after consultation with the Advisory Group established under this Act, upon the Advisory Group's recommendation, may by regulation provide.".

Mr. TOWER. Mr. President, the background of these amendments is this: A series of scandals involving the grain trade over the last 2 years resulted in 1976 in the passage of amendments to the Grain Standards Act, restricting sharply the participation of private boards of trade, grain exchanges, and chambers of commerce in the inspection of grain moving into export.

Under the 1976 amendments, a private agency may be allowed to provide official inspection and weighing of grain in interior terminals under a waiver of conflict of interest provisions. The administrator of the Federal Grain Inspection Service determines the granting of waivers on a case-by-case basis, but the 1976 amendments provided no guidance to the administrator in making this determination.

The amendments also required that FGIS provide weighing and grading services for shipments of grain out of export terminals and for official weighing of shipments into export terminals from areas within the United States. The amendments do not provide mandatory grading of grain on inbound shipments but allows FGIS to perform such a service at the discretion of the administrator.

Supervisory services, which prior to the amendments comprised the essential involvement of the Federal Government in grain inspection and weighing, continue to be performed by FGIS on an expanded scale. The amendments set no limit on the number of supervisors which would be employed, leaving that determination, again, to the administator.

Costs of federally mandated weighing and grading services performed by FGIS under the act and amendments of 1976 are paid for through user fees. A schedule of fees published in early 1977—January 5—levies charges to users of grading and weighing services performed by FGIS of some two to three times the fees paid for identical service provided by private inspection agencies in the past.

In order to allow the orderly functioning of the Nation's grain inspection system, and to reduce the burden of the system's costs on grain producers, four changes have been identified in addition to those already considered in this Congress. Following 2 days of hearings on grain inspection system problems, amendments to the act—attached—were drafted by Senators BENTSEN, PACKWOOD, LUGAR, ZORINSKY, CURTIS, BARTLETT, MCCLURE, and myself.

I intend to proceed to offer these amendments in order, Mr. President, with a brief explanation of each, and I hope that they will be carefully considered by the Senate.

My amendment, No. 141, would provide criteria for the administrator of FGIS to consider in making his determination as to whether a waiver should be granted for any potential conflict of interest. On at least two occasions, the administrator has expressed to my staff his desire to have such criteria, either from Congress or from the advisory committee. I believe it is incumbent on Congress to provide that guidance, while leaving substantial room for additional criteria which either the administrator or the advisory committee may suggest.

This amendment does not require the administrator to do anything more than consider these suggested standards for a board of trade, private exchange, or chamber of commerce which seeks to be designated as the official inspection agent of the FGIS. It is obligatory only in

that the administrator shall consider the criteria. I do not believe that that is too much to ask in the way of curbing the discretion of an administrator, and, therefore, I urge the adoption of my amendment.

The PRESIDING OFFICER. Who yields time?

Mr. CLARK. Will the Senator yield 10 minutes to me?

Mr. HUDDLESTON. Yes; I yield 10 minutes to the Senator from Iowa.

Mr. CLARK. Mr. President, I rise in opposition to the amendment, but I point out that there is no administrator as yet for the Federal Grain Inspection Service. There is only a temporary Acting Administrator, who has been put in on a very brief notice, and certainly, would not have any standing in the Department of Agriculture in terms of their policy. In fact, I asked the Secretary of Agriculture at the time of his confirmation hearings whether he favored weakening in any way the conflict of interest provisions of this law. He assured us on the record at that time that he did not.

I oppose the amendment, even though I think it is an innocent sounding proposal to spell out certain criteria which the Administrator of the Federal Grain Inspection Service shall consider in making a determination under the conflict of interest section of the U.S. Grain Standards Act of 1976—a determination whether or not he will waive the conflict of interest prohibition in certain cases.

In fact, the proposed amendment would spell out several sets of conditions under which there would be increased pressure on the Administrator of the Federal Grain Inspection Service to waive the conflict of interest prohibition now in the law—to provide, if not an automatic waiver—which some argue should exist, and which I oppose—then certainly, a semiautomatic waiver. There should be no mistake, Mr. President, that the inclusion in law of such criteria is a major step toward investing them as the rules and conditions to be met to qualify an applicant for a waiver of the conflict of interest prohibition.

Mr. President, we must not lose sight of the importance of the role of conflict of interest in the problems found in the past in our grain inspection system. The Grain Standards Act and the administrative regulations of the USDA previous to the passage of last year's grain standards amendments prohibited conflicts of interest on the part of grain inspection personnel, but conflicts on the part of grain merchandisers were either permitted or not specifically prohibited. As a result, the General Acounting Office found financial and other relationships between inspection agencies and those they dealt with on a daily basis. The GAO concluded that these relationships either compromised or gave the appearance of compromising the independence of the grain inspection system.

Conflicts of interest are a problem because many aspects of grain grading and weighing involve human judgment and skill. They result in decisions involving thousands of dollars or more in the outcome of each. Furthermore, to work efficiently and smoothly, the inspection and weighing system must move rapidly, with judgments quickly made and quickly reported to both buyers and sellers. All participants must have confidence in the system, and disputes must be minimized and quickly settled by well understood rules, with the whole process open to all.

The existence of a conflict of interest is a threat to each of those conditions. The most basic requirement that grading and weighing be done in the most objective fashion possible is threatened. The confidence buyers and sellers have in the system is reduced. The effectiveness and smoothness of the flow of trade is reduced or threatened. Eventually, buyers seek other markets when they have the choice—as happened with some of our foreign buyers previous to the passage of the 1976 grain standards act. Let me quote, Mr. President, from the GAO report on the irregularities in the marketing of grain prepared and released last year for the committee:

> To be effective, an inspection system must avoid any appearance of situations that compromise its independence. Under a system which tolerates actual or potential conflict of interest, there can be little confidence in the independence and credibility of those charged with inspection responsibilities.

There are two basic problems with the criteria proposed in the pending amendment, Mr. President. They are vague and they do not offer substantial protections to replace the protections given up when conflicts of interest are permitted.

The specification of criteria for waiving conflict of interest prohibitions implies that in return for permitting a conflict of interest, another protection is supplied. The key question, then, is how effective and adequate is the substitute protection compared to the prohibition of conflict of interest that it is to replace? If the substitute is less adequate than the conflict of interest prohibition, then we should not accept the substitute.

Mr. President, let us examine the criteria proposed by this amendment in those terms. First, they would require that the historical record of the organization and its employees with respect to integrity in the provision of inspection or weighing services be considered. This would certainly be a minimum requirement—one which should be required of any person or firm in a position of trust—rather than a significant protection.

Clearly, this provision already exists in the law, and its specification here should not be taken as a reason to justify a conflict of interest.

Second, the amendment would require a balance of buyers and sellers on the board of directors, or other governing body of the inspection service organized under a board of trade or private exchange. It is not clear what protection a balance of buyers or sellers offers users of the service. It is not clear whether one large buyer, for example, could balance several small sellers, or whether an equal number of equal-sized buyers and sellers would be required. It is not clear how firms would be treated that are both buyers and sellers; nor is it clear what would prevent the buyers and sellers on that market from joining together to the disadvantage of other buyers or sellers, or the rest of us. Clearly, such a vague requirement is a very weak protection to offer to replace the fundamental requirement of an objective, unbiased, disinterested referee.

The third specific criterion that the sponsors of this amendment would offer as a protection to replace the prohibition of a conflict of interest is the requirement that the committee or other governing body of an inspection or weighing firm be autonomous within a chamber of commerce. This requirement is also vague, and, in a sense, a contridiction of terms, in the final analysis, the question of what links the "autonomous" body would have to the parent body must be dealt with. If the chamber of commerce provides the capital to establish the inspection or weighing agency, in fact how autonomous is the committee? Under what circumstances could the capital be withdrawn? The officers unseated? I suggest that the concept of an autonomous committee within a parent agency that has, itself, a conflict of interest is a virtual impossibility because of the fact that there are always real or implied links and controls that tie the so-called autonomous body firmly to the parent agency—and to its conflict of interest.

Finally, Mr. President, the fourth criterion says that the administrator shall, in making a determination under this paragraph, consider such other criteria as the administrator, after consultation with the advisory group established under this act, and upon the advisory group's recommendation, may by regulation provide.

This criterion, too, appears vague to me. It says to me that the administrator must consult with the advisory group, and that he may provide other criteria. This would seem to tie the administrator rather more closely to his advisory group in the establishment of these criteria than I believe Congress intends. I would oppose it on those grounds.

In summary, Mr. President, I am greatly concerned that the four criteria offered in this amendment offer us—the grain trade, producers, and consumers—very little protection in return for permitting widespread conflict-of-interest situations.

The fact is that conflict of interest is always a threat to the integrity of the system. This does not mean that those who have a conflict of interest are evil people, or that they are immoral. But it does mean that they do not meet the highest standards of objectivity by reason of the fact that they have a certain, specific, vested interest in the outcome of every decision—a conflict with objectivity.

Mr. President, conflicts of interest are prohibited in most systems because they are a threat to the integrity of the system. The only effective way I know of dealing with conflicts of interest is to prohibit them. In the whole history of Anglo-Saxon law, it has proven impossible to find rules which both effectively permit and adequately protect against conflicts of interest. The rules provided

in this amendment are no exception, Mr. President. They do not protect us against conflicts of interest. They should not be substituted for the only rule that works, the prohibition of the conflict of interest itself.

I have opposed the use of the waiver of the conflict of interest prohibition since it was first proposed—and indeed, this body turned it down. I voted against the act last year because the conflict of interest provision was included. Mr. President, I oppose these amendments because they are vague, and because their impact would be to further weaken the law.

The PRESIDING OFFICER (Mr. ANDERSON). Who yields time?

Mr. HUMPHREY. Mr. President, will the Senator yield me 2 minutes?

Mr. HUDDLESTON. I yield the Senator 2 minutes.

Mr. HUMPHREY. Mr. President, I call to the attention of the Senate today, as the Senator from Iowa (Mr. CLARK) noted, this was a very contentious feature of the bill. We did design language in the current legislation that reads as follows:

> Whenever the Administrator makes such a determination and makes a delegation or designation to an agency that has a conflict of interest otherwise prohibited by this subsection, the Administrator shall, within thirty days after making such a determination, submit a report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture and Forestry of the Senate, detailing the factual bases for such determination.

What I am pointing out is that there is flexibility in the law.

This debate, I think, can be helpful to the administrator. But, quite honestly, we ought to try to eliminate all conflicts of interest, and that is what we tried to do and on the original Senate bill did do. In our conference committee, we made some adjustments.

Mr. President, it has been over a year since Members of Congress became fully aware of wrongdoing and corruption in the U.S. grain inspection and weighing program and of the need for remedial legislation. It has been over 4 months since the U.S. Grain Standards Act of 1976, a wide-ranging measure designed to reform the inspection and weighing program, went into effect.

The 1976 act calls for the replacement of the private grain inspection and weighing agencies at export locations by Federal inspectors and weighers. It establishes a number of new requirements of law to protect American farmers from further abuses.

These first few months, I believe, are crucial to the ultimate success or failure of these reform measures. As with any new program, there will be bugs in the system that must be quickly eliminated. Important executive decisions must be made soon that will have far-reaching effects. For these reasons, strong and capable leadership is absolutely essential now.

Indeed, as the Committee on Agriculture, Nutrition, and Forestry has documented, the new grain inspection and weighing program has already encountered some rough going in a couple of areas, which perhaps could have been averted by the exercise of some sound leadership.

And although the committee stands ready to do everything it can to facilitate a smooth changeover in policies and procedures, it cannot be a substitute for an administrator.

In addition, many important features of the new law have not to date been implemented. To a large degree, this is due to the impossibility of accomplishing everything at one time. Yet, this is also due to the fact that there is no administrator in place to see to the implementation of these features.

Yet, amazingly, 4 months after the new program began, an Administrator has not been appointed.

Mr. President, the leadership problem at the Federal Grain Inspection Service grows more serious with each passing day; and, I believe, it will not be too long before the lack of leadership does irreparable harm to this much-needed new program.

I realize that Secretary of Agriculture Bergland is faced with a very large task in effecting a complete transition of leadership for the many agencies and bureaus within the Department of Agriculture. However, the appointment of an Administrator of the Federal Grain Inspection Service clearly is a high priority, and I urge the Secretary to recruit and appoint a person of experience and competence for that position.

Mr. President, I ask unanimous consent that a list of the various tasks and responsibilities of the Administrator of the Federal Grain Inspection Service originating from the U.S. Grain Standards Act of 1976 be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follow:

BREAKDOWN OF RESPONSIBILITIES OF THE ADMINISTRATOR OF THE FEDERAL GRAIN INSPECTION SERVICE UNDER THE U.S. GRAIN STANDARDS ACT OF 1976

Task	Effective date	Status: Completed	Status: Not completed
1. Transfer to Federal inspection and weighing at certain export port locations.	May 20, 1978		X
(a) Toledo, Ohio	Jan. 16, 1977	X	
(b) New Orleans (Destrehan)	Feb. 12, 1977	X	
(c) Saginaw, Mich	Jan. 16, 1977	X	
(d) Chicago, Ill	Feb. 1, 1977	X	
(e) Beaumont, Tex	Feb. 27, 1977	X	
(f) Houston, Tex	Mar. 12, 1977	X	
(g) Milwaukee, Wis	Apr. 4, 1977		X
(h) Galveston, Tex	May 7, 1977		X
(i) New Orleans (New Orleans Board of Trade)	May 7, 1977		X
(j) Albany, N.Y	June 4, 1977		X
(k) Baltimore, Md	Aug. 2, 1977		X
(l) New Orleans (South Louisiana)	Aug. 27, 1977		X
(m) Corpus Christi, Tex	Sept. 30, 1977		X
(n) Huron, Mich	Nov. 26, 1977		X
(o) Philadelphia, Pa	Jan. 21, 1978		X
2. Implementation of "official weighing" of all grain exported.	Nov. 20, 1976		X [1]
(a) Approval of weighing facilities			X
3. Delegations to certain State agencies for the performance of export inspection and weighing.	May 20, 1978		X
(a) Investigation of applicants			X
(b) Findings made based on investigation			X
4. Designations to State and private agencies to perform inspection and weighing services at interior points.	Nov. 20, 1978		X
5. Equipment testing program initiated	Nov. 20, 1976		X
6. Establishment of Federal Grain Inspection Service:	Nov. 20, 1976	X	
(a) Budget		X	
(b) Hiring of personnel			X
(c) Issuance of regulations under the U.S. Grain Standards Act of 1976.			X
7. Implementation of Federal supervision program	Nov. 20, 1976		X
(a) Appropriations approved and fee schedule set	NA		X
(b) Personnel hired and trained			X
8. Implementation of required inspection and weighing of United States grain transshipped through Canada.	May 20, 1978		X
9. Policy and program for rotation of personnel	Nov. 20, 1976		X
10. Development of standards for the recruitment, training, and supervision of personnel, and work production standards.	Nov. 20, 1976		X [2]
11. 13 license or designation revocation proceedings pending in the Federal Grain Inspection Service.	NA		X
12. 48 criminal investigations pending in the Federal Grain Inspection Service.	NA		X
13. Development of criteria for waivers of conflicts of interest rules.	Nov. 20, 1976		X
14. Review of existing State and private agencies to determine compliance with conflicts of interest rules.	Nov. 20, 1976		X
15. Development of regulations setting procedures for investigating complaints and cancellation of export contracts.	Nov. 20, 1976		X
16. Implementation of program for monitoring grain shipments overseas.	Nov. 20, 1976		X
17. Implementation of continuing research program to improve grain grading.	Nov. 20, 1976		X
18. Implementation of program for registering export grain companies.	Nov. 20, 1976		X
19. Annual report to Congress on the implementation of the U.S. Grain Standards Act.	Nov. 20, 1977		X
20. Annual submission to Congress of a summary of complaints made by foreign buyers of U.S. grain.	Dec. 1, 1977		X
21. Quarterly report to Congress on investigative responses to complaints.	Feb. 20, 1977	X	
22. Special study of grain inspection and weighing practices at interior locations.	May 20, 1978		X
23. Special study of grain standards	Nov. 20, 1978		X

[1] Implemented at Houston, Beaumont, and Destrehan only.

[2] Only the recruitment standards have been developed.

Mr. TOWER. Mr. President, I yield 3 minutes to the Senator from Kansas.

Mr. DOLE. I thank the Senator.

Mr. President, as the distinguished Senator from Minnesota just pointed out, the exchange will be helpful because there is a feeling in the Department that the so-called waiver provisions are so rigid they do not intend to move on the waiver provisions.

I would like to lend my support to the amendment of the Senator from Texas because it will provide some necessary guidelines. All we are talking about are guidelines. not suggesting anything rigid. We are talking about guidelines to assist the administrator to determine whether or not a waiver should be granted.

It seems to the Senator from Kansas that it is necessary we do this. I recall that in the joint conference committee, as has been pointed out by the Senator from Iowa and the Senator from Minnesota, this provision received a great deal of contention. At many of the conference sessions, a great deal of the time spent in the meetings, was primarily on this one point.

It was the understanding of this Senator that we had resolved this problem by granting the administrator authority to grant waivers on the conflict-of-interest provision when he believes the integrity of the system would not be compromised.

Since the passage of the bill last year, the Federal Grain Inspection Service has indicated they cannot determine criteria necessary for the granting of such a waiver, and therefore no waivers will be granted.

So we say, on the one hand, a waiver can be granted and, on the other hand, it is not possible to determine the criteria. FGIS officials indicated such a position. They have repeated this position many times at many regional meetings, and at recent hearings conducted by the Agriculture Committee.

Since the Congress established authority for a waiver, the Senator from Kansas feels it appropriate we also indicate those circumstances under which we would approve a waiver.

It is the opinion of the Senator from Kansas that the amendment of the Senator from Texas (Mr. TOWER) properly establishes such criteria.

On that basis, the Senator from Kansas wants a strong grain inspection bill and wants to preserve strong legislation. We indicated, as the Senator from Minnesota just read from the bill itself:

> Whenever the administrator makes such a determination and makes a delegation or designation to an agency that has a conflict of interest otherwise prohibited by this subsection, the Administrator shall, within 30 days, and so forth.

But then, there is no criteria and because there is no criteria, the acting administrator says that they cannot make that waiver determination.

It seems to me we have some responsibility to assist the administrator if we are going to have a proper interpretation of this act.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. TOWER. Mr. President, I yield myself 1 minute.

I would point out that these criteria were recommended by producer groups during the hearings, before the committee. I further note that this amendment strengthens the act by providing some direction to the Administrator. It does not mandate anything, it just provides some direction.

At this point I will read a list of the States or private agencies performing official inspections: Arizona, Arkansas, California, Colorado, Idaho, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maryland, Michigan, Nebraska, New York, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Tennessee, Texas, and Utah.

I ask unanimous consent to have the list of States with private agencies performing official inspection services printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

States where private agencies are performing official inspection services

State	At interior points	At export points
Arizona	X	
Arkansas	X	
California	[1] X	
Colorado	X	
Idaho	X	
Illinois	[1] X	
Indiana	X	
Iowa	X	
Kentucky	X	
Louisiana		[2] X
Maryland		X
Michigan	X	
Nebraska	X	
New York	X	X
North Dakota	X	
Ohio	X	
Oklahoma	X	
Pennsylvania	-	X
South Dakota	X	
Tennessee	X	
Texas	X	[2] X
Utah	X	

[1] State department's of agriculture also perform official inspection services at certain points.

[2] FGIS also performs official inspection services at certain points.

Mr. TOWER. I think that this amendment actually improves the bill, and I hope that it will be given favorable consideration.

I ask unanimous consent to have printed in the RECORD a letter to the chairman of the Committee on Agriculture, Nutrition, and Forestry, Senator HERMAN TALMADGE, which was signed by Senators BARTLETT, ZORINSKY, CURTIS, ANDERSON, PACKWOOD, LUGAR, MCCLURE, and myself.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., February 28, 1977.

Hon. HERMAN E. TALMADGE,
Chairman, Committee on Agriculture, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: On behalf of grain producers and marketers in our states, we appreciate your Committee's prompt attention to many of the problems which have arisen in implementing the Grain Standards Act of 1976. The hearings which Senator Huddleston's Subcommittee held in this regard were most helpful in identifying these problems, and the solutions embodied in S. 592 and S. 593 will go a long way toward their solution.

We would hope that the Committee will also consider changes in the law which have not been addressed in the proposed legislation. We are enclosing for the Committee's consideration draft amendments which we are sponsoring, and which we feel are essential in resolving the remaining problem areas which have been identified.

The amendments would:

1. Provide criteria for the Administrator of the Federal Grain Inspection Service in the granting of waivers for apparent conflicts of interest among boards of trade, private exchanges, and chambers of commerce.

2. Establish a ceiling on federal supervisory personnel to replace the "blank check" which FGIS received under the present law.

3. Allow FGIS to designate a board of trade, private exchange, or chamber of commerce to perform official inbound inspection at export points to facilitate the orderly marketing of grain.

4. Provide for partial funding through appropriations of all federally mandated inspection, weighing or supervisory costs.

It may be the judgment of the Committee that criteria for granting a conflict of interest waiver could effectively be provided to the Administrator through report language rather than through an actual amendment of the Act. Although we would prefer legislative language, we would be happy to see such language which would achieve the same result.

As cosponsors of these amendments, we would appreciate your consideration of them at the time you mark up legislation dealing with the Grain Standards Act. Adoption of these amendments, it seems to us, eliminates any remaining problems experienced under the Act and will serve to enhance the system which the Committee devised last year.

Sincerely yours,
John Tower, Dewey F. Bartlett, Edward Zorinsky, Carl T. Curtis, Lloyd Bentsen, Bob Packwood, Richard G. Lugar, James A. McClure.

Mr. TOWER. Mr. President, I am prepared to yield back the remainder of my time.

Mr. YOUNG. Mr. President, will the Senator yield?

Mr. TOWER. I yield 2 minutes to the Senator from North Dakota.

Mr. YOUNG. Mr. President, I have not received a single complaint on the bill pending before the Senate. All I have received has been favorable comment. We have one of the biggest co-ops in my area, but I have not heard a thing from any of them except that they approve what the bill contains. Can the Senator tell me what grain companies want changes?

Mr. DOLE. As the Senator recalls, because he was there both days, we had a

number of witnesses—in fact, we had a rather large delegation from the State of Texas and from the State of Nebraska— who suggested that we set forth some guidelines so that a waiver might be granted. We did not adopt in the committee. There is no objection to the bill as approval was unanimous. Senator TOWER has every right to offer his amendment. It is my understanding that the amendment was supported by the National Council of Farmer Cooperatives.

Mr. TOWER. The co-ops, yes.

Mr. YOUNG. Do we have any correspondence from them? I have not seen any correspondence from them.

Mr. DOLE. Telegrams are supposed to be in the mill.

Mr. TOWER. I think that correspondence has been mailed.

Mr. DOLE. I say to the Senator from North Dakota that what the Senator from Texas seeks to do is to set forth certain criteria. But even if a waiver is granted based on these criteria, it still must be reported to the Senate committee and the House committee within 30 days, so we have every right to move on it ourselves, whatever happens.

Mr. YOUNG. It may be all right, but it is odd that I have not received any correspondence, any telephone calls, not a word from anyone in the business or who knows the business. If they wanted any changes, I should think they would have contacted the members of the committee. I am a cosponsor. This is the first time I have heard of an important bill on which nobody was contacted if somebody wanted to make changes.

Mr. HUMPHREY. Mr. President, will the Senator yield for a question?

Mr. DOLE. I yield.

Mr. HUMPHREY. Why can we not wait for the advisory committee that is provided for in the bill to make some suggestion to us, after they have talked to the people in the trade and after they have talked with the producers, cooperative groups, and so forth?

I see great merit in having certain criteria, but I would not want those criteria to be exclusive. I think those are just among others.

It is my judgment that if we are going to have a national advisory committee on this bill, we should wait until they advise us. This is a new instrumentality. There is not yet a permanent administrator of this program. When we get away from the acting administrator to a confirmed administrator, then we will have a chance to take a good look as to whether or not these additional criteria are needed.

I suppose the Senator from Kansas knows that basically I am sympathetic; but I think that the conflict of interest business is so serious that we should not move precipitately. Let us permit that advisory committee to come in with some recommendations. We have had a good discussion here about it. I think it has been helpful.

I am not trying to shoot down the recommendation and amendment of the Senator from Texas. I know it is offered as a means of being helpful and not a means of weakening the legislation. I believe that out of this debate and discussion, with the advisory committee being established under the new bill that Senator HUDDLESTON and Senator DOLE have proposed for us, we can come out in a few minutes with what we want.

Mr. TOWER. Mr. President, I note that these criteria are not exclusive. As a matter of fact, on line 11 of page 2, the amendment states:

such other criteria as the Administrator, after consultation with the Advisory Group established under this Act, upon the Advisory Group's recommendation, may by regulation provide.

I think that answers the problem raised by the Senator from Minnesota.

Mr. President, I am prepared to yield back the remainder of my time, if the other side is.

Mr. President, I ask unanimous consent that Larry Meyers, of Senator BENTSEN's staff, have the privilege of the floor during the consideration of and vote on the amendments to the Grain Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. Mr. President, the conflict of interest rules in section 11(b) of the act were added by the U.S. Grain Standards Act of 1976. During the consideration of the conflict of interest rules, in the course of conference committee proceedings on the 1976 act, the adoption of criteria very similar to the ones in this amendment were discussed and the proposal was made that they be written into the law as requirements or preconditions for any waiver. However, in the end, this proposal was rejected. No one can anticipate all the criteria or factors that sometime in the future may arise which might have a determinative effect on whether or not a waiver is granted.

It was believed better to provide only the general standard which is part of the law today: Could the conflict of interest jeopardize the integrity or the effective and objective operations of the inspection or weighing agency?

I oppose this amendment for the following reasons:

First. Although several of the witnesses at the hearings testified in favor of retaining boards of trade and grain exchanges that have had clean records and in favor of using criteria such as those contained in the amendment, there was no clear and persuasive record made on the need for including these precisely-written criteria in the act, nor did the Committee on Agriculture, Nutrition, and Forestry have the opportunity to discuss them when considering S. 1051.

Second. As I indicated in describing the background on this issue, and as indicated by the Senator from Iowa, the matter had been considered and rejected by conferees on the 1976 act. The adoption of this amendment would, in effect, reverse the decision of Congress made last year.

Third. I believe this amendment would amount to over-legislating. A good general criterion is already set by law, which the Administrator must follow. S. 1051 establishes a temporary advisory committee to assist the Administrator of the Federal Grain Inspection Service in developing just and workable specific criteria.

The Administrator and the advisory committee will have the opportunity to consider criteria thoroughly and with due deliberation; while we are being asked here today to act with, at best, a fragmentary record and little time for reflection.

There are a couple of further things about the amendment that I think should be pointed out.

First of all, the Secretary of Agriculture, Mr. Bergland, has made the statement, in a letter addressed to the Honorable HERMAN E. TALMADGE, chairman of the Committee on Agriculture, Nutrition, and Forestry, that the amendment offered by the Senator from Texas would tend to erode the intent of Congress to cure the problems inherent in the present inspection system.

I point out, too, that while these criteria are presented as merely guidelines to be considered, the language of the amendment says that the Administrator shall, in making a determination under this paragraph, consider these listings.

Also, section (D), on page 2, gives the advisory group virtually absolute power in determining what the criteria shall be. It says:

such other criteria as the Administrator, after consultation with the Advisory Group established under this Act, upon the Advisory Group's recommendation, may by regulation provide.

This, in effect, gives the advisory group absolute power to determine what the criteria will be and how the waiver will be granted.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. HUDDLESTON. I yield.

Mr. TOWER. They are an advisory group. They do not have any absolute power at all.

Mr. HUDDLESTON. But according to this language, the administrator cannot add any criteria unless the advisory group recommends them. That seems to me to give the advisory group virtually absolute power.

Mr. TOWER. He still has discriminatory power.

Mr. HUDDLESTON. How does he avoid this particular paragraph?

Mr. TOWER. He still has discretionary authority on whether or not to grant the waiver.

Mr. HUDDLESTON. Whether or not to grant the waiver, but not on the question of the recommendations of on what basis he can grant the waiver.

Mr. President, I believe this amendment should be rejected. We have addressed the major problem of early implementation efforts by the bill we are considering now. I think the advisory committee should to have an opportunity to go into effect and review the situation and make whatever recommendations it feels appropriate to the Administrator. And then the Administrator, in consultation with the advisory group, can estabish whatever criteria he might feel appropriate.

I am prepared to yield back the remainder of my time, and when all time is yielded back, I move to table the amendment.

Mr. TOWER. I yield back the remainder of my time.

Mr. President, has the Senator moved to table?

Mr. HUDDLESTON. I will as soon as time is yielded back.

Mr. HUMPHREY. Mr. President, will the Senator yield? I make an appeal to the Senator from Texas. He has listened to the argument of the manager of the bill. We have gotten a lot of information on this, why have it batted down? Why not wait for the advisory group? The Senator might want to withdraw his amendment.

Mr. TOWER. I prefer not to withdraw my amendment. There are provisions made in the advisory group on criteria and, therefore, I want to get a vote on it. It is something the producers want and the co-ops want. I think it is reasonable.

Those private exchanges, and so forth, down in Kentucky that inspect this grain are perfectly honest groups, and I have no question about the confidence in them.

Mr. HUDDLESTON. There is no question about Kentucky, but there has been some question about Texas.

Mr. TOWER. That is not in the interior of Texas.

Mr. DOLE. Mr. President, will the Senator yield before he yields back his time?

Mr. TOWER. I yield to the Senator from Kansas.

Mr. DOLE. I think it has been a good record, and it may be helpful to the administrator, whoever that may be, and to the advisory committee when it is appointed.

But I want to point out that the Secretary of Agriculture opposed many of the changes also. He opposed appropriations rather than fees; he opposed advisory committees because we have too many advisory committees now, and it does seem to me we are saying, in effect, there are not any honest grain exchanges, and we are going to put them all out of business and we are going to make it impossible to grant a waiver.

I do not believe that was the intent. It was never the intent, so far as this Senator knows, in the conferences and discussions we had and the hearings that have been held—and there have been many, many hours of hearings—that we wanted anything other than to clean up the system. It was never our intent to put honest businessmen out of business or make it impossible for honest businessmen or businesswomen, whatever, to engage in this activity.

From that standpoint I support the distinguished Senator from Texas. But in the event, in the unlikely event, the motion to table carries we still made a good record.

Mr. TOWER. Mr. President, I am prepared to yield back the remainder of my time.

Mr. HUDDLESTON. How much time remains?

The PRESIDING OFFICER (Mr. ANDERSON). The Senator from Kentucky has 10 minutes and the Senator from Texas 12 minutes.

Mr. HUDDLESTON. Mr. President, I feel we determined, and it was evident in both informal hearings that were held by the Senator from Kansas and formal hearings by my subcommittee, that there may be a number of problems regarding implementation of the act we passed last year.

The bill we are considering addresses the most serious ones and the ones on which there was most agreement as to a remedy.

The masters that are brought up in this amendment and the others by the Senator from Texas certainly deserve further consideration. But I believe we have provided in the legislation we are considering the mechanism to give them the kind of consideration they should have.

I would be hopeful that we could let that mechanism work, that we can have this exchange of ideas between the advisory committee, and the Administrator of the Federal Grain Inspection Service.

I suggest that would be the proper course to take.

Mr. BENTSEN. Mr. President, in Texas farmers historically had to move their grain long distances for grading and marketing purposes. To remedy this situation groups of farmers formed private exchanges or boards of trade or pursuaded their local chamber of commerce to perform the necessary grading of the local grain. This proved to be an efficient local method of grading to the benefit of the farmers.

In Texas, the recent grain scandals were something we read about in the paper. They did not occur in Texas. There have been no convictions. There have been very few complaints. Yet because of scandals elsewhere in the country, our system of grading is being punished to the detriment of a great many people who have performed a good service to Texas farmers.

I support this amendment because individual farmers have asked me to. It does not eliminate the Federal Grain Inspection Service. It only allows the Administrator to make a decision whether to allow private inspection or to federalize a facility. To me, this is a rational procedure. It would still allow us to punish the guilty, yet it would not frustrate the innocent.

Mr. DOLE. Mr. President, will the Senator yield for a unanimous-consent request?

I ask unanimous consent that Mr. Brad Gungoll of Senator BELLMON'S staff be granted the privileges of the floor during the consideration and vote on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. Mr. President, I yield back the remainder of my time.

Mr. TOWER. I yield back my time.

Mr. HUDDLESTON. Mr. President, I move that the amendment by the Senator from Texas be tabled, and I ask for the yeas and nays.

Mr. TOWER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll. The assistant legislative clerk proceeded to call the roll.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. I ask for the yeas and nays on the motion to table the amendment of the Senator from Texas.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on the motion of the Senator from Kentucky to lay on the table the amendment of the Senator from Texas.

The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

The PRESIDING OFFICER (Mr. METZENBAUM). The Senate will be in order. The clerk cannot hear the roll being called. The Senate will be in order.

Will the Members of the Senate retire to their seats or to the cloakroom please?

The assistant legislative clerk resumed the call of the roll.

The PRESIDING OFFICER. The clerk will suspend the calling of the roll.

Will the Senate please come to order? Will the Members of the Senate retire to their seats?

The clerk will proceed to call the roll.

The assistant legislative clerk resumed and concluded the call of the roll.

Mr. CRANSTON. I announce that the Senator from Alaska (Mr. GRAVEL) and the Senator from North Carolina (Mr. MORGAN) are necessarily absent.

I further announce that the Senator from Michigan (Mr. RIEGLE) is absent on official business.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) and the Senator from North Carolina (Mr. MORGAN) would vote "yea."

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. PACKWOOD), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

The result was announced—yeas 58, nays 35, as follows :

[Rollcall Vote No. 87 Leg.]

So the motion to lay on the table Mr. TOWER'S amendment (No. 141) was agreed to.

Mr. HUDDLESTON. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. CLARK. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 142

Mr. TOWER. Mr. President, I call up my amendment No. 142.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Texas (Mr. TOWER) offers an amendment numbered 142.

The amendment is as follows:

S. 1051 is amended by adding the following new section:

SEC. 8. Notwithstanding any other provision of law, the Administrator may designate a broad of trade, chamber of commerce, or private exchange for the purposes of providing official inspection and grading services on inbound shipments at points of export: *Provided*, That—

(A) a balance between buyers and sellers exists among the members of the board of directors or other governing body of an inspection agency established for such purposes by a board of trade or a private exchange;

(B) an autonomous committee composed of neither buyers nor sellers is established to govern an inspection agency set up to perform such services by a chamber of commerce; and

(C) such other criteria as the Administrator, after consultation with the Advisory Group established under the Act, and upon the Advisory Group's recommendation may by regulation prescribe, are met.

Mr. TOWER. Mr. President, I yield to the Senator from Idaho.

Mr. McCLURE. Mr. President, I ask unanimous consent that Frank Cushing of my staff be accorded the privilege of the floor at all stages of the proceedings on this legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, it is apparent——

Mr. HART. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. Will Senators please retire to their seats or return to the cloakrooms, and the Senator from Texas be good enough to use his microphone?

Mr. TOWER. Mr. President, I opposed putting those evil devices in this house in the first place, and I intend not to use my microphone, nor will I ever use it. That settles that question.

The PRESIDING OFFICER. Then it will pe appreciated if the Senator will speak loud and clear.

Mr. TOWER. Mr. President, it is apparent to me that the Senate is in no mood to be enlightened on the amendments to this bill this evening. Therefore, with the steamroller all cranked up, it would appear to me to be futile for me to proceed further on my other amendments, and I think discretion would dictate that I withdraw the one I have just called up, and without the others.

However, I feel that we have made a good record, and I would entreat the committee to give consideration to further improvements to this legislation, as we sought to do with these amendments. I think some good points have been made here on both sides. I do not think any of us want to gut the system whereby we preserve the integrity of our system of grain weighing and inspection and assuring good quality, but I think we do have to take into consideration some legitimate gripes of the producers. I think the Federal cost of three times the private cost is outrageous, and I hope the committee will get into this matter and attempt to do something about it, because that is a cost that is being put upon the producer.

Mr. McCLURE. Mr. President, will the Senator yield for a comment?

Mr. TOWER. I am delighted to yield to my friend from Idaho.

Mr. McCLURE. I thank the Senator from Texas for yielding, because I believe, as the Senator from Texas does, that the amendments would have strengthened the inspection system, at the same time doing so with justice to those producers who are in the marketplaces as well as the marketers in the marketplace.

I am sorry that the Senator has found the Senate anxious to adjourn for the evening rather than to legislate, but I think the Senator is correct. I support him in his actions. I hope the committee will listen and the Senate will listen to the possibility of further revisions in this legislation, and I thank the Senator for yielding.

Mr. HUDDLESTON. Mr. President, I would only comment on the remarks of the Senator from Texas that perhaps his appraisal of the mood of the Senate is in the eye of the beholder. It appears to me that the Senate is well enough enlightened, and that it is not willing to precipitate any substantial changes in what we regard as a reasonably good action to this point.

At any rate, I agree with the Senator that the discussion here today has been helpful. I assure him and the other cosponsors of his amendment that the Subcommittee on Agricultural Production, Marketing, and Stabilization of Prices will be very attentive to this legislation as it is implemented. We moved very quickly to have hearings after the initial implementation for the very purpose of trying to find where the shortcomings were, where the difficulties were, and how things might be improved. S. 1051, which we are considering today, is a result of those hearings. The Senator from Kansas has been very active in maintaining watchfulness over this legislation.

I can assure the Senators that we will be in close contact with the advisory committee established by this legislation. We will be watching very closely as the Federal Grain Inspection Service continues to implement this act. We will look for ways in which we can improve it and strengthen it as implementation goes forward.

Mr. TOWER. Mr. President, will the Senator yield for a question?

Mr. HUDDLESTON. I yield.

Mr. TOWER. One thing I am concerned about is the cost involved in this grading inspection. For example, in Fort Worth, Tex., the Government cost is three times the private exchange cost. It is 2½ times the private exchange cost in Houston. I could go on and on. It seems to me that these costs are inordinately high. I just hope the committee will look into this and do something about it.

Mr. HUDDLESTON. We are looking into it.

Mr. TOWER. The producers have to maintain the cost.

Mr. HUDDLESTON. Our committee report indicates that the costs are much closer than the Senator indicated, I might point out. There is very little difference. But I hasten to point out this is, of course, an area which we will follow very closely.

Mr. TOWER. Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. Without objection, the amendment is withdrawn.

Mr. TOWER. Mr. President, I do not intend to call up my other two amendments.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. HUDDLESTON. Mr. President, if there are no further amendments. I yield back the remainder of my time on the bill.

The PRESIDING OFFICER. Does the Senator from Kansas yield back the remainder of his time?

Mr. DOLE. The Senator from Kansas yields back the remainder of his time, Mr. President.

Mr. ROBERT C. BYRD. Mr. President, this will be the last vote today.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Alaska (Mr. GRAVEL) and the Senator from Maine (Mr. HATHAWAY) are necessarily absent.

I further announce that the Senator from Michigan (Mr. RIEGLE) is absent on official business.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) would vote "yea."

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. PACKWOOD), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

The result was announced—yeas 93, nays 0, as follows:

[Rollcall Vote No. 88 Leg.]

YEAS—93

So the bill (S. 1051) was passed, as follows:

S. 1051

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

RECORDS

SECTION 1. Section 12(d) of the United States Grain Standards Act (90 Stat. 2882; 7 U.S.C. 87a(d)) is amended by striking out "shall, within the five-year period thereafter, maintain complete and accurate records of purchases, sales, transportation, storage, weighing, handling, treating, cleaning, drying, blending, and other processing, and official inspection and official weighing of grain," and inserting in lieu thereof the following: "shall maintain such complete and accurate records for such period of time as the Administrator may, by regulation, prescribe for the purpose of the administration and enforcement of this Act,".

SUPERVISION FEES

SEC. 2. (a) Section 7(j) of the United States Grain Standards Act (90 Stat. 2873; 7 U.S.C. 79(j)) is amended to read as follows:

"(j) The Administrator shall, under such regulations as he may prescribe, charge and collect reasonable fees to cover the estimated cost of official inspection except when the official inspection is performed by a designated official agency or by a State under a delegation of authority. The fees authorized by this subsection shall, as nearly as practicable and after taking into consideration any proceeds from the sale of samples, cover the costs of the Service incident to its performance of official inspection services in the United States and on United States grain in Canadian ports, excluding administrative and supervisory costs. Such fees, and the proceeds from the sale of samples obtained for purposes of official inspection which become the property of the United States, shall be deposited into a fund which shall be available without fiscal year limitation for the expenses of the Service incident to providing services under this Act.".

(b) Section 7A(l) of the United States Grain Standards Act (90 Stat. 2877; 7 U.S.C. 79a(l)) is amended to read as follows:

"(l) The Administrator shall, under such regulations as he may prescribe, charge and collect reasonable fees to cover the estimated costs of official weighing and supervision of weighing except when the official weighing or supervision of weighing is performed by a designated official agency or by a State under a delegation of authority. The fees authorized by this subsection shall, as nearly as practicable, cover the costs of the Service incident to its performance of official weighing and supervision of weighing services in the United States and on United States grain in Canadian ports, excluding administrative and supervisory costs. Such fees shall be deposited into a fund which shall be available without fiscal year limitation for the expenses of the Service incident to providing services under this Act.".

(c) Section 21 of the United States Grain Standards Act of 1976 (90 Stat. 2886) is amended by striking out "those Federal administrative and supervisory costs incurred within the Service's Washington office or not directly related to the official inspection or the provision of weighing services for grain" and inserting in lieu thereof the following: "Federal administrative and supervisory costs related to the official inspection or the provision of weighing services for grain".

(d) Section 27 of the United States Grain Standards Act of 1976 (90 Stat. 2889) is amended by striking out ", who pays fees when due, in the same manner as prescribed in section 7 or 7A of the United States Grain Standards Act, as amended by this Act,".

(e) The provisions of this section shall become effective October 1, 1977.

ESTABLISHMENT OF TEMPORARY ADVISORY COMMITTEE

SEC. 3. (a) In order to assure the normal movement of grain in an orderly and timely manner, the Secretary of Agriculture shall establish a temporary advisory committee to provide advice to the Administrator of the Federal Grain Inspection Service with respect to the implementation of the United States Grain Standards Act of 1976. The advisory committee shall consist of not more than twelve members, appointed by the Secretary, representing the interests of grain producers, consumers, and all segments of the grain industry, including grain inspection and weighing agencies. Members of the advisory committee shall be appointed not later than thirty days after the date of enactment of this Act.

(b) The advisory committee shall be governed by the provisions of the Federal Advisory Committee Act.

(c) The Administrator of the Federal Grain Inspection Service shall provide the advisory committee with necessary clerical assistance and staff personnel.

(d) Members of the advisory committee shall serve without compensation, if not otherwise officers or employees of the United States, except that members shall, while away from their homes or regular places of business in the performance of services under this Act, be allowed travel expenses, including per diem in lieu of subsistence, as authorized under section 5703 of title 5 of the United States Code.

(e) The advisory committee shall terminate eighteen months after the date of enactment of this Act.

(f) There are hereby authorized to be appropriated such sums as are necessary to carry out the provisions of this section.

TECHNICAL AMENDMENTS

SEC. 4. The United States Grain Standards Act (39 Stat. 482–485, as amended; 7 U.S.C. 71, 74–79, 79a and 79b, 84–87, and 87a–87h) is amended as follows:

(a) Section 3 is amended by—

(1) striking out "grain sorghum" in subsection (g) and inserting in lieu thereof "sorghum";

(2) amending subsection (m) to read as follows:

"(m) the term 'official agency' means any State or local governmental agency, or any person, designated by the Administrator pursuant to subsection (f) of section 7 of this Act for the conduct of official inspection (other than appeal inspection), or subsection (c) of section 7A of this Act for the conduct of official weighing or supervision of weighing (other than appeal weighing);";

(3) inserting "for" immediately after "under standards provided" in subsection (x); and

(4) amending subsection (y) to read as follows:

"(y) the term 'supervision of weighing' means such supervision of the grain weighing process as is determined by the Administrator to be adequate to reasonably assure the integrity and accuracy of the weighing, such physical inspection of the premises at which the grain weighing is performed as will reasonably assure that all the grain intended to be weighed has been weighed and discharged into the elevator or conveyance, and the certification of the weight of the grain weighed under such supervision, by official inspection personnel;".

(b) Section 4(a) is amended by striking out "grain sorghum" and inserting in lieu thereof "sorghum", and inserting a comma after "equipment calibration and maintenance".

(c) Section 7 is amended by—

(1) designating the third sentence in paragraph (2) of subsection (e) as paragraph (4) of subsection (e) and inserting it at the end of subsection (e);

(2) amending subsection (f) by—

(A) in the first sentence of paragraph (2), inserting "or State delegated authority pursuant to subsection (e)(2) of this section" immediately after "Not more than one official agency", inserting "inspection" immediately before "provisions of this Act", and striking out ", but this paragraph shall not be applicable to prevent any inspection agency from operating in any area in which it was operative on August 15, 1968";

(B) striking out "No" in the second sentence of paragraph (2) and inserting in lieu thereof "Except as authorized by the Administrator, no";

(C) designating the second sentence of paragraph (2) as paragraph (3) of subsection (f); and

(D) designating the third sentence of paragraph (2) as paragraph (4) of subsection (f);

(3) striking out "subsections (e) and (f)" in paragraph (1) of subsection (g) and inserting in lieu thereof "subsection (f)"; and

(4) adding at the end of subsection (i) a new sentence as follows: "All or specified functions of such inspections shall be performed by official inspection personnel employed by the Service or persons operating under a contract with the Service.".

(d) Section 7A is amended by—

(1) inserting "official weighing or" immediately after "The Administrator is authorized to cause" in subsection (b);

(2) amending paragraph (2) of subsection (c) by—

(A) in the first sentence, inserting "or supervision of weighing" immediately after "to delegate authority to perform official weighing", inserting "official weighing or"

immediately before "supervision of weighing, if such agency or person qualifies", and striking out "number" and inserting in lieu thereof "under";

(B) in clause (A) of the second sentence, striking out "at export elevators", and inserting "or supervision of weighing" immediately after "official weighing"; and

(C) inserting "official weighing or" immediately before "supervision of weighing" wherever this phrase appears in clause (B) of the second sentence;

(3) adding at the end of subsection (d) a new sentence as follows: "All or specified functions of such weighing shall be performed by official inspection personnel employed by the Service or persons operating under a contract with the Service.";

(4) striking out the second sentence of subsection (e);

(5) amending subsection (f) by—

(A) in clause (2), striking out "employ" and inserting in lieu thereof "permit", and inserting "and who are approved by the Administrator" immediately before "to operate the scales"; and

(B) in clause (3), striking out "employees of the facility" and inserting in lieu thereof "persons other than official inspection personnel," and striking out "employees to operate" and inserting in lieu thereof "such persons to operate";

(6) inserting "or supervision of weighing" immediately after "official weighing" in subsection (g);

(7) inserting "or local governmental agency" immediately after "No State" in subsection (i); and

(8) adding at the end of subsection (i) a new sentence as follows: "Not more than one official agency or State delegated authority pursuant to subsection (c)(2) of this section for carrying out the weighing provisions of this Act shall be operative at one time for any geographic area as determined by the Administrator to effectuate the objectives stated in section 2 of this Act.".

(e) Section 7B is amended by—

(1) inserting "for the purpose of official inspection, official weighing or supervision of weighing" immediately before "of grain located at all grain elevators" in subsection (a); and

(2) inserting "for the purposes of this Act" immediately after "no person shall use" in subsection (c).

(f) Section 8 is amended by—

(1) amending subsection (a) by—

(A) inserting ", other than appeal weighing," immediately after "supervision of weighing" in clause (1);

(B) striking out "of grain" in clause (2) (B) and inserting in lieu thereof "(including appeal weighing) of grain in the United States, or of United States grain in Canadian ports"; and

(C) in clause (3), inserting "or governmental agency" immediately after "(3) to contract with any person", and striking out "specified sampling and laboratory testing" and inserting in lieu thereof "specified sampling, laboratory testing, and similar technical functions"; and

(2) adding at the end of subsection (e) a new sentence as follows: "The Administrator may compensate such personnel at any rate within the appropriate grade of the general schedule as he deems necessary without regard to section 5333 of title 5 of the United States Code.".

(g) Section 11 is amended by—

(1) inserting "official weighing or" immediately before "supervision of weighing" in paragraph (3) of subsection (b);

(2) in the first sentence of paragraph (5) of subsection (b), inserting "official weighing or" immediately before "supervision of weighing except", and inserting "director," immediately before "officer, employee,"; and

(3) inserting "or State agency delegated authority under this Act" immediately after "official agency" in subsection (c).

(h) Section 12 is amended by—

(1) inserting ", every State agency delegated authority under this Act," immediately after "official agency" wherever this phrase appears in subsections (a), (b), and (c); and

(2) striking out "delegate authority of this Act" in subsection (c) and inserting in lieu thereof "delegated authority under this Act".

(i) Section 13(a) is amended by—

(1) inserting ", or that any weighing service under this Act has been performed with respect to grain" immediately before the semicolon at the end of paragraph (6);

(2) striking out in paragraph (11) "5, 6, 7(f)(2), 7A, 7B(c), 8, 11, or 12" and inserting in lieu thereof "5; 6; 7(f)(2), (3), or (4); 7A; 7B(c); 8; 11; 12; or 17A";

(3) striking out "testing" in paragraph (12) and inserting in lieu thereof "weighing"; and

(4) in paragraph (13), striking out "the grain" and inserting in lieu thereof "grain", and inserting "the" immediately after "observing the loading of".

(j) Section 16 is amended by—

(1) striking out, in subsection (a), the second sentence and all that follows "or other person;" in the first sentence down through "by the Administrator." and inserting in lieu thereof the following: "and prescribe such rules, regulations, and instructions as the Administrator deems necessary to effectuate the purposes or provisions of this Act. Such regulations may require, as a condition for official inspection or official weighing or supervision of weighing, among other things, (1) that there will be installed specified sampling, handling, weighing, and monitoring equipment in grain elevators, warehouses, and other grain storage or handling facilities, (2) that approval of the Administrator be obtained as to the condition of vessels and other carriers or receptacles for the transporting or storing of grain, and (3) that persons having a financial interest in the grain which is to be inspected (or their agents) shall be afforded an opportunity to observe the weighing, loading, and official inspection thereof, under conditions prescribed by the Administrator."; and

(2) striking out "additional" in subsection (f).

(k) Section 17A is amended by striking out "All persons registered" in paragraph (1) of subsection (b) and inserting in lieu thereof "All persons required to register".

(l) Section 17B is amended by inserting "notice of" immediately after "Administrator or the Secretary of" in clause (2) of subsection (b).

(m) Section 21 is amended by striking out "SEC. 21" and inserting in lieu thereof "SEC. 19".

SEC. 5. (a) Section 8(b)(3) of the United States Grain Standards Act of 1976 (90 Stat. 2874) is amended by inserting "(which may include the application of statistical tolerances for expected variations)" immediately after "error rates of such agencies".

(b) Section 27 of the United States Grain Standards Act of 1976 (90 Stat. 2889) is amended by—

(1) striking out all that follows "SEC. 27." down through "without a designation under the United States Grain Standards Act, as amended by this Act" and inserting in lieu thereof the following: "This Act shall become effective thirty days after enactment hereof; and thereafter no State or other agency or person shall provide official inspection or official weighing or supervision of weighing under the United States Grain Standards Act, as amended by this Act, at an export port location without a delegation of authority or other authorization under such amended Act, and no agency or person shall provide official inspection service or official weighing or supervision of weighing under such amended Act in any other area without a designation or other authorization under such amended Act";

(2) inserting "or other authorization under such Act" immediately after "may continue to operate in that area without a delegation or designation"; and

(3) striking out "and export elevators located at export port locations" in clause (3).

HARD RED WINTER WHEAT

SEC. 6. (a) Notwithstanding any other provision of law, no person acting under a license or authorization to perform official functions under the United States Grain Standards Act shall certify or otherwise state in writing, or perform any analysis to determine, (1) the subclass of Hard Red Winter wheat on the basis of color or on the basis of the dark, hard, and vitreous kernel content, or (2) the percentage of dark, hard, and vitreous kernels in Hard Red Winter wheat.

(b) The provisions of this section shall become effective May 1, 1977, except that a certification or analysis as described in subsection (a) may be performed after May 1, 1977, if pursuant to the requirements of any written contract for the sale of Hard Red Winter wheat entered into and signed prior to the date of enactment of this Act.

Mr. NELSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HUDDLESTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, with no resolutions coming over under the rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there further morning business?

ORDER FOR RECOGNITION OF SENATOR BARTLETT ON FRIDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Friday, after the two leaders have been recognized under the standing order and before the Senate resumes consideration of the code of conduct resolution, Mr. BARTLETT be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT REQUEST—NOMINATION OF PETER F. FLAHERTY

Mr. ROBERT C. BYRD. Mr. President, as in executive session, I ask unanimous consent that on Friday, upon the disposition of the code of conduct resolution (S. Res. 110), the Senate go into executive session to consider the nomination of Peter F. Flaherty, of Pennsylvania, and that there be a time limitation on debate on the nomination of 1 hour and a half to be equally divided between Mr. EASTLAND and Mr. THURMOND.

Mr. BAKER. Mr. President, reserving the right to object, I must say that I do have an objection lodged and noted on my side by a Member. Therefore, I object to the request.

The PRESIDING OFFICER. Objection is heard.

TRANSFER OF CERTAIN MEASURES TO UNANIMOUS-CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are two additional measures which have been cleared for action by unanimous consent on both sides. They are calendar orders numbered 59 and 61. I ask the clerk to place them on the unanimous-consent calendar.

The PRESIDING OFFICER. They will be so transferred.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY FOR THE SUBCOMMITTEE ON MIDDLE EASTERN AFFAIRS TO MEET ON THURSDAY, APRIL 7, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Foreign Relations Subcommittee on Middle Eastern Affairs be authorized to meet next Thursday, a week from tomorrow, April 7, 1977, at 2:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

REMOVAL OF INJUNCTION OF SECRECY—EXECUTIVE F, 95TH CONGRESS, FIRST SESSION

Mr. ROBERT C. BYRD. Mr. President, in executive session, I ask unanimous consent that the injunction of secrecy be removed from the Agreement with Canada Concerning Transit Pipelines, signed at Washington on January 28, 1977 (Executive F, 95th Congress, first session), transmitted to the Senate today by the President of the United States, and that the treaty with accompanying papers be referred to the Committee on Foreign Relations and ordered to be printed, and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the President's message is as follows:

To the Senate of the United States:

I transmit herewith, for Senate advice and consent to ratification, the Agreement between the Government of the United States of America and the Government of Canada Concerning Transit Pipelines signed at Washington on January 28, 1977. I also transmit, for the information of the Senate, the report of the Department of State with respect to the Agreement, including copies of letters exchanged at the time the draft text of the Treaty was initialed.

The Agreement was negotiated in response to a request made by the Congress in the Trans-Alaska Pipeline Authorization Act (P.L. 93-153) that the President determine the willingness of the Government of Canada to permit the construction of pipelines across Canada to carry oil and gas from Alaska's North Slope to markets in the lower 48 States, the terms and conditions which might apply to the operation of such pipelines and the need for intergovernmental agreements for this purpose. The Agreement negotiated in response to this request provides reciprocal protection against interruption in the flow of hydrocarbons in transit, and against discriminatory taxation. The Agreement is applicable both to existing and future pipelines transiting the United States and to future pipelines transiting Canada.

It became clear early in the negotiations that the Government of Canada was not prepared to conclude an arrangement which granted advance approval to a specific pipeline project. Consequently, the Agreement was drafted without reference to the specific proposals which have been made for the construction of pipelines to transport gas from Alaska's North Slope to the lower 48 States. Its provisions would be applicable to both existing and future transit pipelines.

The Agreement does not constitute Canadian approval of construction of a transit pipeline across its territory. Upon completion of studies currently in progress, the Government of Canada will announce whether or not it is willing to permit construction of a transit pipeline for Alaskan gas.

The Transit Pipeline Agreement provides a formal basis for United States-Canadian cooperation on hydrocarbon transportation systems, should both governments decide cooperation is advantageous. I urge the Senate to act favorably on this Agreement at an early date by giving its advice and consent to ratification.

JIMMY CARTER.

THE WHITE HOUSE, *March 30, 1977.*

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I inquire of the Chair whether there is a special order for the recognition of any Senator tomorrow?

The PRESIDING OFFICER. No, there is not.

ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION ON TOMORROW OF SENATE RESOLUTION 110

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the two leaders or their designees have been recognized under the standing order on tomorrow, the Senate resume consideration of Senate Resolution 110.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY FOR COMMITTEES TO FILE REPORTS UNTIL MIDNIGHT TONIGHT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that committees be authorized to file reports until midnight tonight.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. BAKER. Mr. President, I inquire of the majority leader what his plans are for the schedule tomorrow with respect to several amendments that are still at the desk.

Mr. ROBERT C. BYRD. Mr. President, the Senate will resume its consideration of Senate Resolution 110 immediately after the leaders are recognized on tomorrow. The Senate will convene at 9:30 a.m.

I assume that the Senate, therefore, will begin further action on Senate Resolution 110 by about 9:45, if not earlier. Senators will be calling up amendments throughout the day. Motions will be made in relation to some of these. There will be rollcall votes throughout the day. It is the intention of the leadership to stay on the code of conduct measure tomorrow, unless there is some matter which can be handled quickly and which is cleared with the minority leader and which would require unanimous consent. However, barring that, it would be the intent of the leadership to stay on the code of conduct all day tomorrow, into the late afternoon, into the early evening if necessary, and hopefully not into the late evening. But we only have tomorrow and the following morning, on Friday, and the time is already allotted on Friday morning.

Mr. BAKER. I thank the majority leader.

I am glad to hear that he is prepared to stay in session until tomorrow evening, if necessary, in view of the fact that on our side we still have notations of amendments from Senator CURTIS, Senator DOLE, Senator HANSEN, Senator STEVENS, and Senator WALLOP.

As the majority leader points out, to-

morrow is the last day to consider these matters.

Mr. President, I ask the Chair to advise us of the amount of time that remains under the special order.

The PRESIDING OFFICER. The Senator from West Virginia has 309 minutes at his disposal, and the Senator from Tennessee has 466 minutes at his disposal.

Mr. BAKER. Mr. President, according to my mental calculations, that means that we have, after we exclude the time that already has been allocated for Friday, something just under 12 hours for the consideration of the remaining amendments before Friday. It may in fact mean, if all the time is used—and I hope all the time is not used—that we might be in session until 10 o'clock or later tomorrow night. Nonetheless, it also indicates to me that there is enough time to accommodate all the known amendments on our side. I would encourage our Senators to let us know as soon as possible if there are other amendments, and encourage Senators on our side to let us know if they are willing to reduce the time, already allocated, that might be due them under the special order.

I thank the majority leader.

Mr. ROBERT C. BYRD. I thank the minority leader.

It is my guess that the manager on this side of the aisle probably will not use the amount of time that remains allotted to this side of the aisle. I do not know of any further amendment to be offered on this side of the aisle. However, this is not to say that no such amendment is around of which I am not aware.

I want to do everything I possibly can to accommodate the Members of the minority and the majority if they have an amendment. I know that they will understand that in view of the fact that this has been a somewhat controversial code of conduct and that it was not the desire of the leadership in any way to attempt to cut off the time or to reduce the time, which could be done on the resolution, on a nondebatable motion, the leadership has attempted in every way to be considerate of the needs of the Members in their calling up of amendments.

I hope that, in return and in consideration of the fact that tomorrow will be a long day at best, Members at least will consider cutting back on the time they would otherwise be allotted, if they can find it within their hearts to do so. This will ease the burden on all of us.

Mr. President, that about wraps it up for today.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until 9:30 a.m. tomorrow.

The motion was agreed to; and at 6:51 p.m. the Senate recessed until tomorrow, Thursday, March 31, 1977, at 9:30 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 30, 1977:

DEPARTMENT OF STATE

Joseph D. Duffey, of the District of Columbia, to be an Assistant Secretary of State.

Matthew Nimetz, of New York, to be Counselor of the Department of State.

Herbert J. Hansell, of Ohio, to be Legal Adviser of the Department of State.

INTERNATIONAL BANKS

W. Michael Blumenthal, of Michigan, to be United States Governor of the International Monetary Fund for a term of five years and United States Governor of the International Bank for Reconstruction and Development for a term of five years; a Governor of the Inter-American Development Bank for a term of five years; and United States Governor of the Asian Development Bank and United States Governor of the African Development Fund.

DEPARTMENT OF COMMERCE

Sidney Harman, of New York, to be Under Secretary of Commerce.

Jerry Joseph Jasinowski, of the District of Columbia, to be an Assistant Secretary of Commerce.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

ANNIVERSARY OF THE DECLARATION OF INDEPENDENCE OF THE BYELORUSSIAN DEMOCRATIC REPUBLIC

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. WHALEN. Mr. Speaker, in this year when much consideration is given to human, national and religious rights in our foreign policy, I would like to note that March 25 marked the anniversary of the Declaration of Independence of the Byelorussian Democratic Republic, proclaimed 59 years ago in Minsk. Unfortunately, for that small nation and the world, the independence of Byelorussia lasted only 10 months before it was overwhelmed by the Soviet Army. Let us take this occasion to remember that we Americans enjoy the principles of freedom and democracy that so many others have been long denied.

A land of brave and determined people, Byelorussia has long been a pawn both in many internal and external power games. Integrated within the Russian Empire in the late 18th century, Byelorussia was known as the "northwest provinces." She bravely declared her independence on March 25, 1918 while under Austro-German occupation during the First World War. At the end of the war, the nation was split between the Poles and the Russians until less than a year after declaring her independence, she was forcibly incorporated into the Soviet Union as the Byelorussian Soviet Socialist Republic.

During World War II, Byelorussia was seized by Nazi Germany for 3 years beginning in June of 1941. The Nazis tried to restore Byelorussian nationalism and attempted to remodel everything Soviet during this period. When the Russians regained control, they in turn reversed this process. By the end of World War II several million Byelorussians had perished, and the Soviets had usurped full power.

It is significant to note that in 1973 the Soviet Government threatened again the integrity of this brave people by establishing new administrative partitions of the country. Yet the Byelorussian people remained strong and resisted the Soviet attempt to dilute them into a homogeneous Russian nation. While the land they work is not well suited for agriculture, Byelorussians produce such important crops as potatoes, flax, wheat, rye and barley. Urban industries have begun especially in farm related production.

In addition, Byelorussians have managed to excel in many areas of education and the arts. Their folklore is considered one of the richest and most colorful of Eastern Europe.

It is appropriate, therefore, on the anniversary of the Byelorussian Declaration of Independence to commemorate the spirit of this freedom loving people and to reaffirm our belief in the principles of self-determination so that peoples everywhere should have the right to decide their futures.

RHODESIA TEST CASE TO HUMAN RIGHTS

HON. HARRY F. BYRD, JR.

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Wednesday, March 30, 1977

Mr. HARRY F. BYRD, JR. Mr. President, for many years United States foreign policy neglected the continent of Africa. Now, the press of events has forced renewed attention to that important region.

The Carter administration has chosen Rhodesia as the test case to demonstrate America's commitment to human rights and majority rule in Africa. Through a reimposition of an embargo on chrome, the Carter administration seeks to place itself on the side of morality and justice.

I believe that such reasoning represents skewed logic and instead, that, reimposition of the embargo demonstrates the hypocracy of the United States in selectively applying its moral rectitude.

To quote from an editorial in the March 17 Richmond Times-Dispatch:

> Morally, a policy that fails to treat all regimes that violate human rights alike is indefensible, but that is precisely the kind of policy that the United States has now decided to pursue.

This editorial goes on to discuss the illogic of current U.S. policy. I believe every individual concerned with this issue should have the benefit of this editorial.

I ask unanimous consent that the text of this editorial be printed in Extensions of Remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

RESTORING THE BAN

Urged on by President Carter, Congress has repealed the Byrd amendment, which authorized the United States to import chrome from Rhodesia despite a United Nations trade ban against that country. By agreeing now to comply with the embargo, critics of the amendment argue, the United States will dramatically confirm its commitment to majority rule and human rights in Africa.

They are wrong. What the United States will demonstrate, rather, is that it is tragically shortsighted and dismayingly hypocritical. For the most likely effects of the American decision to reinstate the ban against Rhodesian chrome will be to strengthen the leftist movement in Africa and to show that Congress and the Carter administration are brazenly selective in supporting the cause of human rights.

The purpose of the U.N. embargo against Rhodesia is to hasten the collapse of the white government in Salisbury and to promote black control. Since whites constitute only a tiny minority of that country's population, a white-dominated government is perceived by its critics to be inherently evil, while a black government supposedly would mean democratic "majority rule" and a greater respect for "human rights." By helping to destroy the existing Rhodesian regime, the United States will prove, we are led to believe, that it is on the side of the angels.

Such grotesque thinking totally ignores reality. And it makes a mockery of morality, in the name of which the United States government adopts its new policy.

It is absurd to equate black rule in predominantly black nations with majority rule, for few of the black governments in black African countries are even faintly democratic. Some, as the whole world knows, are cruelly despotic, savagely suppressing human rights and extinguishing the lives of those citizens who dare protest too loudly. Many of Africa's governments are pro-Communist, as are some of the strongest guerrilla forces in Rhodesia. Human rights certainly do not flourish under communism, but it is communism that might profit most from the collapse of the white Rhodesian government.

Morally, a policy that fails to treat all regimes that violate human rights alike is indefensible, but that is precisely the kind of policy that the United States has now decided to pursue. Aside from Rhodesia, the two major suppliers of chrome are the Soviet Union and South Africa. It would be difficult if not impossible to name a more flagrant violator of human rights and a more callous brutalizer of the human spirit than Russia, and South Africa's restrictions against its non-white citizens are visible to the entire world. But in voting to repeal the Byrd amendment, Congress rejected proposals to extend the ban to Russian and South African chrome.

Moreover, even as it prepares to punish Rhodesia for its alleged offenses against humanity, the United States government is showing increasing interest in reestablishing trade ties with the Cuban dictatorship of Fidel Castro, that ardent champion of democracy who shows his devotion to human rights by sending his critics to prison or to the gallows. Castro's government is responsible for much of the turmoil that has shaken Latin America in recent years, and his troops are making trouble in Africa, where they are serving as surrogates of Russia.

If the United States is so dedicated to human rights that it cannot trade with Rhodesia with a clear conscience, how could it trade with the Soviet Union? Or even

consider trading with Castro's Cuba? Are Congress and the Carter administration *for* human rights or simply *against* the white government of Rhodesia?

The Byrd amendment was sponsored by Virginia Sen. Harry F. Byrd, Jr., who was motivated both by a desire for fairness in American foreign policy and by a concern for the nation's security. Chrome is important to the American defense industry, and the United States should not have to rely, Senator Byrd has said, upon Russia for the metal. Critics of the amendment argue, however, that reinstatement of the ban would pose no risk for the United States because it has stockpiled more than enough chrome to meet its foreseeable needs.

Perhaps it has. But does it have a stockpile of human rights that it can dispense to the oppressed peoples of Angola, Uganda, Russia and Cuba? Military safe reimposition of the ban might be, but just and wise it most assuredly is not.

TRADE REFORM ACT

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. BOB WILSON. Mr. Speaker, it seems that our purpose here is not to represent the people of America, but rather to take all possible steps to hinder. For instance, in enacting the Tax Reform Act of 1976, we short-sightedly made that cost of Americans doing business overseas prohibitive and easier for others to compete. Right now, our balance of trade is hardly what it should be and our new tax law certainly does not alleviate the situation as the following article from the Wall Street Journal points out:

TRADE TROUBLE: U.S. FIRMS IN MIDEAST HAVE TOUGHER GOING; TAX REFORM ACT CITED

(By Ray Vicker)

RIYADH, SAUDI ARABIA.—U.S. exports of goods and services are running into tougher competition in the Middle East, and Americans and others in the region say the Tax Reform Act of 1976 isn't helping matters one bit.

The Middle East is the world's fastest-growing market, and its most important countries for U.S. companies are Iran and Saudi Arabia, in that order. The Saudi Arabian market has long been dominated by the U.S.; in 1976, U.S. exports here climbed to $2.8 billion from $1.5 billion the previous year. But the U.S. share of the market has fallen, from 31% in 1974 to an estimated 25% now.

American sales to Iran actually declined last year, to $2.8 billion from $3.2 billion in 1975. At the same time, West Germany's sales to Iran increased by 11%, France's by 19%.

Over all, U.S. nonmilitary trade with the 19 countries of the Middle East and North Africa increased by only 10% in 1976 from 1975, after an increase of more than 300% from 1972 to 1975. Some tapering off was to be expected—the oil producers couldn't indefinitely increase their purchases at the rate set immediately after the quadrupling of oil prices in 1973—but the tough competition also hurt.

Now comes the new tax law, which many observers say is making things worse by increasing U.S. firms' costs and by touching off an exodus of Americans from the Middle East.

NOW IN EFFECT

The law, which takes effect with the current tax returns, tightens Washington's tax treatment of Americans abroad. Its impact varies from country to country, but it has been estimated that the U.S. income tax paid by an American in the Middle East may rise by thousands of dollars. Often the tax will exceed the tax he would have paid had he stayed in the U.S. at the same salary but without those large, and taxable, allowances he gets so that he can live in his accustomed manner in this high-cost area—an area where an ordinary meal may cost $20 and a decent apartment may rent for $2,000 a month.

Overseas Americans' first tax returns under the new law aren't due till June 15, but the measure's impact on U.S. firms could be assessed last October when Congress passed it. Here in the Middle East at least, the repercussions are already being felt.

Many big American banks and other firms, especially companies with manufacturing operations abroad, compensate employes for any added taxes they incur in an overseas post. In such cases, the Americans are often an insignificant cost item in a sizable operation, and the added costs may be absorbed without too much trouble.

But the kind of U.S. firm most common in the Middle East—a construction company, service firm, individual entrepreneur or one-shot exporter of a major installation—operates on a contract basis and may not be able to bear any added costs. A construction company, for example, may have a 3,000-man operation that includes 500 Americans. The margin of profit in the contract may not permit the firm to assume their added tax burden.

A COMPANY'S OPTIONS

If the burden isn't assumed, the Americans may quit and go home, and the foreign expatriates hired to replace them may not fit the operation so well. Disrupting though it may be, the hiring of foreign expatriates to replace Americans is already occurring as other Americans are no longer so eager to accept overseas assignments.

If, on the other hand, the firm does assume the tax burden, then the profit is slashed. The bid on the next contract will have to be high enough to reflect the burden; hence that contract may be lost to, say, a British or Japanese firm.

Other key Americans in the Middle East are business consultants; still others are advisers to ministries of the host government. Many of them make purchasing decisions to the tune of millions of dollars and, because of their backgrounds, usually favor American products. Although an adviser might persuade his ministry to give him a hefty raise, generally there is no one to pay these Americans' added taxes except themselves. These people are experts who feel they can easily find jobs in the U.S., and many of them are going home. They are being replaced by other nationals, who won't be disposed to recommend American products.

COMPETITORS' MOVES

All this comes at a time when Japan, West Germany, France, Italy and other countries are already giving strong support to their hard-working companies in the Middle East. One $953 million contract in Saudi Arabia has been lost by American companies to a South Korean construction firm. France has the inside track on some water desalination projects; French President Valery Giscard d'Estang recently visited Saudi Arabia, plugging France as an economic and political friend. West German companies are pushing much harder into Iran. Italy dominates the Libyan market, and its share of sales is increasing. In a press conference at the International Hotel here, a member of a Japanese trade delegation emphasizes his country's total readiness to provide Saudi Arabia with Japanese industrial and technical know-how.

"America is losing out, and it is your own government which is accelerating that trend," says Faisal Beshir, Saudi Arabia's deputy minister of planning. "I recognize the right of your government to pass any laws which it wants. But in this case it is America which will suffer, not us. There are many other countries who are only too happy to replace America in supplying us with the things we need." Most countries don't tax nonresident citizens.

Not everyone, it seems, agrees that the new tax law is having such dire effects. Tax "reformers" in the U.S. say Americans abroad have simply been avoiding paying their fair share of U.S. taxes, and a House Ways and Means Committee task force has recommended that the treatment of overseas earnings be tightened still further.

Among other things, the 1976 act reduces to $15,000 a year—from $20,000 and in some cases $25,000—the amount of income that an overseas taxpayer can exclude from reported earnings. The Ways and Means task force recommends repeal of the entire exclusion. It argues that living costs abroad are often lower than in some parts of the U.S. and that in those cases where living costs are indeed higher abroad, these costs "should not be provided for through a government subsidy."

The panel does propose some tax relief in lieu of the exclusion. It urges, for example, that overseas workers be allowed a tax deduction for expenses of educating their children when these are reimbursed by employers. And it recommends retention of the exclusion for construction and engineering workers. It also notes that if the exclusion is designed to spur U.S. exports, it could be limited to individuals involved in the export trade.

Whatever the merits of the argument so far as the Middle East is concerned, the U.S. Department of Commerce certainly seems undaunted. "Business opportunities in the (Middle East) and North Africa region for aggressive U.S. companies will continue to expand in 1977. U.S. exports may top $14 billion (versus $11 billion in 1976)," Kathleen Keim of the Bureau of International Commerce says in a recent report.

ADVANTAGES IN AREA

America does enjoy advantages in the Middle East. For one thing, 30,000 Americans are in Saudi Arabia now, and there are at least as many elsewhere in the area. They plug the American way, sell U.S. goods and show the Saudis how to apply American technology to their problems. Seventy-five American consulting firms operate in Saudi Arabia. Contracts outstanding with American companies total $17 billion. Yet company officials display anxieties.

Costs may rise no matter how a company reacts to the tax law. If it hires foreign expatriates, the turnover will lower efficiency, at least for a while; also, the company may have to set up personnel departments in foreign lands. If the company flies Americans in and out on a rotating basis so that they remain residents of the U.S.—the firm thereby holding on to Americans without assuming any added tax burden—that costs money, too, even if it is cheaper than compensating employes for added taxes.

"Our costs have been increasing and that makes us less competitive," says Ben Dorfman, vice president of the Dhahran subsidiary of Fluor Corp., the engineering and construction company, as he discusses the tax law's effects. A quarter of Fluor's work force here, or 600 men, are Americans and they hold some of the top jobs. They work on a giant gas-collecting network being built with Arabian American Oil Co. (Aramco) in Saudi Arabia's Eastern Province. That project alone could have a final price tag of over 16 billion. "A lot of our Americans," Mr. Dorfman says, "are thinking of going home."

Similar comments come from Lindel E. Montgomery, manager in Saudi Arabia for Geophysical Services International, a Texas

Instruments subsidiary operating in Dhahran. "That tax bill is adding to our cost of doing business," Mr. Montgomery says. He heads a staff of 175 senior-rated expatriates, which over the years has been predominantly American. The Americans now constitute less than 30% of the total and the firm is looking to foreigners to fill even more of its jobs. Geophysical Services studies terrain and rock structure in connection with oil explorations.

Neither Fluor nor Geophysical Services will say how it is handling individual Americans' added tax burden—perhaps the companies are helping some of the employes. But both firm's face rising turnover and both have set up recruitment programs in foreign lands. A spokesman for Geophysical Services says the tax bill has lowered the firm's margin of profit on each contract by a percentage point.

"IRREVOCABLE" DECISIONS

"One thing that our government doesn't seem to realize is that sometimes decisions affecting trade may be irrevocable," says Frank Jungers, Aramco's chairman. Mr. Jungers notes that Aramco built the first electricity network in Saudi Arabia's Eastern Province for its own operations. It had American engineers and so they went for the American system of 110 volts 60 cycles.

"So this became standard here," Mr. Jungers says, "and this has had a continuing good effect upon sales of American-made refrigerators, ranges and other electrical appliances."

Now he worries that Saudi Arabia is at a turning point in many industrial areas. If certain jobs go to foreign firms, he feels, the long-range effects may be as great as the effects of that electricity network were, but in the opposite direction.

Recently Aramco investigated costs of giving preference to Americans when hiring expatriates. It found that it could hire 2.8 Britons in key executive and technical posts for the cost of one American, and 2.3 Britons for one American in jobs for young engineers just out of college. Aramco now has 850 Britons on its staff compared with "only a handful a few years ago." It still employs close to 1,800 Americans. How many it will still have a year from now is a question.

"There will be an exodus of Americans," Deputy Planning Minister Beshir says. The planning ministry itself is faced with American advisers, and although Mr. Beshir says he can easily hire Germans, Britons, Frenchmen, and other expatriates, he isn't enthusiastic about the possibiliy of having to replace Americans. Like many in the Saudi government, Mr. Beshir is U.S.-educated (University of Oregon) and U.S.-biased (he spent nine years in the U.S., including a stint as a door-to-door salesman).

A COMMISSIONER'S VIEW

That same attitude is encountered in the office of Faroul Akhdar, head of Saudi Arabia's Royal Commission for Jubail and Yanbu. The commission is building the infrastructure for a $30 billion project to create mammoth ports at Jubail on the Persian Gulf and Yanbu on the Red Sea. Thus, it is deeply involved in letting contracts for goods and services, and Mr. Akhdar, who attended the University of California, says he has always been partial to American products and technology.

But American advisers are giving up their jobs for tax reasons, Mr. Akhdar says, and are being replaced by West Europeans, who almost automatically think of European companies when something must be procured.

In Iran, too, says Frank I. Gurney, manager of Pan American Airways in Tehran, "an exodus of American expatriates has already started." Last September, there were about 31,000 Americans in Tehran. According to a rough estimate made by Americans there, the number has declined to 28,000 and is still dropping. Under normal circumstances, the total would probably rise.

R. P. M. Carlson, managing director of Melli Industrial Group, an Iranian conglomerate, says, "The sad part of it is that once these Americans leave, they are very unlikely to come back no matter what happens in the future to American taxes."

The new tax law may harm U.S. political relations with Mideast lands. An Iranian official tells about a U.S. firm whose 500 Americans in Iran perform a service considered important by the Iranian government.

"The company approached us and said that the new American tax is costing them $8 million to $10 million a year extra. They said they couldn't continue their contract with us if they don't get help, so we made an adjustment in our contract with them.

"If taxes are being collected on Americans in Iran, the money should be going to Iran, not to the United States. Your government is actually forcing us to pay taxes to the United States if there are technicians that we want to keep here."

BPW 50TH ANNIVERSARY

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. OTTINGER. Mr. Speaker, the Mount Vernon Business and Professional Women's Club celebrated its 50th anniversary on Saturday, March 26 at the Pelham Country Club. I am pleased to share with my colleagues an article describing the outstanding work of the club over the past half century which appeared in the Mount Vernon Daily Argus:

BPW 50TH ANNIVERSARY

(By Terri Hall)

"Women's liberation" is just a phrase.

Because women have always worked. The Mount Vernon Business and Professional Women's Club proves it—the organization is celebrating its 50th Anniversary in Mount Vernon this month.

"We have always worked for equal rights for women," says Lorraine Rouget, past president of the Mount Vernon BPW club.

"Not in the avant-garde, militant way," she says. "But we've always worked for equal pay for equal work; for equal opportunity in the job market.

"The Federation of BPW clubs has always worked very steadily through legislative means to get the laws passed, rather than through demonstrations."

Miss Rouget is co-chairing the event with Mary Cosentino, also a past president of the Mount Vernon club.

As part of the celebration, the club has put together an exhibit of the club's history, which can be viewed at the Mount Vernon Public Library, 28 S. First Ave. A scrapbook will be presented to a library representative at the anniversary dinner.

Working with Miss Rouget and Mrs. Cosentino, Helyn Fink, current BPW president; and Marian Bertine, senior past president, have compiled a complete history of the organization's work in Mount Vernon including clippings, photographs, and other mementos.

The organization was founded after World War I, during which various groups of women had gotten together to help with the war effort. The national federation of BPW clubs was formed in 1919; the Mount Vernon club, in 1927.

In 1927, Mrs. James (Lena) Flint Barclay, the city's probation officer, invited a group of women who were employed by the city, to a lunch at the Hotel Siwanoy, hosted by Mayor William D. MacQuesten. A larger group met at the Westchester Woman's Club several weeks later, and on March 3, 1927, the Mount Vernon BPW club was officially founded, with Mrs. Barclay becoming the first president.

On April 9, 1927, the group voted to join the state and national federation of BPW clubs. Over the years, the club has been very active in Mount Vernon civic affairs. During the '30s, for example, club projects were instrumental in having over hanging signs and trolley tracks removed from Fourth Avenue; a questionnaire was circulated to find out "Why People Don't Buy in Mount Vernon," and it later led to a campaign to induce people to buy from local merchants.

In the past, the club supported the Mount Vernon Girls' Club and other youth organizations, and currently provides for a $300 scholarship and a $25 prize for the best female business students at Mount Vernon High School.

Last year, the club gave the Mount Vernon Public Library $600 to bring the collection of women's books up to date and will add another $50 every year.

"And we've donated to the United Way down through the years," Mrs. Cosentino says, "since it was the Community Chest."

"And we donated a room in the new wing of the Mount Vernon Hospital," Mrs. Fink adds.

On the state level, BPW administers the Grace Legendre Scholarship Fund, to help women who have stopped working continue their educations so that they might reenter the job market. The local clubs contribute to the fund.

The Mount Vernon club also has contributed four state presidents, district directors and a national treasurer. When the state presidency is held by a member of the Mount Vernon club, the state office of the organization also moves into Mount Vernon. When Miss Rouget was state president in 1967, the office was at 22 W. First St.

"There was a time when we did a lot politically," she says, "but we don't do it anymore. We would urge our members to get out and vote and by 10 a.m. we could say all our members had voted. We've always been active in civic things—we've always tried to be informed."

The Mount Vernon Club was also the first club in the state to start a mental health program called "Presents for Patients," in keeping with the state's "Ring the Bell for Mental Health" campaign. The state awarded the club with a gong, in commemoration of the achievement.

"We worked with other women's organizations," Mrs. Cosentino says. "Zonta, the Weschester Woman's Club—we've had joint meetings with Zonta, with the Chamber of Commerce."

A special adult education course was sponsored by the organization in 1966 and held at Mount Vernon High School, to gear women to the psychological factors, new techniques and resume preparation for going back to work. BPW supports the hospital's budget shop and its members volunteer at the hospital, the library, and the Salvation Army.

Through the national and state federation, the club supports the movement for an Equal Rights Amendment (ERA), by educating members to what such an amendment would mean.

Marian Bertine, senior past president of the club, has been a member for 45 years. Now retired, she was elected the first woman bank officer in Mount Vernon when she was employed by the Eastchester Savings Bank.

"I joined BPW because I thought it was a good opportunity to meet other women in

other fields of business," she says. "I took an active part and I have always enjoyed it."

"I think it's wonderful for a club to have survived 50 years," she says. "I think it's really an accomplishment, don't you?"

THE FABULOUS SCHENCK

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. WHALEN. Mr. Speaker, a very informative article about one of my 19th century predecessors in this body appeared in the February issue of Dayton USA.

Written by Jim Butler, the piece gives a good summary of the life of Robert Cummings Schenck. Titled "The Fabulous Schenck," the article told me a few things about Mr. Schenck I did not know before. For the sake of the record, I insert this piece at this point in the RECORD:

"If the Republican Party of this country, if the thinking, liberty-loving men of the country, want an honest, sensible man to lead them in the coming campaign, they cannot do better than nominate the distinguished gentleman from Illinois, Abraham Lincoln."

These words, spoken in Dayton, on the court house steps, one evening in September 1859, were the first to put Lincoln's name in contention for the presidency. The speaker was Robert Cummings Schenck, a former Ohio Legislator, Congressman, and Ambassador to Brazil. And Lincoln didn't forget.

When Ft. Sumter was fired upon in 1861 Schenck offered his services "in any capacity" to President Lincoln. After a short wait Lincoln summoned Schenck to the White House.

"Good morning Mr. Schenck," Lincoln greeted him.

"Good morning, sir," Schenck replied.

"We're having a devil of a time just now," Lincoln commented, then, "Schenck, can you fight?"

"I don't know sir, but I can try."

"And I'm sure you will succeed. You have it in your blood, and I am going to give you a chance . . . You shall be made a brigadier-general."

Schenck became a credit to Lincoln's wisdom. He fought with courage and distinction in several Civil War battles, including both Bull Runs. During the second battle of Bull Run, in August 1862, Schenck was seriously wounded, and permanently lost the full use of his right arm. When he recovered he returned to duty, but never again was he a battlefield commander.

Schenck, one of ten children of William and Betsy Schenck, was born in Franklin, Ohio, 4 October 1809. He attended Miami University, graduating in 1827. In 1830 he entered the law office of Thomas Corwin "the wisest lawyer in Ohio" at Lebanon. Moving to Dayton in 1831 he became a law partner of Judge Crane, who had a large practice. It became one of the most extensive and lucrative associations in the state.

But Schenck was too ambitious to remain a small town lawyer so in 1841 he entered public life, being elected to the Ohio Legislature. Making a name for himself there, and quite a few Democratic enemies, he was elected to Congress in May 1843. Here he remained for eight years, becoming friends with many great men of the time.

While defending Daniel Webster on charges brought against him by Charles Ingersoll, Schenck called for a thorough investigation. Webster was cleared, but during the inquiry Schenck unearthed evidence that years before, Aaron Burr had been permitted to go through secret files of the State Department. Burr was trying to find evidence to injure President George Washington's esteemed reputation. Apparently Burr's scheme fell through. But, needless to say, Webster was forever a devout friend of Schenck's.

When Schenck was told by doctors in 1848 he had consumption and wouldn't last the winter he went to Cuba. This didn't help so Schenck's good friend, President Millard Fillmore made him Ambassador to Brazil. After spending several fruitful years in South America Schenck came home cured, never again to be bothered by his lungs.

After the war Schenck was appointed by President U.S. Grant in 1870 as Minister to England, where he served for over five years. During this time Schenck unwittingly became involved in a mine fraud, of which he was later exonerated. It was also during this period that another, but much lesser scandal surfaced.

Schenck was quite adept at poker playing and at a house party in Somersetshire he was asked by the hostess to jot down a few rules of the game. This he did, and to his surprise a while later a pamphlet was published with those very rules.

Back in the United States the press raised a furor at our poker-playing ambassador, who should spend more time attending to his duties at the Court of Saint James. Perhaps to show his contempt of those who would castigate him, Schenck had a book of rules published himself when he returned home. On the title page of the 17-page booklet Schenck had written: "Put not your trust in Kings and Princes, three of a kind will take them both."

In Nissequaque, Long Island, New York in 1834 Schenck married Renneiche Smith. Three of their six children died at early ages. Renneiche died in 1849, and Schenck lived until 1890. In his later years he resided in Washington, D.C., practiced law and was renowned as an authority on poker. At his death he was returned to Dayton and buried at Woodland Cemetery.

JAYCEE CREED

HON. HARRY F. BYRD, JR.

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Wednesday, March 30, 1977

Mr. HARRY F. BYRD, JR. Mr. President, last evening I had the pleasure of attending the annual Bosses Night and Awards Banquet of the Warrenton-Fauquier Jaycees in Fauquier County, Va.

The banquet was held to give recognition to outstanding individuals and business which in the last year have contributed greatly of their time and energy for the benefit of the community.

I was struck by the dedication of the many individuals who contributed so fully to their community.

I was equally impressed with the Jaycee's Creed, a creed I long have been familiar with. I believe that this creed should be a guiding force for all Americans. I ask unanimous consent that the text of the Jaycee's Creed be printed in the Extensions of Remarks.

There being no objection, the creed was ordered to be printed in the RECORD, as follows:

JAYCEE CREED

We believe:

That faith in God gives meaning and purpose to human life.

That the brotherhood of man transcends the sovereignty of nations.

That economic justice can best be won by free men through free enterprise.

That government should be of laws rather than of men.

That earth's great treasure lies in human personality.

And that service to humanity is the best work of life.

CAMP SAFETY INCENTIVE ACT

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. ANDERSON of Illinois. Mr. Speaker, today I am reintroducing my Camp Safety Incentive Act with 14 cosponsors. This was first introduced as H.R. 5167 on March 17, 1977, and is nearly identical to the substitute I offered in the House on April 17, 1975. That substitute lost by the narrow vote of 188 to 194. My bill would require the Secretary of HEW to promulgate model youth camp safety standards and provide a one-time 3-year grant assistance program totaling $22.5 million to assist States in setting up their own camp safety programs using comparable standards. Unlike other bills, my measure would not provide Federal preemption and enforcement in those States not having federally approved programs. In my opinion, and based on available data of camp fatalities and injuries, the problem is not so serious as to merit creating a junior-OSHA to police our youth camps. Since my bill does not impose Federal regulation and inspections on the States, the full $7.5 million a year would be available to assist States in the form of plan initiation, training, and startup grants. The Federal approach bills, on the other hand, which authorize the same amount, would necessarily make less available in grants since up to $6 million a year would be required for the enforcement effort alone, thus leaving only about $1.5 million a year for grant purposes. It is obvious that my bill would offer greater financial incentive to the States to establish their own camp safety programs since more assistance would be available.

Mr. Speaker, this morning I was privileged to testify before the House Education and Labor Subcommittee on Compensation, Health and Safety on this legislation. At this point in the RECORD I include a list of cosponsors of my Camp Safety Incentive Act followed by the full text of my testimony:

COSPONSORS OF CAMP SAFETY INCENTIVE ACT

Mr. Anderson of Illinois, Mr. Bevill, Mr. Dickinson, Mr. Fish, Mr. Guyer, Mr. Hyde, Mr. Lagomarsino, Mr. Krueger, Mr. Moorhead of California, Mr. Myers of Indiana, Mr. Pattison, Mr. Pickle, Mr. Pritchard, Mr. Sebelius and Mr. Whitehurst.

TESTIMONY OF HON. JOHN B. ANDERSON, BEFORE THE SUBCOMMITTEE ON COMPENSATION, HEALTH AND SAFETY OF THE HOUSE COMMITTEE ON EDUCATION AND LABOR ON YOUTH CAMP SAFETY LEGISLATION

Mr. Chairman and Members of the Subcommittee: I am grateful for this opportunity to testify before you on the subject of youth camp safety legislation, especially since no hearings were held on this matter in the last Congress before H.R. 46 was reported to the House. I especially want to commend you on your attempt in this Congress to solicit the views and testimony of all interested parties before acting on this matter. I think this diversity of views and suggestions will better enable you to consider all the issues involved and report a better bill.

Mr. Chairman, I want to pay tribute to you and the ranking Republican on your subcommittee (Mr. Sarasin) for your longstanding interest and efforts on behalf of youth camp safety. I think we all share a common concern for the safety and well-being of our Nation's children. As parents we all experience the same nervous uncertainty and fears when our young sons and daughters go off to camp or to visit distant friends or relatives. We know that some serious injury or illness could befall them and we would not be able to be at their sides immediately. We want to know that they will be in good hands, in a safe environment and under proper supervision. During the debate on camp safety in the last Congress, I cited some excellent hints to parents on choosing a camp for their children. These had been inserted in the April 15, 1975, CONGRESSIONAL RECORD by Congressman Rosenthal who pointed out, and I quote: "Parents need not wait until meaningful youth camp safety laws become a reality in order to make sure their children are under adequate supervision." He proceeded to list about ten things to look for in evaluating a camp. I would think most parents would want to take these precautions before sending their child off to a camp they know nothing about.

All this is not to say that the total responsibility rests with the parents or that camp directors and the States are somehow absolved of any responsibility for the health and safety of campers under their jurisdiction. Obviously they have a very special responsibility for safeguarding the welfare of young campers.

But the central issue before us today is whether this is a legitimate responsibility of the Federal government as H.R. 1326, introduced by Mr. Sarasin, and H.R. 4286, introduced by Chairman Gaydos, assume it is. Granted, both bills state that, "it is the intent of Congress that the States assume responsibility for the development and enforcement of minimum standards" for youth camp safety, but both bills then go on to provide for Federal enforcement in those States which do not have Federally approved camp safety plans on the effective date of the Federal standards (one year after their promulgation).

As I'm sure you are aware from our 1975 debate on this, I, for one, do not consider this a legitimate or necessary area for Federal regulation and enforcement. I think Federal enforcement of youth camp safety standards would be an unwarranted intrusion on the police powers reserved to the States under our constitutional system of Federalism. I do not think it will suffice to argue that Federal preemption of these powers is necessary because only a few States have meaningful youth camp safety laws and programs. And I might interject here that while it was argued back in 1975 that only six States had meaningful youth camp safety laws, the latest figures I have seen indicate that 12 States now have such laws. So, State action in this area has doubled in just the last two years, even without Federal financial assistance or the threat of preemption.

But I think the important point to emphasize here is that just because the remaining States do not have youth camp safety laws or programs per se, it does not follow that youth camps within their jurisdiction are unsafe. Most are still subject to State fire and sanitation inspections, and moreover, camp operators are acutely aware of their responsibility to safeguard the health and safety of their campers. Any gross negligence in this regard which led to serious illnesses or accidents would make them extremely vulnerable to suits by the parents of campers.

It seems to me that the acid test in deciding whether Federal enforcement is necessary is not how many States have youth camp safety laws, but rather how serious the problem is in terms of deaths, illnesses and injuries. And I don't think the available data will support the argument that this is so serious as to merit massive and direct Federal intervention. To quote from one of your previous witnesses, Alan J. Stolz of the American Camping Association, "organized camping is already a very safe enterprise." He went on to ponit out that the injury rate in camps, including very minor injuries, is one-fifth that for school children, even though schools operate on six-hour days and most camps on a round-the-clock basis.

Compare, if you will, the estimated 250,000 major and minor injuries in camps each year with the 4.3 million moving vehicle injuries each year, the 8.7 million work-related injuries, and the 21.5 million which occur in the home each year. Or, compare the estimated 25 deaths in camps each year with the 46,000 on our nation's highways, the 12,600 job-related fatalities, and the 25,500 accidental deaths occurring in the home each year. Or, to put this in another perspective, the accidental death rate among campers is .3 per 100,000 campers, compared to a 21.6 death rate in auto accidents and a 12.0 death rate in home accidents. Keeping in mind the .3 accidental death rate in camps, consider the fact that the rate in the overall youth populace, ages 5 to 14, is 18 per 100,000. The source for these statistics is the National Center for Health Statistics at HEW.

While I by no means wish to minimize the individual tragedy which surrounds each and every camper death, I think this committee must put the problem in proper perspective before acting. And the fact is, camps have 60 times fewer fatalities, and five times fewer injuries than the same youth populace at large. To quote again from Mr. Stolz of ACA, "In spite of the fact that some illnesses, accidents and injuries do occur, this is a very heartening endorsement of the safety record in youth camps." This committee should consider the more dangerous situation in which children will be placed if they can't go to camps which may have to close down due to costly Federal regulation.

Mr. Chairman, for all these reasons I am again this year proposing an alternative to Federal enforcement of youth camp safety standards. I introduced this alternative on March 17, 1977, as H.R. 5167, the "Camp Safety Incentive Act." It's nearly identical to the substitute I offered on the House floor on April 17, 1975. You will recall that my substitute lost by the narrow vote of 188 to 194. Under the terms of my bill, the Secretary of HEW would merely promulgate model youth camp safety standards and offer a one-time, three year Federal assistance program to help States establish and enforce comparable standards if they wish. The total grant assistance would be the same amount as authorized in the Federal bills—$22.5 million over three years—but on a 50% rather than 80% matching basis. The idea behind this approach is to get the States started but not to foster near total dependence on the Federal government to keep their programs running in perpetuity.

Not only will the 50% matching requirement (except for the $1 million in plan initiation grants which will not require matching) insure that the grants will go further during this crucial three-year period, but so too will the fact that all the money authorized will go for grants, whereas much of the money under the Federal approach bills will be required for the Federal enforcement efforts which will begin in all States one-year after the promulgation of standards, except in those which have Federally approved programs on the effective date of the regulations. While the committee report on this in the last Congress indicated that it was not its intention to set up "a large force of Federal inspectors," I am wondering how this Federal approach will be anymore effective than what now exists without a large Federal enforcement effort. Whereas, under State plans in the committee bill and my bill each camp must be inspected once a year, there is no such requirement for camps under Federal jurisdiction.

Assuming, for a moment, that only one-fourth of the States and one-fourth of the camps, were under Federally approved plans, that would leave some 7,500 camps subject to Federal enforcement. Since the average summer camping season runs 12 weeks or less, an annual Federal inspection would require 625 inspections per week. Assuming an average inspector could only cover two camps per week, that would require some 312 inspectors. Based on our OSHA experience where the average salary per employee is $17,000 per year and the average cost of an inspection is $786, the cost of inspecting 7,500 camps each summer would total roughly $6-million. And what do inspectors do the rest of the year?

On the other hand, if it is argued that such a large inspection force and annual inspections are not anticipated under the Federal enforcement effort, we are in effect saying that Federal enforcement will be less effective and stringent than in those States running their own programs.

I think my voluntary approach and State enforcement is far preferable to the Federal enforcement approach. Moreover, my bill mandates a study by HEW over the three-year period of the incidence of camp fatalities and serious injuries and illnesses. Hopefully, it will be better than the 1971 study which was so widely faulted. Perhaps then, on the basis of the study and this three-year voluntary program, we will be in a better position to know whether the problem is anymore serious than it now appears to be and whether further Federal involvement is warranted.

BILL HIGGINSON

HON. MORGAN F. MURPHY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. MURPHY of Illinois. Mr. Speaker, today I join many Chicagoans as well as the Illinois General Assembly in applauding the accomplishments of a dedicated civic leader, Bill Higginson. Bill, who is leaving his position as the execu-

tive director of the Southwest YMCA, was recently honored by the Illinois General Assembly for his many achievements.

As head of the YMCA, Bill Higginson has been instrumental in initiating many social action programs benefiting my district and many surrounding areas in Metropolitan Chicago.

Bill has always been concerned about the problems and needs of young people. His summer youth worker program has enhanced the quality of life of our communities and could serve as a model for other neighborhoods.

The Illinois General Assembly cited his drug abuse program as the most effective in the area. Drug abuse is considered by almost half the mayors of the Nation as one of five of the most crucial problems in their cities. To have an effective and productive program in this area is a great achievement. Bill has also set up several student service bureaus at local high schools which have proved very successful.

Bill has worked intimately with the people connected with these social action programs. He has spent countless hours with elected officials on the local and State level to win support for drug abuse, runaway, and counseling programs. His success in securing the proper funding from both State and Federal sources has enabled him to conduct these worthwhile projects.

The Southwest YMCA and our community will greatly miss its executive director. We certainly wish him well in his new position with Chicago United, another social action agency.

REEXAMINING THE NEW YORK FINANCIAL CRISIS

HON. HERMAN BADILLO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. BADILLO. Mr. Speaker, I want to call the attention of my colleagues to an article by Felix G. Rohatyn which appeared in the Wall Street Journal today. The article deals with the oft-discussed New York City crisis and, in a welcome departure from the norm, approaches in realistic and cogent terms the question of how long the New York City financial crisis is likely to continue. Initially, Mr. Rohatyn authored and advocated the 3-year financial plan now in existence. Then, when it became only too obvious that New York City would be unable to approach anything like normal financial stability within that time, he favored an extension to 6 years. Now he has finally come around to advocating a 15- to 20-year term for Federal assistance—an idea he bitterly opposed when I advanced it a couple of years ago.

It is imperative that we all understand that under no circumstances can the New York financial problem be resolved on a short-term basis. The city shall need help for the next 15 to 20 years to come. With the immediate threat of financial disaster removed, we now have time to give some hard thought to the alternatives available to us and to the city. The administration, cognizant of the problems of urban centers, is giving serious consideration to the establishment of an Urban Development Bank. The Subcommittee on Economic Stabilization of the House Committee on Banking, Finance and Urban Affairs, of which I am a member, under the chairmanship of the gentleman from Pennsylvania (Mr. MOOREHEAD) has just finished 2 days of hearings on the subject of direct loans and loan guarantees.

It is most important that we, who ultimately shall have the responsibility of deciding on the type of legislation we enact, now establish a dialog and develop the relevant information necessary to deal not only with the plight of New York, but with the present and future needs of our other urban centers. I believe that the article I am inserting here represents a good first step in that direction. I commend it to the attention of my colleagues.

The article follows:

THE RESTORATION OF NEW YORK CITY

(By Felix G. Rohatyn)

The New York City moratorium crisis appears to be behind us. As the result of a financing package recently announced, including an exchange of MAC bonds for city notes, the last of the unfunded short-term debt accumulated by the city between 1970-1975 will finally have been refinanced. With the completion of the current plan, almost $6 billion of short-term notes outstanding as of May 1975 will have been refinanced through a series of actions which involved creation of the Municipal Assistance Corporation and the Emergency Financial Control Board, together with a financing package involving banks, unions, the public market, state and federal government.

This included not only the $6 billion of accumulated short-term debt, but also $2.5 billion to finance the city's requirements from 1976–1978 and $2.3 billion of seasonal loans provided by the federal government. All of this financing, totaling about $10 billion, was accomplished over the last two years without a public market existing for city securities. And, with the exception of public financing of MAC totaling about $1.5 billion, most of it was arranged privately.

In the last two years New York has made a dramatic change in the direction and philosophy of its government. Through a reduction of almost 20% in its labor force, the imposition of additional taxes, a moderately successful wage freeze and a policy of increased labor productivity in exchange for cost-of-living adjustments, the city has begun the painful process of reversing its almost uninterrupted growth in municipal services and pay over the last 15 years. The imposition of tuition at City University for the first time in 120 years, sharp increases in transit fares and closing of municipal hospitals signify that the city can do politically unpleasant things when faced with harsh reality.

Some of this change was forced by MAC and the Control Board. And certain of the reforms—the efficiency of municipal services and the level of education—are far from perfect. Moreover, changes can't occur overnight. But it is my judgment that the new direction cannot be reversed in the foreseeable future.

AMAZING PASSIONS UNLEASHED

The passions that the New York City problem unleashed are amazing—and complicating. To millions who have entered the U.S. through New York, it is a symbol of opportunity, of freedom, of generosity and of caring for the needy. To at least as many millions, New York is the symbol of liberal thinking carried to its outer limits—the debasing of such virtues as thrift, hard work and the ability to do it on your own.

In truth New York is all of those things. Restoration of the city requires respect both for compassion and those virtues that will enable it to avoid its formed excesses.

The absence of a market for city securities obviously cannot continue much longer. The financing arranged for the survival of the city, both with respect to its capital spending and its seasonal requirements, does not carry beyond June 30, 1978. This is the date at which the current Federal Seasonal Loan Act expires, as well as the date to which the current commitments of the pension systems will carry the city.

It is not only a federal requirement that the city attempt to get back into the market before June 30, 1978. It is necessary for the city, as well.

The recent negotiations ended with a shaky financing plan for the publicly held notes in the amount of $983 million, and with a regrettable breakdown in negotiations between the Clearing House banks and the city. This revolved around creation of a new city bond and with it a Review Board that for the life of those obligations would have significant powers over the city's fiscal and financial life.

This problem has been postponed for the time being, perhaps until the fall or winter when the mayoral election is behind us, and we have a balanced budget for fiscal 1978 and a balanced fiscal plan for 1979.

But there is not the slightest question in my mind that a long-term budgetary review mechanism will be required. Like it or not, the city cannot get away from its tawdry financial past. The issue, therefore, is not whether to have a review mechanism but what kind of mechanism is appropriate.

This will be of considerable interest to Congress if and when federal legislation is considered for beyond June 30, 1978. It seems highly unlikely that by then New York will be able to finance the roughly $4 billion of annual financing that will be required. This is roughly $3 billion of seasonal financing presently provided by the state and federal government and a minimum of $1 billion of long-term capital financing.

Whether long-term credit assistance is provided through some form of federal guarantees or an Urban Development Bank, or whether it is provided by an extension of the Seasonal Loan Act, are issues that require serious debate. The necessary review mechanism should accompany federal assistance, but since it will remain for 15 to 20 years, its constitutional implications for city government also deserve lengthy study.

The continued drama of successive default crises over the last two years has served to obscure the real crisis caused by social and economic factors that are not likely to change in the foreseeable future, and with which the city by itself is incapable of coping. Still it is capable of coping with certain problem areas, and the sooner attention is switched from default to its basic long-term economic and social problems the more quickly solutions may be found.

We can say over and over that the federal government has to take over the city's share of welfare, as it must. But even this would not solve the city's long-term problem. That can only be solved by keeping and attracting private employment. By an educational system that provides quality education. By wider tax borders that include fleeing commuters. By lowering city and state taxes to make us more competitive with other parts of the country.

Moreover, we need to decide what kind of city we can expect to have in 10 or 15 years. Although manufacturing should be pro-

tected and encouraged to the extent possible (tax reductions, union rules, industrial parks, etc.) it is unlikely the city can really compete with those parts of the country where energy costs and taxes are lower, the climate better and labor problems more tractable.

EXPLOIT ITS ASSETS

But New York could exploit its extraordinary assets in leisure, entertainment, communications and light industry. It could become a haven for those tens of thousands of foreigners with means who will view the U.S. and hopefully New York as the last refuge for freedom and capital.

The city should compete vigorously with other American cities for tourist dollars, convention dollars, intellectual dollars. A convention center by itself is not a strategy. Legalized gambling in certain parts of the city is not a strategy. The 1984 Olympics for New York/New Jersey is not itself a strategy. But together they could form the basis of a coherent strategy.

Because of its financial frailty, the city has to coordinate its development policy with the state. Together with such state agencies as the Port Authority and Battery Park City, an economic development structure could emerge. Furthermore the city could benefit from the state's leadership in the Coalition of Northeast Governors, which is trying to frame a regional development policy that seeks energy development as well as new investment, increased employment and lowering of some of the costs that have put the Northeast at such a competitive disadvantage.

But only a New York City that has reformed itself can play a major role in shaping a federal urban program, a program necessary to help not only New York but all the older cities of this nation.

In Harlem in New York, Watts in Los Angeles and Hough in Cleveland, hundreds of thousands of young blacks and Puerto Ricans are unemployed and without hope of becoming productive members of the community. Without a program aimed at this problem, based heavily on private employment, every older city in this country is doomed. This would be catastrophic.

Let us therefore get the moratorium behind us. The debate is not over a city bond since a city bond is not the answer. Nor is the debate over a review mechanism; there will be a review mechanism. The debate should be over the future economic, political and social life of the city, and it should be the center of the incipient mayoral campaign.

While I have not always agreed with The Wall Street Journal's editorial views in the past, I do agree with a recent editorial that suggested we will get the political leadership we deserve if we do not face this reality.

CAPITOL POLICE OFFICER ADOLPH KRENN

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. MAZZOLI. Mr. Speaker, there are certain people who transmit a special warmth to everyone with whom they come in contact.

Capitol Police Officer Adolph Krenn was such a person.

Adolph's regular station was at the C Street entrance to the Longworth Building. My office has been in Longworth for the 6 years I have served in the House. And, I have used the C Street entrance during all these years. So, I got to know Adolph very well—as did my family who visit as often as possible.

Officer Krenn always exhibited special interest in our two children, Michael and Andrea, who first met Adolph in 1971 when they were very young. They are now teenagers. Over the years, whenever they passed Adolph's desk, he always called their names and had a nice word for them.

He treated everyone—friend and stranger—with unfailing consideration and courtesy. His friendly greeting, more than once, got my tough day off to a smooth start.

My staff and I—and I am sure this goes for all the Longworth congressional family—always enjoyed being with and around Officer Krenn.

But, Adolph died yesterday. This fine and kind gentleman will be deeply missed and long remembered by Ron Mazzoli, his family, and a lot of other people.

LITHUANIAN INDEPENDENCE

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. SCHUZLE. Mr. Speaker, today is a glorious anniversary, but it is also a time of sorrow. On this occasion of the 59th anniversary of Lithuania's independence—a culmination of more than two centuries of struggle—it is fitting that the Congress of the United States commend the people of that nation for their valiant efforts.

For 22 years Lithuanians enjoyed their precious freedom and entered a period of unparalleled social, economic, and political advancement. But World War II was to close that door of opportunity and take away the freedom of choice in exchange for Soviet domination.

Freedom and liberty are precious commodities to all Americans. We have but to recall the dramatic accounts of courage, determination, and self-sacrifice of our American revolutionists. Yesterday at the nationalization ceremony of Valley Forge Park, tribute was paid those early American soldiers. That winter of 1777–78—one of suffering and discomfort—was the turning point of our freedom. George Washington's Continental Army entered in defeat, but left as troops in search of victory. Those men fought for our freedom that we take for granted; a freedom that has been preserved for two centuries. The Lithuanians have not been as fortunate.

The U.S. support of the Lithuanian's just aspirations for freedom and independence is clearly reflected in our refusal to recognize the forcible incorporation of Lithuania into the Soviet Union. It is not unreasonable that in time the Soviet masters will recognize that the desire of all men to be free to choose their own destinies cannot be denied. Let us hope that the trend for the granting of national independence will extend to Lithuania so it may take its place as a free nation living in harmony with its neighbors.

Lithuania is a daily reminder for free men everywhere that freedom is not easily attainable. Rather, we exist in a century where growth of totalitarian power thwarts us. Today as we recall our own freedom let us support the Lithuanian people in their hopes and dreams that one day soon they may be free to pursue their birthright—a free and independent Lithuania.

BETRAYAL OF TRUST

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. ABDNOR. Mr. Speaker, the last word has not yet been heard on the fate of the 19 initial water projects President Carter determined should be stricken from the fiscal year 1978 budget. The Senate has already affirmed their intention that the projects be continued, and I am confident the House will be equally forceful in their decision on the matter.

Last week the public hearings were held purportedly to give both proponents and opponents of the various projects a forum to state their case. Quite frankly, I can only consider the hearings an attempt to publicly justify decisions which have already been made.

Where the Oahe project of South Dakota is concerned, I must consider the action by the President a betrayal of the trust the people of South Dakota placed in the Federal Government for assistance in future water resource development when they permitted the four high dams of the Missouri River to be built. My statement at the hearings follows:

STATEMENT BY THE HONORABLE JAMES ABDNOR

Gentlemen of the Oahe review team, I want to thank you for coming to South Dakota to assess the views of the citizens of our State. I was at the meeting at the White House when the President committed you to holding hearings in the areas affected by his proposed budget cuts. It is not too much for us to expect you to do so when the decision the President has already made to terminate funding for our project has such profound implications for the future of our State.

I do not envy the task to which you have been charged, that is to render a fair and impartial judgment, when both the President and Secretary Andrus have publicly and explicitly prejudiced the process by stating that the Oahe Unit and 18 other water resource development projects should be terminated. It is obvious that we have already been found guilty and that we must now prove ourselves worthy of reprieve. I know that it will not be easy for you to render such a judgment with the weight of the prejudicial comments of the Secretary and the Commander-in-Chief hanging over the process. Our legal system provides protection to individuals who might be denied a fair trial in this manner. It is unfortunate that the "review" process offers no such consideration to the many individuals and families whose hopes for a brighter future through development of our abundant but underutilized water resources will be dashed.

In my view the importance of this matter is being sadly disregarded and the people in-

volved badly abused. I would cite as evidence the following facts:

(1) The White House indicated a complete unfamiliarity with the Oahe Unit when they called my office to inform us that the Garrison Unit was being cut but that the Oahe Unit was not. After repeated assurances that Oahe was in the President's budget, they later called to apologize and to say that it was not in the budget.

(2) There was no public involvement in the President's decision to delete funding for the 19 projects from the budget submitted by former President Ford. Vice-President Mondale, who the President calls his "chief advisor," was not consulted or even informed; nor was Secretary of Agriculture Bergland, who is more familiar with the Oahe and Garrison Units than anyone else in the President's closest circle of advisors.

(3) Public hearings in the locations affected were scheduled only after the President was directly challenged by Congressman Mark Andrews for not having done so. In these supposedly unbiased hearings the proponents have been allowed a few short hours to persuade the "review team" to reinstate projects. The projects were initiated only after long years of planning and effort. Now they are marked for termination by the President after a few short weeks in office and without consultation with anyone associated with the projects.

(4) With all due respect to the members of the review team, the President has maintained that he "personally" made the decision to delete funding for the 19 projects. If this is so, and I take his word for it, he should at the very least personally attend to the views of those who will be harmed by his decision. I have invited both the President and Secretary Andrus to come to South Dakota for this purpose. As yet I have no indication from either that they will come to our state to see how badly we need irrigation and how strongly South Dakotans feel about this issue.

(5) Even those members of Congress who are considered to be in the vanguard of the environmentalist movement have been appalled by the President's action—not so much because of the specific projects themselves as because of the callous and perfunctory way with which they have been dispensed. Not only were we not consulted, but we have not been able to get information on the specifics of why our projects are in trouble.

(6) The time limits imposed on the "review process" are ludicrous. No one should know that better than you who are involved in the process. If the President truly understood the importance of projects, such as the Oahe Unit, I cannot believe he would be in such a hurry to pronounce them dead without even taking their pulse.

(7) The President proposes simply to terminate the Oahe Unit. He has taken no notice of the fact that its water transport system is undoubtedly the most economical and efficient means of conveying water to irrigable lands in eastern South Dakota regardless of the specific plan of irrigation. No alternatives have been suggested to replace the Oahe Unit.

(8) No attention whatsoever has been paid to the Federal Government's long-standing commitment to South Dakota to assist with the development of our water resources. It appears that the Administration simply chooses to forget it.

(9) Despite the statements made by the President and Secretary Andrus that in their minds the 19 projects should be terminated and that they take responsibility for halting them, they send us a "review team" with whom we are to plead our case. Even if we were able to persuade you to support reinstatement of our project over the prejudicial comments of the President and the Secretary, I am not convinced doing so will do anything toward overcoming their preconceived notions.

(10) Finally, and in summation, I cannot comprehend how anyone can have faith in a review process under which a project is ruled unsound on the basis of undefined criteria before the process begins and for which no input from those affected was solicited. It is understandable that many are tempted to call this proceeding a charade and a farce.

Giving you the benefit of the doubt, though, which is more than the President was willing to give the Oahe Unit, let me briefly address the "problems" with the project as contained in a one page document transmitted to me by the White House Congressional Liaison Office. Although I had asked for the specific information on which the President based his decision, the letter I received in response is carefully worded in such a fashion that I still do not know if these are, in fact, the issues on which he decided to kill the Oahe Unit. I am not the only member of Congress who has had difficulty in getting a straight answer from the White House, which can only further reduce our confidence in the integrity of this review.

The problems listed are (1) channelization of 120 miles of natural river, (2) destruction of 10,000 acres of wetlands, (3) increased downstream salinity and flooding, and (4) adverse effects on rare and endangered species.

In general, it is my firm belief that the Oahe Unit can only improve the wildlife, fishery, and aesthetic resources of South Dakota in addition to the obvious improvement in utilization of our water resources. A small amount of channelization in concert with employment of floodway and greenbelt concepts can improve the aesthetics of the James, while also reducing flooding and fostering fish and wildlife propagation. I know of no rare or endangered species which will be threatened by the project, and I believe that the wildlife habitate mitigation aspects can more than make up for any losses.

The fact that water quality has been cited as a problem is highly ironic in view of the fact that about 60 percent of the community water supplies in South Dakota do not meet quality standards and never will if the President's criteria are used in evaluating projects needed to improve them. Water quality is also moot if there is no appreciable quantity of it. Construction of the Oahe Unit will ensure that water quantity is no longer a problem for Huron, Mitchell, and other communities.

The fact, as I see it, is that all of these so-called problems can be turned into pluses if we get on with the project in a cooperative spirit.

The final "problem" identified in the document furnished by the White House represents a gross distortion of the implications of the review being conducted by the Oahe Conservancy Sub-District Board. There are many valid questions they wish to address and I support their efforts. The unanimous resolve of the board to study these questions, however, is obviously premised on the assumption that there will be a project to study. I can understand the false understanding of the President, if he did see this document, that the board does not support irrigation. I know this not to be the case, however, and I am sure it will be evident to you too before today's proceedings are concluded.

Other issues not mentioned in the document I received from the White House include opposition to the taking of land for wildlife habitat and especially the taking of land through condemnation proceedings. The loss of tax base is also a problem, but it may be addressed by the Payments in Lieu of Taxes legislation enacted last year. If not, it is not so big a problem that it cannot be solved.

I share the concerns over the acquisitions of large acreages of land for single purpose wildlife habitat—not only in mitigation of the Oahe Unit but also through unrelated purchases. On May 7th of last year, I addressed a lengthy letter on this issue to the Assistant Secretary of the Interior for Fish, Wildlife, and Parks. I was amazed to learn in his reply of August 3rd that over 250,000 acres are already under public ownership or perpetual easement and managed solely for wildlife purposes in South Dakota. I was even more astounded, however, to learn that "the U.S. Fish and Wildlife Service has set a goal of preserving an additional 275,000 acres of wildlife habitat in fee title and 550,000 wetland acres by easement during the next 10–15 years in the principal migratory waterfowl breeding ground of the Central Flyway," and, further, that the "majority of the best remaining habitat lies in South Dakota, and it is estimated that approximately 40 percent of the acquisitions will take place there."

The 40 or so thousand acres associated with mitigation of the Oahe Unit will be controversial; but the 330,000 acres the U.S. Fish and Wildlife Service feels it must acquire or obtain easements on will be even more controversial whether the Oahe Unit is constructed or not. In the interests of all concerned we must sit down in a spirit of cooperation and constructiveness and the wildlife mitigation features of the Oahe Unit may provide the incentive to do so. Anyone who believes South Dakotans will stand for these acquisitions if the Oahe Unit is stopped had better think again. So should anyone who thinks the acquisitions will cease if the Oahe Unit does. We simply must come to grips with the larger problems of the loss of wetlands and the loss of private ownership and control of property. Stopping the Oahe Unit can in no way serve that purpose.

As for the condemnation of property needed for project facilities, I can easily sympathize with those who are directly affected and I agree with those who oppose it in principle. The interstate highway crosses my farm on a diagonal, and I did not exactly relish the thought as it was being constructed. The highway did go through my property though, and I guess I must admit that it has been in the public interest that it did. That does not mean that there may not be better alternatives to expensive condemnation proceedings to ensure the rights of the landowner, however. I recently requested and received a report from the Congressional Research Service in this regard and it speaks very favorably of the prospect of improvements in the current system which might be realized through the institution of an arbitration process. Such a process might prove to reduce the incidence of condemnation while providing landowners with a less involved and expensive means of protecting their interests. I will be happy to furnish a copy of the CRS document for your consideration.

The fact that impresses as we consider these so-called problems—whether it is wildlife habitat loss of tax base and private ownership wetlands, flooding, salinity, or whatever—is that they are not terminal problems. They can be dealt with and they will be if we just get down to working together to do so. Indeed, I know of no problem associated with the Oahe Unit which cannot be solved with cooperation.

The final issue I would like to discuss is the benefit/cost ratio. I have seen various benefit/cost ratios for the Oahe Unit ranging from 1.0 to 3.0. I know that the benefit/cost analysis procedures have been criticized for understating costs, but I want you to know there are probably just as many who criticize the benefit/cost analysis for under-

stating benefits. And why is it that of all federal expenditures only certain water development projects are subjected to benefit/cost analysis? Don't misunderstand, I think more federal programs should be subjected to such an analysis. What do you suppose it would do to regulatory decisions, such as FDA's impending ban on saccharin? Or OSHA or EPA regulations? The biggest water resource program of all is EPA's sewage treatment grant program. What do you suppose a benefit/cost analysis would do to this program? I would guess the President might have to call it an "economic waste" of even greater proportions than the 19 projects he proposes to terminate.

The point is that the benefit/cost ratio is instructive and is a necessary and useful tool, but it should not be used indiscriminately to terminate programs and projects which may involve other issues as well. As far as the Oahe Unit itself is concerned, South Dakota holds a mighty big debt owed by the Federal Government. The Oahe Unit can stand on its own; but, even if it could not, it is just a part of the compensation our state has coming for the sacrifices we have made.

In this regard, I am hereby requesting that the Oahe review team expand its investigations to include the Pollock-Herreid Unit, reauthorization of the Belle Fourche Project, the Lower James Conservancy Sub-District proposal, and expansion of the Oahe Unit to include capacity for additional canal-side irrigation. I am also asking that you communicate to the appropriate officials reviewing Army Corps of Engineer projects my request that their investigations be expanded to include the various pipelines which have been proposed in our state (such as the WEB, West River, Chamberlain to Sioux Falls, and Yankton to Sioux Falls pipelines), the proposed pumped-storage hydroelectric dam near Gregory, the proposed Little White River dam, and the urgently needed bank stabilization work required on the Missouri River.

South Dakotans are entitled to know the implications of this review for potential water resource developments throughout the State. The Oahe Unit is our biggest hope for putting our water resources to work, but it is certainly not our only concern in this respect. I trust I have made myself clear and that you will inform me and the citizens of South Dakota of the full implications of the President's policies for these projects as well as for the Oahe Unit.

As I mentioned earlier I have attempted without a great deal of success to obtain information from the White House on the specific criteria which led him to recommend no further funding for the Oahe Unit. I did receive a form letter response from the President, however. The same letter was sent to all members of Congress who expressed concern to the President over funding for water resource development, and in it the President attempted to justify his actions. I would like to read my response. (Letter Attached)

Frankly, gentlemen, as you may have guessed, I do not have high hopes for the outcome of this proceeding. Nevertheless, I welcome the opportunity to be pleasantly surprised. I urge you to recommend to Secretary Andrus and to the President in the strongest possible terms that the Oahe Unit be completed as expeditiously as possible and that it be expanded to include the Lower James proposal and additional canal-side irrigation.

The easy course for you will be to stand on the preconceived notions of the President and simply write the Oahe Unit off. I ask you to take the more difficult course in support of South Dakota's interests.

South Dakotans deserve your consideration in helping to make the Oahe Unit the very best project possible, and we will thank you for it.

Thank you.

MARCH 18, 1977.

Hon. JIMMY CARTER,
President of the United States,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Thank you very much for your extended reply, dated March 16th, to members of Congress who are concerned over your decision to delete funding for certain water projects. My concern, of course, is for the Oahe Unit in particular and the way this entire matter has been handled in general. I find unacceptable your logic that a project, such as the Oahe Unit, for which a commitment has been made many years ago can and should be stopped on the basis of new criteria that you personally and acting alone have determined to be more applicable at the present time.

Mr. President, where were you when 509,000 acres of South Dakota's prime Missouri River bottom lands were innundated to provide flood control and hydropower for other states? How can you now propose that the benefits our citizens were to receive be simply forgotten? I opposed construction of the high dams on the Missouri but we got them. It is unconscionable that the Oahe Unit and other water resource developments our state needs and wants might be forgone altogether after we have made the extreme sacrifices that we have in order to obtain them.

Senators Karl Mundt and Francis Case would turn over in their graves if they knew how you propose to treat the interests of the state they loved and toiled so long and hard to serve. Senators Mundt and Case have been joined in their support for irrigation development by every major official elected in South Dakota since 1944. The list of previous officials includes Governors Sharpe, Mickelson, Anderson, Foss, Herseth, Gubbrud, Boe, and Farrar; Senators Bushfield, Gurney, and Bottum; and Representatives Lovre, Reifel, Denholm, and Berry. Your proposal that no more funding be made available for the Oahe Unit makes a mockery of the trust they placed in the Federal Government when they supported, over many years and in innumerable instances, the Pick-Sloan Plan that placed the four huge dams on the Missouri River in South Dakota.

I cannot believe, Mr. President, that you, of all people, who have spoken so eloquently and sincerely of the trust you seek to be placed in you, can now betray the trust of these distinguished officials and the people of South Dakota. Surely, trust is not something which can be subjected to a cost benefit analysis. I can only assume that you were not in possession of this information when you concluded that the Oahe Unit should be terminated. With that thought in mind I renew my request of March 10th for the specific information provided to you by your staff upon which you based your decision. I sincerely hope that in the spirit of openness and cooperation which you have sought to cultivate you will honor this request.

More importantly, however, Mr. President, I hope you will honor the trust which demands that the Oahe Unit and other irrigation facilities be completed as expeditiously as possible and in a fashion which affords the maximum benefit to the people of South Dakota. Our people have invested too much of themselves—their past and their future—in the prospect of putting our precious Missouri River water resource to use to be denied by a "review process" which is at best haphazard and, at worst, smacks of an imperial Presidency.

Sincerely,

JAMES ABDNOR,
Member of Congress.

GREEN LIGHT FOR IMPACT AID IN 1978

HON. HERBERT E. HARRIS II

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. HARRIS. Mr. Speaker, I am pleased that the House Budget Committee yesterday approved the restoration of impact aid funds for the coming school year, giving the "Green light" to the Appropriations Committee to fund all parts of the program in fiscal year 1978.

I have been distressed by the reductions proposed in both the Ford and Carter 1978 impact aid budgets and over 100 Members of the House joined me in writing the Labor-HEW Appropriations Subcommittee on March 22 urging that they restore these cuts.

The impact aid program was created 27 years ago to compensate local school districts for the loss of local property tax revenues created by the presence of nontaxable Federal property. The program is as sound today as it was in 1950 and assists 4,300 school systems. Unlike most Federal education programs, these funds go into schools' general operating budgets and help pay bills, from heating bills to furniture repairs. With continued escalation of energy costs—especially on top of a most severe winter—these funds are particularly critical.

I have recently received letters from school officials from my State which discuss in a most compelling way the need for these funds now. I would especially like to point out that these school districts, like 95 percent of those receiving impact aid, are not immediately adjacent to the Nation's Capital and the school officials point out that the loss of impact aid will mean a significant increase in homeowners property taxes.

The letters—from New Kent, Fauquier, and Prince William Counties—follow:

NEW KENT, VA.,
March 23, 1977.

DEAR CONGRESSMAN HARRIS: This is a request to ask you to please urge the reinstatement of RSFI category "B" funds.

Any assistance you can give in getting this appropriation of 874 funds reinstated in President Carter's 1978 FY Budget will be greatly appreciated.

I am sure you are aware that any federal funds cut from the education budget must be reflected in increased county taxes.

Any loss of funds to this small county which is already experiencing growth from all sides would work an extreme hardship on the locality to meet contracted obligations. Even though this county is growing, much needed industry is not present.

I appreciate your efforts, and any assistance I can give you, I will be glad to oblige on behalf of the citizens of New Kent County.

Sincerely,

BURTON F. ALEXANDER, Jr.,
Superintendent.

WARRENTON, VA.,
March 14, 1977.

DEAR SIR: It is my understanding that at the present time the President's budget does not include funds for "B" category pupils under P. L. 874. If this category of pupils is not reinstated in the Federal Appropriations Act, Fauquier County will lose $149,519.00. This would be a significant loss of funds for

our school division and county, and would necessitate an increase in local property taxes to offset this reduction in Federal revenue which we have been receiving for many years.

It is my desire and recommendation that you support and work for reinstatement of these funds which will benefit the student in our school system and the general citizenry of Fauquier County.

Sincerely,

S. HAROLD LAMM,
Superintendent.

MANASSAS, VA.,
March 18, 1977.

DEAR MR. HARRIS: I am writing this letter to thank you for your continuing interest and efforts on behalf of the children of Prince William County. With the multitude and variety of problems confronting you each day, it is a comfort to know that you are keeping education foremost in your actions.

As you well know, one of the most serious problems to be resolved in the next few months is the full funding of the normal federal impact aid. The citizens of Prince William County will be hard hit by rising property taxes to support the school program. The loss of the impact aid will compound this problem as well as impair our present educational program. Therefore, I do request your help in maintaining the present level of impact aid funding. This is a vital and immediate concern to all citizens of Prince William County.

Again, as Chairman of the Prince William County School Board, I thank you for your past efforts on behalf of the young people of our county. Let me assure you that your services are deeply appreciated. I wish you continued success in this area.

Sincerely yours,

GEORGE P. MULLEN,
Chairman, Prince William County School Board.

THIRTY-SEVENTH ANNIVERSARY OF KATYN MASSACRE

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. DERWINSKI. Mr. Speaker, one of the most diabolical of Soviet Government crimes was the perpetration of the Katyn Forest massacre in which approximately 15,000 Polish Army officers were murdered by their Russian captors. The scene was the Katyn Forest area of the Ukraine.

It was one of the major war crimes committed during World War II for which no one was ever punished, and it was largely overlooked by President Franklin Roosevelt in order not to offend the Soviet Union.

On December 22, 1952, a Select Committee of the House, after a thorough investigation, made its final report. It formally accused the Soviet Government of the Katyn crime and asked the State Department to present the case to the United Nations. However, although since that time there has been occasional discussion of the event, the committee's groundwork has never been effectively implemented.

The Katyn massacre was, and remains, a classic example of the untrustworthiness of the Communists. It is especially important that we ponder the historic lesson of the Katyn massacre at a time there is much discussion over the fact that the Soviet Union is not abiding by the Helsinki accords. History also demonstrates that until a legitimate government is restored to Poland the victims of the Katyn massacre and the thousands of other Polish troops who gave their lives for freedom during World War II will have died in vain.

We trust that history will someday prove that through the virtue of a legitimate nationalism rather than duplicity of communism, Poland will one day be a free rather than captive nation.

WARREN HYDE, CITY MANAGER, EDINA, MINN., RETIRES

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. FRENZEL. Mr. Speaker, the city manager of Edina, Minn., a community in my district is retiring after more than two decades in that job. Warren Hyde has been the senior statesman and unofficial guru among municipal officials in the Twin Cities area for many years, certainly through all of my political career. In addition to managing his own community well, he has served on numerous boards and commissions within the State of Minnesota, and shared his experience and expertise generously. His wise counsel and good advice have always been available to any other public official, who was smart enough to ask it of him.

One of the reasons Warren Hyde has been a great city manager is that he has a good sense of humor. The following article written by Jim Klobuchar of the Minneapolis Star and printed on March 25, is illustrative of that quality.

Whatever Warren chooses to do in his retirement will be well done. He leaves his Edina post with the thanks and best wishes of not only the citizens of that town but of the many people throughout the State of Minnesota who have benefited from his good work and thoughtful counsel. The article follows:

WARREN HYDE RETIRES

Where does one go to find a new city manager for Edina?

The employment agencies admit their inadequacies. Shangri-la is not promising as a recruiting source. It offers the requisite atmosphere of bliss but is dominated by elderly sages, a category in which Edina currently is operating at full strength.

As a result it is pressing a search for youthful sages who would embody those qualities the outgoing city manager believes are minimal requirements for the job. These include administrative brilliance, prohphetic powers and the diplomacy of English ambassadors. He should have a gentle tolerance of perfection around him and the ability to teach a squirt defenseman to take the body without drawing a minute and a half for cross-checking.

The retiring city manager, Warren Hyde, acknowledges he has not achieved his full growth potential in his 22 years' stewardship. "I don't handle defensemen very well," he told me.

It is an admission rarely made in Edina, a land of such earnest achievement and civility it seems to be afloat in space, located by astronomers rather than platted by surveyors.

I really don't know where Edina is going to find a replacement for Warren Hyde. Oz? Over the rainbow?

"The guy who runs Oz," Hyde observed, "is tyrannical, inclined to throw tantrums and doesn't approve of citizen input. He would be fired inside of a month in Edina."

In any index of city potentates I have known, Hyde's name leads all the rest in the not-insignificant categories of competence, a certain self-deflating grace that should be demanded of all competent city administrators, and in his willingness to share his wisdom with the less-gifted, such as newspaper columnists.

Bear in mind that when Hyde took the job as city manager, Edina was a place of dairy farms and dirt roads, interrupted here and there by a brokerage office.

Horse shows were bigger than style shows and luaus. It is a condition almost impossible to vizualize at this distance. Hyde himself can recall the days when there were Edina residents with two-horse stables, the first badge of status in the community.

"I just don't know a soul qualified to handle your job," I conceded to my old friend. "I can think of people who are wise, efficient, discrete, sensitive and forward-thinking. But I can think of nobody who has all of these qualities and can still watch a hockey game while reading a newspaper."

Warren Hyde lifted a genteel although grieving eyebrow. "How sad that outsiders would get the impression there was low-brow behavior and spite involving fans at an Edina East-Edina West hockey game," he said. "Nothing could be further from the truth. It was simply a sportive act, that business of the Edina East fans reading newspapers while the West team was introduced."

"And all of the outraged letters to the editor that followed?" I asked. "These were also sportive?"

"Certainly. Either that or they were written by fans from the Iron Range, where they are more familiar with strife than we are here in Edina."

"As a matter of fact," Warren Hyde said, "you should have seen the outpouring of civic solidarity when the Edina East team returned to Edina after finishing runnerup in the state tournament. It was beautiful."

"Did the banners read 'We Try Harder'?" I asked.

"Not at all. We have civic celebrations all the time. The last big one was when the per capita census came out in 1970."

I need hardly tell you the 1970 census showed Edina topping the nation in per capita income. Special editions were published, bells rung. Snake dances formed spontaneously in the streets. The ticker tape fell two minutes behind reporting the news. Above 50th and France banners declared tastefully, "We're No. $1."

"It was," Warren Hyde conceded, smiling, "our Super Bowl."

I asked if he plans to play golf in his retirement, possibly at Interlachen in Edina?

"I would," he said, "but at $43,000 a year I don't think I can afford it."

HEW SHOULD MAKE RESTITUTION FOR ERRORS IN MEDICARE REPORT

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. RUDD. Mr. Speaker, the American people have been deceived again. Re-

cent nationally publicized reports told us that 400 doctors received at least $100,000 each in medicare payments in 1975. These stories, prominently featured on the front pages of newspapers across the Nation, were based on an erroneous report issued by the Department of Health, Education, and Welfare.

HEW listed as recipients of Federal medicare funds such anomalies as a pediatrician who had been retired for 12 years, several other doctors who had retired long before the payments were supposedly made, and the Detroit General Hospital which was listed under the heading of "Physicians in Solo Practice."

The day after these astounding reports appeared, many of those same newspapers published stories—much less prominently featured—which stated that an anonymous spokesman for HEW had acknowledged that the original report issued by the Department was highly inaccurate.

Both the press and HEW have carefully, and quietly, closed the barn door after the horses have departed.

Today I have sent a letter to Secretary Joseph A. Califano of the Department of Health, Education, and Welfare, asking that he take full responsibility for the sloppy, erroneous work done by his Department. I have further asked that he publicly apologize to those doctors whose integrity has been questioned, if not totally besmirched, by the report, and what corrective action is being taken to prevent such massive inaccuracy in future official Government reports.

One or two errors in a report of this kind would not have required such action on my part, although I believe all Government agencies have allowed this probability of a small error rate to escalate beyond acceptable proportions. It has been estimated that the HEW report may be wrong in as many as half of the 409 instances where doctors were named.

I believe that the American people deserve much better from their tax-supported Government agencies. At least, Mr. Speaker, they deserve the truth.

Following is my letter to Secretary Califano:

HOUSE OF REPRESENTATIVES,
Washington, D.C., March 30, 1977.

Hon. JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare, Washington, D.C.

DEAR SECRETARY CALIFANO: A recently publicized report by your Department indicated that approximately 400 doctors had each received $100,000 or more from Medicare payments in 1975. News accounts based on the HEW report were prominently carried in newspapers across the nation, including my own State of Arizona.

On March 16, one day after the initial stories appeared and buried in many of those same newspapers, stories appeared about errors in the HEW report which discounted much of what had appeared the day before. The stories went on to say that the "government has started compiling a list of corrections to its directory of physicians, groups, clinics and laboratories receiving Medicare payments in 1975. . . ."

My purpose in writing, Mr. Secretary, is to ask that you and HEW publicly make every conceivable effort to undo the immense damage which was done by the adverse publicity given to the erroneous reports. I sincerely believe that it is incumbent upon you to bring forth the truth of this situation, and to make a public apology to those doctors whose good reputations and integrity were besmirched by the original, inaccurate report.

I would also appreciate knowing what procedures you are instituting to prevent similar errors in future official government reports issued by the Department of Health, Education and Welfare.

Sincerely,

ELDON RUDD,
Member of Congress.

THE FDA AND THE SACCHARIN BAN

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. OTTINGER. Mr. Speaker, as a member of the House Commerce Committee's Subcommittee on Health and the Environment, which held 2 days of oversight hearings on the recently announced FDA ban on saccharin, I am distressed at the amount of misinformation that is being circulated on this subject.

Perhaps the greatest concern is about the ridiculing of the reality of the cancer threat from carcinogens in our food and the testing required for ascertaining carcinogenity. Statistics show that one out of every five Americans will contract some form of cancer. More than 350,000 people will die of the disease in this country this year. All scientific evidence indicates that this cancer epidemic is due to environmental causes—carcinogens in our food, water, and air.

The Canadian tests which led to the U.S. ban were conducted according to well established and accepted scientific techniques. Testing in animals using large doses is a valid and the only practiced way of determining carcinogenicity. To make valid tests at quantities normally ingested by humans would have reqired testing on 3 million rats. The data that these tests yield are very significant for human beings consuming saccharin in reasonable amounts. Yet the FDA has been ridiculed by the press and industry, ignoring the scientific basis for the agency's decision. I am sure the outcry would be just as strong, or perhaps even stronger, if the Government did not take action to protect Americans from environmental and chemical causes of cancer.

On Sunday, March 20, there was a very good article in the New York Times which helps to explain in a clear and concise manner the reasons why FDA concluded that a ban on saccharin is warranted at this time, which I am inserting for the benefit of those who may wish to learn more about the nature of the testing that led to the ban and the reasons why these tests relate so strongly to the human population. I hope that this material will help to dispel some of the myths that are being spread by well-intentioned persons who simply have not looked at this issue from the scientific point of view.

Two points about the Canadian tests are particularly significant. The first is that they rule out the presence of an impurity in saccharin known as OTS—orthotoluensulfonamide—as the cause of the malignant tumors produced in the animals used. The FDA did not ban saccharin on the basis of a dozen previous tests indicating carcinogenicity because of uncertainty whether it was the OTS impurity that was causing the cancer. The second is that the incidence of malignant tumors in the offspring of the test animals—rats that were exposed in utero to saccharin—was significantly higher than in the parent animals. Tests performed in the United States in 1971 and 1973 which showed similar results, but where OTS was not ruled out as the actual carcinogen, may now become significant because they tend to back up the theory that the fetus is highly susceptible to carcinogenic substances. This immediately brings to mind the tragic case of DES, where the daughters of women who took the drug were those who suffered the consequences.

Mr. Speaker, I hope that many Americans will take the time to review the background of FDA's decision and recognize the very real threat that saccharin may pose to health. Since cancer is an irreversible disease, prevention becomes the only effective attack of the disease. I hope that we will not act hastily to impede the war on cancer by actions to hinder FDA's ability to remove from the market products that show strong evidence of being carcinogenic, particularly when the risks so outweigh the benefits. It does seem that a gradual phaseout of products like saccharin might be provided for because the threat to public health does not seem critical and it would give the public time to adjust their diets and allow the FDA and industry time to get substitutes on the market. For those who medically require it, saccharin can then be approved as a drug.

I commend Charles Wurster's article to the attention of my colleagues and the public:

[From the New York Times, Mar. 20, 1977]

FOR THE SACCHARIN BAN

(By Charles F. Wurster)

STONY BROOK, N.Y.—If society is to make progress in preventing cancer, then the Food and Drug Administration should be commended, not condemned, for banning saccharin.

Yet the F.D.A. has been attacked by allegations that the ban is unscientific, emotional, absurd and an irrational overreaction. It is none of these. Criticism approaching hysteria has been directed not at the hazard of cancer but at those who would protect us from it, and even at the law they upheld.

The assertion that saccharin has been safely used for decades without harm to humans is misleading. Although we know that most cancers are caused by environmental factors, we can identify only a small number of human carcinogens (cancer-causing substances). The exact cause of the overwhelming majority of cancers remains unknown.

Tumors do not come with labels naming the chemical that initiated carcinogenesis (cancer development) decades ago. More than 350,000 people die of cancer in this country annually. Saccharin could be causing thousands of cancers, yet we have no way of knowing it.

Chemicals cannot be tested for cancer-causing potential in human subjects. Such tests would require many thousands of people and take up to 40 years, followed by sacrifice, dissection and a search for tumors. With other carcinogens in the environment and cancer already present in our test group, this absurd, morally offensive and uncontrolled experiment would yield results difficult or impossible to interpret. Laboratory animals, usually mice or rats, are normally substituted for people. They yield meaningful results proved highly relevant to the human experience.

In the human population, very large numbers of people are exposed to low doses of chemicals, but the impact of seemingly low doses of a carcinogen may not be low at all. Exposure of 200 million Americans to doses that cause one cancer in every 10,000 people, for example, would result in 20,000 cancers—clearly a public-health disaster.

To detect the effect of low doses of a chemical that causes one tumor in every 10,000 exposed rats would require using hundreds of thousands of rats. Such vast experiments would be unwieldy and prohibitively expensive. But a dose 5,000 times higher is likely to cause cancer in about 5,000 of every 10,000 rats, or 50 percent of them. Administration of high dosages permits the cancer-causing effect to be readily apparent in a practical, manageable number of animals (30 to 50). The technique is routinely used in carcinogenesis tests.

Statements that humans would need to drink 800 diet soft drinks or chew 6,700 wads of bubble gum daily to equal the saccharin dosage received by the rats are interesting anecdotes, but are totally irrelevant and without scientific credence.

Furthermore, the argument that anything can cause cancer if given in large enough doses is false. High doses of normally safe chemicals may be toxic, but they will not cause tumors. Relatively few chemicals cause cancer, even when fed at the highest possible doses.

We also hear that small amounts of a chemical are safe for man, even though large doses cause cancer in animals. There is not a shred of evidence for this argument. No safe threshold has been identified for any cancer-causing chemical. Furthermore, man may be hundreds of times more or less sensitive than rats or mice. It is therefore invalid to argue from animal data that the risk to man is small, it may be just the opposite. The price of this invalid extrapolation could be thousands of lives.

Cancer causation by a chemical at *any* dosage in laboratory animals is a warning of hazard to man. The absence of cancer in another strain or species does not prove the chemical safe; positive evidence is not nullified by negative evidence. A test of saccharin yielding no cancer in monkeys does not eliminate the danger to man indicated by cancer in rats.

We ignore cancer-causation in animals at our peril. The Delaney amendment to the Food, Drug and Cosmetic Act in 1958 (named for Representative James J. Delaney of Queens) recognizes this fact, and is an essential law for our protection. The amendment states that the F.D.A. must bar from the market any food additive found to cause cancer in human or animal. It wisely allows no human discretion based on dosage in administering the Act, since there is no valid scientific basis for such discretion.

We should support the F.D.A. when it upholds this law—in banning saccharin, it invoked the Delaney clause because the artificial sweetener had been found to cause malignant bladder tumors in laboratory animals.

It would be a tragedy if an uninformed public outcry against the saccharin ban were to sweep away the Delaney clause.

TV, RADIO, CRIME NEWS

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. COLLINS of Texas. Mr. Speaker, today I am introducing a bill that would amend the Communications Act of 1934 to permit the FCC to deny renewal of any radio or television broadcast license if the licensee had broadcast information regarding certain crimes in a manner which impeded law enforcement efforts.

On Wednesday, March 9, 12 Hanafi Muslims held 134 hostages in three buildings in Washington, D.C. In the course of the 39-hour siege, 1 man was killed, 19 others shot, stabbed, or beaten, and numerous others roughed up and terrorized. The lives of these innocent individuals clearly hung on a thread, and the situation was explosive given the desperate nature of the crime and the motive of blood vengeance expressed by the leader of the group, Hamaas Abdul Khaalis.

Mr. Speaker, I believe it must be said that the members of our national press corps and media, while naturally capitalizing on the spectacular nature of the crime, in general conducted themselves with discretion and a continuing sense of their responsibility not to further inflame the situation. The proof of this, of course, lies in the outcome: All of the hostages were released, no one was killed after the initial takeover of the D.C. Building, and there was no shoot-out.

However, it has come to my attention that there were cases of media intervention that might very well have triggered a tragic outcome for the innocent victims. There were cases of interviews with Khaalis, the Hanafi leader, during which the terrorist became increasingly agitated and menacing toward his victims. There were also incidents during the ongoing radio coverage where journalists actually exposed the maneuverings of the police, broadcasting where the police were locating themselves in surrounding buildings, and so forth. Mr. Speaker, those terrorists had radios with them, I need not emphasize the irresponsibility of news tips by reporters to terrorists regarding the strategic movements of the police.

It does not seem to me, Mr. Speaker, that there is any question of censorship at issue in this case, any more than in the case of yelling "Fire!" in a crowded theater. We had a crisis situation here where one careless word could have cost hundreds of lives. I believe that my bill, if adopted, will simply serve to keep the media actively aware of the heavy moral and social responsibility that accompanies its privilege of information. It will assure the generally high level of performance in the media which we witnessed during the siege here in Washington 3 weeks ago.

HOW MINORITY GOP BEAT LABOR'S BILL

HON. DEL CLAWSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. DEL CLAWSON. Mr. Speaker, in today's issue of the Washington Post, March 30, one of the paper's outstanding Capitol Hill writers, Mary Russell, has written a most provocative and down-to-Earth article concerning our colleague and minority whip, BOB MICHEL. BOB is recognized on both sides of the aisle as a most effective leader and whip and on a number of occasions these past few years his ability and accomplishments as Republican whip has been proven. I include herewith Mary Russell's article so that it might have the attention of my colleagues and all who may peruse this RECORD:

HOW MINORITY GOP BEAT LABOR'S BILL

(By Mary Russell)

In the defeat of the common site picketing bill in the House last week, House Republicans feel they have found a combination of ingredients to cure what ails them.

What ails them is a sheer deficiency in numbers. With 289 Democrats, 114 Republicans and two vacancies in the House, Republicans have had little hope of thwarting the huge Democratic majority. They faced a frustrating session, where they could criticize but were not much of a factor to be reckoned with.

"You just get so darned frustrated, you sometimes wonder whether it's worth getting up in the morning," said Republican Whip Robert H. Michel of Illinois.

An aide, Mike Johnson, chimed in: "It's like being a Maytag repair man. All you can do is sit around and wait for the Democrats to break down."

With the top-heavy Democratic margin in Congress and a Democrat in the White House, in most cases Republicans will still be overwhelmed.

But in the defeat of the bill that labor was counting on as a showcase of its strength in this Congress, Republicans not only slowed down the majority steamroller, but found a mix of outside help and inside coalitions that may allow them to win again. Those factors were:

A strong united lobbying effort that involved not only the special interests directly affected by the bill—contractors, home builders and construction suppliers—but large industries, such as Pittsburgh Plate Glass and Dow Chemical, and the three biggest business lobbying organizations, the Chamber of Commerce, the National Association of Manufacturers, and Business Roundtable, comprising the largest corporations in the country.

A method of lobbying that not only used powerful Washington lobbyists but generated a grass-roots campaign that brought more mail to Capitol Hill "than at any time since the Vietnam war," as House Speaker Thomas P. (Tip) O'Neill said.

One element of the drive was the House Republican Campaign Committee's mailing to 300,000 election contributors. They were asked to write Democratic leaders saying stop the bill, and to contribute to the Republican cause to stop any future legislation like common situs, which would have allowed a building trade union to shut down an entire construction site although its grievance was with only one subcontractor.

But the most important and effective part of the grass-roots campaign came from the Association of General Contractors. Its members were given postcards urging defeat of the bill, to be distributed with union employees' paychecks and then collected and mailed by supervisors. The result: While national union leaders were lobbying for the bill on the Hill, House members were getting mail from rank and file members of construction trade locals in their districts urging them to vote against it.

The heavy lobbying effort enabled the Republican Whip organization, temporarily at least, to revive the Southern Democrat-Republican coalition that had existed in Congress during the '50s and until the late '60s. Every Democrat from Alabama, Arkansas, Georgia, Mississippi and North Carolina voted against the bill.

Republican Whip Michel, a somewhat portly, silver haired nuts and bolts legislator from Peoria, whose job it is to count noses on important pieces of legislation, does not take credit for the win.

He admits, "Had I been asked about this in the first part of January, I would have responded that there was no way we could win this one."

Michel had his doubts because a common site bill had passed the House in 1975 with only 178 votes against it. At the time, President Ford had been giving indications of signing a bill if passed, and the bill was strongly supported by his Secretary of Labor, John T. Dunlop. Ford decided after the bill pased to veto it, Dunlop resigned in protest and Congres did not try to override the veto.

The Republican leadership, which had lost two more seats in the 1976 elections, "weren't overly enthusiastic" about trying to defeat the bill, said Clarence Randall, chief lobbyist for the Associated Builders and Contractors. However, his group began working hard "the day after the election" and by February, when they could show Republican leaders that "the right grid" was coming together, the GOP chiefs buckled down.

Michel does take credit for preaching to the contractors and business lobbies the two important ingredients of legslative vote-getting.

He flew to San Francisco to advise a convention of "political action" groups of the Association of General Contractors on how to put together a grass-roots campaign.

"I told them they didn't need thousands of letters. So often when a member says 'my mail has been so heavy on that' he's talking about a dozen letters from key people in his district." If they could get the rank and file union members to write, that would be best of all.

Last Tuesday morning Michel addressed a joint meeting of lobbyists for the Chamber of Commerce, the National Association of Manufacturers and the Business Roundtable at the Chamber building.

It was not a gentle speech. Michel gave them hell. The one-third minority would never be effective without substantial outside lobbying support, he warned, and he blasted business lobbies for not hanging together the way labor unions do.

An industry only lobbies for its own narrow interest, he said; beyond that, it tends to walk away because it is not "prudent" to get involved in political causes.

"Insofar as helping friends and punishing enemies is concerned, labor unions make the business community look like a bunch of kindergartners," Michel said. "You don't see organized labor running three ways from Sunday when one of their issues reaches Congress. Labor is organized, well-organized, united and committed to one approach".

He warned the business groups that there would be amendments to insulate the home builders from the picketing provisions. "But I would hope the home builders would not get suckered into this one, for that would simply gut our efforts and guarantee the legislation's passage. You've either got to stand united on the principles upon which we oppose the legislation, period, or you're going to lose everything in the process."

Such amendments were offered and adopted, and for a while it appeared the weaker bill would be accepted. But the home builders did not desert, and in the end the bill lost, 217–205.

Michel does not believe that the prescription will work all the time, or that the Republican-Southern Democrat coalition is permanently back together, or that all future labor-backed legislation is in jeopardy. He thinks common situs was a bad bill that would have caused inflation, raised expenses for an already depressed industry, and cost jobs.

"But it won't be the only time we'll play the game," Michel said. "If another issue comes along that lends itself to such widespread support, we'll try again. Labor probably learned something, but so did we, and hopefully so did our business supporters. We all learned the name of the game is votes."

CARTER'S ELECTION REFORMS

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. FRENZEL. Mr. Speaker, in the hope that there would be some interest in what a prominent Minnesota daily thinks about the Carter election proposal which would impose the so-called Minnesota system on all States, I am inserting in the RECORD, an editorial from the Minneapolis Star of March 24.

The editorial indicates that same-day voter registration in Minnesota "does seem to have increased voter participation. But it has done so to the accompaniment of complaints that the privilege is an open invitation to abuse and fraud."

The editorial's concluding sentence on voting day registration is as follows:

We'd rather there was firmer proof that same-day registration's potential for mischief is minimal or non-existent before it is applied nationwide.

The editorial follows:

CARTER'S ELECTION REFORMS

When Vice-President Walter Mondale presented the Carter administration's package of proposed federal election reforms he called the need for one of them—same-day voter registration—"compelling and overwhelming." We'd have applied his words instead to another element of the package, a constitutional amendment to eliminate the electoral college.

That, we believe, would remove a clear and ever-present threat to the basic working of American democracy. We're not sure anymore, on the other hand, that letting people register to vote on the same day they cast their ballots might not itself pose such a threat.

Here in Mondale's home state, same-day registration does seem to have increased voter participation, which is one of the laudable objectives of the Carter reform package. But it has done so to the accompaniment of complaints that the privilege is an open invitation to abuse and fraud.

There is no solid evidence of that so far in Minnesota, at least beyond occasional mistakes, such as voters registering in the wrong precinct or election judges accepting questionable proof of residence. But that may be because the program has been rather loosely monitored, usually by mailing non-forwardable postcards to registrants in an attempt to confirm that they do indeed exist and do live where they said they did.

We'd rather that there was firmer proof that same-day registration's potential for mischief is minimal or nonexistent before it is applied nationwide.

The nation may not dare wait, however, for more proof of the mischief that could be done by the electoral college. Twice already in American history, in 1876 and 1888, the college has reversed the popular vote for president. There were no disastrous repercussions, but those were calmer times than we may have when it happens again—as sooner or later it must unless the Constitution is changed in the meantime to get the unneeded electoral college out from between the American people and their presidential choice.

AGAINST STEEL-JAW TRAPS

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. LONG of Maryland. Mr. Speaker, with trepidation I reopen the debate on steel-jaw traps in this Congress. I know that the discussion will be distorted. Emotions will overflow, and I may be accused of being antisportsman, even pro-rabies.

In fact, my bill to ban the steel-jaw trap, H.R. 3516, is not anti-anybody. It would not outlaw trapping; it would simply assure that trapping be humane. Other countries have dispensed with the steel-jaw trap and still have strong trapping industries. Norway is one.

Why should we outlaw steel-jaw traps if we do not wish to stop trapping?

First; it is the humane thing to do. Humaneness is the quality of sympathy for other living things. It is that simple. We either have it or we don't. If we have it we will try to minimize the sufferings of other living things. Steel-jaw traps do not minimize the pain suffered by trapped animals. By holding animals in steel-jaw traps until they either die of shock and exposure or are clubbed to death, these traps cause great suffering. We can and should attempt to do the humane thing. That means banning the steel-jaw trap.

Second is the waste of life of pets and nonfurbearing wildlife. Cats and dogs wind up in the traps. Owls and eagles are put on endangered species lists and then allowed to be caught in indiscriminate trapping devices. It does not make sense.

Third is the impact of this particular method of trapping on the young people who make up a large proportion of those who do trap. If an animal has not already died of exposure in one of these traps, the trapper must club or stomp the animal to death, since shooting it would ruin the pelt. I would rather our children did not learn about nature this way. It is wonderful for young people to spend time in the fields and forests, but let them spend their time in more humane ways.

For these reasons, and because I do not feel that my bill would seriously hurt

the industry in the long run, I will press for action to ban the steel-jaw trap this session. Congressman VAN DEERLIN of California and I, shall be asking for support for an outright ban of these devices in the coming weeks.

A PERSONAL EXPLANATION

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. DORNAN. Mr. Speaker, unfortunately, I was unable to attend the Monday and Tuesday sessions of the House of Representatives this week. Because of this, I would like to take this opportunity to clarify the RECORD as to my position on the legislation which was considered on those days.

If I had been present on Monday, March 28, I would have voted "nay" to the establishment of a Select Committee on Congressional Operations. It is my belief—based on my limited experience—that the Congress does, indeed, need to improve its operations, but I do not believe that this committee is the way to do it. The resolution which establishes this select committee effectively prevents the committee from doing anything worthwhile. The select committee does not have legislative jurisdiction and is prohibited from making any recommendations with respect to the "rules, parliamentary procedure, practices, or precedents of the House or the consideration of any matter on the floor of the House." That does not leave much for it to do. I believe that it would be a waste of the valuable time of those Congressmen appointed to it. It would also be a waste of many thousands of the taxpayers' dollars. It costs a lot to do nothing on Capitol Hill.

On Tuesday, March 29, I would have supported H.R. 3416, the amendment of the Agriculture Adjustment Act of 1938. This amendment would successfully curtail certain tobacco speculation which drives up the cost of the true tobacco farmer and would place no additional burden on the Federal Treasury.

I would not have supported the extension of the CETA program under suspension of the rules. The Congressional Budget Office, estimates that the "mere extension" would cost $8.3 billion in fiscal year 1978 including a carryover from the previous year. The program would also cost an additional $2.25 billion in fiscal year 1979. This is an $11 billion authorization and should not have been considered under a suspension of the rules. Regardless of the worth of the CETA program, an authorization of this magnitude should be open for amendment and for full debate.

My support would have been given to the mandatory rabbit meat inspection legislation, H.R. 2421. I firmly believe that the Federal Government has the right to inspect foreign meat imports for purity and that the domestic rabbit meat producers welcome USDA inspection.

I would not have supported the House Joint Resolution which makes further continuing appropriations for fiscal year 1977. Although proponents of this legislation have stated that it is necessary in order to allow the Secretary of the Treasury to make the next general revenue sharing payments to some 39,000 State and local governments, I cannot support it.

Mr. Speaker, there is simply not any revenue in the Treasury to share with anybody. At least not as long as our national debt stands close to $800 billion. I believe that the Federal Government should balance its budget and live within its means. If it were to do so, it could withdraw from the private money market where it has all but driven out localities which wish to fund their local public works. Localities would once again be able to fund their own programs free from the heavy hand of the Federal Government.

On Tuesday, I would have also voted to amend the Government Reorganization Act to require the House and Senate to pass approval resolutions for reorganization plans. I believe that by the rejection of this amendment the House of Representatives has surrendered some of its power to reorganize and that it may, in the future, have undesirable effects on the broad objectives of our legislation. The House has in effect, voted to allow the executive branch of the Government to accrue more power than it already possesses.

I would have voted against the passage of the Government Reorganization Act for the same reasons.

CONGRATULATIONS TO THE BETTER BUSINESS BUREAU

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. ANDERSON of Illinois. Mr. Speaker, I would like this opportunity to congratulate the Better Business Bureau of Metropolitan Chicago, Inc. on its 50th anniversary of continuous dedicated public service.

This remarkable organization, originally founded by a small group of concerned businessmen, has grown to include more than 2,000 firms for the purpose of assisting legitimate business and responsible consumers in their day-to-day transactions.

Throughout its 50 years of existence, the bureau has conscientiously provided the business community with a means of self-regulation to restore confidence in the marketplace and the free enterprise system. It has done this by developing sound standards for ethical business practices and competition in advertising, selling, investments, and fund raising. These standards have been wisely developed in cooperation with metropolitan media, industries, and trades, and have been implemented through impartial investigations and corrective action. In its evaluation of advertising for example, it has insisted that it be truthful, believable, and factual, and has alerted the proper Government agency responsible for law enforcement when illegal acts or fraud are committed in the marketplace.

Undeniably, the consumer and the free enterprise system have greatly profited from the bureau's timely exposure of questionable, unfair, and deceptive practices and from its role in curtailing frauds. On behalf of citizens of the Chicago area, I would like to thank the Better Business Bureau of Metropolitan Chicago, Inc. for its 50 years of service and wish it well in all future endeavors.

PUERTO RICO'S GOVERNOR BARCELO IS LEADING HIS COUNTRY TO PROSPERITY BY REDUCING TAX RATES

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. KEMP. Mr. Speaker, I am particularly interested in the progressive economic policy being pursued by Gov. Romero Barcelo of Puerto Rico, whose New Progressive Party recently displaced the incumbent Popular Democratic Party after 30 years of rule.

The previous administration of Gov. Hernandez Colon had attempted to fight the island's unemployment problem with huge deficit-spending programs; financing such programs through the Eurodollar market, and raising taxes. And the result—predictably—was a fiscal crisis.

The Barcelo administration, by contrast, has embarked upon a program of tax reduction. As secretary of the treasury Perez recently remarked, we can raise revenues by restoring prosperity.

I believe that this is a very sound policy and I think that the United States would do well to examine more closely the strategy is being implemented in Puerto Rico. Governor Barcelo is eliminating the 5-percent excise tax; increasing the personal income tax exemption; and doubling the exemption limits on interest from savings, from $500 to $1,000.

What I find most exciting, however, is the conviction that these tax reductions will lead to an increase in tax revenues. Governor Barcelo believes that this will result from an expansion of the tax base caused by the incentives to increasing production that result from tax reductions.

I have spoken about this same phenomenon many times. During the 1920's a tax rate reduction proposed by Treasury Secretary Andrew Mellon led to an increase in tax revenues and a reduction of unemployment and inflation again, following the tax rate cuts initiated by President Kennedy in the early 1960's, revenues went up again with the same affects on unemployment and inflation.

As Governor Barcelo's strategy succeeds, I think that this will be very powerful evidence that the elimination of disincentives from high tax rates is the best way for third world countries to

achieve balanced economic growth without inflation, as we all desire for the United States as well.

ARMY TESTING—THE PEOPLE'S RIGHT TO KNOW

HON. DAN QUAYLE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. QUAYLE. Mr. Speaker, I am a supporter of a strong national defense and recognize the importance of research in protecting both civilian and military populations of our country. It is difficult, however, to understand the reluctance of the Defense Establishment, and the Department of Army, in particular, to be forthright with the people in regard to germ warfare testing that occurred in a number of urban and rural areas of our country in the 1960's.

Fort Wayne, Ind., which is in my congressional district, was one of the cities where the Traveler's Research Corp. conducted such tests for the Army under a $640,000 contract between 1964 and 1966.

What is especially alarming to me is that the people did not know the real purpose of these tests—and the Army was not publicly identified at the time with the tests.

I have written the Secretary of the Army requesting a policy statement regarding such testing involving civilian population at the present time. At the same time, I want to know the rationalization for veiling such tests in secrecy during the 1960's.

The people have a right to know when their Government is involved in tests which inject into the environment chemicals of any kind.

Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include an excellent editorial aired by WPTA–TV, channel 21, in Fort Wayne on this subject. The editorial follows:

ARMY TESTING

Reports began to surface last year that the military had been doing testing of some chemical and biological agents on the American public . . . and the public never knew about it.

At a Congressional hearing this past Tuesday, Army officials admitted that for more than a 10 year period, they had been occasionally putting active agents into the air in crowded public places, bus stations and subways and the like. Some became ill and the family of one man thinks that his death is linked to the secret tests.

Also this week, the military admitted they secretly tested chemicals on the population of the Fort Wayne Area back in the 60's. They would not specify exactly where the agents were dispersed, nor what were the results of those tests. They claim it's a matter of national security.

That may be so, but what we're asking is . . . what about our personal security? It is absolutely devastating to find out that we or our friends and neighbors were the unwitting guinea pigs in the outdoor laboratory of some government scientists.

What right does anyone have to experiment on numbers of people without their permission. It sort of reminds us in a way of Nazi Germany and of the so-called Doctors who performed ghastly experiments on concentration camp prisoners in World War II.

We feel that the whole program is a national disgrace, that we must get a full accounting by those responsible, and public guarantees that the program is no longer going on nor will it be revived.

We've got to know all the facts on this one. Because if we don't, then how can we be sure, despite claims to the contrary, that secret testing is not going on right now, by an elusive group of scientists poisoning us in the name of saving the country.

That's as we see it. What do you think?

MINING LAW REFORM

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. UDALL. Mr. Speaker, today I am introducing the mining law of 1977. This is a measure designed to repeal the antiquated mining law of 1872 and replace it with a rational leasing system for the development of minerals on the public domain. I invite my colleagues to join me in cosponsorship.

The mining law of 1872 has been on the books for 105 years and it is showing its age. The old mining law was enacted in a period when Western expansion was a national goal, when we believed our resources were unlimited, and when the long-term impacts of environmental disruptions were little understood. For many decades the 1872 mining law served us well, but this is 1977 and we need a new law.

For my colleagues who may not be familiar with the old mining law, let me briefly describe it. For the uninitiated, this description may be somewhat shocking.

Unlike other federally owned mineral resources, hard rock minerals on the public domain are not subject to a leasing system that assures appropriate payment to the United States; nor does the Secretary of Interior have very much to say about what areas will be explored or developed. Based on common practice in the mining camps of the Old West, the mining law simply provides that anyone may go onto the public domain open to the operation of the mining law, stake a claim and if he finds minerals of marketable value, he is free to dig them up. He is entitled to a patent—total ownership of the land forever. There are no statutory environmental controls, there are no provisions for competitive bidding, and there are no requirements for direct payment to the Treasury.

Mr. Speaker, such valuable Federal resources as coal, oil, and gas are subject to leasing systems and those systems work well. My bill would impose a similar leasing system on hard rock minerals on the public domain. In addition, environmental protection would be achieved through general reclamation requirements drafted for appropriate application to hard rock minerals.

Of course, the old law was based on some concepts that are valid today and I am working with leaders of the mining industry to draft a bill that will recognize these interests.

For example, the old law allowed access to the public land so that the prospector could explore for minerals. In my bill, any person is still free to prospect provided he has received a general prospecting license—which is not subject to a fee—an dhas given notice describing the prospecting areas. Such information is to be held confidential by the Department of the Interior. If there is to be "significant disturbance of the environment," an exploration permit may be obtained and the lessee will be required to obtain approval of a plan describing how the area will be reclaimed under the act's requirements.

Another concept of the old law that makes sense is that mineral development should be encouraged. The 1872 law achieves this by giving the prospector the right to extract what he finds. Unfortunately, the 1872 law goes too far as it entitles the discoverer of valuable minerals not only to take the minerals free of charge but to the full ownership of the land under a patent. Such a system is no longer tolerable.

Under my bill, upon discovery of minerals in paying quantities the holder of an exploration lease is entitled to a development and production lease. Actual extraction will be conducted pursuant to an approved reclamation plan.

Mr. Speaker, the bill contains a number of other features I need not detail here. The act will encourage due diligence, will provide for competitive bidding in areas of known mineralization, and will get us through the transition from a location-patent system to a leasing procedure as smoothly as possible.

The notion of hard rock mineral leasing system is not new. Along with three of my associates on the Public Land Law Review Commission, I supported a leasing system in the committee report issued in 1970. My good friend from Montana, Senator METCALF, has supported leasing legislation and our former colleague and chairwoman of the Subcommittee on Mines and Mining, Mrs. Mink, introduced a leasing bill in the last Congress. Moreover, I can tell my colleagues that the Secretary of the Interior, Cecil Andrus, agrees that we need reform. I am introducing this bill early in the 95th Congress so that with proper study—and I am not wedded to any particular language in this bill—we can get going on this needed legislation.

I hope that my colleagues will join me in cosponsorship of this bill. If they are interested in joining me when I reintroduce the bill on April 19, I hope they will direct their staff to contact my staff at X58331.

THE PRIDE OF NEW JERSEY

HON. HELEN S. MEYNER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mrs. MEYNER. Mr. Speaker, when I speak to my colleagues about my district and my State, New Jersey, I realize that

many still have the impression that New Jersey is little more than a hundred miles or so across the turnpike. Though we in the New Jersey congressional delegation know, of course, that ours is a State rich in natural, architectural, and manmade beauty, we accept good-naturedly the little jokes about our State—because we are used to it. Even the venerable Ben Franklin once referred to New Jersey as a keg tapped at both ends.

Lest anyone think we do not care about our State, beware. Enda Slack, a wise and perceptive columnist for the Daily Record—Morris County, N.J.—knows this. And in a recent column, she takes to task both those who would impugn our sense of pride and those who would shrink from it. Ms. Slack's column will make good reading for all of those who know New Jersey and all of those who should know it:

THE REAL NEW JERSEY JOKE: THERE IS NO STATE PRIDE

(By Enda Slack)

For some months now the picturesque vacation island of Nantucket has been seething with revolt. Congressional redistricting, it seems, is robbing the isle of its very own representative in Congress and there is wild talk among the usually steady New Englanders of becoming founding fathers again.

They want to secede from Massachusetts and form the 51st state or, if they get mad enough, a new nation.

The good residents of Martha's Vineyard are thinking along the same lines and pressure is growing to join the two islands into a new national entity.

Some latter-day Betsy Ross has already stitched up a new flag for the fledgling nation. It features a white sea-gull rampant on a rippling sea-blue field. And petitions of secession have been prepared for presentation to the Massachusetts Legislature.

Connecticut Gov. Elia Grasso has offered to take her ocean neighbors into her state but the independent islanders seem intent on building up their own identity.

There's a message in all of this for New Jersey. We are a state of more than seven million people, who live in 567 municipalities of varying sizes and conditions, ranging from large, battered cities through expensive suburbs to charming rural hamlets.

We have scenery, industry, history, culture and the Meadowlands sport complex. But we have no sense of identity or even of self-appreciation.

New Yorkers think of us as a long turnpike bordered by garbage dumps and swamps. Philadelphians, at the other end of the state, don't view us so harshly. If they think of us at all, it is in terms of our beautiful South Jersey beaches, Atlantic City and the approach of casino gambling.

What is so bad about all of this is that most of us who live here always put up with the jokes about "Jersey" and even share the outsiders' negative perception of our own state. We have no state pride.

We could cure all that by splitting from the union of states, calling back our congressional delegation and setting ourselves up as the nation of Nova Caesarea.

We could deploy the State Police along the Delaware and the relatively small stretch of land border we share with New York. Checkpoints would be set up at all the bridges linking us with New York and Pennsylvania to check passports, collect customs duties on imports, and intercept illegal drugs, contraband cigarettes and other goodies that flow through on our highways.

In no time, we'd become more conscious of all those people who would be trying to enter Nova Caesarea to spend a few weeks on the soft, white sands of Beach Haven or Stone Harbor. Or to fish and camp near our wooded lakes, get jobs in our industrial plants, attend our better colleges or sell their wares in the shopping malls that dot our landscape.

Pride in our new country would grow if we saw tourists landing at Newark Airport, planning to visit the quaint villages and inns of the western part of Nova Ceasarea, skiing in Sussex County, booking motels near the sports complex to be near the trotters and football games, touring our museums and galleries, sampling our better restaurants and enjoying the succulent fruits, vegetables and seafoods that abound in our fields and waters.

As a new nation, we'd have commercial television stations covering our every move, analyzing our government, praising our financial solvency and telling us more than we would ever want to know about ourselves.

No more would a New York TV commentator make a big joke (as one did Tuesday) about our efforts to revive the motion picture industry in New Jersey. The foreign media would follow with fascination our film activities and the antics of our stars.

It's only a dream, of course. No one could get New Jersey's seven million diversified people to agree on such a drastic move. We wish we could convince everyone who lives here to spend one day a week looking at the Garden State with the eyes of a visitor in an interesting foreign country. There's a lot to enjoy and stir our pride, if we open our eyes to our state assets.

We might even manage some day to elect someone from a crossroads village down in Hunterdon to the White House.

FAST DAY PLAN FOR CHARITY IN PLATTSBURGH, N.Y.

HON. ROBERT C. McEWEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. McEWEN. Mr. Speaker, I take this opportunity to commend the students at the New York State University College at Plattsburgh, the college community, Father Dan Keefe, head of the Newman Center in Plattsburgh, and ARA Slater Dining Service for the sacrifices they are making on behalf of the poor of Clinton County, N.Y.

Today, in Plattsburgh, is known as the Fast Day Plan for Charity. The students residing on the sixth floor of Banks Hall, under the leadership of their resident adviser, William Scandalis, and with Father Keefe's assistance, have obtained commitments from approximately 2,300 university students to forgo at least one meal at the university's dining halls today. For every meal that is sacrificed in this manner, the catering service, ARA Slater Dining Service, will donate an equivalent amount of money to be used to purchase food for the needy of Clinton County and those served by the international food relief program.

The distribution of food is being organized through the combined efforts of the Plattsburgh Methodist Church Emergency Food Shelf, Catholic Charities, and Crisis Center, which assists alcoholics and drug addicts. In addition, areas have been established in the university dining halls for students to donate food or money to be used to help the poor.

In this season of Lent and Passover, I think it is most appropriate that these sacrifices should be recognized. These young men and women and all those who participated in this Fast Day Plan for Charity have set an example of charity and concern for their fellow man that contains in it a lesson for us all.

CIVIL ENERGY FROM LASER FUSION: A GROWING REALITY

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. PURSELL. Mr. Speaker, this will be my fourth installment regarding laser fusion. I hope that through these inserts the Congress will have a better understanding of what is taking place in this rapidly moving technology. From this understanding, I hope we can evolve an intelligent policy regarding the development of this technology for civil energy purposes as well as national security interests. Last fall, November 15, 1976, Business Week ran the following article in its research section:

SAVING TWO DECADES ON A FUSION TECHNIQUE

In three separate experiments over the last few weeks, scientists at the Lawrence Livermore Laboratory focused powerful twin laser beams on tiny fuel pellets, squeezing them to incredible densities and touching off reactions that produced more than a billion neutrons—the subatomic particles that are generated when atomic nuclei fuse. These neutron yields are far short of those that will be required to demonstrate the scientific feasibility of laser fusion as a source of energy. But results at Livermore are some 100 times as great as those achieved by any other research group, and they demonstrate clearly that the sprawling government lab near San Francisco has taken the lead in the race to develop laser fusion reactors. "We view our position as significantly advanced," says a confident Roger E. Batzel, Livermore's director, "and we would be surprised if it changes."

Livermore's work on "inertial confinement," as scientists call laser fusion technology, has all but eliminated the 15- to 20-year head start once held by magnetic confinement, the traditional research approach to fusion. In both types, the hydrogen isotopes, deuterium and tritium, are compressed and heated until their nuclei combine, releasing energy in the form of neutrons and alpha particles. This is the same process that lights the sun, and taming it could usher in an era of cheap, essentially inexhaustible energy. Richard E. Balzhiser, director of the Fossil Fuel & Advanced Systems Div. of the Electric Power Research Institute, a utility industry think tank in Palo Alto, Calif., estimates that fusion now represents a worldwide research and development effort of $1.5 billion per year.

AMBITIOUS

Until recently, most of that money has gone for magnetic confinement devices, in which a superheated plasma of hydrogen is contained by intense magnetic fields. Work on this approach began at Princeton University in 1951, and the first experimental magnetic-confinement power reactors are scheduled to start up in the mid-1980s. Inertial confinement, in which the fuel is imploded, or compressed to such high densities that it burns up before it has time to

fly apart, got little attention until the 1960s. As late as 1970, the total government budget for laser fusion research was a niggardly $3 million.

Then, in 1974, an audacious private company, KMS Industries Inc., of Ann Arbor, Mich., stole a march on the big government labs by using a laser to get neutrons out of a fuel pellet. Some of the glamor faded when KMS proved unable to meet its timetable for achieving scientific breakeven—the point at which more energy is generated by the fusion reaction than is required to drive the laser beam. That calls for temperatures of 100 million degrees and pressures of 10 million atmospheres. "We were too ambitious," admits Keith A. Brueckner, former technical director of the KMS fusion effort and now a professor at the University of California in San Diego. "We didn't appreciate the difficulties."

But the experimental strides made at KMS nevertheless persuaded the federal Energy Research & Development Administration to upgrade laser fusion research, with Livermore and the other government labs getting the lion's share of government spending. Livermore's operating budget for laser fusion doubled to $13 million between fiscal 1971 and fiscal 1973. This year it is set at $28 million. In addition, the lab has had some $30 million to spend on lasers and buildings to house them, and these facilities are now producing results.

Just how significant the results are is a matter of some debate. Brueckner, in a study published by EPRI this month, warns that laser fusion still has not reached goals comparable to those achieved in the 1960s by magnetic-confinement researchers. Scientists at Livermore, on the other hand, say that their latest work—including recent experiments not noted by Brueckner—indicates that they will be able to demonstrate scientific breakeven by 1983, or about the same time that proponents of magnetic confinement expect to meet this all-important milestone.

IMPORTANT POSSIBILITY

A major task of laser fusion work is designing the tiny fuel pellets so they will maximize "gain"—the ratio of fusion energy produced to the laser energy required to start the reaction. The relatively simple glass "microballoons" used by KMS and other early researchers apparently cannot provide enough gain to be useful in a power reactor, Brueckner says. But classified work at Livermore and other weapons laboratories has yielded pellet configurations that may do the job. In a carefully worded statement written after a classified briefing last summer, EPRI experts concluded: "These studies offer a very interesting and important possibility of pellet gain markedly exceeding that achievable with the presently published designs."

While this is encouraging news for boosters of fusion power, EPRI worries that the government's habit of keeping its laser fusion work secret may discourage utilities from pursuing the technology, since this would dictate federal control over the core of the power plant. In fact, classification of pellet research has already been a major impediment for researchers at private companies and in European and Japanese labs. But Philip E. Coyle, deputy director of Livermore's laser fusion program, predicts that the pellet designs will be declassified before a commerical plant is built.

Clearly, Livermore's access to classified material, coupled with its expertise in complex computer calculations and its share of ERDA funds, gives the lab a bellwether role that will be hard to challenge. The laboratory's interest in laser fusion goes back to 1960, when theoretician John H. Nuckolls first proposed the idea of imploding tiny deuterium-tritium targets. "But we had no driver then," Nuckolls recalls. "The idea of focusing all the power in the country on a pinhead seemed outlandish."

EARLY WORK

The invention of the laser provided Nuckolls' "driver," and this set off work on inertial confinement in a number of labs. At first, Livermore stayed in the background. "I was the only one here who took the fusion power plant seriously," Nuckolls recalls, "because magnetic confinement looked more promising." But when the old Atomic Energy Commission finally decided to start funding a major laser fusion program, Nuckolls' groundbreaking work vaulted Livermore to the head of the pack.

The lab chose the glass laser as the quickest route to scientific breakeven, even though a gas laser or an electron beam generator may well be better suited for commercial power plants. By 1975, Livermore was able to generate neutrons and—most important—demonstrate that they originated from thermonuclear reactions. At that time, the evidence was only indirect because the single-beam laser that Livermore was using could not produce enough neutrons for direct observation. "There wasn't really much doubt," Coyle recalls, "but there were some mischievous comments." This summer, Livermore started using a $3.5 million laser system called Argus, which is capable of hitting targets with a momentary pulse of more than 2 trillion watts—twice as much power at all the power plants in the U.S. can produce. Argus provided the first direct confirmation of fusion reactions.

"SHIVA"

Now, in a massive three-story building near the Argus operation, Livermore is building the most powerful glass laser in the world. Dubbed Shiva after the many-armed Hindu god, the $25 million system will consist at first of 20 separate lasers mounted on a framework of pure-white steel tubing. This "Spaceframe" is now in place, and the lasers, each capable of generating more than a trillion watts (a terawatt in scientific parlance) will be installed over the next few months. By late next year, Livermore expects to start experiments aimed at achieving a "significant" thermonuclear burn. And with an improved version of Shiva, it expects to demonstrate scientific breakeven. "In terms of neutron production, we are only halfway there on a logarithmic scale," admits Coyle. "But from a physicist's point of view the first steps are the hardest."

While Livermore streaks ahead, researchers elsewhere are also closing in:

At Los Alamos Scientific Laboratory, work has begun on a $55 million carbon-dioxide laser facility with a projected output of more than 100 terawatts. Carbon-dioxide lasers, which can be fired more frequently and are far more efficient than glass lasers, have a long wavelength that was at first considered a handicap in fusion work. But recent experiments have convinced Los Alamos researchers that there is little to worry about.

At Sandia Laboratories, in Albuquerque, N.M., bids have been invited for a $14 million facility that will use electron beams instead of lasers to implode fuel pellets. While prototype work indicates that electron beams would be cheaper and more efficient than lasers as fusion triggers, Sandia still has not found a way to focus the beams at a distance, necessary to avoid damaging the accelerator when a reaction occurs.

At KMS, news is sparse because the company is now negotiating with ERDA for a much-needed contract extension, as well as for additional funds to develop a system for making hydrogen with laser fusion. A tight-lipped Henry J. Gomberg, president of KMS, says only: "We've made significant advances in pellet design, in new pellet materials, and in the application of energy from implosion."

The progress is beginning to ignite some interest among the utilities, even though commercial application of the technology is at least two decades away. "A number of companies are trying to maintain a knowledge of fusion," says William Gough, head of EPRI's fusion research group. The institute recently pledged $1 million to support studies at the University of Wisconsin, which is working on conceptual designs for fusion power facilities. A consortium of utilities that also includes General Electric Co. and Exxon Corp. has committed $27 million over five years to a glass laser project at the University of Rochester. Battelle Memorial Institute has commitments from industry and from ERDA for a study of small-scale laser fusion power plants. "Laser fusion still hasn't caught up with magnetic confinement," sums up Robert W. Conn, who heads the Wisconsin project. "But there have been enough advances to ask what will be needed to achieve a power reactor."

ANNIVERSARY OF BYELORUSSIAN INDEPENDENCE DAY

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. KEMP. Mr. Speaker, last Friday the captive nation of Byelorussia celebrated its 59th anniversary of the Proclamation of Independence of the Byelorussian Democratic Republic. In 1918, after almost two centuries of rich cultural and intellectual development of the Byelorussian heritage, the Byelorussian Rada proclaimed complete national independence, in contrast to the former position of autonomy within a Russian federated state. The declaration read:

A year ago, the peoples of Byelorussia, together with all the peoples of Russia, threw off the yoke of Russian Tsarism which, taking no advice from the people, had plunged our land into the blaze of war and ruined most of cities and towns. Today we, the Rada of the Byelorussian National Republic, cast off from our country the last chains of the political servitude that had been imposed by Russian tsarism upon our free and independent land. From now on, the Byelorussian National Republic is to be a free and independent power. The peoples of Byelorussia themselves, through their own Consituent Assembly, will decide upon the future relations of Byelorussia with other states. . . .

But it was not to be. In December of that year, despite valiant efforts by the Rada to preserve its culturally rich nation as an independent state, the Red Army seized the seat of power at Minsk and established a military police state. Byelorussia was eventually divided into two states, one in Poland, and the other under direct Soviet control.

As we share with the Byelorussian people both in America and behind the Iron Curtain this memorial of their short-lived freedom, we must also reflect deeply on the sharp denial of human rights that still exists for over 8 million people in Byelorussia today. As a nation blessed with the freedom of democracy and the inviolability of individual rights, the United States must lend its support to the courage and pursuit of freedom of those still suffering under the oppression

of communism behind the Iron Curtain—an oppression that does not recognize common decency and respect for human life and dignity as a basic right of human existence.

Mr. Speaker, that right of human dignity must form a cornerstone of our relations with the Soviet Union. We must continue in our efforts to obtain for every citizen of this world that freedom from persecution that is the ultimate result of the mutual recognition of the rights of common humanity among nations.

THE WILMINGTON TEN

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. RANGEL. Mr. Speaker, the North Carolina criminal justice system has long been notorious for its methods of jurisprudence, and the recent developments in the case of the Wilmington Ten have once again demonstrated the discrimination practiced in the courts of North Carolina.

Nine black men and one white woman are currently being incarcerated in North Carolina prisons, falsely convicted of instigating racial violence during implementation of court-ordered busing. The three witnesses used by the prosecution have recently recanted their testimony, citing pressures by the prosecutor's office to give false testimony against the defendants.

The following article by Everett Parker, director of the office of communication of the United Church of Christ, explains in great detail the sad history surrounding the details of this case. My colleagues will find this article of great interest, and I submit the following for their review:

THE SCANDAL OF THE WILMINGTON TEN

(By Everett C. Parker)

Since August, long suppressed evidence in the case of the Wilmington Ten has come to light that should convince impartial observers that these nine young black men and a white woman were railroaded into prison by the North Carolina criminal justice system. The chief witness against the Ten has recanted, confessing how the prosecuting attorney bribed him to testify with a promise of a lower prison sentence and coached him to lie on the stand. FBI investigation has turned up the fact that the State Human Relations Commission had evidence—now conveniently missing from its files—that might have exonerated the Ten, but fearful of the disapproval of powerful legislators did not testify at their trial. Even so, the North Carolina attorney general opposes their release on bail, and a Federal magistrate in chancery abets him by delaying a ruling on appeals in their behalf.

The case of the Wilmington Ten is a microcosm of a wider reality—that America is still very much a country at war with itself. A recounting of incidents in the struggle for civil rights is not needed here—its wounds lie deep within the hearts of all Americans who have fought battles against racism. Nor do we need to retrace the deceits that have underlain the racism of the '70's—the broken promises, the "voluntary desegregation," the gradual quieting of activists who have "met their goals," the cynical emasculation of equal employment opportunity rules by the Labor Department and other Federal agencies. The battle lines are still drawn very much the way they always have been—rich against poor, white against black.

Over the last 25 years, there have been only two fairly constant institutional allies in the struggle for civil rights: the courts and the press. When the courts have been quiescent, the press has often intervened and prodded them to act.

Yet, despite the racist overtones of the case of the Wilmington Ten, no great press support has appeared to expose the indifference and vindictiveness of the North Carolina prosecutors and judiciary. It is a bleak proof that in a society torn by a corporate evil such as racism, no institution of that society, even its final arbiter of social truth and justice, will stand totally apart, without prejudice.

The case of the Wilmington Ten is not just a struggle to protect constitutional rights and individual liberty. It is a fight against what Coleman McCarthy of the *Washington Post* has called "a spirit of vicious retribution" that is operating in all levels of American society.

The Wilmington Ten are at present scattered in nine North Carolina prisons. Only Rev. Ben Chavis, an employee of the United Church of Christ Commission for Racial Justice, has received any widespread press attention. The others—most of them high school students during the 1971 incidents of racial protest in Wilmington—are largely unknown. Marvin Patrick, Connie Tyndall, Jerry Jacobs, Reginald Epps, James McKoy, Wayne Moore, William Earl Vereen, William Wright, Ann Sheppard Turner—these are not household words. To understand why this is the case, and what the new evidence might mean for their eventual release, a review is necessary of the facts of the case and the circumstances that surround it.

Prisons and capital punishment are a way of life in North Carolina. So is poverty. North Carolina leads the country in both the number of prison cells per 1,000 population and of convicts condemned to death row. It also has the lowest percentage of organized labor. It is the largely white, inbred court system of that state that consistently feeds blacks, Indians and poor whites into the waiting cells. Blacks and Indians, though they are only 23 percent of the state's population, fill about 60 per cent of its prison cells.

The case of the Wilmington Ten grew out of a classic failure to enforce the law, which sparked outrage, protest and its own form of lawlessness. In 1966, a Federal court ordered the desegregation of the Wilmington high schools. The order was not implemented until late in 1970, when, in the midst of the school term, the one black high school became a junior high and its former students were divided between the two white high schools. Claims of discrimination by the high school administrators and teachers soon began to be heard from the black students. They complained about discrimination in grades, athletics, transportation and teacher hiring. Attempts at organization to protect their rights were met with counter threats and action by the Ku Klux Klan and a local militant group, Rights of White People (ROWP).

Early in 1971, the black students asked to have a memorial service for Dr. Martin Luther King, Jr. When the request was denied, the students felt they had exhausted the possibility of working within the system.

They sought help from the Rev. Eugene Templeton, the youthful white pastor of Gregory Congregational United Church of Christ. Gregory Church, with a solid middle-class black membership, stands on the edge of Wilmington's black community. Mr. Templeton, fearing violence from ROWP if the church was to become the chief supporter of the black high schoolers, called for aid from the Commission for Racial Justice of the United Church of Christ.

Ben Chavis, then a field worker with the Commission for Racial Justice, was assigned to Wilmington. Chavis had earned a bachelor's degree in chemistry from the University of North Carolina at Charlotte. In April, 1972, he was ordained as a minister in the Black Christian Pan Africanist Church. A young man known to have an "organizing presence," he seemed a good choice to help quiet the growing tensions in Wilmington.

Within a week, a list of the grievances of black students had, under Chavis' direction, been presented to the local school officials. When the officials ignored them, black students walked out of the schools and a crowd of 800 marched in protest to the school board. It was clear that Chavis had provided the organizing presence the black community needed.

Few question the sequence of events to this date. The outcome of the trial hinged on disputed reports of what happened in the next five days.

Wilmington residents knew that Chavis was in Wilmington, at Mr. Templeton's request. Because of Chavis' presence, but against the will of its members, the church had become the center of black resistance. White residents began driving by the church armed with shotguns and rifles. Barricades were hastily thrown up as the KKK and ROWP threatened to attack the black community. Three members of the State Good Neighbor Council (now called the Human Relations Council)—Rev. Aaron Johnson, Preston Hill and Fred Cooper—entered into negotiations between the various groups, but little or nothing was accomplished. By Wednesday, February 3, shooting and arson had already started, and Leon White of Raleigh, Mr. Chavis' immediate supervisor in the UCC Commission for Racial Justice, ordered him to leave Wilmington, hoping that would quiet the city. It did not.

Mr. Johnson, seeing that the situation was in fact worsening, called Mr. White the next day asking that Mr. Chavis, whom he felt to be the only black leader who was in touch with all the various groups, be allowed to return to Wilmington.

Even though Gregory Church was by the end of the week under heavy, almost constant fire from vigilantes, the mayor and chief of police turned down a request for protection and a curfew. Backed and barricaded into the church, Mr. Chavis and Mr. Templeton spent much of Saturday conferring with members of the GNC in attempting to bring food and supplies into the church sector.

That evening, February 6, a fire destroyed white-owned Mike's Grocery, one block from the church. Shortly afterwards, electrical and telephone lines to the church were cut and police were called in to break up sniper fire in the area. Steve Miller, 19, left the church to make a telephone call, and was shot dead. Or so the police say. Mr. Chavis claims that not only was Mr. Miller still alive when the police took him, but that he had been unarmed. The report filed in police headquarters says a shotgun was found near the spot where Mr. Miller fell. Registration markings and fingerprints were not checked.

The next morning a white man, Harvey Cumber, approached the barricades near the church and fired his .38 caliber pistol. A reply shot was fired, and Cumber collapsed, dead. At that point, the governor intervened, sending 600 National Guardsmen to help quiet Wilmington. By then, Mr. Chavis, Mr. Templeton and the others had left town. Nevertheless, the Guard assaulted the empty church.

That is the log of events that led to the trial of the Wilmington Ten. Well over a year passed before the judicial system of North

Carolina produced grand jury indictments. Early in the morning of March 15, 1972, police raided the homes of Mr. Chavis, Anne Sheppard (later Ann Sheppard Turner), a local VISTA poverty worker, and 14 former high school students who were allegedly involved in the Wilmington riots. The ten of these that were eventually brought to trial were charged on several counts: conspiracy to burn and burning with an incendiary device; conspiracy to assault and assault of emergency personnel; conspiracy to commit murder, and accessory before the fact to a crime.

Sixteen defendants (six of whom have still not been tried) were arrested March 15, 1972. By that time, a number of other people involved in the case had left Wilmington. Mr. Chavis was working in Raleigh.

Mr. Templeton, under threats on his life, had resigned the Gregory pastorate and moved to New Jersey. Messrs. Johnson, Cooper and Hill of the Good Neighbor Council dropped out of all phases of the investigation.

The Commission for Racial Justice of the UCC, arranged for all the defendants to be represented by a North Carolina lawyer, James E. Ferguson of Charlotte. He was with them first at a probable cause hearing in April. There the Ten discovered that the substance of the case against them rested with a single witness, Allen Hall. Hall, a black high school youth, had been involved in the Wilmington disorders, was arrested, convicted and under sentence. It soon became apparent that he was to receive lenient treatment in return for his testimony.

The trial was held in rural Burgaw, which has a majority black population. It got underway with a jury of ten blacks and two whites, but was aborted when the prosecutor suddenly became "ill," after jury selection. When it reconvened, the jury proportion was reversed—ten whites and two blacks. Of 42 witnesses called, only Hall gave direct testimony that purported to implicate the Ten. Only three witnesses took the stand in behalf of the defense, all testifying for Ann Turner. Mr. Templeton and the Good Neighbor Council both were subpoenaed by the defense but neither responded and Judge Robert Martin did nothing to force their appearance to testify. Mr. Templeton supposedly was prepared to testify that Mr. Chavis had pled constantly against violence and that they were together in the church at the time Mike's Grocery burned. He actually traveled to North Carolina, but did not go to the trial, supposedly because he heard a rumor that he would be arrested if he appeared there. The Council representatives deliberately flouted the subpoena.

The trial lasted seven weeks. The jury deliberated two hours before it returned a guilty verdict. Mr. Chavis received two sentences, 4–5 years for conspiracy to assault emergency personnel, and 25–29 years for unlawful burning. The judge ordered that they be served consecutively, rather than concurrently. Sentences of the eight youths ranged from 20–24 years to 22–26 years. Ms. Turner was given 7–10 years.

The appeals process began almost immediately. In December, 1972, after three months in prison, Mr. Chavis was freed on $50,000 bail provided by the Executive Council of the UCC. Six months later, the Church's General-Synod voted to post another $350,000 bail for the nine remaining defendants, commenting that their imprisonment represented "a serious injury to the concept of equal justice."

The appeal filed in the North Carolina Court of Appeals on July 30, 1974, alleged that Judge Martin had committed 2,685 trial errors and that the defendants' constitutional rights to a fair trial, impartial jury, due process and confrontation of witnesses had been denied. In December, 1974, the appeals court affirmed each conviction, holding that any errors on the part of Judge Martin were constitutionally harmless.

An appeal then was taken to the State Supreme Court. On May 6, 1975, it declined to review the case.

While he was free on bail, Mr. Chavis became director of the Washington office of the UCC Commission for Racial Justice. From that vantage point he was able to stir up a modest amount of national interest in his plight and that of his fellow defendants. He and the Rev. D. Charles E. Cobb, director of the Commission, made frequent trips to North Carolina to encourage and aid the other nine. Miss Sheppard evinced enough confidence in her future to get married. Members of Congress began to take an interest in the case.

Representatives John Conyers, Jr., (D-Mich.) and Ronald Dellums (D. Cali.) condemned the handling of the case in speeches on the floor of the House. Rep. Robert Kastenmeier (D. Wisc.), chairman of the Subcommittee on Courts, Civil Liberties and the Administration of Justice, noted in a letter to the FBI that the possibility existed that the case against Mr. Chavis "may have resulted from the highly questionable testimony of paid informers, and that the government's interest in prosecuting him may have been politically motivated."

Through all this, the UCC remained the staunch defender of the Ten. The defense attorneys, whose fees were paid by the church, filed an appeal with the U.S. Supreme Court. The late Rev. Dr. Robert V. Moss, president of the UCC and a native of North Carolina, in the press and at public meetings, sharply criticized the miscarriage of justice in North Carolina. Leaders of other denominations and the National Council of Churches spoke out vigorously in behalf of the Ten.

On January 19, 1976, the Supreme Court refused to hear the case, exhausting the last available appeal. President Moss then announced that the UCC would support the filing of a habeas corpus petition in Federal District Court to bring the case under Federal jurisdiction and return it to the Supreme Court, if necessary. In the meantime, the Ten faced incarceration.

They were promptly arraigned before Logan Howell, a magistrate of the Federal District Court in Raleigh. A motion that bail be set pending the disposition of the writ of habeas corpus was denied, despite the presence of several prominent character witnesses and written affidavits requesting the granting of bail for over 100 others. The magistrate focused on the question of setting bond and never permitted the question of the defendants' character to be raised. He took this stand in spite of the fact that all Ten had faithfully appeared in every court when summoned and had immediately surrendered for jailing when the Supreme Court refused to entertain their appeal.

On February 2, 1976, the Ten surrendered to authorities and were jailed, Mr. Chavis at Caledonia Prison Farm, Ms. Turner at the Correctional Center for Women and the eight others at Central Prison. Shortly thereafter, however, six of the eight were sent to other prisons around the state and Mr. Chavis was moved to the McCain Correctional Unit, the state prison hospital, used largely for physically and mentally ill patients. Mr. Chavis maintains this was a form of harassment which made it difficult for the Ten to meet with lawyers or confer collectively.

North Carolina prisons are notoriously bad. The day after the Supreme Court refused to hear the Wilmington Ten case, the Fourth U.S. Circuit Court of Appeals described the conditions in Raleigh's 100-year old penitentiary as "bizarre," constituting "cruel and unusual punishment." Last May, Mr. Chavis filed a $2 million damage suit against six North Carolina prison officials for maltreatment in prison. Ten days later, he was transferred from McCain to Central Prison, Raleigh, where he is today. Mr. Chavis had been on a hunger strike at McCain, as a protest at being isolated in a hospital unit instead of being allowed to be a part of a general prison population. During the short time he was in Caledonia Prison, he initiated a counseling program for the other prisoners and became a champion of prisoner rights. His friends are convinced that he was transferred to McCain as a punishment for aiding his fellow prisoners. His hunger strike was an even greater annoyance to prison officials, because of the risk to his health and consequent danger of public outcry. So the transfer to Raleigh was made with the explanation that officials felt his health was being endangered at McCain.

Early in the summer of 1976 Allen Hall was released from prison on parole after serving about 18 months of his sentence. Troubled in conscience, the young man went to Attorney James Ferguson and recanted his trial testimony. In a tape recording and a sworn statement he told of how he was threatened with a long prison sentence by police and the Wilmington Ten prosecutor; how they persuaded him to testify against the Ten; how they coached him for days in an isolated beach cottage.

Mr. Ferguson immediately amended the habeas corpus petition that is before the District Court to incorporate the new evidence. Mr. Hall claimed he was being threatened. Therefore, a representative of the UCC asked the Department of Justice to conduct an FBI investigation of the entire Wilmington Ten case. Senator John V. Tunney (D. Cal.) lent his support and the investigation was ordered. It is being made by the North Carolina FBI office.

The United Church of Christ is the sole source of money for the Wilmington Ten case. Anticipating action on the habeas corpus petition, the UCC Executive Council in October set aside $400,000 to provide bail if it is permitted. The Council also appropriated $70,000 for legal fees and $130,000 for a national informational campaign in behalf of the Ten.

Suppression of evidence is the latest scandal to be revealed in the case. On November 14, the Greensboro Daily News reported that the Good Neighbor Council was ordered by the North Carolina attorney general to obey the subpoena to testify in the trial of the Ten. Representatives of the Council set off for Burgaw by automobile. They carried with them documentary evidence that Rev. Aaron Johnson states was "highly favorable" to the Ten. En route they heard a radio report that the defense had rested its case; so they turned back to Raleigh and put their documents back in the files, relieved that they had escaped probable reprisals from the state legislature for testifying. Within a short time, the documents were removed from the Council files, and have not been seen since.

Ronald K. Ingle, director of the Council (now called the Human Relations Council), admitted to the News that the documents are missing, and that members of the staff have known for some time of their disappearance. The state attorney general has promised an investigation. Mr. Ingle was summarily fired by his superior for revealing the loss of the files.

Today:

Judge Robert Martin has been rewarded with an appellate judgeship.

Prosecutor James Stroud has been rewarded with a promotion and relocation.

No state official has opened an inquiry into what is in the missing files.

The attorney general still opposes bail for the Ten.

The U.S. magistrate has not ruled on the habeas corpus petition or the request that bail be granted.

The Wilmington Ten are in prison.

Ten lives are being blighted by a regressive judiciary and a white-controlled political apparatus that holds blacks in thrall—separate and unequal.

VALLEY FORGE

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. SCHULZE. Mr. Speaker, today in Valley Forge, Pa., Americans have gathered from all parts of the country, from all walks of life and involved at all levels of Government to observe the ceremony which will turn over to the Federal Government the operation of Valley Forge as a national park.

This action symbolizes more than our Federal Government's recognition of an historical landmark and the watershed of our American heritage. It represents the will of the American people and the harmonious cooperation of local, State, and national governments.

You may recall that in the 94th Congress I initiated legislation to make Valley Forge a national park, and with the cosponsorship and assistance of my colleagues, this bill was signed into law. It was the will of the people—the will that government of the people—by the people—and for the people does work—that saved Valley Forge from the encroachment of the city and industrial expansion. Valley Forge is now preserved for all future generations of Americans.

In recognition of this day, I wish to share a message with my colleagues:

VALLEY FORGE

We return today—almost 200 years later—we cannot imagine that winter of 1777–1778; we cannot admire enough the patience, the fortitude and the strength of the soldiers who suffered and lived those winter months.

But one man returned in the summer of 1796. He was an elderly man, dignified and dressed in a plain suit of black.

He had returned to the scene of so much suffering and distress to see how the inhabitants had recovered from that winter. The stranger had wanted to make one last visit to the area for he had been encamped there during the War and felt he would never return. And that visitor was George Washington.

"I am content," Washington said, "to see the people happy and satisfied, the desolate fields recovering from the disasters they had experienced." This afforded Washington more real satisfaction than all the servile homage that could be paid to his person or station.

And, yet, today is a time to reflect. A time to recall the courageous action of those few who declared before the world their dedication to a new standard, a standard for mankind's freedom. It is a time for re-dedication to the American tradition and the American will. For while the statesmen were building a Nation, the 11,000 soldiers were preserving the peace. The tools have changed. But the ideal remains the same.

Let us dedicate Valley Forge not only as a national park, but as a national memory to the men who as an army came here in defeat, but left as troops in victory. That winter was a turning point of the American Revolution for Washington and his men. They gave life to the words of the Declaration of Independence.

I wish to share with you the words of Henry Armitt Brown in speaking of Valley Forge:

"If heroic deeds can consecrate a spot on earth, if the living be still sensible of the example of the dead, if courage be yet a common virtue and patience in suffering be still honorable in your sight, if freedom be any longer precious and faith in humanity be not vanished from among you, if love of country still finds refuge among the hearts of men, take your shoes off your feet, for the place on which you stand is holy ground."

No name evokes the spirit of patriotism, independence and sacrifice than that which gave birth to the United States—Valley Forge. Today that window to the past—a symbol of our Nation's ability to survive and the will to succeed—has been preserved for all generations.

TO ABOLISH A GOVERNMENT AGENCY

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. McCLOSKEY. Mr. Speaker, our distinguished colleague, JOSEPH MINISH, has introduced a bill (H.R. 4082) to permanently preserve the Renegotiation Board.

I would like to respectfully suggest, as an alternative to renewing and reforming the present Renegotiation Board's powers, that we abolish the Board's function for the time being and place the Renegotiation Board on a standby basis, to be reactivated only upon Presidential determination that a national wartime emergency has arisen of the type that led to the original act in 1942 and its successor in 1951.

I have introduced a bill, H.R. 5257, to accomplish this result.

If there will ever be a time when democratic governments can reduce their own size and complexity, it is now, in the early days of a new administration which made a campaign promise to do just that.

The original Renegotiation Act had its genesis in 1942, a time of grave national emergency—when contracts had to be negotiated under stress and in great haste—when the Government's immediate need for services and materials transcended all other considerations. Under these circumstances, renegotiation to recover excess profits was justified and necessary.

The same circumstances existed in 1951 when the present act was enacted. As in 1942, we were in the first year of a major war. Contracts were being executed under special emergency circumstances, and a special law to balance the equities between the parties was clearly in order.

Today, however, there is no such urgency. Government procurement officers are experienced, competent and under few, if any, time pressures. The principles of contract law are rooted deep in our history, and are well understood by the most recent law school graduates. The need to renegotiate a contract is a concept which should have no place in a society where the contracting parties can meet in dispassionate and quiet negotiations, with neither party under pressure to make or accept an offer.

Since 1951, Congress has enacted a whole series of additional laws calculated to prevent fraud and deception against the Government in both the negotiation and performance of contracts.

The Truth in Negotiation Act (10 U.S.C. 2306(f)), section 719 of the Defense Production Act (50 U.S.C. App. 2168) and the host of requirements codified in title 10 of the United States Code all operate in favor of the Government to require fair negotiating and fair reporting by contractors.

Why, then, should there be a special law, in nonemergency circumstances to give the Government a special remedy?

What showing has any witness made before the House committees of jurisdiction that any contract executed by the Government under peacetime conditions, where the contractor complied with all of these laws to protect the Government, resulted in inordinate profits to the contractor?

And if the contractor has not complied with those laws, if he has not submitted accurate, complete and current cost or pricing data, if he has not disclosed and adhered to disclosed cost accounting practices, there are standard legal remedies for the Government just as in the case of any other person who has been injured by breach of contract or violation of law.

I submit, Mr. Speaker, that in peacetime the whole concept of contract renegotiation is fallacious. There is no emergency to justify it. In those cases of novel, complex and experimental new weapons or scientific systems, the Government is free to enter into contracts on any basis it wishes, cost-plus, fixed price, fixed price incentive, or otherwise. The Government can calculate precisely what kind of contract it wishes in order to obtain the best advantage for the people of the United States.

But having done so, why should the Government need additional advantages?

Fairness of negotiation and performance is not a problem when no emergency exists.

If no fairness problem arises, what economic benefits can be said to arise from the operation of the act?

From the Renegotiation Board's last report, of December 31, 1976, it appears that in 1976 some 4,559 contractors filed with the Board. Forty-six contractors—about 1 percent—were determined to have made excessive profits. Of the 4,559 filings, 2,511 were screened, representing $24 billion in renegotiable sales.

Of this $24 billion, the Board determined that there were excess profits of slightly over $40 million. Assuming a 10-percent reasonable profit—one measure used by the Maritime Administration, for example—if one were to assume that $24 billion in sales allowed $2.4 billion in acceptable profits, only $40 million, or approximately 1½ percent of the total allowable profits, were found by the Board to be excessive.

And what were the costs to the taxpayer for this $40 million potential recovery?

First, the cost of the Board's operations for fiscal 1976 were approximately $5.5 million.

Second, the loss in corporate income taxes to the Government would be approximately half of the $40 million reduction in profits, an additional $20 million.

Third, there is the cost to the contractor—passed on to the Government—of compliance with the act itself. One company in my congressional district estimated that the cost of compliance with the act in 1976 came to over $160,000—about one-tenth of 1 percent—of their gross sales to the Government of around $150 million.

This company, Hewlett-Packard, does a gross business of $1 billion per year, with roughly 15 percent of its sales to the Government. Its board chairman, former Deputy Secretary of Defense David Packard, has seen the act in operation from both sides, and is of the opinion that Hewlett-Packard's experience, translated across the board to all of the contractors doing business with the Goverment, probably results in a cost to the Government in excess of $350 million.

For example, if the average per contractor cost were only half that of Hewlett-Packard's—$80,000 per year—the total cost for the 4,559 contractors filing with the Board would come to approximately $365 million, some of which is passed on to the Government and the balance to the American public.

If our colleagues will look at the list of 46 companies found by the Board to have made excessive profits since 1976, the Renegotiation Act begins to look more like an antismall business act than a law to deny excessive profits to large corporations.

None of the 46 companies would be listed among the household names of the Government contracting industry.

Under these conditions, Mr. Speaker, it seems well worth while to retire the Board to standby status, granting to the President the power to reactivate its procedures if and when he determines that emergency conditions have arisen to again place the Government at a disadvantage in contract negotiations. I have offered a bill, H.R. 5257, to accomplish this result.

Hopefully, the standard principles of contract, the Truth in Negotiation Act, the 3,300 watchdogs in the Defense Contract Audit Agency, and the GAO will be adequate to protect the United States from harm.

Abolishing a $5.5 million a year agency and 179 Government employees may not be the only step we can take to reduce the size and cost of unnecessary Government, but it is at least a start.

If this action reduces the total cost of goods and services purchased by the Government and American consumers by anywhere near $350 million, the resulting loss of after-tax "excess" profits of $20 million to small American businesses is neatly balanced by the recovery of an extra $20 million in Federal income tax revenues, and the saving of the $5.5 million in annual operating costs of the Board is an additional bonus.

I might add in passing that if Mr. MINISH's bill, H.R. 4082, is enacted, Hewlett-Packard estimates that the cost to their company and to the Nation will be tripled by the additional paperwork and compliance costs.

For all of these reasons, I hope the House will give serious consideration to enacting H.R. 5257 into law as an alternative to H.R. 4082, and that the wartime powers of the Renegotiation Act can be set aside until the next period of national emergency.

I have appended a list of the 46 American businesses who were last year determined by the Board to have taken excess profits from the Government, as well as a copy of H.R. 5257.

CONTRATORS DETERMINED TO HAVE MADE EXCESS PROFITS, FISCAL YEAR 1976

ADDRESS, FISCAL YEAR, AND PRODUCT OR SERVICE

1. Commerce Packaging Corp., Stamford, Conn., 1968, Packaging service.

BEACH EROSION

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. YOUNG of Florida. Mr. Speaker, today I had the opportunity to testify before the House Appropriations Subcommittee on Public Works on the problem of beach erosion control in Pinellas County, Fla. During the course of my testimony, I urged approval of a $100,000 preconstruction planning study for erosion control on Long Key, as well as $20,000 for a restudy of an existing renourishment project for the city of Treasure Island. So that my colleagues may be fully aware of the beach erosion problems in Pinellas County, I respectfully submit the full text of my testimony:

TESTIMONY OF CONGRESSMAN C. W. BILL YOUNG OF FLORIDA

Mr. Chairman, I appreciate this opportunity to address the Members of your committee on the subject of the Florida Public Works appropriations requests for fiscal year 1978. I would specifically like to direct my comments toward the problem of Beach Erosion in Pinellas County. A review of the Administration's budget, and its obviously supportive view of the need for Beach Erosion control in Florida, encourages me. I am impressed by budget requests for this purpose in the amounts of $4,500,000 to Dade County, $3,300,000 to Duval County, $1,950,000 to Broward County, $80,000 to Monroe County, $80,000 to Volusia County, and $60,000 to Martin County. That is $9,970,000. It is curious to note, however, that all of those beach front Florida communities are on the Atlantic Coast. Crossing to the west coast of Florida, I note only a total of $273,000 requested, and zero dollars in budget requests for Collier County, Sarasota County, and my own county of Pinellas. I submit that beach erosion is just as serious a problem for beach front communities on the Gulf of Mexico.

Before this committee for consideration today, are two projects located in Pinellas County for which erosion control studies are

essential. And, because beach erosion is an ever increasing problem which can easily get beyond immediate control, these studies really need to be provided for in the 1978 budget. The first is for a $100,000 preconstruction planning study for erosion control on Long Key, which is at the tip of the Pinellas County beaches in the incorporated area of the City of St. Petersburg Beach. The State of Florida has approved the study, and the Corps of Engineers has stated its capability to accomplish it as soon as it is funded.

Seasonal storms, currents and winds all act to reshape the coastline. While a natural beach system can adjust to many of the stresses due to the natural configuration of the beach and adjacent dunes, the activities of man often prevent this natural equilibrium from establishing itself. Developments too close to the water's edge destroy the natural dune system and limit the beach's ability to compensate for severe losses in sand. Beach renourishment is the solution to this problem. Dr. Robert Dolan of the University of Virginia, a noted authority on barrier beaches, sees beach renourishment as the closest approximation to the natural beach formation process. He notes, "The best method of beach restoration is any method that is similar to the natural process. Structures are designed to alter the energy flow, interfacing with the natural equilibrium of the beach. Rebuilding beaches, artificially, by placing sand on the system, permits the natural process to continue essentially unhampered."

The area of Pinellas County which will benefit from this $100,000 planning study, is a highly developed and widely used year-round resort. People from all over our country, and many parts of the world come to Long Key, and Florida residents from St. Petersburg, Tampa, and many of the inland Florida counties come to these beaches often, because they are less than a day's drive from their homes. If erosion of these beaches is not controlled, the beaches will not be readily usable and accessible to these tourists.

I ask you further to consider a budget request for $20,000 for a restudy of an existing renourishment project for the City of Treasure Island. The Treasure Island project began in 1969 with Federal Aid for renourishment scheduled to expire in 1979, in spite of the fact that the project has a 50-year "project life." The study must be done now, because only Congress has the authority to extend Federal aid, and its feasibility must be determined prior to the budget request period for 1979. The state of Florida has estimated that the study will cost $20,000, and the Corps of Engineers has stated that it has the capability to perform the study.

The Treasure Island project is not one that should be allowed to expire. In 1969, $524,766 was invested in beach renourishment there. In 1971, an additional $62,620 was appropriated. In 1972, another $216,000 was approved, and in 1976, $956,000 was added. This is a total appropriation to date of $1,759,586 of which approximately 50%, nearly $880,000 has been Federal money. The beach renourishment project has been very beneficial to Treasure Island, where 90% of the beach front property is held as public beach. That city's 9,000 permanent population, swells to 25,000 to 30,000 a day from December to April each year, and to 15,000 in the off season. While the money spent on any renourishment project that is well done, is money well spent, unfortunately it does not insure that the beach will always be there. The nourished sand is generally put on the beach above the water line. Wave and wind energy move sand from this beach face into the offshore zone, and when the energy subsides, much of the sand, but not all, is transported back on shore. This give and take action is part of the natural process of shoreline dynamics. Some groins have also been added in Treasure Island to minimize erosion and trap eroding sands. At this moment, the beach in Treasure Island is in good condition, and a continuing beach renourishment program over a period of years to come is important if it is to stay that way.

Another very important factor is that the Treasure Island project has now spanned nearly ten years, and it has served as a testing area for our entire national beach erosion program. A great deal of data has been gathered in the Treasure Island project which is of immeasurable historical value to the overall study of beach renourishment. Without this new study, all of the money expended to date by the Federal Government, the State Government, the County Government, and by Treasure Island itself, will literally be washed away into the Gulf of Mexico.

Again, I would like to emphasize, that both of these projects have already been authorized by Congress, but before they can begin, a pre-construction planning study of Long Key, and a reevaluation study of the Treasure Island project must be completed by the Corps of Engineers. I feel that it is very important that these studies be funded for Fiscal Year 1978, to clear the way for beach renourishment to begin in Fiscal Year 1979.

I urge this committee to take the action necessary to approve this total appropriation of $120,000 for beach erosion control studies in Pinellas County for Fiscal Year 1978.

SOVIET EMIGRATION POLICY

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. BONKER. Mr. Speaker, I want to call attention to the moving remarks delivered by Mrs. Esther Lazaris last week before the Commission on Security and Co-operation in Europe. She is one of the hundreds of Russian emigrees in Israel, still awaiting their long-detained spouses It had been their hope that the Helsinki accords, as a major statement of détente, would promote freer emigration. In fact, the Soviet Union not only remains stingy in issuing exist visas, but has taken increasingly to harassing applicants who assert only what they think are their new rights.

Mrs. Lazaris' conclusion speaks for itself: "My husband might have to pay dearly for my appearance before you. However, knowing him I have no doubts that he would approve of my action, as it is much worse to remain silent."

TESTIMONY OF ESTHER LAZARIS BEFORE THE COMMISSION ON SECURITY AND COOPERATION IN EUROPE, MARCH 17, 1977, WASHINGTON, D.C.

Ladies and gentlemen:

Allow me to thank you for giving me the opportunity to speak here. My name is Esther Lazaris. I live in Rehovot, Israel, together with my son Raphael who will be 5 years old next month, and with my parents. My husband Vladimir is still in Moscow. He has been trying to join us for over three years. His repeated requests for permission to be reunited with us in Israel have been refused by the Soviet authorities. WHY?

My husband, a lawyer by profession, worked in the patent office of a research institute for new building materials. The institute did not deal with any secret information, and Vladimir had no "secret" work. He was dismissed from his place of work shortly after he applied to leave for Israel, in October 1974. He was denounced publicly as a traitor by his colleagues. He has been out of work since then and has often been accused of being a parasite. During this time my husband has had one aim, to join us in Israel, and he has been doing everything possible to achieve this.

For every separated family life is very difficult, but in our case there is an added problem. Our son Raphael is somewhat retarded physically and mentally as a result of asphyxia suffered at birth. He receives medical treatment but needs more than the care and attention that I alone can give. HE NEEDS HIS FATHER!

Unfortunately I lack the legal and the political experience needed for understanding the details of the Helsinki "Final Act," signed by the Soviet Union, the United States, and other nations, but it appeared not only to our family, but to many others in a similar position that the end of our sufferings was near. No matter what the wording of the document was, none of us had any doubt that it would confirm the humanist principle of reunification of families who have been separated.

I have no right to forget that when speaking to this distinguished Commission, I represent not only my own case, but numerous other tragedies. I live in a country where there are hundreds of families in a position similar to mine. They came from all over the Soviet Union. There are many of them and I could not, of course, list them all. I have brought with me many cases. However, I would like to mention two today.

Mrs. Dina Ass lives in undescribable fear: her son Iosif Ass from Moscow, has been arrested by the Soviet authorities several months ago and he was facing a prison term. Thanks to the immediate reaction of the world public including members of the United States Congress, he was released. He still waits in Moscow for permission to join his mother in Israel. His mother, is afraid to turn on the radio every morning—what if there would be bad news from Moscow, again.

Even more difficult is the situation of another category of Soviet Jews—my unfortunate sisters whose husbands and sons are imprisoned in the Soviet Union. The long absence of letters, reports about torments of hunger and cold, the impossible work, the insults and harassments by the officers and the guards, reports about transfers to the frightful Vladimir Prison, about illnesses and inadequate medical treatment and punishment in solitary cells—all these and the complete helplessness turn their lives into hell.

Meri Khnokh, for example, had last seen her husband 7 years ago, when he was arrested. He has to serve another 3 years in prison and he is already very ill. It would be difficult to bring him to a satisfactory physical condition even if he would live in the best possible conditions. Thus, his wife and son, whom he has never seen, his parents, brother and sisters all in Israel, are still hoping to see him . . .

Sitting next to me is Jeanette Mager. Like me, Jeanette is a "separated" family. She lives in Israel. Her husband, Mikhail lives in Vinnitsa, in the Ukraine. They have been separated 4 years now. Jeanette's husband, a factory worker, has been repeatedly refused permission to join his wife and parents.

My husband might have to pay dearly for my appearance before you. However, knowing him I have no doubts that he would approve of my action, as it is much worse to remain silent. Apart from the worries I have about my son's health, I also live with continuing fear for my husband's daily life. We all remember the cases of the Prisoners of Conscience and the easy way they were transformed from being "Refusenik" to "POC". This process can happen very easily, as my parents too, suffered for their Zionist ideals. They were forcibly moved overnight to the

far north from their home in Lithuania in 1941.

For the last few months the campaign against the "refuseniks" has been raging in the press and on the radio and television. Anti-Semitism has increased. Even such a little thing as communication with my husband, something that is so basic and important when we are so far apart, is both uncertain and irregular and subject to censorship.

I would like here to remind you that the Soviet authorities allow Jews to emigrate to Israel solely on the basis of reunification of separated families. However, in many cases, instead of enjoying the happiness that should result from the application of such a humanitarian principle, people have become victims of a biased interpretation of this principle. In other words, they become victims of a personal tragedy.

Finally, honourable members of this Commission, I have told you of some of the problems that families like mine have, and I hope and pray that while you discuss the issues concerned with the Helsinki Agreement, please give thought to the fate of our loved ones.

I want to thank the National Conference on Soviet Jewry for bringing me to the United States to testify before this Commission, and I want to thank the Commissioners for hearing me.

Thank you.

PACIFIC DAILY NEWS EDITORIAL ON CLARK, SUBIC BASES

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. WON PAT. Mr. Speaker, as residents of the westernmost part of the United States, we of Guam are much closer to the island nations and mainland of Asia than we are to Hawaii. Also, being more than 3,000 miles west of Hawaii, Guam is the westernmost Pacific position in our Nation's defense.

Additionally, particularly since World War II Guam has been a primary defense facility. The military services own more than one-third of the island, military personnel and their families comprise about one-fourth of our island population and military operations are by far the largest factor in our local economy.

Consequently, we are acutely attuned to changes in the U.S. defense climate in the western Pacific. Presently, this includes close attention to the pending readjustments in the defense relationships between the United States and the Republic of the Philippines.

A cogent commentary on some aspects of this situation recently appeared in the Pacific Daily News of Guam, written by editor Joe Murphy. Mr. Murphy presents some astute observations and practical suggestions regarding the present and future alinement of national defense in the western Pacific.

The editorial is in large part based on a recent Philippine publication by a Filipino writer. It is useful to keep in mind that under the present Marcos administration in the Republic of the Philippines little is published that is not first approved by the Government and generally is required to reflect official views and positions.

Mr. Speaker, with the consent of my colleagues I would like to include Mr. Murphy's editorial in today's RECORD:

[From the Pacific Daily News, Mar. 25, 1977]

PHASING OUT OF CLARK, SUBIC BASES?

A phasing out of the two big American bases in the Philippines has been suggested by a Filipino writer, Juan T. Gatbonton.

This makes some sense. To arbitrarily close down the Navy base at Subic Bay and the Air Force base at Clark would be far too traumatic for everyone, including the Filipinos.

Such a closure would put too much pressure on Guam and Tinian, in too short a time. It wouldn't allow us to plan for the future. We never would be able to catch up on our infrastructure, such as schools, highways, sewers and housing.

Yet, if we knew that a move definitely was in the offing, five or 10 years hence Guam and Tinian could begin planning and preparing now for what figures to be a large increase in military expenditures on the islands.

A sudden decision to leave the Philippines could be disastrous for those islands as well. Such a disruption would throw thousands of Filipinos out of work, and chop hundreds of millions of sorely needed dollars from their economy. This wouldn't be fair to the Filipinos, who have put up with the base since the first American involvement in the Philippines back in 1898.

Even worse, any sudden change in the status quo of the bases would toss the entire Pacific Basin into a tizzy. Our allies, such as Taiwan and Japan, would grow extremely nervous about America's military umbrella in the Pacific. China would be upset over the new "vacuum" and the possibility of the Soviet Union moving in.

In short, it wouldn't be good politics for America to arbitrarily pull out of the Philippines without a long-range plan of action.

Writer Gatbonton, out of Manila, noted that President Marcos has defined three issues still unresolved in the bases negotiations between the Philippines and the United States. These are the manner and nature of rental payments; the powers to be vested in Filipino commanders of the bases; and the kinds of weapons to be allowed on the bases. All are critical.

The rental figure that has been mentioned by American sources is $200 million annually over a contract period of five years. This is roughly equivalent to what the U.S. is planning on paying the Spanish government. It is also roughly double the present volume of annual American aid.

The $200 million figure, Gatbonton says, is probably acceptable to Marcos. However, Manila objects to the payments being described as "aid", which connotes one-sided charity, whereas rental connotes reciprocity and mutual benefit.

That makes sense to us. The word aid isn't realistic. It is a subterfuge, a coverup. The U.S. is paying the Filipinos for the use of a portion of their islands for our own national interest.

Gatbonton suggests that the questions of what powers the Filipino commanders should have and what kinds of weapons should be allowed on the bases are related. Politically, the most sensitive weapons are, of course the nuclear ones.

The Japanese have always insisted that no nuclear weapons be stored at the American bases within their territory. This has caused a lot of problems, particularly in Okinawa. The Japanese wax indignant even in the midst of a typhoon when our B52s from Guam are flown to Kadena. Gatbonton says Chinese maps routinely identify the U.S. stations at Clark and Subic as part of the ring of American nuclear bases containing Communist power on the mainland.

The issue of nuclear capability was not anticipated when the bases treaty was arranged in 1945. And, as you might imagine, the fact that the Philippines would be an immediate target in the event of an all-out nuclear war must be strongly considered by the Filipinos. Still, up to now, the subject of the bases becoming magnets for enemy nuclear attacks has never been brought up, by the Filipino government.

The use that can be made of the bases in the Philippines will enter into whether or not the bases are worth the cost. If the Filipinos, like the Japanese limit the use of nuclear weaponry on the bases then the bases' effectiveness drops to the point where they might not be worth the payments. The U.S. couldn't use the Filipino bases for "offensive" action, for instance.

The U.S. already has some problems in use of the bases, although they really are enclaves of extraterritoriality. When Saigon fell, it was unilaterally decided by the U.S. to fly the refugees into Clark, and to ship them into Subic. No deal. Marcos, aware that the world was watching, turned thumbs down on that plan, and at the last minute the hordes of refugees were shifted to Guam.

If the Philippines limit the type of weapons that can be brought into the country, and if the bases have Filipino commanders, and if the host country tries to control the type of interventionism, then we can't see the point of staying in the Philippines at all.

It is time to consider a long-range pullout of our forces in the Philippines. The insight article concluded: "Even if the current stalemate on the bases is resolved, it is unlikely that the bases will stay for much longer. Significantly, the American figure for "aid" was stated over a five-year term. The situation in our part of the world five years from today will probably look even more different than the current situation. What the Filipino and American negotiators need to do is agree on a transition period for phasing out the bases and psychologically preparing both countries for life without them. In this way acrimony will be avoided and misunderstanding minimized."

That makes sense. We value highly the friendship of our Filipino friends. We don't want the bases to become a wedge between the two countries.

We think the handwriting is on the wall. The five-year base treaty probably will be accepted because anything less would cause great concern, and would disrupt the Filipino economy. But, once the die is cast, Guam and the Northern Marianas should begin pressuring the military to announce its future plans—so that we can make plans of our own for the accommodation of much of this military increase. JCM.

MINIMUM WAGE BILL: THE UNEMPLOYMENT ACT OF 1977

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. ERLENBORN. Mr. Speaker, it is no news to Members of this House that the pending minimum wage legislation could be the most important economic legislation to be faced by this session of Congress.

It should be no news, either, that unless this bill is either outright rejected, or drastically amended, it would, in the opinion of knowledgeable persons, be the most damaging piece of economic legislation in many, many years.

The trouble is, I firmly believe, that the idea of increased minimum wages is superficially attractive to those who judge the economic impact solely on the basis of the words "minimum wages." Of course, the idea looks like a blessed benefit for the poor.

Unfortunately, Mr. Speaker, when subjected to even elementary analysis, the pending minimum wage legislation is clearly deceptive. It would be a shuddering disappointment to the poor who have had their hopes raised by those who have been touting the idea that such legislation would be the pot of gold at the end of the rainbow.

I would like to bring to the attention of the Members of the House perhaps one of the most thoughtful editorials on the impact of minimum wage increases I have seen. The Washington Star of March 27, 1977, calls the current proposals an "Escalator for Wages." The writer asks a question we must all ask ourselves, when this legislation comes before the House:

> Is a higher minimum, especially at $3, or even $2.85, a measure of "economic justice to the poor"? Or is it a measure that could push tens of thousands of marginal workers out of jobs, while softening resistance to unionization, especially in the South?

I think it especially significant, as the editorial points out, that Dr. Arthur Okun, a former Chairman of the Council of Economic Advisers, told the Senate Budget Committee just last week that the $3 minimum demanded by organized labor would be "The most inflationary action taken by Federal Government in modern history," and termed it a "disaster."

Mr. Speaker, under leave to extend my remarks, I include the following editorial from the Washington Star of Sunday, March 27, 1977:

ESCALATOR FOR WAGES

When Labor Secretary Ray Marshall unveiled the administration's "compromise" policy on minimum wage legislation (a boost from the present $2.30 to $2.50 an hour, with "indexing" at 50 per cent of the average factory wage) one might have thought he had come out for the restoration of peonage.

Mr. George Meany, summoning his teariest tones, deplored the plan as "a bitter disappointment to everyone who looked to this administration for economic justice to the poor."

That's the sentimental way of saying that the AFL-CIO would like the federal minimum wage jumped to $3 an hour, with indexing provisions to keep it at 60 per cent of the average factory wage.

What is the case for sentiment? No subject of national economic discussion remains so stuck in the pieties of the 1930s. We are still mesmerized by memory; for the establishment of a floor under wages (at 40 cents an hour) was—39 years ago—a victory for workers over a class-conscious interpretation of the right of contract, interpreted as a right to employ on any terms, however degrading.

Today, the majority of American industrial workers earn far more than the minimum, and a vastly more sophisticated knowledge of the cross-currents of the job market is available. One may afford a somewhat more dry-eyed view. The relief of poverty may be an issue in the minimum wage battle. But there are many others.

Before deciding that this is the year for a major adjustment in the minimum wage, Congress ought to ask a number of questions:

Is a higher minimum, especialy at $3, or even $2.85, a measure of "economic justice to the poor"? Or is it a measure that could push tens of thousands of marginal workers out of jobs, while softening resistance to unionization, especialy in the South?

Is minimum wage "indexing"—tying the minimum to a constant percentage of the average hourly industrial wage—a device of unwelcome inflationary pressure?

And what, precisely, is the effect of an ever-rising minimum wage level—not a floor but an escalator—on the availability of low-skill jobs? Some industries with slack in their costs can absorb higher wage levels. Others, working at the margins, cannot do so and must turn to technological change that at best trades many low-paying jobs for a few high-paying jobs and worsens the plight of the unskilled. "Just how many jobs would disappear is not known," speculates a recent *New York Times* editorial, but "rough calculations put the figure between 200,000 and one million."

All these are hard but not unanswerable questions Congress ought to ask before taking Mr. Meany's visions at face value.

The key question, considering the general public interest, is what a higher minimum wage would do to the price index. Inflation, once out of hand, can erase the initial advantage of wage increases for those who get them and set back those who do not.

At a Senate Budget Committee hearing last week on the 1978 budget, Dr. Arthur Okun, a former chairman of the Council of Economic Advisers, took a dim view of the $3 minimum sought by organized labor.

"A jump like that," he said, "is something like a 2.5 per cent wage increase across the board, and . . . will be paid for by consumers and set off a new inflationary spiral. In that sense it would be a disaster."

"A disaster?" asked one senator. It would be, Dr. Okun went on, *"the most inflationary action taken by federal government in modern history* (emphasis ours) . . . This doesn't mean the $2.30 minimum wage ought to remain forever, but the jump from $2.30 to $3 would be a very major increase, unprecedented in the history of the minimum wage."

If Dr. Okun is right—and he speaks with authority and scarcely from an anti-labor point of view—it is either naive or cynical or both to speak of minimum wage legislation as if the only thing at stake were "economic justice to the poor." Like other governmental interventions in the economy, the legislative adjustment of wage floors (especially when floors are converted into escalators) has intricate effects on the price index and the structure and functioning of the job market. Not all the effects are necessarily constructive, even for the poor. Where, then, will the escalator go? And who will be on it?

THE AMERICAN BALD EAGLE

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. JONES of Tennessee. Mr. Speaker, on June 20, 1782, the bald eagle was formally adopted as the emblem of the United States of America, a living symbol of our Nation's strength and freedom. Today it is fighting for its life.

With the problems that have plagued our national symbol in recent years, it is always encouraging to find people today who are willing to work in order to preserve and promote an American tradition so admired as the American bald eagle. As a Representative of the Seventh Congressional District of Tennessee, I am especially proud that at least two such people are my constituents.

Reelfoot Lake is an 11,000-acre natural lake located in the extreme northwest portion of Tennessee. Formed in 1812, by an earthquake, Reelfoot serves as one of the few winter homelands for the bald eagle in the United States. Because the bald eagle's diet is about 95 percent fish, Reelfoot's ready-food supply—fish—and relatively mild winters—ice-free water—make it ideal for 100 or more of this distinguished predator.

Recently a young photographer, Dale Beard, who is a native and lifelong resident of Reelfoot Lake, set out to do what he could to promote both respect for the American bald eagle and insight into the beauty of Reelfoot Lake. He has undoubtedly accomplished both in his remarkable photograph of the inspiring eagle atop the cypress of Reelfoot. Dale has developed a limited edition print of his work that will allow others to take pride in our country and its heritage. Thanks to Dale one of those prints, framed in cypress from a Civil War barn, hangs in my office so that people from near and far may have an opportunity to look upon the natural symbol of American pride. Therefore, I invite each of you to visit my office and this unique display.

Another young man has been instrumental in both preserving and promoting the American bald eagle. He is Steve Pardue, naturalist at Reelfoot Lake State Park. The work that Steve has done has come to my attention from various sources and I am proud to bring his dedication and hard work to the attention of others.

Reelfoot is a source of pride to west Tennesseans as the American bald eagle is to Americans. Through his work at Reelfoot in general and with the eagle in particular, Steve has helped to spread the pride that we have in Reelfoot Lake to many visitors and other States. By conducting an eagle watch program, Steve has helped to add yet another dimension to the hunting, fishing, and camping of beautiful Reelfoot Lake, as well as restoring a sense of pride and dedication in America to many people as they are able to personally view the majestic beauty that abounds in the bird that truly symbolizes America.

For thousands of years, the bald eagle has been a source of inspiration to mankind. They appear throughout history in art, literature, and religion as symbols of majesty and independence, spiritual aspiration, and divine power.

It is encouraging and inspiring to see people take pride in their country, heritage, and future. But it is even more so to see young people such as Dale and Steve, working so that others may take pride. Our thanks to them.

SACCHARIN

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. MARTIN. Mr. Speaker, I am pleased to announce that my bill, H.R. 5166, now has 148 cosponsors who agree that the Delaney clause needs to be amended and saccharin kept on the market.

The saccharin controversy presents Congress with the necessity for amending the Delaney clause to the food additives law. Saccharin is the first clear case where the absolute zero tolerance standard of the Delaney clause requires a substance to be banned even though its benefits to the general public clearly exceed any remote risk. Saccharin also has the distinction of being slated for a ban based on consideration of less valid evidence when far better evidence—tests on monkeys and public health statistics on human illness—show that normal use of saccharin poses no risk to the public.

Yet the present law requires that the best medical evidence and any consideration of health and nutritional benefits be disregarded. It requires that saccharin be prohibited as a food additive, simply because massive overdose tests on sensitive rats produce a significant increase in bladder tumors.

In general, medical, scientific, and nutritional experts recommend that the Delaney clause be amended to allow reasonable judgment of all the evidence of risk as well as the public benefits. Three former FDA Commissioners have endorsed this approach in principle as have the Director of the National Cancer Institute and a former Director.

Increasingly, it is recognized that obesity predisposes humans to not only diabetes and heart illness, but also to cancer. Accordingly whether saccharin is regarded by some as essential and by others as a convenience, there is no question but that it enables millions and millions of American consumers to maintain their dietary discipline with greater dependability. It is thus an important part of the preventive medicine regimen of those who need to control their weight in order to reduce their susceptibility to each of the three most prevalent fatal diseases. It is also of similar importance to elderly invalids and those who already have diabetes and heart illness as Members of Congress have already learned from their mail.

This effort to save saccharin as a general purpose—as opposed to a more expensive prescription item—nonnutritive sweetener is not a case of producers versus consumers. In fact, it poses a conflict of consumers versus consumer advocates, at least those consumer advocates who insist upon the Delaney absolute. Those who would ban saccharin on the basis of a disregard for its benefits and the best evidence of its safety are in the position of preventing the FDA from acting in the best interests of the health and nutrition of many millions of American consumers.

The Delaney clause should only be amended with great caution; but it clearly should be amended.

WORKERS EXPOSED TO LEAD NEED FEDERAL PROTECTIONS

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. VENTO. Mr. Speaker, a national hearing is currently underway in Washington, D.C., to establish a safe and healthful standard for workers exposed to lead.

Lead is an ancient metal whose health hazards have been known since the days of the Romans, but today there is a renewed attempt to find a level of exposure which will not endanger men or women workers, nor of their children who can be infected by lead particles in the clothing of workers.

Many of our great trade unions are presenting testimony which is of vital importance to the Nation, yet little of this appears in the public press.

I know that many of my colleagues will be interested in the presentations and in the background studies which are behind the positions taken for safer and more healthful lead standards.

I insert an article from Press Associates, "OSHA To Act on Lead Poisoning: Steelworkers Plan Strategy To Win Tough Lead Standards," to be printed in the RECORD:

OSHA TO ACT ON LEAD POISONING: STEELWORKERS PLAN STRATEGY TO WIN TOUGH LEAD STANDARDS

ST. LOUIS, MO.—A. Q. Lewis, who has worked for over 20 years melting down used car batteries for pig lead at a small plant in Indianapolis, Ind., has seen seven co-workers die in recent years from causes believed to be job-related.

Lewis told 130 delegates to the Steelworkers' Lead Conference here, "and the last one was a close friend who spent three years on a kidney machine before he died."

The almost sinister nature of their deaths was the absence of any "official" medical documentation of a work-related nature. "But they knew they were dying from lead poisoning, their families knew it and those of us who still work there knew it," Lewis told the conference.

Dr. Richard P. Wedeen, professor of medicine at the New Jersey Medical School and director of the New Jersey Medical Center, provided scientific documentation of the dangers of lead contamination to those who work in the industry.

"When I began my research I found that American medical literature did not recognize any occupational disease to the kidney, or lead nephropathy," Wedeen told the conference. "Yet there is overwhelming evidence that excessive blood leads in the body will result in kidney breakdown and ultimate failure."

Wedeen, conducting clinical examinations of 141 workers in lead-related occupations in New Jersey while operating with a research grant from the Steelworkers, found a ten percent incidence of lead nephropathy.

"This could mean that upwards of 100,000 lead workers may have lead poisoning in the United States," he declared. The government estimates that one million workers are in lead-related industries.

Steelworkers' President-elect Lloyd McBride opened the conference by serving notice the union will fight for tougher standards on lead at Washington, D.C. hearings in mid-March. The steel union plans more than 17 hours of testimony from lead workers, medical experts and union safety and health technicians at the hearings of the Occupational Safety and Health Administration.

McBride is Director of District 34 here, where as many as a third of the 20,000 Steel workers in lead smelter and refining operations are located.

George Becker, the union's safety and health representative, served as conference chairman. Becker won praise from the scientific panel for his successful efforts in getting the government and medical experts to investigate the lead problem.

Claudia Miller, USWA Industrial Hygenist, detailed the proposed OSHA lead guidelines and stressed that contamination criteria should be based on lead particulates in the work environment rather than the readings of testing machines. While machines are valuable for determining damage to various parts of the body, Miller and other conference participants stressed that the only meaningful approach to lead in the workplace is to prevent exposure to workers.

Studies conducted among USWA members at battery plants in Indianapolis and Vernon, Calif., as well as New Jersey, revealed workers with evidence of nerve damage, premature aging, abdominal colic, kidney failure and even symptoms of brain damage. The studies in Indiana and California were conducted by a medical team of more than a dozen physicians and technicians, four of whom made presentations here.

Lead smelters in particular have been a continuing source of disease, reported Dr. Alf Fischbein, Dr. Ruth Lilis and Dr. William E. Blumberg, who have been part of the Mt. Sinai Hospital School of Medicine investigation team which interviewed union members last year. The inquiry was headed by Dr. Irving Selikoff, considered one of the nation's foremost researchers in occupational medicine.

An additional study by Dr. Hector Blejer of the California-based City of Hope medical research facility found electric storage battery plants in Los Angeles as another source of dangerous-level lead exposure.

Along with other members of the Mt. Sinai panel and Dr. Wedeen, Blejer cautioned against the use of drug therapy, especially by physicians unfamiliar with the occupational nature of lead poisoning. The complications of exposure were stressed by Dr. John Repko of the University of Louisville, who detailed the behavioral problems which can result, including loss of hearing, eye-hand coordination and body balance.

Dr. William Lloyd, USWA staff epidemiologist, said the history of lead as a health hazard is ancient, being blamed for the decline of the Roman Empire. However, there has been no serious attempt by the industries which employ as many as a million workers who risk exposure to lead to provide any protection, he said.

One example of the union's initiative was at the Granite City, Ill., lead smelter of NL Industries, which has 200 members of Local 6496. The plant was found to have "toxic exposure to lead" by the National Institute of Occupational Safety and Health only after the USWA asked for evaluation.

Dramatic evidence of the problem was demonstrated at the three-day conference, where the Mt. Sinai staff conducted a blood test by computer device that instantly measures the relative degree of lead exposure. While a reading of 30 by persons not exposed to lead is normal, a majority of the USWA members at the conference had readings in excess of 100, with several recording 250 or more.

Arthur Rucker, president of Local 735 in Cleveland, said that pressure must be placed on employers to provide testing devices as well as the preventive measures sought in OSHA guidelines. "Why can't they certify physicians to treat lead exposure cases, just as they do for other specialties?" he asked.

Dr. Ken Bridbord of NIOSH reviewed the agency's recommendations for a lead standard, and covered the effects of lead on reproduction. Virtual exclusion of women from the lead industry was cited as acknowledgement by companies in this sector that lead is harmful, but the response has been to "an adverse public opinion, concerned with the affects on pregnancy and children." Pregnant women who may be exposed to lead should leave the workplace, Dr. Lilis emphasized.

Canadian delegates circulated a company publication of a leading employer in Canada of lead smelter workers, which asserted that life expectancy of lead smelter workers exceeded that of "average workers," concluding that "trace elements (lead) found in humans are not only harmless, but essential to good health." The consensus at the USWA Lead Conference, however, was just the opposite, and pointed toward an alarming disregard toward the health and welfare of thousands of lead workers.

U.S. CAMPAIGN TO SUPPORT ARGENTINE REVOLUTIONARY TERRORISTS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. McDONALD. Mr. Speaker, from 1970 through 1975 Cuban-trained and supported Marxist and Trotskyite terrorists conducted increasingly well-armed and sophisticated attacks on the citizens of Argentina. They were joined in 1974 by the Montoneros guerrillas from the leftwing of the Peronist movement. And due to the opportunism of the aged Juan Peron, and the incompetence of his widow and successor, Isabel, with her retinue of corrupt administrators, Argentina had entered a state of de facto civil war by the time moderate, anti-Communist officers of the Argentinian Army deposed Mrs. Peron in an orderly, nonviolent coup just 1 year ago.

During the past year, approximateley one-half of the armed revolutionary terrorists have been killed in shootouts with police and army forces. Although revolutionary terrorism has been diminished, the civil anarchy caused by the Marxist-Leninists continues with criminal gangs taking advantage of the revolutionaries' kidnaping techniques at the rate recently of three victims per hour. Criminals have found that everyone is worth something to someone; and kidnap relatives of store clerks, working people, teachers, and doctors for small ransoms amounting to whatever close relatives might reasonably be expected to have available in a bank. Furthermore, various gangs of thugs calling themselves the Argentine Anticommunist Alliance (AAA) have engaged in random acts of terrorism. These criminals have undermined public order and have actually aided the Marxist terrorists by further polarizing the country, and driving moderates into the ranks of extremists.

Argentina under the Perons had been made a haven for pro-Soviet, Castroite and Trotskyite revolutionaries from many Latin American countries. A large number of leftists who had been given refuge by Allende in Chile moved to Argentina legally and illegally after Allende's downfall in September 1973. Now the revolutionary terrorists and their sympathizers and supporters find themselves equally unwelcome in Argentina and are dispersing to Paris, Lisbon, Caracas, Mexico City, and other capitals.

It is apparent that sufficient numbers of Argentinian Marxist-Leninists have entered the United States to form their own organization and work alongside American Castroites and New Leftists against the Movimiento Antimperialista por el Socialismo en Argentina (MASA) (Anti-Imperialist Movement for Socialism in Argentina) first came to attention in this country in 1975. MASA has been active in cosponsoring demonstrations with a number of other groups composed primarily of foreign Marxist-Leninist nationals such as Chile Democratico (headed by the late Orlando Letelier), the Union of Democratic Thais, Iranian Students Association, Union of Democratic Filipinos, Association of Vietnamese Patriots in North America, and others. U.S.-based radical groups working with MASA include Non-Intervention in Chile (NICH), National Coordinating Center in Solidarity with Chile (Chile Solidarity Committees), Venceremos Brigade, Puerto Rican Socialist Party, Puerto Rican Solidarity Committee, Communist Party, U.S.A., Workers World Party, Prairie Fire Organizing Committee, Committee To Free the Five Puerto Rican Nationalist Prisoners, the Committee for the Defense of Human Rights in the Dominican Republic, CASA-General Brotherhood of Workers, and the New American Movement.

MASA operates from P.O. Box 134, Times Square Station, New York, N.Y. 10036; from P.O. Box 4388, Berkeley, Calif. 94704; and from P.O. Box 17728, Los Angeles, Calif. 90018.

In its literature, MASA supports both the Castroite/Trotskyite terrorist Ejercito Revolucionario del Pueblo (ERP) and the Montoneros which have been working in alliance for several years. Also given praise by MASA is the Junta de Coordination Revolucionaria (JCR), the "terrorist international" formed by the Castroite and Trotskyite terrorists of Argentina (ERP), Chile (MIR), Uruguay (Tupamaros), and Bolivia (ELN) in 1974 which takes its inspiration from the message read to the January 1966 Tricontinental Conference in Havana at which Castro set up the formal mechanism for his export of revolution around the world.

It is worth while in the present context to consider what Guevara said in that message. He predicted that the creation of many coordinated small terrorist focuses throughout the Third World would require our country to produce large amounts of arms and counterinsurgency to aid the governments under attack, possibly including military advisers and troops. Said Guevara:

It is the road of Vietnam; it is the road that should be followed by the masses; it is the road that should be followed in America, with the special characteristic that the groups in arms may form something like coordinating councils to make more difficult the repressive efforts of Yankee imperialism and facilitate our own cause.

The international revolutionary coordination from Havana has been able to drive a wedge between America and Argentina just when we should be aiding the Argentinian people in restoring the fabric of their society rent by revolutionary and criminal terrorism.

Guevara's speech is also worth rereading as a guide to the mentality of the revolutionaries who make up the JCR. These are not the "détente" Marxist-Leninists who are willing to take power by any means, even by playing the electoral game as in Chile. These are the hard-line advocates of terror and armed struggle. Said Guevara:

* * * we will follow the perennial example of the guerrilla, carrying out armed propaganda * * * that is the propaganda of bullets, of battles won or lost—but fought—against the enemy.

* * * * *

Hatred as an element of struggle; relentless hatred of the enemy that impels us over and beyond the natural limitations of man and transforms us into effective, violent, selective and cold killing machines. Our soldiers must be thus; * * *

We must carry the war as far as the enemy carries it: to his home, to his centers of entertainment, make it a total war. * * * Then his morale will begin to fall. He will become still more savage, but we shall see the signs of decadence begin to appear.

* * * * *

This means a long war; and we repeat once more, a cruel war. Let no one fool himself at the outstart and let no one hesitate to begin in fear of the consequences it may bring to his people.

Guevara repeatedly emphasized the international aspects of the Marxist-Leninist struggle for world power:

* * * we must bear in mind that imperialism is a world system, the last stage of capitalism—and it must be defeated in a great world confrontation. The strategic end of this struggle must be the destruction of imperialism. * * * In envisaging the destruction of imperialism, it is necessary to identify its head, which is no other than the United States of America.

* * * * *

And let us develop a true proletarian internationalism, with international proletarian armies; * * * so that to die under the flag of Vietnam, of Venezuela, of Guatemala, of Laos, of Guinea, of Colombia, of Bolivia, of Brazil * * * be equally glorious and desirable for an American, an Asian, an African, or even a European.

In this context it is considered significant that MASA documents have stated the organization believes "conditions in the United States are very favorable for solidarity work" and that—

Our people's experience in struggle will be an effective contribution to the process of class struggle in this country. We and the North American people have a common enemy: the capitalist system and imperialism.

Among the Marxist-Leninists, the phrase "solidarity work" covers everything from picketlines to acts of transnational terrorism.

Demonstrations of the more ordinary

variety of street-level "solidarity work" occurred on Thursday, March 24 to mark the first anniversary of the military takeover in Argentina.

The events opened with a small ecumenical service held at the Church Center for the United Nations which was organized by Jim O'Callahan of Clergy and Laity Concerned (CALC), one of the militant anti-imperialist organizations which has been defending the Vietnamese Communists imprisonment of an estimated 300,000 persons in "reeducation" and slave labor camps.

Sponsors of the "service" were the National Council of Churches Office for Latin America and the Caribbean; Union Theological Seminary; the United Methodist Church, Women's Division; the Ecumenical Committee; and the Washington Square Methodist Church. Principal participants included O'Callahan; David Calce; and Paul Mayer of Union Theological Seminary, an active defender of the Vietnamese Communist regime and board member of the July 4 Coalition of U.S. Castroite and New Left organizations.

During evening rush hour 250 persons demonstrated at the Argentine Consulate on 56th St. The demonstration was organized by MASA and the Committee for Democracy in Argentina, 339 Lafayette Street, New York, NL 10012. The demonstrators demanded an immediate end to all U.S. Economic involvement, private sector as well as government, in Argentina.

With the customary inflamed rhetoric, the demonstrators claimed that 50,000 persons had either disappeared without a trace or had been jailed for their "political beliefs." No mention was made of anyone jailed for their acts of political terrorism against the Argentine people. Generally the speakers tossed about the tired old catchwords which substitute for having to think and analyze objectively. "Imperialist," "Nazi," "torture" and "fascist" were the favorites.

MASK did not believe the present rupture of cordiality between the United States and Argentina was sufficient, and demanded an end to all U.S. private sector economic involvement in Argentina.

MASA's cosponsors for the demonstration provide an excellent example of Castro's tricontinental support for Marxist-Leninist revolution. Many of these organizations I have previously discussed. Sponsors included two Palestine Liberation Organization support groups, the Palestine Information Committee and Friends of the Palestinian Revolution; the violence-prone Iranian Students Association; the Prairie Fire Organizing Committee, an overt branch of the terrorist Weather Underground Organization, and its newspaper, City Star; the Tricontinental Film Center, which states it is being investigated by the Justice Department for possible violation of the Foreign Agents Registration Act; the Southern Africa Committee, which has announced it is also having foreign agents registration difficulties; NACLA—the North American Congress on Latin America, "intelligence-gathering arm of the movement"; the Irish Republican Clubs, the support group of the pro-Soviet "official" wing of the terrorist Irish Republican Army; and the militant Trotskyite Communist Workers World Party which a number of the leaders of a "terrorism now" faction expelled from the Socialist Workers Party have joined. Another militant Trotskyite faction, the Spartacist League, and its front, the Partisan Defense Committee, were represented in the crowd. Both of these Trotskyite factions are vocal admirers of the JSR and its "terrorism now" stance.

The sharply leftward drift of the new American movement was indicated by the presence of Friends of Santucho, Box 239, 161 E. Houston Street, New York, N.Y. 10002, which has applied to become a chapter of NAM to be called Santucho NAM. Roberto Mario Santucho was the founder and leader of the ERP. He was killed in a shootout with the Argentine authorities on July 19, 1976.

The sponsors as listed by MASA were:

Anti-Imperiialist Movement for Socialism in Argentina.
El Comité M.I.N.P.
N.I.Ch.
Third World Coalition: Latin American Task Force (AFSC).
Friends of Haiti.
O.P.H.R.I.Ch.
Tricontinental Film Center.
Workers World Party.
Youth Against War and Fascism.
Prairie Fire Organizing Committee.
F.U.S.P.
Venceremos Brigade.
Fight Back.
United Black Workers.
N.A.C.L.A.
Partido Socialista Puertorriqueno (P.S.P.)
Union de Estudiantes Sudamericanos—Hostos College.
Union Nacional de Panameños.
U.S. Committee for a Democratic Argentina.
New York Socialists (Socialist Party U.S.A.)
U.S. Committee for Panamanian Sovereignty.
City Star.
The Guardian.
War Resisters League.
Patrice Lumumba Coalition.
Jewish Socialist Community.
ZANU Support Committee.
People's Democratic Association.
Colectiva de Mujeres Latinas.
Jewish Socialist Youth Bund.
P.A.S.O.A.
Action for Women in Chile.
Iranian Student Association.
Blacks in Solidarity with South African Liberation.
Comite Antifascista Chileno.
American Indian Movement (International Indian Treaty Council).
Native American Solidarity Committee.
Mass Party Organizing Committee.
Irish Republican Clubs.
Puerto Rican Solidarity Committee.
Partido Revolucionario Dominicano.
Fourth of July Coalition (New York).
Frente Colombiano por el Socialismo.
Indian People's Association of North America.
Southern Africa Committee.
Palestine Information Committee.
Friends of the Palestinian Revolution.
Comité de los Cinco Nacionalistas.

The week's activities in solidarity with the Argentine terrorists concluded with a Saturday night showing of an Argentinian revolutionary movie, Los Traidores, at the New York University Catholic Center on Washington Square South. The meeting was organized by MASA, the Puerto Rican Socialist Party, the militant Puerto Rican and Dominican group called El Comite-MINP (Movement for Puerto Rican National Independence), and the Workers World Party.

Clearly as the U.S. revolutionaries build an anti-Argentine campaign there is a possibility that the accompanying "solidarity work" will include bombings or other acts of terrorism against Argentine consulates and against U.S. businesses with branches in that country. U.S. Federal and local law enforcement agencies have the responsibility to prevent acts of violence, and in particular the sort of "experience in struggle" which has brought havoc to civilization in Argentina.

JOB ENRICHMENT

HON. HERMAN BADILLO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. BADILLO. Mr. Speaker, today the New York Times carried a very perceptive article by Mr. A. H. Raskin, calling attention to a measury by my colleague, Mr. LUNDINE, that is designed to foster projects in the private industry to increase job security through cooperative endeavors by employers and workers to redesign job, upgrade skills, spur productivity and increase job satisfaction.

H.R. 29, which I cosponsored, has the strong support of the distinguished chairman of the Banking, Finance and Urban Affairs Committee, Mr. RUESS. The Economic Stabilization Subcommittee is scheduled to hold a second day of hearings on this bill tomorrow, March 31, 1977. The article is an interesting one and I commend it to my colleagues:

A MOVE FOR JOBS ENRICHMENT AND HUMANIZATION OF WORK

(By A. H. Raskin)

WASHINGTON.—Contrary to popular belief, Michael Maccoby did not spring full-armored out the primordial ooze as a stalker of victory-obsessed team captains in corporate executive suits. Long before his book "The Gamesman" started zooming up the best-seller list, Dr. Maccoby had won renown among social scientists as chief theorist for an experiment in work humanization that has been transforming fundamental attitudes toward work, productivity and industrial democracy at a Tennessee auto-parts factory.

Last week, over French toast at breakfast in the Capitol, the soft-spoken director of Harvard University's project on technology, work and character joined a legendary pioneer in reshaping the workplace, Einar Thorsrud of Oslo, in outlining to three influential members of Congress ideas that may help speed the United States along paths of labor-management innovation long familiar in West Europe.

The first thrust in that direction will begin tomorrow when the economic stabilization subcommittee of the House Banking Committee opens hearings on a bill sponsored by the host at that breakfast, Representative Stanley N. Lundine, Democrat of Jamestown, N.Y. The measure has strong support from the two other legislators at the session—Representative Henry S. Reuss, Wisconsin

Democrat, who heads the full Banking Committee, and Senator Jacob K. Javits, New York Republican, who has introduced a companion bill in the upper chamber.

The bill would make available $40 million in Federal grants to foster projects, primarily in private industry, to make employment more secure through cooperative efforts by workers and employers to redesign jobs, upgrade skills, spur productivity and heighten job satisfaction.

As Mayor of Jamestown, N.Y., before coming to Capitol Hil, Mr. Lundine helped demonstrate practicality of such ventures by presiding over development of a community-wide labor-management committee that was instrumental in cutting local joblessness from 10.2 percent to 4.2 percent in a three-year period when the rest of the country was slumping into recession.

The Lundine bil faces formidable obstacles. Most of organized labor is cool to quality-of-work experiments for fear that they can be exploited by nonunion employers to build a wall * * * corporations oppose them on the ground that they tear down traditional lines of authority and thus undermine plant discipline.

Within the Federal Government, jurisdictional jealousies between vested interests in the Labor and Commerce Departments could wreck the new initiative just as they have orphaned and abandoned the supposedly independent National Center for Productivity and the Quality of Working Life, which Congress chartered two years ago.

But roadblocks like these are not insuperable, in the judgment of so seasoned a legislative tactician as Representative Reuss. As one who believes "small is beautiful" when it comes to ventures to generate jobs through Federal stimulus, Mr. Reuss considers the Lundine approach a sensible one that involves no risk of enormous additions to the deficit and that stands a much better chance of Congressional approval than would most bills put forward by a sophomore on Capitol Hill.

The experience Dr. Maccoby has gained from four years of wet-nursing the job-enrichment program that he and Dr. Thorsrud cooperated in installing at the plant of Harman International Industries Inc., in Bolivar, Tenn., offers persuasive support for more experiments, though both experts stress that no single pattern can succeed if it is applied mechanistically in a different setting.

"Ideas for change must come from all levels, top to bottom," Dr. Maccoby said, "but it requires exceptional leadership to release the creativity that exists within the work force." The crucial initial factor at Harman was the intense support given the project by Irving Bluestone, an international vice president of the United Automobile Workers union, and Dr. Sidney Harman, president of Harman International until his nomination by President Carter in January to be Under Secretary of Commerce.

The workers at Bolivar, half of them women, formed teams to perform various operations involved in the preparation, painting and packing of auto mirrors. They decided among themselves who would do what jobs, kept their own records, covered for one another in periods of absence and worked out an intricate formula for sharing with management the labor-cost savings that have resulted from the project.

The improved communications and mutual trust built up at all levels through the establishment of clear principles for joint decisionmaking and increased job autonomy paid off this month in the remarkable conclusion of a new wage agreement—three months ahead of schedule—without any intervention by top officers of either company or union.

"That's the real triumph of this project," commented Gus Howard, a worker in the plant's receiving department and head of the local union.

The triumph goes well beyond Bolivar, however. Mr. Bluestone, enthusiastic over the progress there toward breaking down at avistic labor-management hostilities, has enlisted the support of the General Motors Corporation in a much more embracing experiment in job enrichment under union-company auspices at dozens of G.M. plants.

Similarly, now that Dr. Harman is going into Government, the Beatrice Foods Company of Chicago, a huge conglomerate, that is in process of absorbing his company, has assured Dr. Maccoby that one of the chief points of attraction is the harmonious and productive relationship that the project achieved. And Dr. Harman himself, as Commerce Under Secretary-designate, is scheduled to lead off for the Administration at tomorrow's hearings on the Lundine bill, embodying precisely the principles that underlay his own experiment.

For Dr. Thorsurd, the Norwegian expert, who has been involved in guiding more such ventures throughout the world than any other social scientist, the potential benefits seem boundless. He enthralled the Capitol breakfast guests with his description of the retraining programs that Norway instituted with unemployment insurance funds when the nation's idleness rate reached what was considered a calamitous level of 2 percent at the low point of the recession.

As Dr. Thorsrud described it, the greatest success in equipping workers with new skills (through a combination of on-the-job training and community vocational schools) came in plants with active programs for workers to participate in industrial decisionmaking. Senator Javits found in the Thorsrud report new ammunition for his pet campaign to convert the $17 billion a year that the United States now spends on unemployment insurance into something more substantial than a substitute for welfare.

THE NEED FOR A NATIONAL HEALTH POLICY

HON. MATTHEW F. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. McHUGH. Mr. Speaker, later this year we can expect the administration to present its proposals on national health insurance. During the campaign last year President Carter repeatedly indicated his support for such a program, although he wisely did not bind himself to particular details at that time.

I do not serve on any of the committees that will have initial responsibility for considering national health insurance, Mr. Speaker, but this is an issue that is raised constantly in my district. Invariably, and regardless of the setting, strong support is expressed by the average citizen for health insurance in some form. Many of you have reported similar sentiments in your districts. The combination of the President's commitment to act and the public's desire for it will surely result in our having to deal with the issue in the 95th Congress.

THE ROOTS OF PUBLIC DISSATISFACTION

Clearly, the demand for action on the part of the public is a result of deep-seated dissatisfaction, and the reasons for that dissatisfaction are not hard to understand. The costs of health care in the United States have escalated dramatically in recent years, with Americans spending approximately $139 billion on medical treatment in 1976 alone. This represents an increase of approximately 400 percent over what we were spending 15 years ago, and it is estimated that we will be spending twice as much as we are presently spending by 1981.

Moreover, in spite of this dramatic increase in spending for medical care, there is growing evidence that Americans are not much healthier today than we were 15 years ago. We are told, for example, that the average life span has remained essentially constant in the last decade, and that the death rate for middle-aged men has begun to increase.

Numerous other problems have contributed to the growing public dissatisfaction. The maldistribution of doctors and other health professionals between central cities and rural areas on the one hand, and suburban and medium-size urban communities on the other, leaves much to be desired. Then, too, our Nation is aging. As our population grows steadily older, health problems become more serious and intense.

Thus, it is not hard to understand the reasons for public dissatisfaction. However, the simple fact is that solutions to these problems are not easily fashioned. Because national health insurance has been talked about so much, and because it has been held out by so many as an answer to these problems, most people now believe that it is the answer, which helps explain the growing support for Federal action in this area. Clearly, however, many do not fully appreciate the complexity of the problems we face.

National health insurance does not represent a national health policy. To be sure, it may eventually be the centerpiece of a national health policy. By itself, however, it is not going to solve all of the problems that have brought on the dissatisfaction that people feel. By itself, it is not going to make people healthier. Indeed, if it is implemented poorly, it may even aggravate the problems I have mentioned.

Moreover, we are faced with a paradox. While the people clearly want more Federal action, they also believe more strongly than ever that Federal programs have been inefficient and ineffective in resolving pressing national problems. People want these problems solved. However, at the same time, they question whether we can really solve them.

NEEDED: A NATIONAL HEALTH POLICY

To what can we attribute our failure to satisfy the people as regards health care? To some degree, of course, our failure can be traced to the complexity of the problems themselves. For example, in spite of the vast amounts of funds expended on cancer research to date, a solution to this dread disease has eluded our best minds. This is not simply a matter of wasted funds. It reflects the fact that some of these problems are very difficult and complex.

Failure can also be attributed in part to the contentiousness of the various parties involved. The President and Congress have battled over the appropriate

responses to health problems for the last 8 years. The Senate and the House have engaged in intramural squabbling within the House of Representatives itself, a variety of different committees and subcommittees have warred over which shall have jurisdiction over national health insurance. Further complicating the situation, a variety of outside groups have proved more than willing to challenge congressional enactments and executive regulations in the courts.

The basic reason for our failure, however, is that we lack a national health policy. The actions that have been taken over the last decade have not been considered in the context of a whole policy. Programs have been adopted on a piecemeal and episodic basis without excessive regard to consistency. For example, the medicare program pays rural physicians approximately 60 percent less than their urban counterparts because it compensates physicians on the basis of prevailing charges, which are lower in rural areas. Here is a perfect example of a program adopted to solve one health problem—namely, the lack of access by the poor to medical treatment—but which at the same time has aggravated another health problem; namely, the poor allocation of medical personnel between rural and urban communities.

In other cases, programs that have been adopted have worked at cross-purposes. Consider, for example, Federal policy with regard to smoking. On the one hand, the Public Health Service and the Surgeon General are constantly reminding us of the dangers of smoking. On the other hand, the Government continues to subsidize tobacco growers. We provide benefits for victims of black lung disease on the one hand; but we fail to provide sufficient funds for mine inspection on the other. Much of this happens because we lack a coordinated, comprehensive national health policy.

The consequences of our failure are familiar enough. The costs of obtaining health care continue to increase because the present system does not provide incentives to hold costs down. At the same time, the present system does little to improve the overall health of our people because it is geared to treating illness rather than preventing its occurrence. Dissatisfaction is further aggravated because poor administration and the complexity of the system allow much of the taxpayers' money to be siphoned off fraudulently.

My own tentative conclusion is that national health insurance, and the related components of a health care system, must be reconsidered in the light of a national health policy that is both comprehensive and integrated. Such a policy has never been enunciated, but the need for one has never been greater.

GOALS OF A NATIONAL HEALTH POLICY

By its very nature, such a policy must include broad goals, operational objectives, and plans for implementing them. I cannot elaborate in great detail on all of these; however, I would like to share with you what I believe the basic goals of such a policy should be:

First. A national health policy must, first of all, do more to promote good health. It must play a role in helping us to lead more sensible lives. As I said earlier, despite our increased spending on medical care, the health of all of our citizens—rich, poor and middle class alike—has not measurably improved. It seems likely, therefore, that other factors, such as nutrition, environment, and life style have a more significant impact on health than medical care. Yet, we have really not committed ourselves to prevention as a goal. Although we spend over $8 billion on feeding programs, and although there are large gaps in our understanding of human nutrition, the U.S. Agriculture Department spends less than 3 percent of its research budget on human nutrition. Indeed, we spend more for research on animal nutrition than we do on human nutrition. Doctors counsel patients to choose their food more carefully, to exercise, to stop smoking. How effective can such advice be, however, in the face of television advertising? A recent study concludes that on weekdays, over 70 percent, and on weekends, over 85 percent, of food advertising "is negatively related to the Nation's health needs * * *." Americans eat too much, and they eat too much of the wrong kinds of food.

Similarly, recent nutritional studies indicate that the quality of our diet is on the decline with the result that the incidences of certain types of diseases are on the increase. While constantly presented with persuasive messages on the kinds of foods to buy, the consumer has remarkably little information on the nutritional characteristics of the food itself because nutritional labeling is almost nonexistent. People are told that being overweight is not that big of a problem. All you have to do is to buy any one of a variety of gadgets and lose weight while watching television. They are not told the truth, namely, that to lose weight, you have to reduce your caloric intake and exercise properly. All of this points up the distinction between medicine and health. We spend vast sums of money curing diseases that could have been avoided in the first place if we lived more sensible lives. Yet, as Rene Dubos once observed: "To ward off disease or recover health, men as a rule find it easier to depend on the healers than to attempt the more difficult task of living wisely." Somehow that must change, and a national health policy must help bring about that change.

Two. A second goal of any national health policy should be to assure that all citizens have access to necessary medical care. No American should be excluded from this. Poverty should not be a disqualification. The medicaid program, which was first implemented in 1966, has helped many of our poor obtain adequate medical care. But the fact remains that over 25 percent of the poor continue to be excluded from coverage.

Nor can the problem of access be dismissed by pointing to the many private health insurance plans available. These are vital to our current health care system, but over 1 million Americans are denied coverage because the insurance industry considers them uninsurable. An estimated 12 percent of the American people have no health insurance protection at all.

Moreover, poverty and the inability to obtain insurance are not the only bars to access. Place of residence can also be a problem. As I mentioned earlier, many rural and inner-city residents are poorly served because of the difficulty in attracting and retaining doctors and other health professionals. Currently there are 133 counties in the United States populated by approximately 500,000 people in which there is no active physician providing medical care to patients. It does little good to have comprehensive entitlement to health care if the means for actually delivering it are not available.

Thus, universal access to necessary medical care must be the second goal of a national health policy.

Three. Finally, of course, such a national policy must have as a goal bringing health care costs under control. As I said earlier, medical costs have been escalating rapidly in recent years, and at a pace consistently faster than increases in the cost of living generally—as measured by the Consumer Price Index. This is no longer a problem for the poor alone. As we all know, inflation is the rallying cry of the middle class, and rightly so. To illustrate how medical costs affect inflation indirectly, I would point to the case of General Motors. When major steel producers recently announced a 6 percent increase, there was great resistance because of the assumption that the increase would soon be reflected in the price of major durable goods, notably automobiles. However, there was hardly any discussion of the 21 percent increase in health insurance premiums General Motors was required to pay. Yet, the fact is that General Motors pays more to Blue Cross and Blue Shield than it does to United States Steel, its major supplier of metal. We can be sure that this increase in premiums had a read impact on the rate of inflation.

The primary problem, of course, is that there are very few incentives to keep costs down under the current system. Just any kind of national health insurance would not do. We can see through the implementation of medicare and medicaid, and the growth in private insurance, that the wrong kind of insurance, whether public or private, is a contributing factor in the escalation of health costs. Under the present system, both the providers and the consumers of medical services have incentives to give and to take medical treatment, not to limit it to what is essential. This must be changed. A national health policy must not foster the spending of $250 on tests to achieve 97 percent certainty on a particular diagnosis when $50 on tests can provide 95 percent certainty. At the same time, some action must be taken to contain the rapid increases in the costs of malpractice insurance, increases which almost force a doctor to try for 97 certainty. In short, a national health policy must provide incentives to hold costs down.

CONCLUSION

These, then, are the basic goals we should seek to achieve in the development of a national health policy. If we can achieve them through the private sector, and by preserving personal

choices I am all for it. I sincerely hope we can. However, we cannot stand still. The present system is clearly not acceptable to the people at this point in our history.

By the same token, it would be a mistake to adopt a national health insurance plan without knowing that it fits into a comprehensive national health policy—a policy which hopefully can be arrived at with the participation and consent of all the interested parties, including the health professionals themselves.

I believe we are entering a time when critical choices will have to be made. Depending on the choices we make now, the health of our people will improve significantly, or will likely decline, undoing much of the progress made in earlier years. The most crucial decision, it seems to me, is whether we will now develop a national health policy or whether we will continue to improvise ad hoc solutions to these very serious and complex problems.

THE PORK CHOP BRIGADE

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. KOSTMAYER. Mr. Speaker, I rise today to support the President in his challenge to the dam builders.

Last February 21, President Carter announced a review of all Federal water resource projects. Each of the construction agencies—the Bureau of Reclamation, Corps of Engineers, Soil Conservation Service, and the Tennessee Valley Authority—is to screen all authorized projects for which construction funds have been requested for fiscal year 1978.

Secretary Andrus on March 8, listed the criteria upon which the projects will be initially screened. The three criteria are:

First. A project must have no significant negative environmental impact,

Second. No major safety questions must be involved,

Third. The ratio of remaining costs to remaining benefits must exceed 1:1 when computed at the current discount rate of 6⅜ percent.

Those projects not satisfying all three criteria will then undergo further evaluation including a hearing and a complete review of economic, safety, and environmental data. Secretary Andrus further stated that before a final recommendation would be made on a project, consideration would be given to the human factors and the need for the project.

The reaction from Members of Congress to the President's review procedure bordered on hysteria. The "pork chop brigade" moved into high gear, Mr. Speaker. Are we to believe that the Members objecting to the review doubt that their pet projects will survive objective scrutiny?

Judging from the reaction of some of my colleagues I believe this is the case.

Mr. Speaker, we are talking about a lot of money. The 19 projects for which the President initially asked Congress to halt funding will eventually cost in excess of $5 billion. I commend the President for sharpening his pencil and reexamining the merit of those projects.

Some of these projects may be worthwhile. They are intended for flood control, water supply and agricultural use. But many of them are unsound both from an environmental and economic standpoint. The fact that Congress has already appropriated funds for the projects, and that indeed some are underway, does not diminish the validity of the President's challenge.

He must challenge the wisdom of past Congresses, of this Congress, and indeed, of future Congresses. If he does not, who will? Certainly not the other body which on March 10 refused to delete the funds.

The Federal budget is a political document. It grows in direct proportion to the desires of the individual Members of Congress to locate projects such as these water projects within their districts. Congressmen bear no individual responsibility but only a collective one for the increasing size of the Federal budget. It is the President who must bear the individual burden, and therefore it is he, and he alone, who must make these individual decisions, because Congress in its collective greed is simply not going to do so.

I am proud to support him, Mr. Speaker. I believe the American people support him, too.

During his campaign for the Presidency, Jimmy Carter promised to do exactly what he is doing now. Who among us in Congress can be surprised about this review. The President is fulfilling a commitment to those who supported him. He is keeping his promises, Mr. Speaker.

Instead of opposing the President, we should be defending him. My mail indicates my constituents do.

It is time to listen to the people and to the President. Let us call an end to "pork chop" politics. Let us truly trim the fat, Mr. Speaker.

SALUTE TO THE AMVETS

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. ANDERSON of California. Mr. Speaker, those people who are familiar with my record over the years know that I have been a stanch supporter of programs benefiting our Nation's veterans. It is only right that we should be of assistance whenever possible, to those who have helped this Nation in its hours of need. While pursuing legislation, I have often had the opportunity to work with AMVETS—American Veterans of World War II, Korea, and Vietnam.

AMVETS has invariably been in the vanguard of progressive veterans' legislation. As important as this contribution has been to America, it is only one small part of the AMVET story.

The history of AMVETS follows:

THE HISTORY OF AMVETS

Truly AMVETS was born in the midst of war, for it was in August 1943, with victory still two years away, that a new organization, later to be known as American Veterans of World War II, had its beginning. Overseas the tide of battle was turning. Allies had swept through North Africa and Sicily. In the Pacific fighting raged on New Guinea. Thousands of Americans had made the supreme sacrifice. Hundreds of others were being mustered out of uniform with battle wounds and medical discharges. These men who fought in history's greatest war found it natural to seek each other's company. They were united by similar experiences . . . in jungles, in the Arctic, in deserts, in mountains, at sea, and in the skies. Thus, out of such comradeship, AMVETS came to be.

Two independent veterans clubs in Washington, D.C.—one formed on the campus of George Washington University, the other among veterans employed by the government—joined together to sponsor a servicemen's party. By September 1944 other such veterans clubs organized throughout America—in California, Florida, Louisiana, New York, Oklahoma, Rhode Island, Tennessee, and Texas. On November 11, 1944, Veterans Day, an article entitled "12,000,000 in Search of a Leader" appeared in *Collier's Magazine*. This story, written by Walter Davenport, introduced the clubs and outlined their mutual aims—1. To promote world peace, 2. To preserve the American Way of Life and 3. To help the veteran help himself. In December, 18 leaders, representing these nine groups, met in Kansas City, Missouri. There a national organization was formed, and it was on December 9, 1944 the name "American Veterans of World War II" was chosen. The word AMVETS, coined by a newspaper reporter, soon became the official name. The "White Clover", a flower which thrives in freedom throughout the world, is symbolic of the struggle during World War II and is the adopted flower of AMVETS.

In October 1945, two months after the end of World War II, the first national convention was called in Chicago. In 1946 AMVETS petitioned Congress for a federal charter. AMVETS, having displayed dignity and sound approach to National problems, won the deep respect of Congress, and on July 23, 1947 President Harry S. Truman signed AMVETS Charter. The words of the Senate Judiciary Committee echoed throughout the land: "the veterans of World War II are entitled to their own organization" and AMVETS being "organized along sound lines and for worthy purposes . . . having demonstrated its strength and stability, is entitled to the standing and dignity which a national charter will afford." President Truman also commented, "Were I a veteran of this war, I would prefer to have a veteran of World War II looking after my affairs, than a veteran of some other war." To this day no other World War II veterans group has been so honored.

When the war broke out in Korea in 1950 and again during the Vietnam crisis in 1966, AMVETS requested Congress to amend the charter so that those serving in the Armed Forces would be eligible for membership. On September 14, 1966 President Lyndon B. Johnson signed the bill redefining the eligibility dates for AMVET membership—"Any person who served in the Armed Forces of the United States of America or any American citizen who served in the armed forces of an allied nation of the United States on or after September 16, 1940 and on or before the date of cessation of hostilities as determined by the government of the United States is eligible for regular membership in AMVETS, provided such service when terminated by discharge or release from active duty be by honorable discharge or separation." On May 7, 1975, President Ford signed Proclamation 4373 terminating the Vietnam era and the cessation of hostilities; effective May 8, 1975 the Armed Forces became a peacetime service. The result of the proclamation is that military personnel entering

the service for the first time on or after May 8, 1975 are not eligible for AMVET membership.

The first National Headquarters for AMVETS was rented quarters at 724 Ninth Street, N.W., Washington, D.C. Then on April 18, 1952 President Truman dedicated the first AMVETS-owned National Headquarters. This building, a five-story townhouse, was located at 1710 Rhode Island Avenue, N.W. For fifteen years this building served Headquarters and the National Service Foundation. In 1965 AMVETS moved to a temporary location, and the historic townhouse was torn down. On the same site appeared a modern three-story structure of marble and glass. On the 19th anniversary of the signing of the Congressional Charter, July 23, 1966, President Lyndon B. Johnson dedicated the new building. During the program a beautiful life-like bronze bust of the President was unveiled by Mrs. Johnson. The bust is now located in the lobby of National Headquarters. The printing, quartermaster, mailing, programs, membership, public relations, legislative, accounting departments and the offices of the National Service Foundation are housed in the headquarters building.

Hourly from Headquarters a Carillon, donated by Schulmerich Carillons, Inc., chimes and then at specific times musical classics resound through the area. These bells are significant of the other AMVET Carillons throughout the United States. The Memorial Carillon at Arlington National Cemetery to honor the memory of those who died in the service of their country was the first installation. This console is in the Arlington amphitheatre overlooking the Tombs of the Unknowns. It was on December 21, 1949 that AMVETS presented the Carillon to the nation with the message: "While these bells ring, safely rest, freedom lives." AMVET Carillons also are now located at Golden Gate National Cemetery, San Bruno, Calif.; USS Arizona Memorial, Pearl Harbor, Hawaii; Jefferson Barracks National Cemetery, St. Louis, Missouri; State Capitol, Salt Lake City, Utah; Truman Library, Independence, Missouri; Garden of Patriots, Cape Coral, Florida; Federal Building, Chicago, Illinois; Rock Island Cemetery, Rock Island, Illinois; National Cemetery, Marietta, Georgia; Hoover Library, West Branch, Iowa; County Court House, Peoria, Illinois; Camp Butler Cemetery, Springfield, Illinois and VA Cemetery, Houston, Texas.

The "Green Hats" of AMVETS have served the hospitalized veteran, the retarded child, the shoeless orphan, and the lonely serviceman. However, the granting of scholarships has been a major endeavor of AMVETS. Each year many scholarships are awarded deserving students. This program, orginated in 1952, has awarded $250,000 in study grants. Positive Americanism, Youth Programs, Veterans Services, as well as participation in the World Veterans Federation, United Nations, All-American Conference to Combat Communism, and Freedoms Foundation at Valley Forge all means that AMVETS take a realistic approach to the problems of the day.

In 1954 the first AMVET Silver Helmet Award—a replica of the G.I. helmets of World War II—was presented to General George Marshall for his "enormous contributions to the United States in war and in peace." Subsequently Silver Helmets have been presented to other great Americans. Recipients include Presidents Hoover, Truman, Eisenhower, Kennedy, Johnson, Nixon and Ford; Pope Paul VI; Members of Congress, other Government officials, the clergy, military, professions, business and the entertainment world who have made a significant contribution to the welfare of our country and his fellow man. Presentation of the awards is made annually.

A network of trained National Service Officers across the country provide free expert advice to veterans and veterans' dependents. Annually these officers handle thousands of claims and obtain various benefits for the deserving veterans. These involve hospitalization, disability compensation, and educational benefits.

AMVETS keep a watchful eye and take an active part in the legislation on "The Hill." based on the assumption that "the veteran will ultimately benefit from any measure that benefits the nation and, conversely, any program not good for the country as a whole cannot be good for the veteran." AMVETS are especially proud of their roles in the enactment of the "Korean G.I. Bill of Rights" and the "Cold War Bill of Rights." Domestic issues, national defense, and foreign relations are issues of importance and grave concern to AMVETS.

The AMVETS National Insurance Program provides a very complete portfolio of group plans including Life, Hospitalization, High Limit Medical Catastrophe, Income Protection, High Limit Accident, and Cancer Expense insurance for members of AMVETS or the Auxiliary, Sons of AMVETS, Jr. AMVETS, and their family members. The associations and friendships of fellow-AMVETS is without doubt the most valued benefit of AMVET membership. In addition, participation in the many service programs whether it be Americanism, Civil Defense, Traffic Safety, or Rehabilitation, will provide a reward of real personal satisfaction. AMVETS is truly a family organization. Wives, mothers, sisters and daughters of AMVETS are eligible for membership in AMVETS Auxiliary, while sons and daughters between 7 and 17 years of age may join Jr. AMVETS. The Fun and Honor Group of AMVETS is known as the Sad Sacks, while its counterpart in the Auxiliary is the Sachettes. All male descendants, adopted sons, and stepsons of members of AMVETS and deceased members, or servicemen who died and who would have been eligible for membership in AMVETS, (providing the applicant is not eligible for membership in the parent organization) and who is at least eighteen years of age may join the Sons of AMVETS. Each subsidiary organization, including the National Service Foundation, is governed by its own Constitution and elects its own officers; however, all activities are geared to further the aims and purposes of the parent organization, AMVETS.

Time marches on, and AMVETS continue to work to attain world peace so that every man can live fearlessly under free skies, to make the United States an ever-better land of "freedom for all", and to help the veteran, his widow and orphan live happily as contributing members of society.

A partial listing of AMVETS aims and purposes surely provides one with inspiration and can only evoke our best wishes for the continued success of this fine organization.

To serve our country in peace as in war; to build and maintain the welfare of the United States of America toward lasting prosperity and peace for all its inhabitants.

To encourage, in keeping with policies of our Government, the establishment of a concrete plan to secure permanent international peace and to assist in the maintenance of international peace.

To inspire in our membership a sense of responsibility, and to develop leadership for the preservation of our American democratic way of life.

To help unify divergent groups in the overall interest of American democracy.

To train our youth to become purposeful citizens in a democracy with full knowledge of the responsibilities as well as the privileges of citizenship.

To cooperate with all duly recognized existing veterans organizations in the furtherance of the aims of World War II, Korea, and Vietnam veterans.

To insure the orderly return of the veteran to civilian life by protecting his rights as an individual while he is still in uniform.

To expedite and assist in the rehabilitation of the veterans by maintenance of employment services, sponsoring educational opportunities, and providing counsel of insurance, housing, recreation, personal problems, hospitalization, and veterans benefits.

To act as liaison agent between the veteran and the Government.

To provide an organization to encourage fellowship among all veterans of World War II.

To keep the public forever reminded that the veterans of World War II, Korea, and Vietnam fought or served to preserve peace, liberty, and democracy for their Nation.

I joined AMVETS in 1947, and am proud to be a life member of Post No. 2, Culver City, Calif.

WATER PROJECTS

HON. FRANK E. EVANS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. EVANS of Colorado. Mr. Speaker, I would like to submit the following testimony by Representatives JIM WRIGHT and HAROLD T. JOHNSON given before the House Appropriations Subcommittee on Public Works. I commend their statements to your attention:

THE VALUE OF WATER PROJECTS

(Statement of JIM WRIGHT to House Appropriations Subcommittee March 28, 1977)

Today this committee begins its intensive annual examination of water resources projects—what they cost and what they are worth to the nation, its people and its future.

This process has been going on for a very long while. One of the earliest recognized purposes of government, when this republic was in its infancy, was the development of the nation's waterways.

It did not begin there, of course. Works to utilize water for the benefit of the human race can trace their genesis to the book of that name which records the commandment given at the dawn of human history to subdue and replenish the earth.

Since the earliest days of recorded civilization, the tribes of man have marked their progress by erecting impoundments and digging canals and drainage ditches to make the fickle vagaries of nature sustain their lives and serve their ends.

They needed no formalized formulae of benefits to costs. They knew instinctively that water was life, and it could bring death. Today, as then, it is man's most indispensable commodity and man's most useful servant.

Trapped, harnessed and directed by human intelligence, it runs our mills and grows our crops. It powers our machinery and lights our homes, cleanses our waste and moves our commerce.

Unharnessed and left to rampage, it can inundate our cities and our farms, destroy our homes and our hopes, afflict us with disease and death, and carry away to the seas

the fertile topsoil upon which our vaunted civilization rests.

It seems ironic that, almost alone among the works of our government, the development of our water resources is required by law to meet the stern mathematical criteria of benefits-to-costs ratios. No such requirement is imposed upon the funds we spend for weapons—or for highways—or for schools—or for welfare or for foreign aid.

When a manifest need exists for efforts in any of these directions, we move without hesitancy to meet it. Yet none of these activities is more important to the future of man than the development of our water supplies.

The President has asked that we reexamine a number of carefully considered projects and evaluate them anew by even harsher criteria than those set forth in law—the legal criteria by which the committees and houses of Congress have repeatedly examined those very projects in the past.

Certainly no responsible person would contend that any expenditure of government should be immune from sensible re-examination None of us would defend a palpably wasteful activity. Nor should we insist that our past judgments, however carefully rendered, contain any of the properties of infallibility.

But I do believe it presumptuous upon the part of the President's advisors to assume that they can, within a period of sixty days, perform a more enlightened judgment than the judgments performed by Congress after the most exhaustive hearings and reviews which in some cases have been in progress for 20 years and more.

Some of these are projects upon which literally millions of dollars already have been spent, with construction well begun. Most certainly we would need to consider the gross wastefulness of simply abandoning these projects in mid-way.

Recently a Washington newspaper editorialized that all water projects authorized as long as ten years ago should be reviewed before any more money was spent on them.

How, I wonder, would this newspaper react to the suggestion that this same rule apply to all other federally-funded projects—including for example the Washington subway system? Should we consider abandoning it now, with billions rather than millions expended? Should we simply call it off, and leave the elaborate structure of tunnels and tracks and stations half-finished—unused and unusable?

Those who advise the President in this matter have stressed that the interest rate on borrowed money has increased. But borrowed money is used in every program of both government and business, not only in water resources development. Must the benefits hoped from all the other activities of government be subjected to automatic devaluation by applying a discount rate? None of them are.

Far more useful to society and the nation's progress, it seems to me, that we should move in the reverse direction and pursue a conscious policy to bring about a reduction in interest rates.

Indeed, I do believe—and Congress has repeatedly directed—that we should develop some new criteria for the economic evaluation of water resources projects. If we are to magnify our projection costs, due to higher interest rates, how much more we need to increase our projection benefits to reflect the realistic expectation!

The stern, conservative criteria by which benefits are measured have been far too restrictive. They fail to account for benefits which clearly can be seen in the retrospective examination of our nation's water resources development program.

Any impartial review of that program will reveal that it has paid off handsomely in jobs, in measurable commerce, in health and safety, and in its undeniably impressive additions to the gross national product.

On balance, water resources development has paid richer dividends than we have derived from almost any other activity of our government.

FLOOD CONTROL

Let us look first at the benefits flowing from flood control. The nation has invested some $8 billion in a system of 325 completed projects and 150 others which are under construction. Already these projects have prevented more than $53 billion in flood losses—seven times the amount invested in them!

Nor could we reasonably conclude that all or even most of the nation's flood problems have been cured. About half the nation's communities and at least seven percent of its total land area still are subject to significant flooding. In 1972, Hurricane Agnes took 122 lives and damages estimated at $3.1 billion. And in 1973, floods along the Mississippi damaged 13 million acres of land, resulting in losses of almost a billion dollars, even though several billions of dollars in additional damages were prevented by existing flood control works.

RECLAMATION AND IRRIGATION

Next, let's consider the reclamation program which brings precious water to parched and thirsty lands of the American West.

According to a summary issued in January of this year by the Department of the Interior, the food, fibre and forage produced on western lands made useful by irrigation have added about $50 billion to the nation's wealth. And this is eight times the amount invested in those projects.

In 1975, enough food was produced on former desert lands reclaimed by irrigation to feed 36.5 million people for the entire year. This is something to think about as more and more of our traditional farm lands are taken out of production each year to accommodate our population growth, as the spectre of food shortages looms and a hungry world looks increasingly in our direction for sustenance.

Aside from these measurable additions to the nation's wealth and wellbeing, it is necessary to keep in mind that some 84 percent of all federal money spent on irrigation is directly reimbursable to the Federal treasury through the sale of water.

NAVIGATION

And let us consider the benefits of navigation. Traffic on our navigable waterways has increased seven-fold in the past twenty-five years, reaching more than 350 billion ton-miles annually.

Has it justified itself? Almost every waterway project has far exceded the economic usefulness attributed to it by the benefits projections estimated at the time of its authorization.

The Gulf-Intra Coastal Watreway, for example, was originally supposed by the conservative criteria of the Corps of Engineers ultimately to move some seven million ton-miles of commercial freight annually. Last year it exceeded one hundred million ton-miles.

Is the day of navigation ended? At a time when we must consider anew the efficient use of fuel, it seems more vitally necessary than ever. A couple of years ago, the following comparison was made: One dollar's worth of gasoline, or its equivalent in other fuels, would move one ton of freight 5 miles by air; 16 miles by truck; 65 miles by rail; or 333 miles by barge.

That water navigation creates economic wealth for the nation can be seen clearly in the fact that 131 of the nation's 150 largest cities have sprung up along the nation's navigable waterways.

During the past three years, more than $1 billion in private capital has been invested in industrial locations along the Tennessee-Tombigbee Waterway to create new jobs for Americans in the private economy.

Certainly this is worth considering at a time when we need to create some two million new and additional jobs in the private sector each year in order to take up the slack created by automation and to produce useful work for those young Americans coming newly onto the job market.

HUMAN VALUES

These are only a few of the demonstrable and clearly calculable values which inure to the nation through the development of our nation's water resources.

Certainly others are fully as impressive:

The development of potable water supplies for communities . . .

Wholesome outdoor recreational facilities for city-bound Americans . . .

The preservation of the nation's top-soil for future generations . . .

The augmentation of low-flows downstream to abate pollution in the dry seasons of the year . . .

It is hard to put a dollar sign on benefits like these.

Since the nation began, the enlightened conservationists, those interested in a wholesome living environment for the human race, have been those in the forefront of developing our nation's water resources.

In recent years, there has grown up a sort of faddish impression that the development of our water resources for people is somehow inimical to the natural environment since it sometimes disturbs existing habitat for various species of fish and wildlife.

Surely it reduces us to ridicule when at a time of great human and societal need for power we see the spectacle of a project which can supply millions of megatons of desperately needed electric power stopped just short of completion because of overriding legal concern for a species of tiny fish, the snail darter, of little interest or usefulness to mankind, which could no doubt be just as effectively preserved by seining it and simply transferring it to another locality.

We need to restore to our deliberations a modicum of common sense. And we need to bear constantly in mind that the very highest cause of environmental concern is the human species—and, the need to preserve it—from joining the list of endangered species.

Manifestly, when we provide pure water supplies for people, we improve the living environment.

When we save millions of families from having their life's savings and their life's dreams washed away by floods, we improve the living environment.

When we save the soil from wind and water erosion, we improve the living environment.

When we provide opportunities for wholesome outdoor recreation for millions of city-bound Americans, we improve the living environment.

When we reclaim a desert and make it bloom with food and fibre to feed and clothe people, we improve the environment.

Just as the positive benefits often are left out of environmental impact studies, so also are many valuable and measurable benefits often left out of our formal economic benefit studies.

It is to suggest a more realistic approach—one which appraises the value as well as the cost—that I have presumed to make this statement today.

If we looked only to cost, we would do nothing. America's cities would never have been built. Our factories would never have developed. The humane services which flow to our disadvantaged would never have been undertaken. A school would never have been constructed. All scientific inquiry would have been stillborn, and our exploration of

space would not have left the dreamer's drawing board. Columbus, in fact, would never have left Europe.

At the beginning of this century, America used some 40 billion gallons of water daily. Today our society uses more than 500 billion gallons. Water is our most useful servant. It is the one commodity for which there is no synthetic substitute, and the one which man can never, ever do without.

There is enough water to serve our needs for future time—only if we demonstrate the enlightened stewardship to use it and reuse it well. And there is enough time to do what we must—if we'll only be about the task. But there isn't any of either to spare.

STATEMENT OF THE HONORABLE HAROLD T. (BIZZ) JOHNSON

I am very pleased to have this opportunity to appear before the Subcommittee on Public Works Appropriations concerning the important subject of development of our Nation's water resources.

The conditions of the past two years in the midwest and west have made it dramatically clear that we are still dependent to a large extent on "Mother Nature" for a sufficient supply of water for human consumption, agriculture, industry, and transportation.

As our needs for water will continue to grow, so will the need to develop and conserve this most precious of resources.

Last year, through the process established by the Congressional Budget Act, our two Committees were instrumental in securing a substantial increase in the budget for water resources projects.

This increase brought the water resources program up to a satisfactory and responsive level, overcoming the Administration's efforts to phase out the Federal Government's role through the elimination of any funding for new project starts.

This year, too, our Committees have worked closely together on the budget recommendations, and have arrived at similar conclusions as to the funding needs and direction of the water resources program.

This similarity in understanding is very gratifying to me and I am sure that our two Committees will continue to work together in the future as we have in the past.

Mr. Chairman, I am not here today to talk about specific projects, but rather about the overall needs of the water resources program.

If the program is to function well, it is necessary that sufficient new construction starts be funded in order to meet identified needs.

It is likewise essential that studies be funded at an adequate level so that there will be a comprehensive identification of needs and solutions which will enable us to better choose priorities in water resources development.

Lastly, I would point out the need for generous funding of the small project authorities of the Corps of Engineers.

These small projects, which can be constructed without the specific authorization of Congress, can be undertaken expeditiously to meet serious needs of many communities throughout the country while at the same time, creating many new jobs over a wide geographic area.

Finally, Mr. Chairman, I would like to discuss the review of water resources projects and policies being undertaken by the Administration.

As you are aware, all projects under construction or in advanced engineering and design were reviewed in accordance with three criteria—remaining costs versus remaining benefits at 6⅞ percent, environmental impacts, and safety considerations.

Late last week, the list of 19 Corps of Engineers projects and 11 Bureau of Reclamation projects which did not meet the criteria was announced and public hearings will now be held on these projects prior to the final decision being made as to whether Fiscal Year 1978 funding will be requested by the Administration.

Our Committee has been monitoring this review very closely and will continue to do so as it is a matter which concerns us greatly.

I have spoken with the President, with O.M.B. Director Bert Lance, and Secretary of the Interior Andrus about it.

I have pointed out that the Congress, in Section 80 of the Water Resources Development Act of 1974, provided a mechanism for a review of the principles and standards used in project evaluation and formulation and urged completion of the Section 80 study and its submission to the Congress.

This would enable the Congress to play its proper role in this very important matter rather than simply reacting to actions taken unilaterally by the Administration.

With the information called for by Section 80 we will be in a position to determine what changes in project evaluation and formulation procedures are necessary to ensure that the water resources program will continue to be responsive to the changing needs of our Nation.

Many areas of the Country lack sufficient water now.

In the future, many more areas will be in the same situation.

It is imperative that we continue to identify present and future needs and ways of meeting them if we are to sustain and improve the quality of life for our people.

FOOD AND POPULATION: VI

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. RICHMOND. Mr. Speaker, I would like to bring to the attention of my colleagues two recent statements concerning appropriate policies the United States should undertake with respect to population growth and world food security. The Environmental Fund, an independent, nonprofit population organization, and the Rockefeller Brothers' Fund have both endorsed the concept of establishing a direct correlation between our foreign food and economic assistance and population control efforts in recipient nations. Both have, incidentally, called for a policy of population stabilization in the United States, without which our best efforts to preserve our environment, farmland, and natural resources will be for naught.

POPULATION POLICY

A task force of major environmental organizations—sponsored by the Rockefeller Brothers' Fund—concluded that U.S. foreign assistance programs "should be insistent upon one simple condition: That birth rates shall not be maintained higher than death rates. That constraint is derived from the physical laws of the planet, however, not from the selfish desires of any one group of people. This condition for population stabilization may interfere with some freedoms, but it lets each government accomplish that interference as it sees fit. At the same time it creates other freedoms by reducing the threats to survival, welfare, and equality that overpopulation would bring."

In order to reach this goal, the task force calls for special emphasis upon foreign aid measures that have the effect of reducing the number of children couples generally desire in most of the developing world. According to a recent Gallo-Kettering Poll in African, Latin American, and Asian nations, this number is between 4 and 6, guaranteeing at that level the doubling of national populations every 15 to 30 years, a condition that is intolerable.

In a statement on January 13, 1977, the Environmental Fund called for a moratorium upon assistance to any nation unwilling to tackle its population problem. On the other hand, the fund declared:

Our government should not only continue to help but expand its assistance—

To those developing countries which show through—

active practices a determination to decelerate their rate of population growth. The moratorium will only affect those nations which will not do so.

This is a courageous and welcome addition to the continuing discussion of how best to reverse rapid population growth and its subsequent environmental degradation.

FOOD POLICY

I am acutely aware of the desperate living conditions of many poor and hungry people around the globe. We have neither the time nor the resources to wait patiently for a hoped for automatic reduction in population growth rates due to prosperity. First, population growth makes any real improvement in living standards for much of the world impossible. Second, what is applicable to a tiny handful of western, industrial nations is not for the overwhelming number of nations in the less-developed world. Third, this theory, generally known as "the demographic transition", is seriously flawed. Japan, for example, has gone through such a successful transition that its 30 million people in 1850—with a zero population growth rate—are now 111 million people, doubling every 40 years.

In recognition of this, the environmental fund points out:

Food aid also enables the donor to postpone facing the grim reality no one wants to face, which is: unless population growth is stabilized, the inescapable result of saving lives today will be even greater number of lives lost tomorrow.

Echoing this concern, the task force recommends a significant change in U.S. food policy:

The world food situation is sufficiently critical that these areas of activity [food production, food redistribution, and population stabilization] should be pursued, each one more vigorously than it is now. And a reversal of priorities is necessary. Population stabilization is the only long-term solution and the one with the fewest economic and environmental costs.

Both statements warn that many of the world's food producing systems are being irreversibly destroyed due to the growth in human numbers. Population in many places have outrun the carrying capacity of their land, leaving many people at the mercy of climate change

and condemned to continued squalor and poverty, on areas of arable land which continue to dwindle.

The chairman of the Senate Foreign Relations Committee eloquently spoke to these problems a short time ago. Addressing his colleagues on the Senate floor, Senator SPARKMAN said:

I would like to see the United States, acting within the framework of the United Nations, take a strong new initiative this year to encourage population control programs. If the over-straining of the international financial system is the greatest short-term threat to the world economy, there can be little doubt that uncontrolled population growth is the greatest long-term threat. It is noteworthy that in the First United Nations' Decade of the 1960's, the developing countries actually achieved their goal of raising annual growth rates to 5 percent, but the gain in per capita terms was more than wiped out by population growth so that the gap between the rich and poor countries actually grew wider during the 1960's.

The United Nation's sponsored a World Population Conference at Bucharest in 1974, but little came of it except pious pleas and unrealistic attempts to shift the blame for economic ills from the failure of the third world countries to control population growth to the economic policies of the developed countries. Whatever merit there may be in these arguments—and I do not think there is much—it is obvious to any rational observer that no amount of aid is going to lift the burden of poverty from the third world unless effective measures are taken to curb population growth.

Accordingly, I would urge the Carter Administration, acting both bilaterally and through international organizations, to establish a direct correlation between economic assistance and effective population control measures. This may be severe, but our resources are limited and priorities must be established. It seems to me infinitely more humane, to direct our aid where it will really help people rather than to places where it will be quickly buried under the avalanche of uncontrolled population growth.

We hold no magic formula for the solution to the problem of population growth. Our current efforts, though, are simply making the matter worse. The potential international conflict resulting from over-population and its sisters of famine and pestilence are not hard to imagine. I support these proposals and hope my colleagues will give them serious consideration.

FRED RICHARD.

TUNA INDUSTRY

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. BOB WILSON. Mr. Speaker, last week I made mention of the dire straits in which the American tuna fishing industry finds itself. This situation was brought on first by congressional action, and now is further compounded by congressional inaction.

We are standing by while governmental regulations slowly strangle this valuable and viable industry. We passed the laws, saw the subsequent regulations come into effect, and now we equivocate while the courts twist the meaning of our very words.

A good overview of the impossible position of the tuna industry and of the battle that is raging can be found in the following article from the Review of the News, March 23, 1977, issue and I commend it to my colleagues for their information and, hopefully, their action:

WHY YOU COULD PAY $2 A CAN FOR TUNA FISH

(By Susan L. M. Huck)

Perhaps you have noticed that the price of tuna has gone out of sight. It has to do with "crimes" on the high seas. Federal crime-fighting priorities are astonishing indeed. The penalties for accidentally drowning an eastern spinner porpoise which becomes entangled in a tuna seine were recently described by Mr. August Felando, manager of the American Tunaboat Association in San Diego. A tuna skipper "risks criminal penalties of a year in jail and $20,000 fines for himself and all his crew," plus civil fines of $10,000 for each porpoise violation, plus a $25,000 fine against the ship, plus confiscation of the entire catch (which can be worth up to a million dollars in the largest tuna clippers with a full load).

These incredibly draconian penalties might be compared to the fate awaiting those who are guilty of manslaughter, the accident killing of a human being. But the fact is that it's now *much* less costly to kill people!

What is this madness, you may well ask? What is so special about the eastern spinner porpoise? In response to enormous pressure from professional "environmentalists," the National Marine Fisheries Service (N.M.F.S.) recently decided that the species is depleted below an arbitrary figure—a conclusion more or less plucked from the blue, since nobody knows how many eastern spinner porpoises the ocean hold. This is "statistical gymnastics" to serve a political purpose—in this case that of taking the heat off the N.M.F.S., which has displeased the environmental lobby by failing to destroy the American tuna industry.

America's tuna fleet recently returned to San Diego and San Pedro a month early and 20,000 tons short of tuna, with all flags at half-mast. A resultant flat-out shortage of tuna will clearly boost the price. Bureaucrats and environmentalist lobbyists don't care to venture how high, but you might well be paying double within the year. If so, you can thank the lawyers, propagandists, and fund-raisers who have discovered that porpoises as clients have many advantages over people. They let you keep all the loot collected, and they can't even fire you.

The origin of all this legal grief is the Marine Mammal Protection Act of 1972. The majority of Congressmen, in voting for it, were thinking to protect whales and seals and such. The troublesome portion of the Act was inserted in the Senate version by former Senator Fred Harris and retained when House and Senate versions were reconciled in Conference Committee. The radical Harris, responding to the siren song of an obviously powerful lobby, had originally sponsored a bill which the Committee for Humane Legislation characterized as "much stronger," a bill which would not even have allowed the American tuna industry time to work on a solution to their problem.

In Congressional Hearings conducted on February 17th, it took Chairman Robert Leggett nearly half an hour to read a summary of the tuna-porpoise battle since passage of the 1972 Act. In the end, various federal judges based in Washington, far from reality but close to the environmentalist lobbies cluttering the capital, decided that the tuna industry should be sacrificed in the name of being nice to porpoises. Said judges were briefly defied by U.S. District Judge William Enright of San Diego, who gave the industry a two-month breather, saying "I cannot abdicate my responsibility while the entire industry withers." However, the outraged Washington judges responded by ordering the Secretary of Commerce to employ the F.B.I., along with U.S. Marshals, to keep the fishermen away from their work.

In mid-February, driven to the limit by legal pressure which is depriving them of a livelihood, the fishermen of the American Tunaboat Association sent a delegation to Washington to plead for relief before the Leggett Subcommittee. The tuna fishermen were joined by union representatives who detailed how many cannery workers would lose their jobs if this continued, and by a Puerto Rican official angered by the same consideration. What the Congressmen refer to as "monitor groups" were given equal time to carp, criticize, and carry on like schoolmarms about "punishing the bad captains."

The tuna men showed a film detailing their own research into better methods of sparing the porpoises. At present, only about one percent of those "wrapped" by the net are killed. Underwater film showed porpoise "sulking" in the nets, but responding well to the chance to escape during backdown. A delightful lady marine biologist, Patricia Forkan, suggested that, since porpoise are intelligent enough to learn what it means, a sound source, a sort of "freedom bell," might be placed in the water to guide these animals to the proper part of the net for escape. Finer mesh nets could be used, to further scale-down accidental entanglement.

All of this work was being done by the industry, without a penny of the small fortune collected by environmentalist hustlers rattling the can for Flipper nationwide. Having seen those groups in action, the best one can say is that *some* of them are well-intentioned. But they are, without exception, arrogant and uncompromising, and they have never put any food on my table and never will. They proved totally uninterested in the economic damage they were doing to consumers, and simply regarded the fishermen as beneath contempt. That may not be the way the rest of us see it.

One of the easiest ways to detect tuna, a deep-running fish, is to look for porpoise, because yellowfin tuna like to swim beneath two types of porpoise, spotters and spinners.

Tuna used to be caught by hook-and-line only. Then, in 1958, American tuna skippers figured out how to catch them with purse seines. If you think that you would enjoy tearing around in the open sea in a speedboat, then tuna fishing is for you, because the porpoises, and the tuna below them, are rounded up by seaborne cowboys and then "wrapped" by a gigantic net which extends hundreds of feet down. At the lower end of the net, a cable drawn through pursing rings then tightens the bottom of the net into a "purse." After that the net is drawn in, and within it are tons of tuna.

The big problem all along has been what to do about the porpoises which are also in the net. Some foreign fishermen have a market for them, also, but there is none in the United States.

Aside from that, there are several other excellent reasons why fishermen would rather spare the porpoises. They are large animals and tear up the nets. In addition they are "like hunting dogs" in that they may be useful in finding other tuna. Besides, the tuna fishermen know and like the porpoises—often risking their own lives to save them.

As the purse-seining fleet grew, so did the number of porpoises killed in the course of tuna fishing. On their own the tuna fishermen tried to do something about it. Back in 1970, a notable tuna skipper invented the "Medina panel" which formed a sort of ramp at the far end of the seine, thus helping the surface-running porpoises to escape while

the deeper-running tuna remained in the net.

Other skippers perfected a tricky "back-down procedure" which temporarily submerged the end of the net, while speedboat cowboys herded the porpoises in that direction. Many, many fishermen have gone into the sea themselves to help porpoises to escape. Many have been injured in doing so.

So it is the tuna industry, with the aid of some elements of the National Marine Fisheries Service, which is actually doing its best to save the porpoises. Anything short of not catching tuna, that is. Not catching tuna when they are near porpoise—which is often—is the only solution the environmentalists can think of.

Tuna fishing is an important business. The boats and gear are terribly expensive; even the fuel is enormously costly. These are not pleasure cruises. The tuna fishermen cannot afford to go out and clown around. And if you think so, as I did, "who's going to know what they're doing out there?" then it will amuse you to learn that the U.S. Coast Guard sends "spy planes" to monitor fishing methods, and that foreign fishermen "setting on tuna" can get a big reward for turning in Americans who do likewise.

Our tuna fishermen, who have a staggering investment in boats and equipment—a quarter of a million dollars for the net alone is not unusual—*must* produce profitably in order to stay afloat in more ways than one. The "porpoise lobby" airly tells me that they were warned about buying all these boats and "they can't use their purse seines, that's all." The lobbyists have spoken: their arrogance is hard to believe. When fishermen get up in the morning, their way of making a dollar is to provide us with something to eat. When these lobbyists get up in the morning, their way of making a buck is to prevent the fishermen from fishing profitably. Yet we are supposed to regard their espousal of the porpoise as selfless dedication. Watching these well-paid operations in action, one sees them smug and sleek, wallowing in the secular sainthood of their own propaganda machine.

The tuna fishermen and their families are Americans. Their ancestors invented the tuna industry around the turn of the century, and built everything they have. They don't want to leave the United States, but they are seriously considering taking their boats away and basing themselves in some other country where environmentalists are not allowed to harass the producers of badly needed food. Other countries are, indeed, wooing them; they represent a gold mine, after all. They can bring jobs, tax revenues, and needed exports to countries like Mexico, Panama, Netherlands Antilles, and so forth. Not in *any* other country would they have these unproductive fanatics harassing them year after year with the power of national government.

The totalitarian instincts of the environmentalists shone forth at the February Hearings, when they gloated over a 1916 statute which would prohibit the tuna fishermen from registering their boats elsewhere. It seems that, in order to remove from United States jurisdiction any vessel which could be useful to the U.S. Navy, it was necessary to obtain permission from the National Maritime Administration. The tuna clippers easily fall within this classification; during World War II, "the entire fleet was painted grey within weeks." So, in the name of national defense, a subject the environmentalists normally give rather little thought, the law can act to pin down their victims for further torment. The environmentalists even claimed that Americans aboard foreign-flag ships would be hunted down and prosecuted. One might wish they would become so incensed about our friendly neighborhood muggers.

The U.S. Coast Guard, incidentally, should now be employed to prevent Soviet factory ships from sweeping our fishing grounds clean. But, if the porpoise lobby has its way, Coast Guard spy-planes will be spanning the Pacific in search of American tuna fishermen.

Meanwhile, the propagandists are responsible for using children to turn out such letters as the following:

"I am writing about fishing on porpose [*sic*]. If you are going to fish for yellowfined [*sic*] tuna you should drop your nets and take them up right away so you can sort them out and get all the dolfins [*sic*] and porpose [*sic*] out. How would you like to get held under water and not beable [*sic*] to get air and then die very very slowly. You might get away but you would leave a fin or a half a tail behind. I think it hurts very much." * * *

"I am disgusted with the way you catch your tuna fish. Tishing [*sic*] on porpoise is one of the most unfair things in the world. You wouldn't like getting scooped up in a net and than [*sic*] drown." * * *

"We will never forgive you if all the dolphins leave this world. I don't think you would like to be drownd [*sic*] and then thrown back in the water when you are already dead."

A bale of this material, accompanied by kiddie-cartoons of fishermen drowning in nets, descended from the public schools upon the American Tunaboat Association last winter. Fishermen could laugh it off if it were not the sort of nonsense which pushes through legislation. Pressure on Congress can take the form of volume of mail times emotional agitation; the intelligence displayed is irrelevant. A spokesman for the Committee for Humane Legislation boasted of having generated stunning quantities of mail—resulting in a law which can make the price of tuna climb the wall and punch through the ceiling.

It does the fishermen no good to point out that bottlenose dolphins like the popular Flipper, are *not* associated with tuna and therefore never turn up in the nets, because the fishermen can hardly compete with all the well-oiled, professional propaganda outfits that know how to play fifth-graders and their teachers like an organ.

Just for fun I called the Fabius School, from which the above letters came, and spoke first to the principal, Michael Zindorf. Yes, he knew the difference between propaganda and education, but with regard to having Fabius pupils enlisted in the propaganda wars, he said, "I hate tuna, so I don't mind."

Neither he nor the fifth-grade teacher, Miss Tina Place, quite relished publicity however. I asked Miss Place why the spelling was so bad, and she said she corrected their first drafts, but let it go on the second and final draft of each letter "as long as it was legible."

In doing what was suggested in the ecology-lobby material which found its way unerringly into her classroom, Miss Place protested that "they tell you millions of places to write to," and she had chosen the Tunaboat Association rather than Congress, so she hadn't really mobilized her charges for propaganda purposes, and therefore I shouldn't sound, like, everybody by mentioning this in public. By this time I felt sure that Miss Place was not a hardcore agitator-propagandist, but someone only slightly less naive than her ten-year-olds.

Suppose that, by some miracle, no porpoises were ever again to die in the nets. Would that satisfy the environmentalists?

Absolutely not.

In the hearing room, on February 17th Bernie "Bud" Fensterwald, representing a gaggle of groups, demanded that porpoises not be "harassed," either! Nobody laughed.

Mr. Fensterwald's reading of the term "taking," in "taking of porpoise," includes "harassment" as far as he is concerned. I suppose he compares being in a net with being arrested. "If I were a porpoise," said Fensterwald's secretary, "I'd consider it harassment, having a net put around me, and having men in diving suits [sic] getting me out of the net, and bugging me all day."

Well, into each life some rain must fall. On the other hand, possibly porpoises like being tickled by sailors risking their lives to save them, something Mr. Fensterwald's secretary unaccountably omitted from her anthropomorphic fantasies.

No sooner had Fensterwald issued his new position than representatives of the other "monitor groups" begged permission to troop back to the stand and add that they, too, would fight to the last dollar against the "harassment" of porpoise. If they had not done so, they might have been put out of business by more hyperbolic porpoise saviors.

Those receiving environmentalist propaganda either perform their letterwriting chores as directed, or do nothing, they hardly ever take pen in hand, or beat their type writer keys, to write in opposition. Thus, the only mail generated is one-sided. This produces laws, the results of which come down on our heads some time later.

Many people have other things to do than write to Congress in complaint of the price of tuna, but should it soar through the ceiling you will know why, though unfortunately only Congress can undo what the Congress has done. Perhaps you will want to tell your Congressman that you know why the price of tuna is up, and would he and the other federal busybodies please get off the backs of the fishermen so the price of this inflation-era staple can come down again.

HATCH ACT IS NEEDED

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. ABDNOR. Mr. Speaker, one of the most abused words in the dictionary is "reform." By simple invocation of the sounds that go with those six letters, all sorts of ideas are offered to what the reformers hope will be a gullible public and Congress.

Rising again under the reform banner are proposals to amend the Hatch Act—which since 1939 has served to protect Federal employees from political intimidation, and at the same time has protected the public from undue political influence in their dealings with the Federal Government.

Proper regulation of political activities of Government employees has been debated since the meeting of the First Congress in 1791. Various means were tried through the years, culminating with the present law which is now under attack.

As the act has stood since its enactment, certain political activities were permitted and other were prohibited. The Hatch Act has survived Supreme Court tests which challenged its possible infringement on the rights of free speech.

Activities permitted under the current act include:

First, register and vote in any election; second, express opinion as an individual privately and publicly on political subjects and candidates, display a political picture, sticker, badge or button; third, make a financial contribution to a political party or organization; fourth, participate in nonpartisan activities of a civic, community, social, labor, or professional organization, or of a similar organization; fifth, be a member of a political

party or other political organization and participate in its activites to the extent consistent with law; sixth, attend a political convention, rally, fundraising function, or other political gathering; seventh, sign a political petition as an individual; eighth, take an active part as an independent candidate or in support of an independent candidate in a nonpartisan election; ninth, be politically active in connection with a question not specifically identified with a political party such as a constitutional amendment, referendum, and so forth; tenth, serve as an election judge or clerk or in a similar position to perform nonpartisan duties; and eleventh, otherwise participate fully in public affairs, except as does not materially compromise efficiency or integrity of an employee or the neutrality, efficiency, or integrity of the agency.

Activities prohibited under the current Hatch Act include: First, use official authority or influence for the purpose of interfering with or affecting the result of an election; second, take an active part in political management or in a political campaign of a partisan candidate for public office or political party office; third, serve as an officer of a political party a member of a National, State, or local committee of a political party, or an officer or member of a partisan political club, or be a candidate for any of these positions, organize or reorganize a political party, organization, or club; fourth, directly or indirectly solicit, receive, collect, handle, disburse, or account for assessments, contributions, or other funds for a political organization; fifth, organize, sell tickets to, promote or actively participate in a fundraising activity of a partisan candidate, political party, or club; sixth, become a partisan candidate for or campaign for an elective public office; seventh, solicit votes in support of or in opposition to a partisan candidate for public office or political party office; eighth, act as recorder, watcher, challenger, or similar officer at the polls in behalf of a political party or partisan candidate, drive voters to the polls on behalf of a political party or partisan candidate; ninth, endorse or oppose a partisan candidate for public office or political party office in a political advertisement, a broadcast, campaign literate, or similar material; 10th, address a convention, caucus, rally, or similar gathering of a political party in support of or in opposition to a partisan candidate for public or political party office; 11th, serve as a delegate, alternative, or proxy to a political party convention; and 12th, initiate or circulate a partisan nominating petition.

Mr. Speaker, as we listen to the advocates of Hatch Act reform we all need to remember that once the protection of the Hatch Act is removed, the political pressures to which Federal employees will be subjected will be enormous. This past Monday the editorial writers of the Washington Star said it well. Their final advice on leaving the Hatch Act alone bears heeding by all my colleagues:

[From the Washington Star, Mar. 28, 1977]

MR. CARTER AND THE HATCH ACT

The Hatch Act has survived three major challenges in the courts but chances do not look good for its withstanding the combined assault of a Democratic Congress and a Democratic President, prodded by the unions that helped elected them.

President Carter the other day added the weight of his office to the mounting pressure on Capitol Hill to strip the Hatch Act of its prohibitions against partisan political activities by federal workers.

Yet, even while lamenting the Hatch Act's denial to federal employes of a "full opportunity to participate in the electoral process," the President conceded that the restrictions are valid for some. "There should be exceptions," he said, "for those employees who must retain both the appearance and the substance of impartiality. For employees in such sensitive positions . . . restrictions on political activity are necessary."

Mr. Carter did not define "sensitive positions" but we assume he means government workers who are in a position to exert political pressure on the public. Ones that come easily to mind are agents of the Federal Bureau of Investigation, the Internal Revenue Service and other law enforcement and investigative units.

But where do you draw the line? How about postal workers? Mr. Carter, who mentioned them specifically among the 2.8 million employes denied active participation in partisan politics, wants them freed from the Hatch Act. But it could be argued that mail carriers, who are in daily contact with millions of American citizens, are in a better position than most to proselytize for partisan political purposes.

How about employes who deal with welfare recipients? What's to stop them from putting in a plug, or a little pressure, for their favorite candidates as they go over eligibility forms?

How about federal agricultural agents who deal with farmers? Defense Department employes who handle contracts? Regulatory agency workers in a position to dispense or withhold all manner of favors?

John Bolton, a Washington lawyer, warned in a treatise on the Hatch Act published last year by the American Enterprise Institute: "A politically active bureaucracy raises grave dangers that, at least in part, government by the people risks being replaced by government by the government."

President Carter touched on the other major danger inherent in removing Hatch Act restrictions—the coercion of federal employes into political activity. Mr. Carter apparently does not believe this would be a serious problem but, just in case, he favors "strong penalties for any federal employe who attempts to influence or coerce another federal employe into political activity, or who engages in political activity while on the job."

The Hatch Act came into being in 1939 because federal workers were being pressured into political activity. Testimony disclosed that WPA workers in Kentucky were fired for holding views different from those of Democratic Senator Alben Barkley; federal workers in Tennessee were being pressured to make campaign contributions; WPA workers in Pennsylvania were ordered to attend a political rally; others were ordered to change their registration from Republican to Democratic.

Opponents of the move to lift the law's restrictions believe the danger of coercion is even greater now than at the time the Hatch Act was adopted. There were no unions among federal employes then; now there are strong ones. It is no coincidence that the main pressure for scuttling the Hatch Act comes from the unions.

If the protection of the act is removed, federal employes are apt to be caught between two pressures: Supervisors trying to make points with politicians in power, and unions trying to politicize the federal service for their own ends.

"The only possibly effective method to eliminate coercion," Mr. Bolton argues, "is to forbid the activity as well as the intimidation. This route is strong medicine, to be sure. Nonetheless, there does not appear to me any other equally protective alternative."

That what the Hatch Act does. It ought to be left alone.

EMBARGO ON CHROME: IT PUTS THE U.S. SEAL OF APPROVAL ON AGGRESSION

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. McDONALD. Mr. Speaker, in a sad action recently, this body repealed the so-called Byrd amendment which permitted the importation of Rhodesian chrome. Sad to say, the ban will probably be strictly enforced, which is more than can be said of the other U.N. countries, including the Soviet Union. Instead of bringing democracy to Rhodesia, this action will hasten the day of slaughter of blacks and whites in Rhodesia by terrorists from all sides. Instead of representative government and majority rule, we will inevitably bring another black dictatorship into being in Africa, if there were not already a surplus of them. Is this progress for Africa? Is this the advancement of civilization? It looks like a retreat to me and the addition of another African country to the Communist sphere of influence in Africa.

John Davenport, formerly editor of Fortune magazine and also the former editor of Barron's, recently returned from South Africa and Rhodesia and what follows is his summation of why our policy is so wrong.

I commend it to the attention of my colleagues. The article appeared in Barron's, March 21, 1977:

EMBARGO ON CHROME—IT PUTS THE U.S. SEAL OF APPROVAL ON AGGRESSION

In a notable address to members of the American Bar Association in the spring of 1968, the late Dean Acheson declared that the imposition of economic sanctions against the state of Rhodesia by the U.S. and other countries at the instigation of the United Nations constituted nothing less than "*barefaced aggression, unprovoked and unjustified by a single legal or moral principle.*" We recall these forthright words of a not undistinguished U.S. Secretary of State with a certain amount of nostalgia, not just because we saw fit to reprint them at the time (Barron's, June 2, 1968), but also because they offer perhaps the sharpest commentary that can be made on the Carter Administration's latest ploy to deal with what has become known as the Rhodesian issue.

That ploy is to jam through an all-too-acquiescent Congress legislation which nullifies the so-called Byrd Amendment of 1971, which at least allowed the U.S. to purchase high-grade chrome ore and ferro-chrome from Rhodesia to the mutual benefit of both countries. To the benefit of the U.S., because chrome is essential to the making of stainless steel and to high-technolgy industries. To the benefit of Rhodesia, because sale of chrome allows her to earn the foreign exchange she desperately needs to buy arm to defend herself against mounting terrorist attack, which, on the evidence, is amply supplied with Communist guns and money and contravenese all principles of

international law, to say nothing of the spirit of the United Nations Charter.

We here pass over as largely irrelevant the shabby economic argument which Secretary of State Vance and others have brought forward for tightening the noose of sanctions around a country which has never harmed an American citizen, never threatened American property and the present government of which, despite everything, remains loyal to the West. The chief argument on this score is that in cutting itself off from Rhodesian chrome, the U.S. will no longer be completely dependent on Soviet Russia as an alternative source of supply, since advancing technologies both here and abroad now allow American industry to make use of lower-grade chrome available elsewhere, notably from South Africa, the racial policies of which are constantly denounced. In our book, other things equal, the U.S. should buy its raw materials where they are cheapest and most plentiful, and on both counts Rhodesia surely qualifies.

But the Administration's economic arguments are at best a smokescreen for its real purpose, which is to redeem some ill-advised political promises made during the late campaign. Acting on those promises, it will now further denigrate the government of Rhodesia's Prime Minister Ian Smith at the very time when he is seeking to fulfill commitments made under the Kissinger agreement to give Rhodesia responsible majority rule within the next two years. The new chrome embargo will not (as Secretary Vance professes to believe) enhance the chances of a peaceful and just solution to the Rhodesian question. On the contrary, it will put the seal of American approval on aggression and terrorism, and constitute the final turn of the screw in an American policy of deception and poltroonery that can only serve Soviet interests.

The seeds of this deception were planted in 1965, when Rhodesia, for many years a self-governing British colony, declared her independence of the British Empire with assuredly as much right, indeed more right, than many another African state then seeking and gaining self-determination. In this case, however, Great Britain opposed the move, but having no Redcoats at hand to put down the alleged "rebellion" (as she did in 1776), threw the whole matter into the lap of the United Nations. It did not take that body long, under pressure from other African states, to determine that Rhodesia was a "threat to the peace" because she had upset the psychology of her neighbors, and so merited non-recognition and economic reprisal. To those who pointed out that such reprisal clearly violates the provision of the UN Charter which forbids that body to intervene in the domestic affairs of any country, it was argued that in declaring independence, Rhodesia had become a species of non-state, enjoying no standing at the bar of international justice.

To strengthen this Humpty Dumpty reasoning (Mr. Acheson's phrase), it has become the business of the State Department, and most of the news media, to depict the government of Rhodesia as a renegade and "racist" regime, where some 270,000 whites shamelessly exploit six million blacks. This is at best a caricature of the truth. In declaring independence, Rhodesia adopted a constitution that made no mention of race, creed or color in terms of the franchise and might have drawn plaudits from a Madison or Jefferson. In 1969, that constitution was amended along more racial lines, with blacks voting for blacks and whites for whites. Yet as of early this year, there were four black tribal leaders in Ian Smith's Cabinet, an equal number of blacks and whites in Rhodesia's assembly, with provision that black representation would advance at least to parity as the contribution of blacks to the national income, thanks to education and rising productivity, steadily increased.

This may not be Simon-pure democracy, but on the record, Rhodesia's political system has given the nation a far better deal than the one-man, one-vote principle which has landed so many other African states in military or civil dictatorship (and, in many cases, economic penury). Between 1965 and 1975, Rhodesia staged a spectacular economic advance which surprised her friends and aggravated the enmity and envy of her foes. In a decade, Rhodesia's gross national product expanded on average by 7% per year, or better than that of the U.S., as the result of the diversification of her agriculture from tobacco to maize, cotton and cattle breeding, as well as heavy investment in mining, light industry, roads, public housing and education. With the result that even today, under wartime conditions, 85% of Rhodesian children receive at least five years of elementary education; the literacy rate is the highest in Africa (except for South Africa); and there are more blacks in the University of Rhodesia than whites. It should likewise be noted in passing that as of today, blacks constitute some two-thirds of Rhodesia's fighting forces.

In view of all the foregoing, the notion that Rhodesia's troubles stem from seething domestic unrest as the result of white "racist" rule must be dismissed. What endangers her existence is external aggression, of the kind that the UN was supposed to stop but which it has so far encouraged. Such aggression began in a small way in the early 'Seventies, when Rhodesia's so-called black "nationalist" leaders, operating usually from outside its borders, took up terrorist tactics. It was vastly increased with the collapse of the Portuguese empire in 1974–75, and the loss of both Angola and Mozambique to Communist domination—the latter exposing Rhodesia's long eastern flank, as well as her Zambian border, to continuous infiltration and attack.

Terrorism may well be a kind of life-style in much of Africa, but in the case of Rhodesia it has surely reached new depths of degradation—the mowing down last month of three Jesuit priests and four nuns at a Christian mission being only one of countless and recurrent acts of brutality. In this spreading war, moreover, it is not whites who have suffered the most. On the contrary, over 90 percent of civilian casualties to date have been blacks, who, working on Rhodesia's farms or on Tribal Trust lands, have been ruthlessly put to death—in many cases literally butchered—as punishment for their loyalty to what they regard as their own homeland.

To counter this Soviet armed and orchestrated barbarity, Rhodesia's military forces have given good account of themselves. Yet to date despite much hand-wringing, the civilized world has done little to back them up, and Western diplomacy has faltered. It is to the credit of Henry Kissinger that when Russian arms and Cuban mercenaries poured into Angola, he immediately perceived that a new imperial presence threatened the whole African continent, thus compelling a new American initiative. Yet when it came, the initiative was of a peculiar kind. In his speech in Lusaka, Zambia, last April, Kissinger dealt at best tangentially with the problem of terrorist attack across Rhodesian borders. Instead, in a desperate effort to hold the allegiance of neighboring black states and to prevent direct Soviet intervention, he refurbished an old formula: no help for Rhodesia whatever until she accepted the slippery and wholly undefined solution of "majority rule."

In pressing that policy, Kissinger found a reluctant ally in South Africa, which, though no friend of majority rule, found herself under mounting threat of UN sanctions, and desired peace in the north at almost any price. In Pretoria last September, all the cards came face up on the table, and against his own better judgment, Ian Smith bowed to American-British terms: virtual abdication of Rhodesia's 50-year-old Parliamentary system; the formation of an interim government in which whites and blacks would participate; and the drafting of a new constitution, which would give Rhodesia majority rule in two years.

These were harsh terms, but at least they held promise of an orderly transition from white to black political dominance, and the promise of an immediate lifting of sanctions when the interim government was formed. What came after is far uglier. For scarcely had the Kissinger plan been announced, than it ran into the opposition of precisely those African states which it was designed to mollify. From the so-called "front-line presidents" of Mozambique, Zaire and Zambia came swift denunciation of the Kissinger package as one more "imperialist" plot.

At the ensuing Geneva conference, it turned out that the black "nationalist" Rhodesian leaders were themselves badly split between the forces of the moderate Bishop Muzorewa, who probably would command a majority of black Rhodesian votes if an election were held tomorrow, and the so-called Patriotic Front of Joshua Nkomo and the implacable Robert Mugabe, a self-admitted Marxist, who is supposed to control the bulk of the terrorist forces. Small wonder that the Geneva conference broke up a babble of voices. Nor were matters mended when the pipe-smoking British chairman of the conference, Ivor Richards, indulged in his own shuttle diplomacy to come up with a wholly new settlement plan. This, as Ian Smith subsequently pointed out differed from the original Kissinger proposals "as chalk from cheese," and in effect would have given native Rhodesians, black and white, little say in their own future.

In taking this position, Smith has occasioned much tongue clacking around the U.S. Department of State. Indeed, in pressing for fresh sanctions on Rhodesia, Secretary Vance has implied that Smith is again endangering the peace, and apparently continues to believe that in any forthcoming conference, all parties, including known terrorists and Communists, must be represented. In our judgment, Smith stands tall for questioning this naive assumption that good can come out of evil. Having committed himself to majority rule, this man from Bulawayo, Rhodesia, and former RAF pilot, is not going back on his word. What he is stubbornly holding out for is a constitutional transfer of power which will duly protect minorities, recognize deep tribal differences and affiliations, and maintain civilized values and procedures—a settlement ' by Rhodesians and for Rhodesians."

What most other black African states, and terrorists of the stamp of Mugabe, are calling for is something totally different, namely, a black power grab of the kind that has undone so many African countries, and thereafter the socialization of Rhodesian industry and the nationalization of its land. States a pronouncement of one of the so-called "liberating" movements: "(In the new Zimbabwe) the present capitalistic system, which benefits a few settlers in Rhodesia and capitalists in South Africa, Britain and America at the expense of the laboring masses, will be abolished."

In the circumstances, there is no question where the U.S. should stand. What Congress should be debating is not how to tighten economic sanctions against Rhodesia, but how to get rid of them entirely. What the State Department should be encouraging are precisely those efforts of Mr. Smith to work out with moderate black Rhodesian leaders an "internal solution" which will square with the will of the majority of its peoples, rather than with the dictates of outsiders. And in preparing for any new international conference, Washington should surely reopen direct communication with Salisbury, where it has had no representative since 1968. As

matters stand, U.S. policy is being shaped in a vacuum.

To spark such an initiative, to send to Rhodesia a small delegation of Americans (including, we would hope, at least one distinguished jurist), would take courage. But, after all, not so long ago President Carter was promising an "open" administration and a comprehensible foreign policy. The trouble with U.S. Rhodesian policy is that it is simply incomprehensible to most Americans. Incomprehensible to go on treating Rhodesia as a "non-state" when, even under wartime conditions, she is one of the better governed states of Africa. Incomprehensible, because while calling for majority rule, the U.S. goes on blocking Rhodesia's own attempts to achieve it. Incomprehensible, finally, in view of the fact that if Rhodesia goes down the drain, then we may be sure that South Africa will be next on the Soviet shopping list. Solzhenitsyn, like Spengler before him, has a name for such diplomacy: the Decline of the West. We prefer to hope that the West will rally and come to its senses, perceiving that the issue in Rhodesia, as in much of southern Africa, is not between black and white. The issue is between the reign of terror and the rule of law.—JOHN DAVENPORT.

WRIT OF HABEAS CORPUS

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. GONZALEZ. Mr. Speaker, in my opinion one of the most important rights guaranteed under our Constitution is that of article I, section 9, which states that the writ of habeas corpus shall not be suspended unless when in cases of rebellion or invasion the public safety may require it. And to quote Dr. Samuel Johnson in his conversations with Boswell:

> The Habeas Corpus is the single advantage our government has over that of other countries.

The citizens of our Nation have always taken the right to habeas corpus for granted and throughout our 200-year history it has not been abused, but I am very concerned with a Supreme Court decision last term, Stone against Powell which has resulted in restricting the availability of Federal habeas corpus review and I am proposing legislation today that will reverse the effect of this decision.

In Stone against Powell, Powell was convicted of murder in a California court on evidence obtained when he was picked up on a local vagrancy ordinance. At both his trial and on direct appeal the State courts rejected Powell's arguments that the vagrancy order was unconstitutional. Powell applied for a writ of Federal habeas corpus review on the grounds that he was being held in violation of the Constitution. The district court denied his plea, but the U.S. court of appeals reversed that decision holding the vagrancy ordinance was unconstitutionally vague, the arrest and search were unlawful and thus the evidence gathered should be excluded at trial based on the fourth amendment which guarantees against unlawful search and seizure and is applicable to the State courts through due process granted by the 14th amendment. But the Supreme Court reversed the appeals court decision holding that—

> A federal court need not apply the exclusionary rule on habeas review of a 4th amendment claim absent a showing that the state prisoner was denied on opportunity for a full and fair litigation of that claim at trial or on direct review.

It appears that the court is more concerned with limiting the avenues of relief than insuring that Powell, or anyone else is similar circumstances be guaranteed their rights under the Constitution. The Court did not say that it lacked jurisdiction, nor that a violation of the fourth amendment did not occur nor did it rest its decision on construction of the Federal habeas statute.

Instead, the Court rested its decision in this case on its own balancing of the relative State and Federal interest involved. The Court states that State courts protect fourth amendment rights as competently as the Federal district courts, but it appears that in Stone against Powell the Court has redrawn, based on its own policy judgments, the limits prescribed by Congress. And to quote Justice Brennan who dissented in Stone:

> The interest balancing approach use to justify the majority decision is nothing less than an obvious usurpation of Congress' Article III power to delineate the jurisdiction of federal courts.

Mr. Speaker, the bill I am proposing today will guarantee that a request for habeas corpus review by a Federal court will not be precluded because the argument raised is based on the exclusionary rule and relief shall be granted if the merits of the case warrant such relief. I believe my bill will reassert the power Congress is granted under the Constitution by insuring that Federal courts are open to claims which I feel have been closed by the Supreme Court decision in Stone against Powell.

The Court issued a number of policies which led to its decision in this case to limit the exclusionary rule in the context of Federal habeas corpus review and one calls for the most effective utilization of limited judicial resources. It appears that the Court is obviously asserting that by restricting the right of habeas corpus review the Federal courts will not be inundated with frivolous petitions. But can justice truly be served if the Court is more concerned with expediting court proceedings and administrative convenience rather than insuring that each party be guaranteed their constitutional rights.

And furthermore, based on the information I have obtained habeas corpus petitions are only a small fraction of total civil filings and consume on the average less than 1 percent of the Federal judges' time. It should also be noted that Congress has responded to any overloading causes by habeas corpus petitions by enacting the Federal Magistrates Act which provides for the preliminary screening by Federal magistrates of applications for posttrial relief and the submission of a report and recommendation to the district judge to facilitate decisionmaking.

Mr. Speaker, Congress has the power and the authority to define the jurisdiction of the Federal courts and I hope that my colleagues agree that we must do just that in order to preserve personal liberty by guaranteeing the right to habeas corpus review by the Federal courts to everyone regardless of prior State action. To quote Zechariah Chafee, Jr., from Documents on Fundamental Human Rights:

> Such great liberties as worship and speech will go on somehow, despite laws, but not liberty of person. Censorship can be evaded; prosecutions against ideas may break down; a prison wall is there. Only habeas corpus can penetrate it. When imprisonment is possible without explanation or redress, every form of liberty is impaired. A man in jail cannot go to church or discuss or publish or assemble or enjoy property or go to the polls.

Mr. Speaker, the Court's decision in Stone against Powell is just one of a number of decisions made by the Burger Court that reduces access to the Federal courts and I hope that the Judiciary Committee will consider my bill as well as look into other areas where the Court has used comity and federalism to essentially close the Federal courts to all cases where the State courts can hear the Federal claims. The legislative branch must exercise its power to define the jurisdiction of Federal courts and I believe the time to start is now.

JOBS, PRODUCTIVITY AND HUMAN RESOURCES

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. MIKVA. Mr. Speaker, the continuing high rate of unemployment and inflation coupled with the slowing rate of productivity are among the most difficult problems facing our Nation. This week, the House Banking, Currency and Housing Subcommittee on Economic Stabilization begins hearings designed to provide alternatives and solutions to these serious economic problems. The subcommittee is using as the test for the hearings, the Human Resources Development Act introduced by our distinguished colleague from New York, STAN LUNDINE. The bill is carefully designed to encourage employers and workers to begin cooperative efforts to spur productivity and upgrade job skills. On Thursday, Under Secretary-designate Sidney Harman will be testifying on the successful jobs enrichment program which he instituted at Harmon International Industries before joing the State Department.

At this time, I would like to insert an article from the New York Times of today, March 30, by A. H. Raskin concerning the Lundine bill and the subcommittee hearings. I commend the article and the Human Resources Development Act

for the serious consideration of all Members:

A MOVE FOR JOBS ENRICHMENT AND HUMANIZATION OF WORK

(By A. H. Raskin)

WASHINGTON.—Contrary to popular belief, Michael Maccoby did not spring full-armored out the primordial ooze as a stalker of victory-obsessed team captains in corporate executive suits. Long before his book "The Gamesman" started zooming up the best-seller list, Dr. Maccoby had won renown among social scientists as chief theorist for an experiment in work humanization that has been transforming fundamental attitudes toward work, productivity and industrial democracy at a Tennessee auto-parts factory.

Last week, over French toast at breakfast in the Capitol, the soft-spoken director of Harvard University's project on technology, work and character joined a legendary pioneer in reshaping the workplace, Einar Thorsrud of Oslo, in outlining to three influential members of Congress ideas that may help speed the United States along paths of labor-management innovation long familiar in West Europe.

The first thrust in that direction will begin tomorrow when the economic stabilization subcommittee of the House Banking Committee opens hearings on a bill sponsored by the host at that breakfast. Representative Stanley N. Lundine, Democrat of Jamestown, N.Y. The measure has strong support from the two other legislators at the session—Representative Henry S. Reuss, Wisconsin Democrat, who heads the full Banking Committee, and Senator Jacob K. Javits, New York Republican, who has introduced a companion bill in the upper chamber.

The bill would make available $40 million in Federal grants to foster projects, primarily in private industry, to make employment more secure through cooperative efforts by workers and employers to redesign jobs, upgrade skills, spur productivity and heighten job satisfaction.

As Mayor of Jamestown, N.Y., before coming to Capitol Hill, Mr. Lundine helped demonstrate practicality of such ventures by presiding over development of a community-wide labor-management committee that was instrumental in cutting local joblessness from 10.2 percent to 4.2 percent in a three-year period when the rest of the country was slumping into recession.

The Lundine bill faces formidable obstacles. Most of organized labor is cool to quality-of-work experiments for fear that they can be exploited by nonunion employers to build a wall * * * corporations opposed them on the grounds that they tear down traditional lines of authority and thus undermine plant discipline.

Within the Federal Government, jurisdictional jealousies between vested interests in the Labor and Commerce Departments could wreck the new initiative just as they have orphaned and abandoned the supposedly independent National Center for Productivity and the Quality of Working Life, which Congress chartered two years ago.

But roadblocks like these are not insuperable, in the judgment of so seasoned a legislative tactician as Representatives Reuss. As one who believes "small is beautiful" when it comes to ventures to generate jobs through Federal stimulus, Mr. Reuss considers the Lundine approach a sensible one that involves no risk of enormous additions to the deficit and that stands a much better chance of Congressional approval than would most bills put forward by a sophomore on Capitol Hill.

The experience Dr. Maccoby has gained from four years of wet-nursing the job-enrichment program that he and Dr. Thorsrud cooperated in installing at the plant of Harmon International Industries Inc., in Bolivar, Tenn., offers persuasive support for more experiments, though both experts stress that no single pattern can succeed if it is applied mechanistically in a different setting.

"Ideas for change must come from all levels, top to bottom," Dr. Maccoby said, "but it requires exceptional leadership to release the creativity that exists within the work force." The crucial initial factor at Harmon was the intense support given the project by Irving Bluestone, an international vice president of the United Automobile Workers union, and Dr. Sidney Harman, president of Harman International until his nomination by President Carter in January to be Under Secretary of Commerce.

The workers at Bolivar, half of them women, formed teams to perform various operations involved in the preparation, painting and packing of auto mirrors. They decided among themselves who would do what jobs, kept their own records, covered for one another in periods of absence and worked out an intricate formula for sharing with management the labor-cost savings that have resulted from the project.

The improved communications and mutual trust built up at all levels through the establishment of clear principles for joint decision-making and increased job autonomy paid off this month in the remarkable conclusion of a new wage agreement—three months ahead of schedule—without any intervention by top officers of either company or union.

"That's the real triumph of this project," commented Gus Howard, a worker in the plant's receiving department head of the local union.

The triumph goes well beyond Bolivar, however, Mr. Bluestone, enthusiastic over the progress there toward breaking down atavistic labor-management hostilities has enlisted the support of the General Motors Corporation in a much more embracing experiment in job enrichment under union-company auspices at dozens of G.M. plants.

Similarly, now that Dr. Harman is going into Government, the Beatrice Foods Company of Chicago, a huge conglomerate, that is in process of absorbing his company, has assured Dr. Maccoby that one of the chief points of attraction is the harmonious and productive relationship that the project achieved. And Dr. Harman himself, as Commerce Under Secretary-designate, is scheduled to lead off for the Administration at tomorrow's hearings on the Lundine bill, embodying precisely the principles that underlay his own experiment.

For Dr. Thorsrud, the Norwegian expert, who has been involved in guiding more such ventures throughout the world than any other social scientist, the potential benefits seem boundless. He enthralled the Capitol breakfast guests with his description of the retraining programs that Norway instituted with unemployment insurance funds when the nation's idleness rate reached what was considered a calamitous level of 2 percent at the low point of the recession.

As Dr. Thorsrud described it, the greatest success in equipping workers with new skills (through a combination of on-the-job training and community vocational schools) came in plants with active programs for workers to participate in industrial decisionmaking. Senator Javits found in the Thorsrud report new ammunition for his pet campaign to convert the $17 billion a year that the United States now spends on unemployment insurance into something more substantial than a substitute for welfare.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, March 31, may be found in the Daily Digest section of today's RECORD.

The schedule follows:

MEETINGS SCHEDULED

APRIL 1

*8:00 a.m.

Agriculture, Nutrition, and Forestry

To resume hearings on the administration's proposals relative to the food stamp program.

322 Russell Building

9:30 a.m.

Commerce, Science, and Transportation

*Subcommittee on Aviation

To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.

1202 Dirksen Building

Environmental and Public Works

Water Resources Subcommittee

To hold hearings on the proposed replacement of Lock and Dam 26, Alton, Ill.

4200 Dirksen Building

Foreign Relations

Subcommittee on Western Hemisphere Affairs

To meet in closed session to receive a briefing on Panama Canal negotiations from Ambassadors Ellsworth Bunker and Sol Linowitz.

S-116, Capitol

Human Resources

Health and Scientific Research Subcommittee

To continue hearings in connection with the protection of human subjects used in experimental research.

Until 12:30 p.m. 6226 Dirksen Building

10:00 a.m.

Banking, Housing, and Urban Affairs

To continue hearings on S. 664, to provide for the insurance of graduated payment mortgages, and S. 1078, to revise the experimental mortgage insurance program.

5302 Dirksen Building

Budget

To mark up proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.

357 Russell Building

Commerce, Science, and Transportation

To hold hearings on the nominations of Charles Linn Haslam, of North Carolina, to be General Counsel, and Frank Alan Weil of New York, to be an Assistant Secretary, both of the Department of Commerce.

235 Russell Building

Energy and Natural Resources
Subcommittee on Energy Research and Development
To hold hearings on S. 419, to test the commercial, environmental, and social viability of various oil-shale technologies.
3110 Dirksen Building

Environment and Public Works
Nuclear Regulation Subcommittee
To hold hearings on proposed fiscal year 1978 authorizations for the Nuclear Regulatory Commission.
457 Russell Building

Governmental Affairs
Energy, Nuclear Proliferation, and Federal Services Subcommittee
To hold hearings on S. 897, to strengthen U.S. policies on nuclear nonproliferation, and to reorganize certain nuclear export functions.
3302 Dirksen Building

Human Resources
Subcommittee on Labor
To continue hearings on S. 717, to promote safety and health in the mining industry.
Until: 1:00 p.m. 4232 Dirksen Building

11:00 a.m.
Foreign Relations
Subcommittee on International Operations
To mark up H.R. 5040, authorizing additional funds for fiscal year 1977 for the Department of State; to be followed by a hearing on proposed fiscal year 1978 authorizations for the Board for International Broadcasting.
4221 Dirksen Building

Joint Economic
To hold hearings on the employment/unemployment situation.
1202 Dirksen Building

2:30 p.m.
Foreign Relations
To receive a briefing by Leonard Woodcock on his delegation's recent trip to Vietnam and Laos.
4221 Dirksen Building

APRIL 4

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To resume hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of the Treasury, on funds for New York City financing.
1318 Dirksen Building

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Budget
To mark up proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Commerce, Science, and Transportation
To hold hearings on S. 263, to provide for interim regulatory reform of the Interstate Commerce Commission, Federal Trade Commission, Federal Power Commission, Federal Communications Commission, Civil Aeronautics Board, Federal Maritime Commission, and Consumer Product Safety Commission.
235 Russell Building

Energy and Natural Resources
Subcommittee on Energy Conservation and Regulation
To hold oversight hearings to determine status of national efforts in energy conservation.
3110 Dirksen Building

Energy and Natural Resources
Subcommittee on Energy Research and Development
To resume hearings on proposed authorizations for fiscal year 1978 for the Energy Research and Development Administration.
S-407, Capitol

Governmental Affairs
Energy, Nuclear Proliferation, and Federal Services Subcommittee
To hold hearings to release an Office of Technology Assessment report entitled "Nuclear Proliferation and Safeguards."
3302 Dirksen Building

Human Resources
Subcommittee on Labor
To hold oversight hearings on the administration of the Black Lung Benefits program.
Until: 2:00 p.m. 4232 Dirksen Building

Human Resources
Subcommittee on Child and Human Development
To hold hearings on S. 961, to promote the healthy development of children who would benefit from adoption by facilitating their placement in adoptive homes.
Until: 1:00 p.m. 2228 Dirksen Building

2:00 p.m.
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

*3:30 p.m.
Foreign Relations
To receive a briefing (in closed session) from officials of the Central Intelligence Agency on the general world situation.
S-116, Capitol

APRIL 5

9:30 a.m.
Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Forest Service.
1114 Dirksen Building

Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold hearings on S. 562, the proposed Union Station Improvement Act.
235 Russell Building

Human Resources
To consider S. 855, to authorize funds for fiscal year 1978 for activities of the National Science Foundation; S. 755, extending through fiscal year 1978 all expiring health programs under the Public Health Service Act and the Community Health Centers Act; and S. 725, authorizing funds through fiscal year 1982 for certain education programs for handicapped persons.
Until: 11:30 a.m.
4232 Dirksen Building

Select Small Business
Monopoly Subcommittee
To resume hearings on alleged restrictive and anticompetitive practices in the eye glass industry.
424 Russell Building

10:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Consumer Product Safety Commission.
1224 Dirksen Building

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Budget
To mark up proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Joint Economic Committee
To resume hearings on a recent study prepared by the University of Wisconsin on food chain stores' profits and prices.
318 Russell Building

Energy and Natural Resources
Subcommittee on Energy Production and Supply
To resume hearings on S. 977, to conserve gas and oil by fostering increased utilization of coal in electric generating facilities and in major industrial installations.
3110 Dirksen Building

Energy and Natural Resources
Subcommittee on Energy Research and Development
To continue hearings on proposed authorizations for fiscal year 1978 for Energy Research and Development Administration.
S-407, Capitol

Governmental Affairs
Intergovernmental Relations Subcommittee
To hold hearings on S. 904, to establish a center within OMB to provide current information on Federal domestic assistance programs.
3302 Dirksen Building

Select Committee on Intelligence
Subcommittee on the Budget
To hold hearings on the question of public disclosure of funding levels authorized for Government intelligence activities.
2228 Dirksen Building

Special Aging
To hold hearings on the impact on older Americans of rising energy costs.
1202 Dirksen Building

10:30 a.m.
Commerce, Science and Transportation
To hold a business meeting.
5110 Dirksen Building

11:00 a.m.
Select Ethics
Business meeting (open with immediate vote to go into closed session) to discuss committee organization.
1417 Dirksen Building

2:00 p.m.
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To consider S. 365, authorizing funds for fiscal year 1978 for NASA.
235 Russell Building

APRIL 6

9:00 a.m.
Energy and Natural Resources
Parks and Recreation Subcommittee
To hold hearings on S. 393, the proposed Montana Wilderness Study Act.
Room to be announced

9:30 a.m.
Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of the Interior, to hear congressional witnesses.
1114 Dirksen Building

Commerce, Science, and Transportation
Communications Subcommittee
To hold oversight hearings on rural telecommunications policy.
235 Russell Building

Commerce, Science, and Transportation
Aviation Subcommittee
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

Human Resources
Subcommittee on Child and Human Development
To hold oversight hearings on extension of the Child Abuse and Prevention Treatment Act (Public Law 93-247).
Until: 12:00 noon 4200 Dirksen Building

Human Resources
*Health and Scientific Research Subcommittee
To hold hearings on benefits from and technological uses of genetic engineering-Deoxyribonucleic Acid (DNA) research.
Until 3:00 p.m. 6202 Dirksen Building

Select Small Business
Monopoly Subcommittee
To continue hearings on alleged restrictive and anticompetitive practices in the eye glass industry.
424 Russell Building

10:00 a.m.
Appropriations
Foreign Operations Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for foreign aid programs, to hear public witnesses.
1318 Dirksen Building

Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Consumer Product Safety Commission, Office of Consumer Affairs, and Consumer Information Center.
Room to be announced

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Budget
To mark up proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Energy and Natural Resources
Subcommittee on Energy Conservation and Regulation
To continue oversight hearings to determine status of national efforts in energy conservation.
3110 Dirksen Building

Governmental Affairs
Subcommittee on Energy, Nuclear Proliferation, and Federal Services
To continue hearings on S. 897, to strengthen U.S. policies on nuclear nonproliferation, and to reorganize certain nuclear export functions.
3302 Dirksen Building

Human Resources
Subcommittee on Labor
To continue oversight hearings on the administration of the Black Lung Benefits program.
Until: 1:00 p.m. 4332 Dirksen Building

Select Committee on Intelligence
Subcommittee on the Budget
To hold hearings on the question of public disclosure of funding levels authorized for Government intelligence activities.
2228 Dirksen Building

2:30 p.m.
Foreign Relations
Subcommittee on African Affairs
To meet in closed session to receive a briefing from officials of the Central Intelligence Agency on internationalization of local conflicts in Africa.
S-116, Capitol

APRIL 7

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.
Appropriations
Military Construction Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for military construction programs, on funds for NATO and classified programs.
S-146, Capitol

Commerce, Science, and Transportation
Merchant Marine and Tourism Subcommittee
To hold hearings on S. 1019, to authorize funds for fiscal years 1978 and 1979 for certain maritime programs.
235 Russell Building

Energy and Natural Resources
Subcommittee on Energy Production and Supply
To continue hearings on S. 977, to conserve gas and oil by fostering increased utilization of coal in electric generating facilities and in major industrial installations.
3110 Dirksen Building

Select Intelligence
To hold a closed hearing on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

Special on Aging
To continue hearings on the impact on older Americans of rising energy costs.

SENATE—*Thursday, March 31, 1977*

(Legislative day of Monday, February 21, 1977)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by Hon. LLOYD BENTSEN, a Senator from the State of Texas.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O Lord our God, we lift our prayer to Thee at the beginning of the day, not as a substitute for work, but that all our work may be hallowed by Thy presence. May we work as though everything depended upon us and pray as though everything depended upon Thee. Restrain us from devising our own schemes, drafting our own codes, and then calling upon Thee to bless them. But rather keep us close to Thee, attuned to Thy spirit, obedient to Thy law so that what we do may begin, continue, and end in Thee, to the glory of Thy name and the advancement of Thy kingdom. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 31, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. LLOYD BENTSEN, a Senator from the State of Texas, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. BENTSEN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Wednesday, March 30, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, there is one nomination on the Executive Calendar in the Navy that has been cleared on both sides. I ask unanimous consent that the Senate go into executive session to consider that nomination.

The ACTING PRESIDENT pro tempore. Hearing no objection, it is so ordered. The clerk will report the nomination.

U.S. NAVY

The assistant legislative clerk read the nomination of Vice Adm. Julien J. LeBourgeois, U.S. Navy, to be vice admiral.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object to the nomination, the majority leader is correct. There is no objection on this side of the aisle to this confirmation, and I shall not object.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask that the President be immediately notified of the confirmation of the nomination.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate resume legislative session.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CONSIDERATION OF CERTAIN MEASURES ON THE UNANIMOUS-CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are two measures which have been placed on the unanimous-consent calendar as of yesterday which can be considered at this time. They still remain without objection from either side.

I ask unanimous consent that the Senate proceed to the consideration of calendar orders Nos. 58 and 59 on the unanimous-consent calendar.

ERDA LOAN GUARANTEE PROGRAM

The Senate proceeded to consider the bill (S. 37) to amend the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5906), and for other purposes, which had been reported from the Committee on Energy and Natural Resources with amendments as follows:

On page 9, line 1, strike "forebearance" and insert "forbearance";

On page 13, line 12, strike "Interior and Insular Affairs" and insert "Energy and Natural Resources";

On page 14, line 10, following "appropriated" insert "effective October 1, 1977, and thereafter";

On page 18, line 2, following "energy-related" insert "portions of";

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as "Amendments to the Federal Nonnuclear Energy Research and Development Act of 1974".

SEC. 101. Section 7(a) of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5906) is amended—

(1) by striking out "and" after the semicolon at the end of paragraph (5),

(2) by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and", and

(3) by adding at the end thereof the following new paragraph:

"(7) Federal loan guarantees: *Provided,* That all of the other provisions of this Act apply to such guarantees in the same manner and to the same extent as they apply to demonstrations under this Act.".

SEC. 201. The Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5901, et seq.) is further amended by adding at the end thereof the following new section:

"LOAN GUARANTEES FOR COMMERCIAL BIOMASS DEMONSTRATION FACILITIES

SEC. 20. (a) It is the purpose of this section—

"(1) to assure adequate Federal support to foster a commercial demonstration program to produce on a commercial scale synthetic fuels and other desirable forms of energy from biomass;

"(2) to authorize loan guarantees for the construction and startup and related costs of commercial demonstration facilities for the conversion of biomass into synthetic fuels and other forms of energy; and

"(3) to gather information about the technological, economic, environmental, and social costs, benefits, and impacts of such commercial demonstration facilities.

"(b)(1) The Administrator is authorized in accordance with such rules and regulations as he shall prescribe after consultation with the Secretary of the Treasury, to guarantee and to make commitments to guarantee, in such manner and subject to such conditions (not inconsistent with the provisions of this Act) as he deems appropriate, the payment of interest on, and the principal balance of, bonds, debentures, notes, and other obligations issued by or on behalf of any borrower for the purpose of (A) financing the construction and startup costs of commercial demonstration facilities for the conversion of biomass into synthetic fuels; and (B) financing the construction and startup costs of commercial demonstration facilities to generate desirable forms of energy (including synthetic fuels) in commercial quantities from bioconversion. The outstanding indebtedness guaranteed and committed to be guaranteed under clauses (A), and (B), of this paragraph shall at no time exceed $300,000,000.

"(2) An applicant for any guarantee under this section shall provide information to the Administrator in such form and with such content as the Administrator deems necessary.

"(3) Prior to issuing any guarantee under this section the Administrator shall obtain the concurrence of the Secretary of the Treasury with respect to the timing, interest rate, and substantial terms and conditions of such guarantee.

"(4) The full faith and credit of the United States is pledged to the payment of all guarantees issued under this section with respect to principal and interest.

"(5) With respect to any demonstration facility for the conversion of solid waste (as that term is defined in the Solid Waste Disposal Act, as amended), the Administrator, prior to issuing any guarantee under this section, must be in receipt of a certification from the Administrator of the Environmental Protection Agency and any appropriate State or areawide solid waste management planning agency that the proposed application for a guarantee is consistent with any applicable suggested guidelines published pursuant to section 209(a) of the Solid Waste Disposal Act, as amended, and any applicable State or regional solid waste management plan.

"(c) The Administrator, with due regard for the need for competition, shall guarantee or make a commitment to guarantee any obligation under subsection (b) only if—

"(1) the Administrator is satisfied that the financial assistance applied for is necessary to encourage financial participation;

"(2) the amount guaranteed does not exceed 75 per centum of the total cost of the commercial demonstration facility, as determined by the Administrator: *Provided,* That the amount guaranteed may not exceed 90 per centum of the total cost of the commercial demonstration facility during the period of construction and startup; and

"(3) the Administrator has determined that there will be a continued reasonable assurance of full repayment;

"(4) the obligation is subject to the condition that it not be subordinated to any other financing;

"(5) the Administrator has determined, taking into consideration all available forms of assistance under this section and other Federal statutes, that the impacts directly resulting from the proposed commercial demonstration facility have been fully evaluated by the borrower, the Administrator, and others;

"(6) the maximum maturity of the obligation does not exceed thirty years, or 90 per centum of the projected useful economic life of the physical assets of the commercial demonstration facility covered by the guarantee, whichever is less, as determined by the Administrator.

"(d) At least sixty days prior to submitting a report to Congress pursuant to subsection (m) of this section on each guarantee, the Administrator shall request from the Attorney General and the Chairman of the Federal Trade Commission written views, comments, and recommendations concerning the impact of such guarantee or commitment on competition and concentration in the production of energy and give due consideration to views, comments, and recommendations received: *Provided,* That if either official recommends against making such guarantee or commitment, the Administrator shall not do so unless he determines in writing that such guarantee or commitment is in the national interest.

"(e)(1) As soon as the Administrator knows the geographic location of a proposed facility for which a guarantee or a commitment to guarantee is sought under this section, he shall inform the Governor of the State, and officials of each political subdivision and Indian tribe, as appropriate, in which the facility would be located or which would be impacted by such facility. The Administrator shall not guarantee or make a commitment to guarantee under subsection (b) of this section if the Governor of the State in which the proposed facility would be located recommends that such action not be taken unless the Administrator finds that there is an overriding national interest in taking such action in order to achieve the purpose of this section. If the Administrator decides to guarantee or make a commitment to guarantee despite a Governor's recommendation not to take such action, the Administrator shall communicate, in writing, to the Governor reasons for not concurring with such recommendation. The Administrator's decision, pursuant to this subsection, shall be final unless determined upon judicial review to be arbitrary and capricious. Such review shall take place in the United States court of appeals for the circuit in which the State involved is located, upon application made within ninety days from the date of such decision. The Administrator shall, by regulation, establish procedures for review of, and comment on, the proposed facility by States, local political subdivisions, and Indian tribes which may be impacted by such facility, and the general public.

"(2) The Administrator shall review and approve the plans of the applicant for the construction and operation of any commercial demonstration and related facilities constructed or to be constructed with assistance under this section. Such plans and the actual construction shall include such monitoring and other data-gathering costs associated with such facility as are required by the comprehensive plan and program under this section. The Administrator shall determine the estimated total cost of such demonstration facility, including, but not limited to, construction costs, and start-up costs.

"(f) Except in accordance with reasonable terms and conditions contained in the written contract of guarantee, no guarantee issued or commitment to guarantee made under this section shall be terminated, canceled, or otherwise revoked. Such a guarantee or commitment shall be conclusive evidence that the underlying obligation is in compliance with the provisions of this section and that such obligation has been approved and is legal as to principal, interest, and other terms. Subject to the conditions of the guarantee or commitment to guarantee, such a guarantee shall be incontestable in the hands of the holder of the guaranteed obligation, except as to fraud or material misrepresentation on the part of the holder.

"(g)(1) If there is a default by the borrower, as defined in regulations promulgated by the Administrator and in the guarantee contract, the holder of the obligation shall have the right to demand payment of the unpaid amount from the Administrator. Within such period as may be specified in the guarantee or related agreements, the Administrator shall pay to the holder of the obligation the unpaid interest on and unpaid principal of the guaranteed obligation as to which the borrower has defaulted, unless the Administrator finds that there was no default by the borrower in the payment of interest or principal or that such default has been remedied. Nothing in this section shall be construed to preclude any forbearance by the holder of the obligation for the benefit of the borrower which may be agreed upon by the parties to the guaranteed obligation and approved by the Administrator.

"(2) If the Administrator makes a payment under paragraph (1) of this subsection the Administrator shall be subrogated to the rights of the recipient of such payment as specified in the guarantee or related agreements including, where appropriate, the authority (notwithstanding any other provision of law) to complete, maintain, operate, lease, or otherwise dispose of any property acquired pursuant to such guarantee or related agreements or to permit the borrower, pursuant to an agreement with the Administrator, to continue to pursue the purposes of the commercial demonstration facility if the Administrator determines that this is in the public interest.

"(3) In the event of a default on any guarantee under this section, the Administrator shall notify the Attorney General, who shall take such action as may be appropriate to recover the amounts of any payments made under paragraph (1) (including any payment of principal and interest under subsection (h)) from such assets of the defaulting borrower as are associated with the commercial demonstration facility, or from any other security included in the terms of the guarantee.

"(4) For purposes of this section, patent and technology resulting from the commercial demonstration facility shall be treated as project assets of such facility in accordance with the terms and conditions of the guarantee agreement. Furthermore, the guarantee agreement shall contain a provision specifying that patents, technology, and other proprietary rights which are necessary for the completion or operation of the commercial demonstration facility shall be available to the Government and its designees on equitable terms, including due consideration to the amount of the Government's default payments.

"(h) With respect to any obligation guaranteed under this section, the Administrator is authorized to enter into a contract to pay, and to pay, the holders of the obligation, for and on behalf of the borrower, from the fund established by this section, as applicable, the principal and interest payments which become due and payable on the unpaid balance of such obligation if the Administrator finds that—

"(1) the borrower is unable to meet such payments and is not in default; it is in the public interest to permit the borrower to continue to pursue the purposes of such demonstration facility; and the probable net benefit to the Federal Government in paying such principal and interest will be greater than that which would result in the event of default.

"(2) the amount of such payment which the Administrator is authorized to pay shall be no greater than the amount of principal and interest which the borrower is obligated to pay under the loan agreement; and

"(3) the borrower agrees to reimburse the Administrator for such payment on terms and conditions, including interest, which are satisfactory to the Administrator.

"(i) Regulations required by this section shall be issued within one hundred and eighty days after enactment of this section, except as provided in subsection (s) of this section. All regulations under this section and any amendments thereto shall be issued in accordance with section 553 of title 5, of the United States Code.

"(j) The Administrator shall charge and collect fees for guarantees of obligations authorized by clauses (A) and (B), of subsection (b)(1), in amounts sufficient in the judgment of the Administrator to cover the applicable administrative costs and probable losses on guaranteed obligations, but in any event not to exceed 1 per centum per annum of the outstanding indebtedness covered by the guarantee.

"(k)(1) The Administrator is directed to submit a report to the Congress within one hundred and eighty days after the enactment of this section setting forth his recommendations on the best opportunities to implement a program of Federal financial assistance with the objective of demonstrating production and conservation of energy.

"(2) The report submitted under paragraph (1) of this subsection shall include a comprehensive plan and program to acquire information and evaluate the environmental, economic, social, and technological impacts of the demonstration program under this section. In preparing such a comprehensive plan and program, the Administrator shall consult with the Environmental Protection Agency, the Federal Energy Administration, the Department of Housing and Urban Development, the Department of the Interior, and the Department of Agriculture.

"(3) The comprehensive plan and program described in paragraph (2) shall include, but not be limited to—

"(A) information about potential commercial demonstration facilities proposed in the program under this section;

"(B) any significant adverse impacts which may result from any activity included in the program;

"(C) proposed regulations required to carry out the purposes of this section;

"(D) a list of Federal agencies, governmental entities, and other persons that will be consulted or utilized to implement the program; and

"(E) methods and procedures by which the information gathered under the program will be analyzed and disseminated.

"(4) The report required under paragraph (1) of this subsection shall be updated and submitted to the Congress at least annually for the duration of that program under this section.

"(l) Prior to issuing any guarantee or commitment to guarantee pursuant to subsection (b) of this section, the Administrator shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a full and complete report on the proposed commercial demonstration facility and such guarantee. Such guarantee or commitment to guarantee shall not be finalized under the authority granted by this section prior to the expiration of ninety calendar days (not including any day on which either House of Congress is not in session because of an adjournment of more than three calendar days to a day certain) from the date on which such report is received by such committees: *Provided*, That, where the cost of such commercial demonstration facility exceeds $50,000,000 such guarantee or commitment to guarantee shall not be finalized if prior to the close of such ninety-day period either House passes a resolution stating in substance that such House does not favor the making of such guarantee or commitment.

"(m)(1) There is hereby created within the Treasury a separate fund (hereafter in this section called the "fund") which shall be available to the Administrator without fiscal year limitation as a revolving fund for the purpose of carrying out the program authorized by clauses (A), and (B), of subsection (b)(1) and subsections (g) and (h) of this section.

"(2) There are authorized to be appropriated effective October 1, 1977, and thereafter to the fund from time to time such amounts as may be necessary to carry out the purposes of the applicable provisions of this section, including, but not limited to, the payments of interest and principal and the payment of interest differentials and redemption of debt. All amounts received by the Administrator as interest payments or repayments of principal on loans which are guaranteed under this section, fees, and any other moneys, property, or assets derived by him from operations under this section shall be deposited in the fund.

"(3) All payments on obligations, appropriate expenses (including reimbursements to other government accounts), and repayments pursuant to operations of the Administrator under this section shall be paid from the fund subject to appropriations. If at any time the Administrator determines that moneys in the fund exceed the present and reasonably foreseeable future requirements of the fund, such excess shall be transferred to the general fund of the Treasury.

"(4) If at any time the moneys available in the fund are insufficient to enable the Administrator to discharge his responsibilities as authorized by subsections (b)(1), (g), and (h) of this section, the Administrator shall issue to the Secretary of the Treasury notes or other obligations in such forms and denominations, bearing such maturities, and subject to such terms and conditions as may be prescribed by the Secretary of the Treasury. Redemption of such notes or obligations shall be made by the Administrator from appropriations or other moneys available under paragraph (2) of this subsection for loan guarantees authorized by clauses (A) and (B) of section (b)(1) and subsections (g) and (h) of this section. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, which shall be not less than a rate determined by taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the notes or other obligations. The Secretary of the Treasury shall purchase any notes or other obligations issued hereunder and for that purpose he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act; and the purpose for which securities may be issued under that Act are extended to include any purchase of such notes or obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes or other obligations shall be treated as public debt transactions of the United States.

"(n) For the purposes of this section, the term—

"(1) 'State' means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, or any territory or possession of the United States,

"(2) 'United States' means the several States, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa, and

"(3) 'borrower' or 'applicant' shall include any individual, firm, corporation, company, partnership, association, society, trust, joint venture, joint stock company, or other non-Federal entity.

"(o) An applicant seeking a guarantee under subsection (b) of this section must be a citizen or national of the United States. A corporation, partnership, firm, or association shall not be deemed to be a citizen or national of the United States unless the Administrator determines that it satisfactorily meets all the requirements of section 802 of title 46, United States Code, for determining such citizenship, except that the provisions in subsection (a) of such section 802 concerning (1) the citizenship of officers or directors of a corporation, and (2) the interest required to be owned in the case of a corporation, association, or partnership operating a vessel in the coastwise trade, shall not be applicable.

"(p) No part of the program authorized by this section shall be transferred to any other agency or authority, except pursuant to Act of Congress enacted after the date of enactment of this section: *Provided*, That project agreements entered into pursuant to this section for any commercial demonstration facility for the conversion or bioconversion of solid waste (as that term is defined in the Solid Waste Disposal Act, as amended) shall be administered in accordance with the May 7, 1976, Interagency Agreement between the Environmental Protection Agency and the Energy Research and Development Administration on the Development of Energy from Solid Wastes, and specifically, that in accordance with this agreement, (1) for those energy-related projects of mutual interest, planning will be conducted jointly by the Environmental Protection Agency and the Energy Research and Development Administration, following which project responsibility will be assigned to one agency; (2) energy-related portions of projects for recovery of synthetic fuels or other forms of energy from solid waste shall be the responsibility of the Energy Research and Development Administration; and (3) the Environmental Protection Agency shall retain responsibility for the environmental, economic, and institutional aspects of solid waste projects and for assurance that such projects are consistent with any applicable

suggested guidelines published pursuant to section 209(a) of the Solid Waste Disposal Act, as amended, and any applicable State or regional solid waste management plan.

"(q) Inventions made or conceived in the course of or under a guarantee authorized by this section shall be subject to the title and waiver requirements and conditions of section 9 of this Act.

"(r) With respect to any obligation which is issued after the enactment of this section by, or in behalf of, any State, political subdivision, or Indian tribe and which is either guaranteed under, or supported by taxes levied by said issuer which are guaranteed under, this section, the interest paid on such obligation and received by the purchaser thereof (or the purchaser's successor in interest) shall be included in gross income for the purpose of chapter 1 of the Internal Revenue Code of 1954, as amended: *Provided*, That the Administrator shall pay to such issuer out of the fund established by this section such portion of the interest on such obligations, as determined by the Secretary of the Treasury to be appropriate after taking into account current market yields (1) on obligations of said issuer, if any, or (2) on other obligations with similar terms and conditions the interest on which is not so included in gross income for purposes of chapter 1 of said Code, and in accordance with, such terms and conditions as the Secretary of the Treasury shall require.

"(s)(1) Each officer or employee of the Energy Research and Development Administration who—

"(A) performs any function or duty under this section; and

"(B)(i) has any known financial interest in any person who is applying for or receiving financial assistance for a commercial demonstration facility under this section; or

"(ii) has any known financial interest in property from which biomass or other energy resources are commercially produced in connection with any commercial demonstration facility receiving financial assistance under this section,

shall, beginning February 1, 1977, annually file with the Administrator a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statement shall be available to the public.

"(2) The Administrator shall

"(A) act within ninety days after the date of enactment of this Act—

"(i) to define the term 'known financial interest' for purposes of paragraph (1) of this subsection; and

"(ii) to establish the methods by which the requirement to file written statements specified in paragraph (1) will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Administrator of such statements; and

"(B) report to the Congress on June 1 of each calendar year with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

"(3) In the rules prescribed in paragraph (2) of this subsection, the Administrator may identify specific positions within the Administration which are of a nonpolicy-making nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this subsection.

"(4) Any officer or employee who is subject to, and knowingly violates, this subsection or any regulation issued thereunder shall be fined not more than $2,500 or imprisoned nor more than one year, or both.

"(t) Nothing in this section shall be construed as affecting obligations of any borrower receiving a guarantee pursuant to this section to comply with Federal and State environmental land use, water, and health and safety laws and regulations or to obtain applicable Federal and State permits, licenses, and certificates.

"(u) The information maintained by the Administrator under this section shall be made available to the public, subject to the provisions of section 552 of title 5, United States Code, and section 1905 of title 18, United States Code, and to other Government agencies in a manner that will facilitate its dissemination: *Provided*, That upon a showing satisfactory to the Administrator by any person that any information, or portion thereof, obtained under this section by the Administrator directly or indirectly from such person would, if made public, divulge (1) trade secrets or (2) other proprietary information of such person, the Administrator shall not disclose such information and disclosure thereof shall be punishable under section 1905 of title 18, United States Code: *Provided further*, That the Administrator shall, upon request, provide such information (A) any delegate of the Administrator for the purpose of carrying out this Act, and (B) the Attorney General, the Secretary of Agriculture, the Secretary of the Interior, the Federal Trade Commission, the Federal Energy Administration, the Environmental Protection Agency, the Federal Power Commission, the General Accounting Office, other Federal agencies, or heads of other Federal agencies, when necessary to carry out their duties and responsibilities under this and other statutes, but such agencies and agency heads shall not release such information to the public. This section is not authority to withhold information from Congress, or from any committee of Congress upon request of the chairman. For the purposes of this subsection, the term 'person' shall include the borrower.

"(v) Notwithstanding any other provision of this section, the authority to make guarantees or commitments to guarantee under subsection (b)(1), the authority to make contracts under subsection (h), the authority to charge and collect fees under subsection (j), and the authorities under subsection (m) of this section shall be effective only to the extent provided, without fiscal year limitation, in appropriation Acts enacted after the date of enactment of this section.

"(w) For purposes of this section 'biomass' shall include, but is not limited to, animal and timber waste, urban and industrial waste, sewerage sludge, and oceanic and terrestrial crops.".

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the amendments be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendments were agreed to en bloc.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–70), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE MEASURE

The purpose of S. 37 is to amend the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5906) so as to provide the Energy Research and Development Administration with authority to utilize loan guarantees in the research, development and demonstration of energy and energy-related technologies. The bill also provides for the authorization of a loan guarantee program to provide for the financing, construction and operation of commercialized demonstration facilities for the conversion of biomass into synthetic fuel or other usable forms of energy.

SUMMARY OF MAJOR PROVISIONS

Senate bill 37 would amend the Federal Non-Nuclear Energy Research and Development Act of 1974 by authorizing the Energy Research and Development Administration to enter into agreements, subject to congressional approval, whereby the Federal Government would guarantee the repayment of interest on and principal balance of loans and other forms of financial commitments secured for design, construction and operation of energy and energy-related research, development and demonstration projects.

Second, the bill provides for the establishment of a loan guarantee program, to be administered by the Energy Research and Development Administration, whereby the Administrator of ERDA is authorized to guarantee and to make commitments to guarantee the payment of interest on, and the principal balance of, bonds, debentures, notes, and other obligations issued by or on behalf of any person for the purpose of financing the construction and initial operation of commercial-sized demonstration facilities for the conversion of biomass into synthetic fuel or other usable forms of energy. The total outstanding indebtedness that may be guaranteed, at any time, by the Administration of ERDA is limited to $300 million.

BACKGROUND AND NEED

In 1975, the then Senate Committee on Interior and Insular Affairs considered the development of a national program to encourage the production of synthetic fuels through the use of Federal loan guarantees. Various private sector concerns were (and still are) unable to obtain financial backing for the construction of first-of-a-kind commercialized demonstration facilities without partial Federal assistance. Faced with the reality that this Nation's domestic oil reserves are continuing to decline and that ultimately the petroleum exporting nations will lack sufficient resources to export the Interior Committee acted to begin the development of a national synthetic fuels program. This Nation has vast amounts of energy stored in its coal, shale, and biomass reserves; much more so than it does in its petroleum and natural gas reserves. The purpose of enacting a synthetic fuels program, therefore, is to assure that this country investigates all possible substitutes for the declining liquid and gaseous supplies. The intent is to gather information and to determine whether or not these processes are technically feasible and cost effective.

By a vote of 92 to 2, the Senate adopted the Interior Committee's recommendation last year to adopt a $6 billion loan guarantee program. The conversion of biomass to synthetic fuels or other forms of energy was included in the loan guarantee program. After agreement by Senate and House conferees to retain the provision of the loan guarantee program, the Senate again adopted the conference report but the House of Representatives rejected that portion of the recommendations dealing with the loan guarantee program.

In order to insure that the 4th Congress had an opportunity to take action on a syn-

thetic fuels option, the committee voted to reinsert into the authorization bill for fiscal year 1977 the biomass portion of the synfuels program agreed to by the Senate and House conferees during consideration of the fiscal year 1976 authorization bill. Members of the Interior Committee meeting in executive session reiterated support for the broad development of a synthetic fuels program, but the committee specifically did not take action on the broader synthetic fuels program (which could include coal, oil shale, geothermal and solar energy resources) in order to await further action by the House of Representatives upon a synthetic fuels proposal under consideration during the second session of the 94th Congress. The bill, under consideration in the House (H.R. 12112) would have authorized a $4.0 billion loan guarantee and price support program for the production of synthetic fuels, including biomass, on a commercial demonstration scale. In addition, the legislation would have authorized the demonstration of energy conservation technologies in industrial and business settings. On a vote to adopt rules by which to consider H.R. 12112, the membership of the House voted (193–192) to deny the adoption of proposed rules and the measure was thereby not considered on the merits.

However, Senate and House conferees to the fiscal year 1977 ERDA authorization bill (H.R. 13350) agreed to the Senate provision which authorized ERDA to issue loan guarantees and to undertake a $300 million loan guarantee program to convert biomass to various forms of useful energy. The House of Representatives subsequently adopted the conference report to H.R. 13350 but the Senate, on matters unrelated to the loan guarantee provisions, failed to adopt the conference report just prior to adjournment of the 94th Congress. Senate bill 37, introduced by Senator Henry M. Jackson on January 10, 1977, is identical to titles VII and VIII of the conference report to H.R. 13350 except that the biomass loan guarantee program is not authorized to begin until October 1, 1977.

Provisions of the bill in need of further explanation and clarification are the following:

Section 20(b)(3)—Treasury To Act Promptly

This subsection was adopted to assure that the loan guarantees are administered with the concurrence of the Secretary of the Treasury so as to minimize the impact on the money market and coordinate these efforts with other Administration programs which affect fiscal policy. It is expected that the Secretary of the Treasury will act promptly so that the concurrence will not delay the implementation of this program and that the Secretary will exercise special care that smaller projects will not be delayed.

Section 20(c)—Competition

Subsection (c) requires that the Administrator have due regard for competition in carrying out loan guarantees. The committee is concerned that concentration in the energy business not be further aggravated through Federal loan guarantees.

Section 20(c)(2)—Project costs

ERDA is authorized to make guarantees for up to 75 percent of the total project cost of each facility.

ERDA can guarantee a higher percentage during construction and the start up period but limit this to a maximum of 90 percent.

Section 20(d)—Competitive impact

In subsection (c) ERDA must consider the need for competition in making loan guarantees.

In subsection (d), ERDA is required to solicit from the Attorney General and the Chairman of the Federal Trade Commission written views, comments, and recommendations concerning the impact of each proposed loan guarantee on competition and concentration in the energy supply industry. ERDA must do this in a timely fashion, but at least 60 days before ERDA sends its report on the proposed guarantee to Congress under subsection (1).

Section 20(e)(1)—State review

Section 20(e)(1) provides that once ERDA has ascertained, after reviewing applications for loan guarantees and determining which are capable of being approved, where a proposed demonstration facility is likely to be located, ERDA must promptly notify the appropriate State and local governmental officials. Before ERDA can approve any such application, however, ERDA must give the Governor of the State where the facility will be located an opportunity to make a recommendation thereon.

If the Governor recommends against making the guarantee for the facility, the ERDA must refrain from doing so unless the Administrator finds that there is an overriding national interest and sets forth his reasons for this finding in writing to the Governor.

The ERDA decision is subject to judicial review filed within 90 days after the decision.

Provision is also made for ERDA regulations concerning review by States and communities which may be impacted by the facility in any way and by the general public.

Section 20(g)(2)—Disposal of property in case of default

In the event of default, the Administrator is provided with the authority to complete the project, maintain the facility, operate the facility, including purchase of necessary feedstock and other material, and the authority to sell the products or energy produced by the facility. Such operation may be by the Federal Government or by other parties or by the defaulting borrower, where the Administrator determines that permitting the borrower to continue pursuing the purposes of the facility is in the public interest.

Section 20(g)(4)—Disposition of Patents on Default

Section 20(g)(4) provides that "patents and technology resulting from the commercial demonstration facility shall be treated as project assets of such facility in accordance with terms and conditions of the guarantee agreement." The purpose of this provision is to make clear that in the event of default intangible assets such as patents and technology are subject to claim by the United States in the same manner as tangible, physical assets. The term technology is intended to be all-inclusive and embrace such items as know-how and trade secrets. Patents and technology may well be extremely valuable assets of a defaulted project, and should be available to the United States upon default.

Section 20(g)(4) also provides that "the guarantee agreement shall contain a provision specifying that patents, technology, and other proprietary rights which are necessary for the completion or operation of the commercial demonstration facility shall be available to the Government and its designees on equitable terms, including due consideration to the amount of the Government's default payments." The purpose of this authority is to insure that the full complement of patents and technology required for the limited purpose of completing and operating the defaulting project will be available to the Government and its designees. Without this provision, it is conceivable that blocking patents and technology of the project participation or patents and technology license to the project participant by others might frustrate the ability of the United States or its designee to expeditiously and economically complete the project.

Waivers under section 20(r) of this act are not intended to override the applicability of section 20(g)(4) and should be made subject to its provisions.

Section 20(k) and 20(l)—Congressional Oversight

Section 20(k) provides that before ERDA finally makes a binding commitment to guarantee, or a guarantee of, obligations to any borrower to build a commercial demonstration facility, ERDA must transmit to the House Science and Technology Committee and the Senate Energy and Natural Resources Committee a complete report on the proposed guarantee and facility.

Such report on each proposed guarantee or commitment will lay before the committees for 90 calendar days, exclusive of days either House adjourns for more than 3 days.

If the estimated cost of proposed commercial demonstration facility will exceed $50 million, ERDA shall not finalize the guarantee or commitment for that facility if either House passes a resolution of disapproval within the 90 days period.

Section 20(p)—Transfer of loan guarantee program

The primary responsibility for the entire loan guarantee program is to remain with the ERDA until otherwise directed by the Congress. The committee does not intend to prevent the participation and cooperation of other Federal agencies with the ERDA through normal fund transfers provided that the ERDA maintain the final authority to control the program.

LEGISLATIVE HISTORY

On January 10, 1977, the bill S. 37, was introduced by Senator Jackson and referred to the Committee on Interior and Insular Affairs. The bill, pursuant to the provisions of Senate Resolution 4, was subsequently referred to the Senate Committee on Energy and Natural Resources. Senate bill 37 is almost identical to titles VII and VIII of H.R. 13350, 94th Congress, 2nd session. The major provisions of S. 37 have been extensively considered in the preceding Congress and favorably acted upon by the Senate and House of Representatives. On March 10, 1977, the Senate Committee on Energy and Natural Resources ordered the bill favorably reported with certain amendments of a technical nature.

COMMITTEE RECOMMENDATION AND TABULATION OF VOTES

The Senate Committee on Energy and Natural Resources, in open business session on March 10, 1977, by unanimous vote of a quorum present recommends that the Senate pass S. 37, with certain amendments of a technical nature as previously described herein.

SECTION-BY-SECTION ANALYSIS

SECTION 101. Section 101 amends section 7 (a) of the Federal Nonnuclear Energy Research and Development Act of 1974 to provide the Energy Research and Development Administration, acting through the Administrator with the authority to issue loan guarantees.

SECTION 201. Section 201 amends the Federal Nonnuclear Energy Research and Development Act by adding a new section which authorizes the establishment of a loan guarantee program for biomass and urban waste commercial demonstration facilities. The program is authorized to provide guarantees for loans whose total amounts are not to exceed $300 million.

COST AND BUDGET CONSIDERATIONS

As the Committee on Interior and Insular Affairs (the predecessor to the Committee on Energy and Natural Resources) reported to the Congress during the 94th Congress, the Nation must pursue an aggressive, and necessarily expensive, research, development and demonstration program in various energy technologies. That proposition has not changed and the new Energy and Natural Resources Committee adopts the commit-

ment of its predecessor to see that the nation has available a number of economically and environmentally acceptable methods to derive needed energy producing and conserving technologies to meet future demands. It should be reiterated that as each new energy technology is moved to the commercial-size demonstration plant phase, major increases ($500 million to $1,000 million) in the budgetary level for capital expenses will necessarily have to be authorized. Cost for construction and operation of first-of-a-kind commercial scale demonstration plants will add several billion dollars to the total budget for the nonnuclear programs conducted by ERDA over the next several years. The committee believes that private industry must be intimately involved in this development of technologies and that federally backed loans are one mechanism which provides stimulation to private industry to embark upon these commercial-scale ventures with minimum government involvement and financial support.

Because default on various guaranteed loans is unpredictable with a new program, it is not now possible to establish the actual dollar outlays that might be incurred through establishment of this program. However, even if the percentage of defaults were 25 percent of the total guaranteed amount authorized under this program—and 25 percent is exceedingly large when compared with similar loan guarantee programs—that amount of Federal expenditures would be a modest amount when compared to the billions of dollars now being used to pay for foreign imported oil.

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., March 25, 1977.

Hon. HENRY M. JACKSON,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, 3106 Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 103 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for S. 37, a bill to amend the Federal Nonnuclear Energy Research and Development Act of 1974.

Should the Committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

ALICE M. RIVLIN, *Director.*

MARCH 25, 1977.

COST ESTIMATE

1. Bill number: S. 37.

2. Bill title: Amendments to the Federal Nonnuclear Energy Research and Development Act of 1974.

3. Bill status: As reported by the Senate Committee on Energy and Natural Resources.

4. Purpose of bill: This bill would authorize loan guarantees of up to $300 million for the construction, start-up and related costs of commercial demonstration facilities for the conversion of biomass into synthetic fuels and other forms of energy. Biomass is defined as animal and timber waste, urban and industrial waste, sewage sludge, and oceanic and terrestrial crops.

The Administrator of ERDA is authorized to carry out this program through the use of a revolving fund in the Treasury. The bill authorizes, to be appropriated to the fund, such amounts as may be necessary to guarantee these loans and manage the loan process. The bill also authorizes the ERDA Administrator to borrow from the Treasury if there is insufficient money in the fund to meet the government's commitments under the provisions of this bill, and it requires the Treasury to purchase the notes or other obligations issued by the Administrator for this purpose. ERDA also must submit a report within 180 days of enactment and annually thereafter, including a comprehensive plan for the evaluation of this program.

5. Cost estimate: The major potential budget impact of this bill is the establishment of contingent liabilities. It is estimated that the government would be required to fund at least $150 million of the $300 million authorized. However, the potential liability is the entire $300 million. Other budget effects are the administrative express ERDA would incur and the fees ERDA would collect. These costs are summarized below.

[In millions of dollars, fiscal years]

	1977	1978	1979	1980	1981	After 1981
Contingent liability						150.0
Estimated costs (function 300):						
Administrative costs	0.5	1.0	1.1	1.2	1.3	.....
Less: fees		—.1	—.4	—1.2	—2.4	.....
Net cost	.5	.9	.7	0	—1.1	.....

6. Basis for estimate: Administrative costs for the biomass program were based on ERDA's planning and evaluation costs for comparable high-technology loan guarantee programs. On this basis, it was estimated that the costs to process these loans, plan and assist in construction, and evaluate plant performance would total $1 million a year initially, with adjustments for inflation in future years. Fees were estimated at 1 percent of the outstanding debt covered by the guarantee.

Through the loan guarantee program, the government would assume a potential liability of up to $300 million. However, there is great uncertainty as to the economic and technological feasibility of the biomass program. Doubts as to the likely success of the program stem primarily from the lack of experience with such projects on the scale of those that are planned. As a result, some industry experts project the possibility of default as close to 100 percent, while others estimate a 25 percent chance of failure.

For purposes of realistically estimating the likely budget impact of these guarantees, it was assumed that roughly three plants would be built under this program and that two out of the three would fail either technologically or economically. However, should a default occur, it is estimated that approximately one-fourth of the value of the plant could be recovered. Therefore the government's contingent liability is estimated at $150 million. Due to the planning and lead time necessary for construction, operation, and evaluation of these plants, any failure and disbursement of funds would not occur until after 1981.

7. Estimate comparison: None.

8. Previous CBO estimate: None.

9. Estimate prepared by: Leslie Wilson.

10. Estimate approved by:

C. G. NUCKOLS,
(For James L. Blum,
Assistant Director for Budget Analysis).

REGULATORY IMPACT EVALUATION

In compliance with paragraph 5 of rule XXIX of the Standing Rules of the Senate, the committee makes the following evaluation of the regulatory impact which would be incurred in carrying out S. 37.

The bill is not a regulatory measure in the sense of imposing Government-established standards or significant economic responsibilities on private individuals and businesses. The loan guarantee program authorized by S. 37 would be developed by the Administrator of ERDA with the voluntary cooperation of the public and local governments.

No personal information would be collected as a result of this program. Therefore, there would be no impact on personal privacy. When the program is developed, it will be used to assist only those members of the public who request assistance.

It is not anticipated that any additional paperwork, over and above that which is agreed to by the parties involved to the loan guarantee, would result from enactment of S. 37.

JOINT COMMITTEE ON ATOMIC ENERGY

The bill (S. 1153) to abolish the Joint Committee on Atomic Energy and to reassign certain functions and authorities thereof, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

PURPOSES

SEC. 101. The purposes of this Act are—

(1) to abolish the Joint Committee on Atomic Energy and to provide for the transfer of its statutory functions and authority to other committees of the Congress which, under the rules of the House and Senate, are assigned jurisdiction over the development, utilization, or application of atomic energy;

(2) to preserve the security of information relating to the national security considerations of nuclear technology;

(3) to make necessary conforming amendments to the Atomic Energy Act of 1954, as amended, and certain other laws which pertain to the Joint Committee on Atomic Energy; and

(4) to provide for the disposition of staff personnel of the Joint Committee on Atomic Energy.

TITLE II—JOINT COMMITTEE ON ATOMIC ENERGY

SEC. 201. The Joint Committee on Atomic Energy is abolished.

TITLE III—TRANSFERS OF CERTAIN FUNCTIONS OF THE JOINT COMMITTEE ON ATOMIC ENERGY AND CONFORMING AMENDMENTS TO CERTAIN OTHER LAWS

SEC. 301. (a) Sections 201, 202, 203, 204, 205, 206, and 207 of the Atomic Energy Act of 1954, as amended, are repealed.

(b) Section 103 of the Atomic Energy Community Act of 1955, as amended, is repealed.

SEC. 302. Section 3 of the Congressional Budget Act of 1974 is amended by—

(1) striking the subsection designation "(a)"; and

(2) repealing subsection (b).

SEC. 303. Section 252(a)(3) of the Legislative Reorganization Act of 1970 is repealed.

SEC. 304. Section 502 of the Mutual Security Act of 1954, as amended, is amended by striking the words "the Joint Committee on Atomic Energy and".

SEC. 305. Section 3 of the International Atomic Energy Agency Participation Act of 1957 is amended by striking the words "the Joint Committee on Atomic Energy,".

SEC. 306. (a) Section 11 of the Atomic Energy Act of 1954, as amended, is amended by repealing subsection o.

(b) Section 11c of the Atomic Energy Act of 1954, as amended, is amended by deleting the words, "The term 'atomic energy' means" and inserting the words ' The terms 'atomic energy' or 'nuclear energy' mean".

(c) Section 11d of the Atomic Energy Act of 1954, as amended, is amended by deleting the words "The term 'atomic weapon' means" and inserting the words "The terms 'atomic weapon' or 'nuclear weapon' mean".

SEC. 307. Section 120 of the Atomic Energy Community Act of 1955, as amended, is amended by striking the second proviso and all that follows, and substituting the following: *"Provided further,* That before the Commission makes any disposition of property under the authority of this section, the basis for the proposed disposition (with necessary background and explanatory data) shall be submitted to the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section, and a period of forty-five days shall elapse while Congress is in session (in computing such forty-five days, there shall be excluded the days on which either House is not in session because of adjournment of more than three days): *Provided, however,* That after having received the basis for the proposed disposition, such congressional committees may by resolution in writing agreed to by such committees waive the conditions of all or any portion of such forty-five-day period.".

SEC. 308. Section 91 d. of the Atomic Energy Community Act of 1955, as amended, is amended by striking the words "Joint Committee on Atomic Energy" and substituting "congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section,".

SEC. 309. Section 51 of the Atomic Energy Act of 1954, as amended is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting "congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section,"; and

(2) striking the proviso and substituting *"Provided, however,* That the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section, after having received such determination, may by resolution in writing agreed to by such committees waive the conditions of all or any portion of such thirty-day period.".

SEC. 310. Section 54 a. of the Atomic Energy Act of 1954, as amended, is amended by deleting the words *"Provided, however"* the second time they appear and all that follows up to the next sentence and substituting the following: *"Provided, however,* That before they are established by the Commission pursuant to this subdivision (ii), such proposed amounts and periods shall be submitted to the Congress and referred to the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section, and a period of sixty days shall elapse while Congress is in session (in computing such sixty days, there shall be excluded the days on which either House is not in session because of an adjournment of more than three days): *And provided further,* That any such proposed amounts and periods shall not become effective if during such sixty-day period the Congress passes a concurrent resolution stating in substance that it does not favor the proposed action: *And provided further,* That prior to the elapse of the first thirty days of any such sixty-day period the congressional committees to which have been referred such proposed amounts and periods shall report to their respective Houses concerning their views and recommendations respecting the proposed amounts and periods and shall report to their respective Houses an accompanying proposed concurrent resolution stating in substance that the Congress favors, or does not favor, as the case may be, the proposed amounts or periods.".

SEC. 311. Section 61 of the Atomic Energy Act of 1954, as amended, is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting "congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section,"; and

(2) striking all after the words *"Provided, however,"* and substituting "That the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section, after having received such determination, may by resolution in writing agreed to by such committees waive the conditions of all or any portion of such thirty-day period.".

SEC. 312. (a) Section 123 c. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"c. the proposed agreement for cooperation, together with the approval and the determination of the President, has been submitted to the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over such proposed agreements, and a period of thirty days has elapsed while Congress is in session (in computing such thirty days, there shall be excluded the days on which either House is not in session because of an adjournment of more than three days): *Provided, however,* That the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over such proposed agreements, after having received such agreement for cooperation, may by resolution in writing agreed to by such committees waive the conditions of all or any portion of such thirty-day period; and".

(b) Section 123 d. of such Act is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting "congressional committees which, under the rules of the House and Senate are assigned jurisdiction over such proposed agreements,"; and

(2) striking the remainder of the sentence following the word *"Provided"* and substituting the following: "That prior to the elapse of the first thirty days of any such sixty-day period the congressional committees to which have been referred the proposed agreement shall each submit a report to their respective Houses of the views and recommendations of the committee respecting the proposed agreement and an accompanying proposed concurrent resolution stating in substance that the Congress favors, or does not favor, as the case may be, the proposed agreement for cooperation.".

SEC. 313. Section 161 v. of the Atomic Energy Act of 1954, as amended, is amended by striking the third proviso and substituting the following: *"Provided further,* That before the Commission establishes such criteria, the proposed criteria shall be submitted to the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this subsection, and a period of forty-five days shall elapse while Congress is in session (in computing the forty-five days there shall be excluded the days in which either House is not in session because of adjournment for more than three days): *Provided, however,* That the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this subsection, after having received such proposed criteria, may by resolution in writing agreed to by such committees waive the conditions of all or any portion of such forty-five-day period.".

SEC. 314. Section 164 of the Atomic Energy Act of 1954, as amended, is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting "congressional commitees which under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section,"; and

(2) striking the proviso and substituting *"Provided, however,* That the thirty-day period may be waived by resolution in writing agreed to by the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section.".

SEC. 315. Section 107(c) of Public Law 88-332 (42 U.S.C. 2204a) is amended by—

(1) striking the word "Joint Committee" the first time they appear and substituting "congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section"; and

(2) striking the proviso and substituting *"Provided, however,* That the forty-five-day period may be waived by resolution in writing agreed to by the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section.".

SEC. 316. Section 170 i. of the Atomic Energy Act of 1954, as amended, is amended by striking the words "Joint Committee" each time they appear and substituting "congressional committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section.".

TITLE IV—INFORMATION AND ASSISTANCE TO CONGRESSIONAL COMMITTEES

SEC. 401. (a) The Energy Research and Development Administration and the Nuclear Regulatory Commission shall keep the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the functions of the Administration or the Commission, fully and currently informed with respect to the activities of the Administration and the Commission.

(b) The Department of Defense shall keep the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over national security considerations of nuclear technology, fully and currently informed with respect to such matters within the Department of Defense relating to national security considerations of nuclear technology which are within the jurisdiction of such committees.

(c) Any Government agency shall furnish any information requested by the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the development, utilization, or application of nuclear energy, with respect to the activities or responsibilities of such agency in the field of nuclear energy which are within the jurisdiction of such committees.

SEC. 402. The committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the development, utilization, or application of nuclear energy, are authorized to utilize the services, information, facilities, and personnel of any Government agency which has activities or responsibilities in the field of nuclear energy which are within the jurisdiction of such committees: *Provided, however,* That any utilization of personnel by such committees shall be on a reimbursable basis and shall require, with respect to committees of the Senate, the prior written consent of the Committee on Rules and Administration, and with respect to committees of the House of Representatives, the prior written consent of the Committee on House Administration.

SEC. 403. All records, data, charts, and files of the Joint Committee on Atomic Energy which are not transferred under section 501 of this Act are transferred to the committees of the Senate which, under the rules of the Senate, have jurisdiction over the subject matters to which such records, data, charts, and files primarily relate. Such com-

mittees of the Senate shall make available such records, data, charts, and files to other committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the subject matters to which such records, data, charts, and files relate.

TITLE V—PROTECTION OF NATIONAL SECURITY INFORMATION

SEC. 501. (a) All records, data, charts, and files of the Joint Committee on Atomic Energy relating to national security matters, including the military applications of nuclear technology, shall be transferred to the committees of the Senate which, under the rules of the Senate, have jurisdiction over the subject matters to which such records, data, charts, and files relate. In the event that any record, chart, or file shall be within the jurisdiction of more than one committee of the Senate, duplicate copies shall be provided upon request.

(b) The committees of the Senate which receive the records, data, charts, and files of the Joint Committee on Atomic Energy under subsection (a) shall make available such records, data, charts, and files to the committees of the House of Representatives which, under the rules of the House, have jurisdiction over the subject matters to which such records, data, charts, and files relate.

(c) The committees of the Senate which receive the records, data, charts, and files of the Joint Committee on Atomic Energy under subsection (a) may utilize the Office of Classified National Security Information established by section 502 of this Act or make other suitable arrangements for safeguarding such records, data, charts, or files.

SEC. 502. (a) There is established for the period beginning on the effective date of this Act and ending March 31, 1979, an office of the Senate to be known as the "Office of Classified National Security Information" (hereafter in this section referred to as the "Office"). The Office shall be under the policy direction of the majority leader, the minority leader and the chairman of the Committee on Rules and Administration of the Senate, and shall be under the administrative direction and supervision of the Secretary of the Senate. The Office shall have the responsibility for safeguarding such restricted data and such other classified information as any committee of the Senate may from time to time assign to it.

(b) The Office shall have the authority—

(1) upon application of any committee of the Senate, to perform the administrative functions necessary to classify and declassify information relating to the national security considerations of nuclear technology in accordance with guidelines developed for restricted data by the responsible executive agencies;

(2) to provide appropriate facilities for hearings of committees of the Senate at which restricted data or other classified information is to be presented or discussed; and

(3) to establish and operate a central repository in the United States Capitol for the safeguarding of restricted data and other classified information for which such Office is responsible.

(c) The Secretary of the Senate, with the approval of the majority leader, the minority leader, and the chairman of the Committee on Rules and Administration of the Senate, is authorized to appoint and fix the compensation of not more than two professional staff members and three clerical staff members for the Office. One of such professional staff members may be paid compensation at a rate not to exceed the rate provided for the two employees of a standing committee of the Senate referred to in section 105(e)(3)(A) of the Legislative Branch Appropriation Act, 1968, as amended and modified (2 U.S.C. 61-1), and the other professional staff member may be paid compensation at a rate not to exceed the rate provided for professional staff members of a standing committee of the Senate by section 105(e)(1) of such Act. The clerical staff members may be paid compensation at a rate not to exceed the rate provided for the four clerical assistants of a standing committee of the Senate referred to in section 105(e)(2)(A) of such Act.

(d) The salaries and expenses of the Office shall be paid from the contingent fund of the Senate pursuant to appropriations made to the contingent fund for such purpose. Until funds are first so appropriated, such salaries and expenses shall be paid from the contingent fund out of funds appropriated for "Miscellaneous Items". Such salaries and expenses shall be paid out of the contingent fund upon vouchers approved by the Secretary of the Senate, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

(e) Within thirty days of the date of enactment of this Act, the Office shall furnish the Committee on Armed Services, the Committee on Energy and Natural Resources, the Committee on Environment and Public Works, and the Committee on Foreign Relations of the Senate with a listing of all those records, data, charts, and files of the Joint Committee on Atomic Energy which are to be transferred to such committees under section 501(a) of this Act, indicating which committee(s) may have jurisdiction over each item. The chairmen of the committees involved shall be responsible for resolving any case of doubt regarding jurisdiction over particular records, data, charts, or files.

TITLE VI—COMMITTEE STAFF

SEC. 601. For purposes of this title, the term—

(1) "effective date" means the effective date of title II of this Act;

(2) "eligible staff member" means an individual who is a member of the staff of the Joint Committee on Atomic Energy on the day prior to the effective date and had served continuously (except for any period of four days or less) as a member of the staff of the Joint Committee on Atomic Energy since October 1, 1976;

(3) "new committees" means the Committee on Armed Services, the Committee on Energy and Natural Resources, the Committee on Environment and Public Works, and the Committee on Foreign Relations of the Senate; and

(4) "transition period" means the period beginning on the effective date and ending on June 30, 1977, or, if later, on the ninetieth day after the effective date.

SEC. 602. (a) On the effective date, those eligible staff members who are required to carry out the provisions of section 502 of this Act, as designated by the majority and minority leader and the chairman of the Committee on Rules and Administration of the Senate in accordance with such section, shall be transferred to the Office of Classified National Security Information.

(b) On the effective date, each eligible staff member not transferred to the Office of Classified National Security Information under subsection (a) shall be transferred to the staff of a new committee. The determination of the eligible staff members transferred to the staff of each of the new committees shall be made by the Committee on Rules and Administration in consultation with the chairmen and ranking minority members of the new committees. The chairman of each new committee (and the ranking minority member with respect to minority employees) shall notify the Secretary of the Senate of the eligible staff members transferred to that new committee.

(c) During the transition period, each eligible staff member transferred to a new committee—

(1) shall, notwithstanding the limitations contained in section 105(e) of the Legislative Branch Appropriation Act, 1968, as amended and modified, receive compensation at a rate not less than the rate of compensation such staff member was receiving on March 1, 1977; and

(2) may not be removed, except for cause, as a member of the staff of the new committee.

(d) The provisions of subsection (c)(2) shall not apply in the case of an eligible staff member who would be entitled to an annuity under section 8336(d) of title 5, United States Code, upon his involuntary removal from service as an employee of the Senate if such staff member (but for the provisions of subsection (c)(2)) would be subject to involuntary removal from such service and such staff member elects to have the provisions of this subsection apply.

SEC. 603. Not later than the effective date, the Committee on Rules and Administration shall report a resolution which authorizes expenditures out of the contingent fund of the Senate during the transition period by the new committees sufficient to enable each new committee to pay the compensation and expenses of the eligible staff members transferred to its staff under section 602.

TITLE VII—MISCELLANEOUS PROVISIONS

SEC. 701. Titles II, III, IV, and V of this Act shall take effect on the tenth day after the enactment of this Act.

SEC. 702. Any reference in any rule, resolution, or order of the Senate or the House of Representatives or in any law, regulation, or Executive order to the Joint Committee on Atomic Energy shall, on and after the effective date of title II, be considered as referring to the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the subject matter of such reference.

SEC. 703. The provisions of section 502 and title VI (except section 602(c)(1)) are enacted—

(1) as an exercise of the rulemaking power of the Senate, and as such they shall be considered as part of the rules of the Senate, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of the Senate to change such rules at any time, in the same manner, and to the same extent as in the case of any other rule of the Senate.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TRANSFER OF MEASURES TO UNANIMOUS-CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are five measures on the general orders calendar that are shown on page 10—orders Nos. 63–67. It is my understanding that these measures could pass as of now by unanimous consent, they having been cleared on both sides of the aisle.

If I am not incorrect in that assertion, I ask the clerk to place them on the unanimous-consent calendar for consideration later.

Mr. BAKER. Mr. President, if the majority leader will yield, he is correct.

There is full clearance on our side for those five items. However, I join him in the request and state my preference that they go to the unanimous-consent calendar.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, may I say respectfully that no unanimous consent is required.

The ACTING PRESIDENT pro tempore. The Senator is correct. The Senator has clearance for the year, as I recall.

Mr. ROBERT C. BYRD. Yes; that is correct.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I assume later in the day it would be possible to get final clearance on the two measures that are on the unanimous-consent calendar, Calendar Orders No. 60 and 61, but we will await that event.

Now, Mr. President, I yield to the minority leader. I do have a statement I want to make, but I yield to him in the event he has anything at this time so as not to delay him.

The ACTING PRESIDENT pro tempore. The minority leader is recognized.

Mr. BAKER. Mr. President, I have two short matters I wish to take up.

NONGAME WILDLIFE

Mr. BAKER. Mr. President, this past Tuesday I was pleased to cosponsor, along with Senator HART and a number of my Senate colleagues, the Federal Aid in Nongame Fish and Wildlife Conservation Act of 1977. This bill would provide Federal funds to aid the States in initiating programs for the protection and management of a large array of this country's most beautiful, interesting, and unique wildlife.

In the past traditional game management programs have in many instances had beneficial impacts on the nongame species but rarely were any management programs focused specifically toward this broad genre of wildlife.

Programs developed pursuant to this legislation should provide a chance to enjoy our country's abundant wildlife resources to a large segment of our citizenry, particularly our urban dwellers, who for a number of reasons have not had this chance in the past. The programs in addition should enable a large number of our nongame species of wildlife a chance to benefit from enhanced management for their particular needs.

Most if not all of the State wildlife management agencies highly favor this legislation because it allows them to develop innovative management programs that can bring the enjoyment of wildlife to many more of their citizens. For instance, my own State of Tennessee has written expressing support for this measure and has made some comments on this proposal which I am sure will be helpful in the further consideration of this bill in committee.

Mr. President, I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

TENNESSEE WILDLIFE RESOURCES AGENCY,
Nashville, Tenn., March 17, 1977.

Re Federal Aid in Nongame Fish and Wildlife.

Hon. HOWARD BAKER, Jr.,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BAKER: We appreciate your interest in a bill that would provide funding for nongame fish and wildlife.

We have reviewed Senator Hart's S. 3887, which he introduced on October 1, 1976. We are much encouraged by this legislation and have the following constructive comments for your consideration for reintroduction during 1977. We hope that you may be a joint sponsor because the program could provide many benefits for Tennessee and the Nation.

The proposed legislation provides for a fairly funded and much needed stimulus to current State nongame programs.

It would be helpful to make reference to the spin-off benefits accruing to many nongame species from game management programs and that many game species can also benefit from programs directed primarily toward nongame.

Many nongame species need target programs for this preservation and enhancement. However, legislation should reflect the general inseparability of programs benefiting game, nongame and endangered species. Most can best be perpetuated by programs recognizing total ecosystem management.

As much as nongame proponents need hope for properly funded State programs, there is a possibility that such a bill, unless carefully coordinated with Pittman-Robertson and Dingell-Johnson funding provisions, could further widen the breach and competition between consumptive and nonconsumptive users. We believe the bill can be more broadly supported if it reflects the broad benefits to be achieved by both clientele. It would be very helpful if the bill avoided references indicating (to some) a "raw edge" between such programs.

The legislation should provide for multiple use for consumptive and nonconsumptive users of fish and wildlife wherever such uses can be made compatible. An example of incompatibility would generally include urban nongame areas.

The use of license revenue, as 10% matching funds, is not excessive where multiple use is planned and where a "nongame management" practice is clearly beneficial to game species (Section 5(F)(4)).

"Fish and wildlife" is defined (Section 3) as "any member of the animal kingdom... with respect to a particular State, is native to that State." Many species which are not indigenous to particular states, were transplanted from other States or countries many years ago and are now well established and valued by the residents of these States. Such species include: rainbow trout, brown trout, largemouth bass, channel catfish and pheasant. In order to protect such desirable transplanted species, we recommend that "native fish and wildlife" be defined as, "any wild fish or wildlife species indigenous to a State or a non-indigenous wild species that the State Fish and Game Agency recognizes as well established in that State."

An excise tax on outdoor recreation equipment would probably be a good source of funding. However, it would be difficult to adequately delineate the types of equipment and fair percentages of excise tax that should be allotted on each. Based on overall benefits to the ecosystem, such funding could well be justified by Federal general appropriations, provided adequate provisions are made to assure annual continuation.

It would be very helpful if provisions are provided for such funds to be administered to the State Wildlife Agencies by the same Fish and Wildlife Service Section that administers other Federal aid programs. For your further information, I am enclosing a copy of a similar letter written to Senator Hart on January 17, 1977.

We hope these comments will be useful. Please call on us if we can testify in favor of the Nongame Bill or provide other input into this worthy proposal.

Sincerely,

HARVEY BRAY,
Executive Director.

TRIBUTE TO ALEX HALEY

Mr. BAKER. Mr. President, it is with a strong sense of pride that I, a Tennessean, can claim that Alex Haley is a native of my State. I am pleased, therefore, to announce that plans are in progress to pay tribute in Tennessee to this distinguished citizen during the period of May 18–21, and to establish a philanthropic foundation in his honor for the promotion of literary excellence.

In reality, however, the creation of "Roots" has benefited all of us, and Mr. Haley's contribution to the Nation cannot be reserved to Tennessee alone.

Mr. President, I commend the Governor of my State and his administration for taking the lead in proposing this celebration, and I am pleased to join them in that effort. I might state to my colleagues that some time next week I will ask for a special order to make further remarks on this subject, and I would invite anyone else who is similarly inclined to consider doing the same on that day.

THE SALT II NEGOTIATIONS

Mr. BAKER. Mr. President, yesterday afternoon I was privileged to travel to the White House to meet with the President of the United States, the Vice President of the United States, and certain of his advisors, together with the distinguished majority leader and the leadership on his side of the aisle, House and Senate.

We were briefed at that time rather extensively on the situation in the Soviet Union and the progress of our efforts to negotiate a satisfactory SALT talk.

I simply want to reiterate what I said at the conclusion of that briefing—that we may agree or disagree with the negotiating techniques of the administration in this regard; we may even agree or disagree with the substance of the policies that is formulated for presentation at those negotiations; but, I believe, that substance is fully and fairly bipartisan, and almost no one disagrees with the objective, which is to negotiate a satisfactory SALT II agreement.

I speculated and surmised following that briefing that there may be a little testing going on here. The Russians may be testing a new American President.

I would like to say in that regard, Mr. President, that I hope the world understands that while we have Republicans and Democrats in Congress and in the country, we have only one President; and in the matter of testing we will stand firmly and squarely behind our President, as he is now challenged or may later be challenged, in our devotion to

the culmination of successful negotiations for strategic arms limitation and other important matters in the future.

Mr. President, I reiterate those views because I hope this repetition will emphasize my dedication to them.

I have no request nor requirement for the remainder of my time under the standing order, and I yield it back.

Mr. ROBERT C. BYRD. Mr. President, I congratulate the distinguished minority leader on his statement.

As I indicated yesterday at the meeting at the White House, I congratulated the President on making the meeting a bipartisan joint leadership meeting with Members on both sides of the aisle and Members from both bodies.

This is a matter that is so vital and so critical that it requires bipartisan consultation and bipartisan support.

I have no doubt that when the chips are down the security interests of this country are at stake, the President, no matter who he may be, whether he be a Democrat or whether he be a Republican, is the one President of the country, he is the one leader of the country, and that both political parties and the leadership of both parties are going to be with him on matters that go to the heart of the security interests of this country.

I know I am not presumptuous in interpreting the statements of the minority leader as I have just enunciated them.

The press is filled with stories that the talks between Secretary of State Cyrus Vance and Leonid Brezhnev on a treaty to limit nuclear weapons have "broken down." Secretary Vance is described as being "disappointed." Other press comments used the words "impasse" or "collapse" to describe the state of the negotiations.

Brezhnev is said to have rejected as "inequitable" both of the U.S. proposals for breaking the 2-year impasse in negotiations. Press accounts state that Mr. Brezhnev made no counterproposal and that his refusal to accept any aspect of the American plans appeared to deal a sharp blow to chances of achieving an accord before an interim 5-year agreement limiting some missiles expires in October.

Mr. President, I am not discouraged by the turn of events. Of course, I am disappointed, but this is nothing more than I expected. I expected to be disappointed. One should always expect to be disappointed in the behavior and attitude of Soviet leaders where arms talks are concerned.

This is a time of testing of wills. The Soviet leaders are testing President Carter.

It has become common practice of the Soviets to test the mettle of each new American President early in his term of office. I am sure that Jimmy Carter will prove his mettle to be firm and to be resolute. While it is a time of testing, it is no time for weakness. The proposals submitted by President Carter have been well thought out over a period of months, they were fair and equitable and reasonable, and they were calculated to be protective of the security interests of both the United States and the Soviet Union and to lower the risk of nuclear war. It is not surprising that the Soviets have initially turned down the proposals. They want an agreement that is not one of parity between the United States and the Soviet Union but, rather, one that will give the Soviet Union a decided advantage over the United States. Such an agreement would be a bad agreement, and no agreement is better than a bad agreement.

Any pretense that the President's position on human rights has endangered or scuttled the arms talks is nothing more than flimflam. The Soviets have never hesitated to meddle in our own internal affairs and to lecture us before the world, and it is good for them to get a little of their own medicine in return.

Soviet leaders will understand that it is in their own interests as well as in the interests of the United States that there be a new agreement—protective of the security interests of both countries. Soviet leaders know that it is in their interests, as well as in the interests of the United States, that the arms race not be accelerated. The Soviet leaders should also know that, while Americans are peace loving, the American people have the will and the resources to engage in an accelerated arms race if there is no other alternative, and that, in such event, while it would be at a disastrous cost to both countries, American technology will prevail over the Soviet system.

Soviet leaders have pretended to be ready and eager for a new SALT agreement. Today they stand before the bar of world opinion as having rebuffed American plans which were deliberately calculated to bring about a lowering of the Vladivostok ceilings on offensive missiles.

Mr. Carter says that he is "not discouraged at all." He should not be. His position is morally right, and his proposals were equitable and sound from the standpoint of the security interests of both nations. He has warned that if no agreement should be forthcoming, the United States "would be forced to consider a much more deep commitment to the development and deployment of additional weapons." The President is right in forgoing that decision until he is convinced that the Soviets will not join in a good faith workable, effective, verifiable agreement. But he is also right in stating that the United States, in the event no agreement can be reached, will develop and deploy additional weapons. We would have no other choice.

I think we have to understand that the proposals that were submitted by Mr. Carter through Mr. Vance were very complex proposals, and I do not think we should have expected the Soviet leaders to accept those proposals within a matter of 72 hours—a 3-day period.

I am encouraged by the fact that Mr. Vance and Mr. Gromyko will meet again in May and, meanwhile, Soviet and United States "working groups" are to be established to explore numerous other subjects—ranging from halting all nuclear weapons tests to limiting military forces in the Indian Ocean.

So, Mr. President, I think we have to avoid knee jerk reactions of "discouragement," "alarm," and so on.

The Soviets do not want to see their cities destroyed any more than we want to see ours destroyed. The Soviets cannot afford to bleed their economy of needed consumer goods for the sake of engaging in an accelerated arms race any more than can we. But, by the same token, they should not expect the United States to be willing to accept an agreement that places the United States at a disadvantage any more than can the Soviets accept such an agreement in reverse. Hopefully, commonsense will ultimately prevail after the Soviet leaders have had more time to reevaluate the proposals and to reassess the situation.

Mr. President, the road to a nuclear arms limitation treaty is neither a primrose path nor a superhighway. There are going to be potholes, pitfalls, and detours.

President Carter has said that he will "hang tough." I think the Soviet leaders should understand that the American people will also "hang tough" behind their leader. There will be no political division in this country when it comes to a matter so vital to the security interests of the United States and to the peace of the world. We may have political divisions with respect to the economic stimulus package, tax rebates, environmental problems, and solutions to the energy problem, but not with respect to the vital security interests of the United States and the peace of the world.

The time has passed when the Soviets can win advantages for themselves simply by saying "no" to American proposals, presenting no alternative proposals, folding their arms, and closing down the talks in the expectation that the U.S. negotiators will be so eager for a new agreement that we will be willing to settle for less than what is equitable in our own security interests. In the past the Soviets have had a way of showing intransigence until our own negotiators retreated to their final backup positions. The Soviets simply say no; the Americans fall back to the next position. The Soviets say no, fold their arms, turn their backs, pick up their ball and go home; the Americans fall back to another position. The stakes are too high, Mr. President, for us to cave in to Soviet intransigence.

There is only one course, and no other. That is for us to keep trying, demonstrating a continuing good faith, but, at the same time, a persistence and tenacity and patience that the Soviets will respect and that will stand up to their rebuffs. This is no time for belligerence nor saber rattling, but it is a time for clear vision and strength.

The President has said he will "hang tough." The American people will hang tough behind a strong leader. To paraphrase the words of the great American who spoke in the very early days of this Republic, this is a situation in which we either all hang together or we will all hang separately.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will resume the consideration of the pending business, Senate Resolution 110, which the clerk will state.

The assistant legislative clerk read as follows:

Calendar No. 43, a resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the United States Senate; and for other purposes.

The Senate resumed the consideration of the resolution.

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977—UNANIMOUS-CONSENT AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I believe we are about to agree on a matter on which we can take action, but pending that agreement, let me engage in a colloquy with the distinguished minority leader.

I think that the situation with reference to action on the tax bill, which is H.R. 3477, should be clarified. Many staffs are constantly calling my personal staff, and the staff of the Policy Committee, inquiring as to whether or not any action is going to be taken on the tax bill before the recess. I think the matter ought to be clarified beyond any doubt.

It was my desire to call up the tax measure if it could be disposed of prior to the Easter nonlegislative period. The distinguished minority leader and I have discussed this matter on several occasions. I have sought to try to work out a time agreement which would provide for a final vote no later than, say, 6 o'clock next Thursday.

I do not labor under any illusions as to the likelihood of such an agreement. I personally feel that the Senate ought to act on the measure if action can be completed before the Easter holiday. I do not think it would be good for the Senate to begin action on this measure, and then take a scheduled nonlegislative period during which committees can act on various measures, during which Members of the Senate can conduct hearings on various matters, catch up on their mail and other things, or visit their home States, but leave the final floor action and a good many amendments awaiting our return following Easter.

I also have to say that many Senators who might call up amendments prior to the Easter nonlegislative period, would, if their amendments were rejected, be prepared, I am sure, upon their return to resurrect those amendments with slight changes, and thus get a vote on their amendemtns all over again.

So, Mr. President, I think it is time to leave our people in no doubt as to what the situation is.

For the record—and the distinguished minority leader and I have discussed this; I understand his position and he understands mine—I ask unanimous consent that a final vote occur on H.R. 3477 at no later than 7 o'clock p.m. on Thursday next.

Mr. BAKER. Mr. President, reserving the right to object, the majority leader is correct, as always, in faithfully reporting the negotiations and conversations we have had in this respect.

We have discussed this matter on a number of occasions. We have discussed this bill and its disposition fully, frankly, and candidly. I was aware of his intention to make this request, as he was aware of the necessity for me, a little later, to object to it.

I had hoped, to be honest, Mr. President, that we could turn to the tax bill immediately after we finish the ethics package; that we could get to certain aspects of it, including perhaps one of the amendments in the Republican economic package that has been adopted overwhelmingly in the Republican conference, which is a permanent tax reduction to be offered as a substitute. I had hoped it would be impossible to lay that down and dispose of it before the Easter recess, or at least to have it pending when we come back after the recess, following some statements on the bill generally and possibly on one of those amendments.

However, the majority leader was forthright and candid with me in indicating that he would prefer to dispose of the bill before we leave. I tried to be equally candid with him, and said that is not possible, in my view of the situation.

So it is therefore necessary for me, Mr. President, with that explanation, and signaling my continued devotion to a tax cut—though preferring a permanent tax cut as soon as possible—to object, realizing that under these circumstances we could not possibly deal with the full range and spectrum of the amendments likely to be offered, I believe, on both sides of the aisle.

The ACTING PRESIDENT pro tempore. Objection is heard.

Mr. ROBERT C. BYRD. Mr. President I ask unanimous consent that upon the Senate's return—I have not discussed this with the Senator from Tennessee, but I feel it is a reasonable request—and I believe I may have indicated to him that it was my intention to make the tax bill the pending business upon our return—I ask unanimous consent that when the Senate returns following the nonlegislative day period on Monday, April 18, the tax bill (H.R. 3477) be the pending business.

Mr. BAKER. Mr. President, reserving the right to object, would the majority leader consider withholding that request for just a moment? I am frank to say that after our previous conversation I discussed this matter on Tuesday with the distinguished Senator from Nebraska (Mr. CURTIS), our ranking member on the Finance Committee, the Republican leadership, and others; and I believe there is no objection. However, this is 2 days later, and I would be grateful if the majority leader would withhold that request for a few minutes until I can check.

Mr. ROBERT C. BYRD. Yes, I will be glad to withhold the request, but I am frank to say there is no other business to be taken up by the Senate upon our return.

Mr. BAKER. I appreciate the majority leader's withholding the request. I realize, of course, that the flow of legislation is uniquely under his control, but still I think it would be of benefit if I could clear that request for unanimous consent in order to make it firm and solid.

Mr. ROBERT C. BYRD. I am glad to withhold the request.

(Later in the day the following occurred:)

Mr. ROBERT C. BYRD. Mr. President, I understand that the distinguished minority leader has been able to establish a contact with some of his colleagues who are principals in connection with the tax measure. I would like at this time to propose again my unanimous-consent request, that when the Senate returns from the nonlegislative day period on April 18 at 12 noon, and following the recognition of the two leaders and the transaction of routine morning business, at that time, the Senate proceed to the consideration of H.R. 3477, an act to provide for a refund of 1976 individual income taxes and other payments, to reduce individual and business income taxes and to provide tax simplification and reform.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, I would point out, as I am sure the majority leader would agree, that the effectiveness of this unanimous-consent agreement is simply to make this bill the pending business when we return. It does not embrace any other requirements, any time limitations, or any provisions with respect to any other rule of the Senate. It rather has only to do with the business of making this measure the pending business when we return.

Mr. ROBERT C. BYRD. The Senator is correct.

The ACTING PRESIDENT pro tempore. Nor does it relinquish any rights of the minority leader.

Mr. BAKER. Nor is in intended to be a relinquishing of any rights of the minority leader.

Mr. ROBERT C. BYRD. The distinguished minority leader has preeminently covered the subject in a most comprehensive and understandable and impressionable manner.

Mr. BAKER. The majority leader is aware of the fact that the minority leader has few opportunities except to make sure that everyone understands.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the distinguished minority leader for his usual fine cooperation and good humor.

KILLING OF NEWBORN HARP SEALS

Mr. ROBERT C. BYRD. Mr. President, on behalf of the Senator from Hawaii (Mr. MATSUNAGA), I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 60 on the unanimous-consent calendar.

The ACTING PRESIDENT pro tempore. The resolution will be stated by title.

The legislative clerk read as follows:

Calendar No. 60, a concurrent resolution (H. Con. Res. 142) urging the Canadian Government to reassess its policy of permitting the killing of newborn harp seals.

The ACTING PRESIDENT pro tempore. Without objection, the Senate will proceed to its consideration.

The Senate proceeded to consider the concurrent resolution, which had been reported from the Committee on Foreign Relations with amendments.

The PRESIDING OFFICER. The clerk will state the committee amendment to the resolution.

The legislative clerk read as follows:

On page 2, line 3, strike "is a cruel practice which" and insert "at the current high level".

The PRESIDING OFFICER. The question is on agreeing to the committee amendment to the resolution.

The committee amendment to the resolution was agreed to.

Mr. MATSUNAGA. Mr. President, there is great urgency and need to adopt House Concurrent Resolution 142, as amended by our Committee on Foreign Relations. The urgency arises from the fact that the annual 6-week Canadian harp seal hunt is now in full progress. In fact it is already into its third week. The need to adopt this measure as swiftly as possible exists because the seal killings are threatening the future survival of these sea mammals.

Mr. President, in my testimony before the Senate Foreign Relations Committee on a companion measure, Senate Concurrent Resolution 14, which I introduced in cosponsorship with Senator CRANSTON, Senator PELL, Senator MAGNUSON, Senator WILLIAMS, Senator PACKWOOD, Senator CHURCH, and Senator CASE, I pointed out my reasons for the need to curtail—if not halt—the seal slaughter. I believe:

First. There is little justification for the plunder of the newborn harp seals which provide relatively small economic utility;

Second. The manner in which these seal pups are killed and skinned is cruel and causes much suffering on the part of the animals;

Third. The continuance of massive killings by commercial sealers will eventually lead to the extinction of this species;

Fourth. The United States has a responsibility and a commitment to preserve and safeguard all wildlife whose existence on this planet is being threatened by the continued exploitation by man.

This year the Canadian Government is pursuing a seal killing quota of 170,000 pelts, an increase of more than 30 percent of last year's quota. My concern for this high level of killings—especially by the commercial, profit-motivated sealers, is that the hunts may be a real threat to the future existence of the harp seals.

I have reason to believe, Mr. President, that the species may be potentially endangered. According to Government scientists, the population of the harp seals has been declining. For example, for the period between 1951 and 1954, the approximate herd size of adult seals totaled 3 million. In only 10 years from 1954 to 1965 it had decreased to 2 million; and by 1976 the herd was decreased to a population of only 1 million.

Moreover, these scientists have reported that the decline in population has created a stressed state in the sexual development of the seals.

The mean age at first maturity of the seal during the 1950's ranged in the area of 5.49 years. In 1961–65 the mean age of sexual maturity was determined to be 4.77 years; recently, in 1976, this age marker was reported to be 3.8 years.

This is highly indicative that by instinct for survival, and because of their rapidly declining numbers, the seals are being forced to bear their young at a much earlier age.

In a recent report issued by the University of Guelph in Ontario, Canada, the projected harp seal pup production was somewhere between 193,000 to 321,000, with sustainable yields of 65,000 to 160,000. The authors of the Guelph report considered appropriate sustainable yields to be 103,000 to 130,000. This year, Mr. President, the allowable quota of kill has been set at an extremely high level of 170,000 seal pups.

The damage that can be created by an explosive quota such as this is best described by Dr. David M. Lavigne of the University of Guelph. In his article which appeared in the January 1976 issue of National Geographic magazine, Dr. Lavigne reports:

To many observers the reduction of quotas seems long overdue. In the 1950s alone the harp seal population in the western Atlantic appears to have dropped by more than half, from an estimated 3.3 million to 1.25 million animals. Obviously births declined as well. . . . Available evidence, however, suggests that even under present hunting quotas the harp seal may be reduced to precarious levels before the end of this century.

In addition to the belief that the seal hunts are depleting the stock of this species, the manner in which the killing is done has given rise to extensive public criticism and outrage.

Guilty of bearing an incredibly soft white fur, the seal pups—when only a few days old—are being clubbed to death and skinned on the icy drifts off the Labrador coast and the Gulf of St. Lawrence. These prized pelts, often brutally stripped from the young pups while they are still alive, serve no human purpose other than providing some with luxury fashionwear or toys and trinkets for tourists.

The United States has an interest and concern for the killings of the harp seals. Under the Marine Mammal Protection Act, our Nation has deemed it unlawful to import into our country any marine mammal, particularly seals, if such mammal was pregnant or nursing at the time of taking, or less than 8 months old, whichever occurs later—as it is taking place today on the Canadian front, where seal pups are being slain as early as 3 to 5 days after birth. The act further dictates that it is unlawful to import those marine mammals which are taken from a depleted stock or threatened or endangered species; or taken in a manner deemed inhumane by the Secretary of Commerce or the Interior, as the case may be.

Mr. President, the pending concurrent resolution is a sincere attempt to appeal to the conscience of the Canadian Government, a longtime friend and neighbor, to reassess its policy of permitting the killings of a mammal species which may become extinct in the near future.

The annual harp seal hunt is on. The hunting period is nearly half over. I urge the Senate's favorable and swift action on House Concurrent Resolution 142, as amended.

Mr. WILLIAMS. Mr. President, I rise in strong support of House Concurrent Resolution 142. I am very pleased that the Senate Foreign Relations Committee acted expeditiously on this resolution urging the Canadian Government to reassess its policy of permitting the killing of baby harp seals.

Mr. President, there is convincing evidence that the continuation of this annual slaughter will eventually lead to the extinction of the harp seal. The world community is understandably alarmed when the survival of a wildlife species is threatened. Through the Marine Mammal Protection Act and the Endangered Species Act, the United States has established a policy of encouraging the conservation of wildlife not only in this country but throughout the world. The resolution before us today seeks to further that policy.

I wish to thank my distinguished colleague and Senator sponsor of the resolution, Senator MATSUNAGA, for agreeing to my amendment to House Concurrent Resolution 142. This amendment sets forth the feeling of many U.S. citizens that the slaughter of baby seals not only threatens the harp seal with extinction, but also is a cruel practice. Hunters from Canada and Norway bludgeon the newborn seals and skin them within minutes. Many of my constituents have written to me to express their outrage about the cruelty and barbarity of killing such young animals. This sentiment was translated into the public policy of the United States through the Marine Mammal Protection Act of 1972, which established an absolute ban on the killing or importation of marine mammals which are nursing or under 8 months of age.

Mr. President, I believe the Senate should go on record today to protest the killing of baby seals in Canada. I urge my colleagues to vote in favor of House Concurrent Resolution 142 as amended.

UP AMENDMENT NO. 117

Mr. MATSUNAGA. Mr. President, I have an amendment at the desk. I ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Hawaii (Mr. MATSUNAGA), for Mr. WILLIAMS, proposes an unprinted amendment No. 117.

On page 2, line 3, insert the following: before "at" insert "is considered by many citizens of the United States to be cruel, and if continued".

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The concurrent resolution (H. Con. Res. 142), as amended, was agreed to.

Mr. MATSUNAGA. Mr. President, inadvertently an error in House Concurrent Resolution 142, as amended, exists in the text of the preamble. Therefore, Mr. President, I ask unanimous consent that the committee amendments to the preamble be agreed to en bloc and that the words "has increased the" be stricken from line 1 of the second "whereas" and that the preamble as thus amended be considered original text for the purpose of further amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendments to the preamble are as follows:

On page 1, in the second paragraph of the preamble, strike "Canadian Government";

On page 1, in the second paragraph of the preamble, strike "by one third" and insert "has increased from one hundred and twenty-seven thousand";

On page 1, in the third paragraph of the preamble, strike "up to 90 per centum" and insert "a high percentage";

On page 1, strike all of the fourth and fifth paragraphs of the preamble, and insert in lieu thereof:

"Whereas there is enough conflicting scientific data available indicating that the 1977 quotas may be unsound from a conversion point of view; and"

On page 2, in the sixth paragraph of the preamble, after "preserve" insert "animals which are or may become".

The PRESIDING OFFICER. Is there further amendment to the preamble? If there be no further amendment, the preamble, as amended, is agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which this important measure passed.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–71), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE RESOLUTION

The primary objective of House Concurrent Resolution 142 is to urge the Canadian Government to reassess its policy of permitting the killing of newborn harp seals in its annual 6-week harp seal hunt.

BACKGROUND

The harps seal is one of two major species of hair seals which exist on the drifting ice pack of the North Atlantic.

Scientific estimates that the total primeval population of all harp seals was approximately 9 or 10 million. Excessive hunting and human competition for the available food supply (fish) has diminished these herds to about 2.5 million animals.

The harp seal reproduces in three distinct populations or herds that inhabit widely separated areas of the northern seas. These are: (a) the White Sea herd; (b) the Jan Mayen (or Greenland Sea) herd; and (c) the Newfoundland herd.

The Newfoundland herd was and still is the largest of the three seal populations. This herd consists of two groups: the "gulf herd," numbering about 400,000, which breeds on the ice in the Gulf of Saint Lawrence, usually in the vicinity of the Magdalen Islands; and the "front herd," numbering about 800,000, which breeds on the drifting ice pack to the east of southern Labrador and northern Newfoundland.

The Newfoundland herd has been the victim of an annual hunt since the late 18th century. The largest catches took place between 1820 and 1860 (over 500,000 animals annually).

In 1967, the management of the northwest Atlantic seal herds was placed under the aegis of the International Commission for the Northwest Atlantic Fisheries (ICNAF), whose members include most West European countries, Canada, Iceland, Japan, and the Soviet Union. In 1971, ICNAF set the first total allowable catch limit (TAC) to harp seals at 245,000. That same year, Canada established the independent Committee on Seals and Sealing (COSS), whose participants—scientists, veterinarians, and members of humane societies—advise the Government on sealing policy. The total allowable catch limit for 1972 through 1975 was 150,000; it was reduced to 127,000 in 1976. This year the ICNAF scientific advisers and COSS agreed that recent increases in the seal population made a higher 1977 total allowable catch limit reasonable. When Canada extended its fisheries jurisdiction to 200 miles on January 1, 1977, it alone became responsible for the seal herds. For 1977, it has adopted ICNAF's recommended total catch limit of 170,000 animals.

The primary justification for the hunt is economic. The following excerpt taken from a Canadian public affairs publication states the Canadian position:

"Most Canadian sealers live in the scattered communities of northern Newfoundland and southern Labrador. They pursue a resource-based rural life which depends upon the harvesting of cod, salmon and other wild species, as well as seals. Sealing occurs during a season when local unemployment rates may rise as high as 90 percent. The $2,300 earned by a sealer on a large vessel is significant when compared to Newfoundland's annual per capita income of $3,643. Almost one-third of those revenues come from edible meat and oil.

"The 1976 hunt's economic value for the Atlantic region was estimated to be $3.6 million. Its social value to traditional, rural communities is immeasurable. But more is at stake than the seal hunt itself; a balanced ecosystem is vital to all of the sea-based industries in the Atlantic provinces.

"Fisheries management is a complex science which provides no simple answers. Canada's seal hunt policy reflects the social and economic realities of the Atlantic region, the need for a balanced ecosystem, and a commitment to the conservation of wildlife and the humane harvesting of living marine resources. The current strategy is to allow seal populations to increase gradually over the next few years and to intensify scientific studies on the biology of seals and their interactions with other marine life."

U.S. POSITION

The State Department has not taken a specific position on House Concurrent Resolution 142. However, the Department did transmit general comments on the attitude of the U.S. Government with respect to the harp seal hunt. A copy of this communication is included in the appendix to this report.

The Government of Canada requested the State Department to convey to the Senate Foreign Relations Committee its comments on House Concurrent Resolution 142. The Canadian Government also asked the Department to convey to the Congress its offer to make available the services of qualified Canadian scientists for informal briefings for interested Members on the management of the seal hunt in Canada. Copies of these letters are included in the appendix to this report.

CONGRESSIONAL ACTION

On March 8, 1977, House Concurrent Resolution 142 was introduced in the House. An identical bill, Senate Concurrent Resolution 14, was introduced in the Senate by Senators Matsunaga, Cranston, Magnuson, Packwood, Pell, and Williams on March 17, 1977.

On March 21, 1977, the House Committee on International Relations ordered House Concurrent Resolution 142 favorably reported by a voice vote. This resolution passed the House on March 22, 1977 by unanimous consent.

On March 29, 1977, the Committee on Foreign Relations met in open session to consider House Concurrent Resolution 142. After hearing testimony from Senator Matsunaga (statement included in the appendix), the committee ordered, by a voice vote, that the resolution be reported with a number of clarifying amendments.

COST ESTIMATE

The enactment of House Concurrent Resolution 142, as amended, will not require the expenditure of any funds.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

The PRESIDING OFFICER (Mr. ROBERT C. BYRD). The distinguished minority leader is recognized.

UP AMENDMENT NO. 118

Mr. BAKER. Mr. President, I call up my unprinted amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) proposes an unprinted amendment numbered 118.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 24, lines 18 and 19, strike the following: "(unless hired on a per diem basis)".

On page 28, in unprinted amendment Number 110, strike the following "(unless hired on a per diem basis)".

On page 29 in unprinted amendment Number 94, strike the following: "(unless hired on a per diem basis)".

On page 39, after line 19, insert the following:

"5. In exceptional circumstances for good cause shown, the Select Committee on Ethics may waive the applicability of any provision of the Senate Code of Official Conduct to an employee hired on a per diem basis."

On page 53, insert after line 19, the following:

"Sec. 310. The Committee on Rules and Administration and the Select Committee on Ethics shall study the desirability of applying provisions of the Code of Official Conduct to individuals, corporations or other entities employed by the Senate on a per diem, consultant or contract basis."

Mr. BAKER. Mr. President, I yield myself 2 minutes.

Mr. President, this amendment I offer today is a followup on the colloquy I had with the distinguished manager of the bill a few days ago. It has to do with the question of the applicability of the code of conduct and other provisions to staff personnel who may be hired on a per diem basis. This makes clear, I believe, an ambiguity noted by the Senator from Tennessee in his first reading of the committee print which was not fully clarified, I thought, in the colloquy. I would very much hope that the manager of the bill could see fit to accept this amendment. I would also welcome his comments on it.

Mr. NELSON. Mr. President, the amendment by the distinguished Senator from Tennessee accomplishes what I had thought the resolution draft did accomplish. We made an exception for per diem employees related to the provisions of the resolution because people are hired on a temporary basis or a professor comes for 3 months in the summer, or a consultant is hired.

To require, for purposes of a limited period of time of service on a per diem basis, or for a straight period of 90 days, a disclosure of all assets we thought was overly burdensome and, furthermore, would discourage people from going through all that process only for purposes of serving as a consultant for a limited period of time.

So, in the drafting of it, when we exempted per diem employees, there was no attempt to permit a situation to exist where an employee could be hired on a per diem basis endlessly, and I think the Senator from Tennessee, in reading the resolution, addressed himself to a point that would have appeared to have permitted a permanent exemption of per diem employees, which was not our intent. I think the amendment accomplishes the original purpose that the committee had and it is a clarification of this issue in this problem. I think it is a good amendment. I am prepared to accept it.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. BAKER. Mr. President, I yield back the remainder of my time.

Mr. NELSON. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of Mr. BAKER.

The amendment was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NELSON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 119

Mr. NELSON. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON), proposes unprinted amendment No. 119.

On Page 21, line 13 after "grandmother" insert "grandson, granddaughter,"

Mr. NELSON. This amendment corrects an oversight in the resolution. It merely includes a grandson or granddaughter in the definition of a relative. Therefore, gifts from a grandson or granddaughter would not be disclosed or prohibited in any circumstances under rules XLII and XLIII.

Mr. President, I move the adoption of the amendment. I yield back the remainder of my time.

Mr. BAKER. I yield back my time.

The PRESIDING OFFICER. All time is yielded back.

The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment was agreed to.

Mr. NELSON. I move to reconsider the vote by which the amendment was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VITIATION OF ACTION ON UP AMENDMENT NO. 108

Mr. NELSON. Mr. President, on Tuesday, the Senate agreed to an unprinted amendment No. 108, offered by Senator BENTSEN, which changed the effective date of rule XLIV from January 1, 1978, to January 1, 1979. Unprinted amendment No. 108 was technically imperfect and did more than the sponsor of the amendment intended. This problem has been pointed out to Senator BENTSEN and he has agreed that the Senate's action on amendment No. 108 should be vitiated.

Mr. President, I ask unanimous consent that Senate action on amendment No. 108 be vitiated.

Mr. CHAFEE. Reserving the right to object, Mr. President, as I understand, this amendment does not change anything from the original bill except it does permit the Bentsen amendment to extend advances to 1979, but the rest stays as we presented it.

Mr. NELSON. That is correct. The amendment was drafted in such a way that it went beyond the extension of the exemption until January 1979. This corrects that.

Mr. CHAFEE. I think that now, it remains that persons getting off boards of directors or publicly held corporations—that is effective next January, is it not?

Mr. NELSON. We changed no other effective dates, whatever the date may be, other than the effect of the limitation on outside earned income.

Mr. CHAFEE. I have no objection.

The PRESIDING OFFICER (Mr. STENNIS). Will the Senator repeat his request?

Mr. NELSON. My request was for unanimous consent that action on amendment No. 108 be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 165

Mr. NELSON. Mr. President, I call up printed amendment No. 165 and ask for its immediate consideration.

Mr. CHAFEE. Reserving the right to object, Mr. President, going back a bit, do we not now have to vote to accept the Bentsen amendment to put it in?

Mr. NELSON. I am now calling up that amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Texas (Mr. BENTSEN) proposes an amendment as follows:

On page 54, line 17, strike out "1978" and insert in lieu thereof the following: "1979".

Mr. NELSON. Mr. President, amendment No. 165 was offered by Senator BENTSEN to accomplish the objective intended by unprinted amendment No. 108 and the Senate, in its vote on that amendment. I move adoption of the amendment.

Mr. CHAFEE. I second that, Mr. President.

The PRESIDING OFFICER. Is all time yielded back?

Mr. NELSON. I yield back the remainder of my time.

Mr. CHAFEE. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. NELSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 120

Mr. NELSON. Mr. President, I call up an unprinted amendment and ask for its immediate consideration.

Mr. CHAFEE. Reserving right to object, Mr. President.

The PRESIDING OFFICER (Mr. STENNIS). The Chair, in his capacity as a Senator from the State of Mississippi, suggests the absence of a quorum. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, I ask that my unprinted amendment be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes unprinted amendment No. 120.

On page 25, line 14, insert the following: Delete the word "immediately."

Mr. NELSON. Mr. President, in rule XLIV, we have provided that honoraria in excess of the 15 percent of income limitation may be earned if the honoraria are donated to an organization exempt from taxation under section 501 (c)(3) of the Internal Revenue Code of 1954, and no tax benefit accrues to the Senator, officer, or employee. Paragraph 2(c), which discusses this provision, requires the Senator, officer, or employee to immediately donate the honorarium to a 501(c)(3) organization.

Several Senators have asked whether the committee in using the word "imme-

diately" had some specific time frame in mind.

In response to the questions, I have looked at the committee report and concluded that the word "immediately" does not accurately reflect the committee's intent. Therefore, this amendment would delete the word "immediately." It was the committee's intention that if an honorarium is received, and given to a tax exempt organization, the provisions of the paragraph would be satisfied. The committee would not want an organization to lose a benefit, because some delay on the Member's part took place. In terms of tax treatment, of course, the committee envisions a "wash": If the Member designated the 501(c)(3) organization, he would list the honorarium as income, and would claim an offsetting charitable deduction, with the result being as the provision requires, that "no tax benefits accrue."

The PRESIDING OFFICER. Does the Senator offer this as an amendment?

Mr. NELSON. Yes, the amendment is at the desk and it simply strikes the word "immediately."

Mr. President, I yield back the remainder of my time.

Mr. CHAFEE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment was agreed to.

Mr. NELSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NELSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 102

Mr. NELSON. Mr. President, I ask unanimous consent that unprinted amendment No. 102 be reconsidered.

Mr. CHAFEE. Mr. President, I reserve my right to object.

Mr. NELSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, there is pending a unanimous-consent request to reconsider unprinted amendment No. 102. I repeat that unanimous-consent request.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 121

Mr. NELSON. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

"In the unprinted amendment No. 102 strike subparagraph (c) and all that follows and insert in lieu thereof the following:

(c) a member of the board of a corporation, institution, or other business entity, if (1) the Member, officer, or employee had served continuously as a member of the board thereof for at least two years prior to his election or appointment as a Member, officer, or employee of the Senate, and (2) the amount of time required to perform such service is minimal, and the Member, officer, or employee is not a member of or a member of the staff of any Senate committee which has legislative jurisdictions over any agency of the Government charged with regulating the activities of the corporation, institution, or other business entity.

Mr. NELSON. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. NELSON. Mr. President, I move the adoption of amendment No. 102 as amended.

The question is on agreeing to amendment No. 102 as amended. Amendment No. 102, as amended, was agreed to.

Mr. NELSON. Mr. President, I move to reconsider the vote by which the amendment as amended, was adopted.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TIME-LIMITATION AGREEMENT—AMENDMENT NO. 121

Mr. CURTIS. Mr. President, I ask unanimous consent that on my amendment No. 121 there be a time limit of not to exceed 1 hour, equally divided between the proponents and the opponents.

The PRESIDING OFFICER (Mr. MATSUNAGA). Without objection, it is so ordered.

Mr. CURTIS. Mr. President, I should like to have the attention of the manager of the bill.

I have amendment No. 121, on which the Senate has agreed to 1 hour of debate. I should like to be informed as to what the program of the manager of the bill is, so that I might have an idea when would be a good time to bring up this amendment.

Mr. NELSON. I have not had a chance to look at this amendment.

Mr. CURTIS. I will furnish the Senator with a modified copy. I have modified my amendment.

Mr. NELSON. I say to the Senator from Nebraska, without commenting on the merits one way or another, that this is a nongermane amendment.

Mr. CURTIS. I think that as we proceed, the Senator will find that it is germane and that a point of order will not lie against it.

Mr. NELSON. All right. I did not object at the time, so I cannot raise the point of order, anyway. But I do think it is not germane.

Mr. CURTIS. Will the Senator advise me what other amendments are now pending or about to be called up?

Mr. NELSON. I have no notion as to what amendments are about to be called up. We have some clarifying amendments that will be called up sometime today, but the only amendments I am aware of, other than those on which we have to reach some time agreement later, are the amendments that are being called up by Members as we go along.

Mr. CURTIS. I shall seek recognition to present this amendment sometime around noon, I think. I am not seeking recognition at this time.

Mr. NELSON. I see. The Senator wants to call it up later in the day.

Mr. CURTIS. Yes, a little later in the day. I have some troops that I want to summon.

Mr. NELSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I hope that Senators who have amendments will come to the floor and call them up. Time is running, and it is going to be a long day, at best. This is the last full day that the Senate will be spending on this code of conduct. The time that will be taken tomorrow is already allotted.

So I urge that Senators who have amendments come to the floor and call them up. Now is a good time. No Senator who wishes to call up an amendment is in the Chamber at this time.

I urge both cloakrooms to get the word out to Senators who have amendments to come forward, call them up, and get action thereon.

Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged against both sides on the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT OF DISCLOSURE ON INCOME AND ASSETS

Mr. NELSON. Mr. President, it has been brought to my attention that during the debate on March 28, 1977, certain comments were made by Senators which I believe do not accurately reflect the reporting requirements contained in proposed Rule XLII. This confusion surrounded the value which must be placed on assets covered by the financial dis-

closure rule. The rule requires that the identity and category of value of real property, certain types of personal property, and other assets be reported under the Code. When listing the category of value of such an asset, the category of value refers to the category in which the fair market value of that asset is included. For example, if the person owns stock in a corporation which stock has a fair market vaue of $150,000, then that person would list the stock with a category of value of between $100,000 and $250,000. If the asset were a piece of real property, the fair market value—or purchase price—would be listed. The category of value of the property relates to the value of the property without regard to any loan or mortgage. The category of value of the loan or mortgage would be listed separately under paragraph 2(f) requiring the identity and category of value of certain liabilities.

This is very important. If a person owns a home which was purchased for $90,000 and that person has an $80,000 mortgage on that home, under the Code the person is permitted to list the category of value of the purchase price of that home. So the category of value of the purchase price of the home would be listed as between $90,000 and $100,000. The person cannot list as the category of value of the home the difference between the purchase price and the value of the mortgage on the home; namely, $10,000. The Code calls for the listing of the category of value of the fair market value of certain assets and not the person's equity interest in such assets.

Similarly, with regard to the reporting of income, an individual is required to list the gross income received. If there are expenses allocable to that income, the reporting individual has the option of indicating those expenses and also listing a net income figure. However, a person cannot just list a net income figure where earned or unearned income is required to be listed.

Mr. President, I call attention to the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order of the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SARBANES). Without objection, it is so ordered.

AMENDMENT NO. 166

Mr. STEVENS. Mr. President, I call up my amendment No. 166.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

On page 26, line 14, strike subparagraph (10) and insert the following: "(10) distributive shares of partnership income if the material income-producing services performed by the Senator or officer or employee of the Senate are those of a managerial or supervisory nature and do not consume significant amounts of time while the Senate is in session.".

Mr. STEVENS. Mr. President, may I inquire what the time limit is on these amendments?

The PRESIDING OFFICER. The Chair informs the Senator that there is a 2-hour time limit on the amendment, to be equally divided between the mover of the amendment and the manager of the resolution.

Mr. STEVENS. I thank the Chair. I have no intention of taking that amount of time, but I would like to direct some questions to the manager of the bill with regard to this provision as it appears in the bill, and my suggested amendment.

The provision that appears in the bill is on page 26, commencing on line 14, and it states:

Distributive shares of partnership income if the services provided by the Senator, or officer or employee of the Senate, are not a material income-producing factor.

I am certain that my good friend from Wisconsin, the manager of the bill, would agree with me that one of the objectives of the new code of conduct would be to try to prevent the use of the Senate office per se for the acquisition of income. Yet I would call to the attention of my friend that if the resolution as it is presently drawn were adopted by the Senate, that might happen.

A Senator could be asked by Partnership X to become a partner; they would list him as a partner, and if it were a trucking company, for example, it could say on the sides of the trucks, "Senator Jones Trucking Company." He would have no obligation to provide any contribution to the partnership, and yet, to the extent that they distributed a share of partnership income to him, it would be completely exempt.

My amendment seeks to identify the actual role of a partner, which is a combination of that of a stockholder and that of a member of a board of a corporation, because a partner is called upon to participate in partnership affairs and the making of policy, as a stockholder would be, and he is also called upon to be a member of the partnership, as a member of the board of directors would be. He is, then, a responsible policymaker of the partnership.

I take it that the intent here is to limit earned income of a Senator from either a partnership or a corporation; does the Senator agree with that?

Mr. NELSON. Yes. The objective is to define earned income, which the resolution does, and then to provide a cap on the earned income of $8,600.

The amendment that is pending—we have another draft that I would like to have considered later on—would allow the earned income, as the resolution does, as high as $8,600 or 15 percent. It would permit the Member or the staff member to contribute managerial and supervisory services, for the purpose of protecting the investment, and the amendment that we will propose would also limit the distributive share of profits at the end of the year in a partnership to a pro rata percentage represented by the capital investment of the Member.

Mr. STEVENS. I think I agree with the Senator from Wisconsin. Let me state the objective of my amendment, and see if we are in agreement that we are going to achieve that objective.

A member of a partnership contributes to the capital account, and if we were in a partnership that had five members, and we each put in, say, $10,000, we could operate that partnership for about 4 years, and in each year have on our income tax return an attributable portion of the partnership income, even though we had no distributive shares. I assume that the Senator would agree with that, that you can have attributable income without having a distributive share of partnership income. This is for tax purposes, and it would mean that you would, in effect, have had no return from that partnership even though you would be taxed on a portion of the partnership return, under the circumstance that the moneys were used by the partnership for equipment, payment of mortgages, or whatever it would be; but you would be taxed on a portion of the income. In the event we came to the 5th year, and did have a cash flow after paying off the equipment or whatever it might be, and the Senator could then take a distributive share, the previous 4 years would show an increase in the capital account of the partner.

In the 5th year he could take a distributive share from the partnership which actually could amount to both a return of capital and a sharing of that current year's income. I hope the Senator realizes that. That would be perfectly legal under any partnership arrangement, to reduce your capital account by a distributive share, as well as taking, of course, the income.

In the Senator's concept here in terms of the pro rata return on the capital invested in the partnership, that is what I am aiming at. He does not mean the original investment but the pro rata share of the partner's interest in the partnership.

Mr. NELSON. That is correct. He may have made an original capital investment of a certain amount. Over the years the partnership is making a profit and that money is plowed in to pay off the mortgage against whatever capital asset they have, buildings or machinery, therefore, they are accumulating an increasingly larger interest in the capital investment which is coming from earnings of the partnership. Obviously, then, on any distributive share of income at any time it would be intended by the amendment that we would propose that the Member is entitled to receive a pro rata share of whatever his total investment in that partnership is.

Mr. STEVENS. As I understand the Senator's proposal, again looking at the Senator who is involved in a small corporation as opposed to a partnership, or any corporation, for that matter, the Senator could, under the existing resolution, receive a salary of not to exceed $8,600, approximately, from a corporation. Is that correct? That is, assuming he had no other income.

Mr. NELSON. He could receive a salary from the corporation for personal services of $8,600 as a member of the board, or whatever.

Mr. STEVENS. A Senator who is a member of a partnership could similarly receive a salary either from the partnership or from any other source in the amount of the 15 percent without regard to the limitation on this distributive share; is that correct?

Mr. NELSON. That is correct.

Mr. STEVENS. I take it we should call it a substitute for the amendment of the Senator from Alaska, if it is adopted. What it means is that in any year a Senator can have the 15-percent earned income and there will not be considered toward that income moneys that are received from a partnership in which the Senator has investment, so long as that share does not exceed his pro rata portion of the total investment in the partnership.

Mr. NELSON. That is correct.

Mr. STEVENS. In other words, if there is a capital account of $10,000 in the partnership and I were to have a $1,000 portion of that capital account, then I could take 10 percent of the income of the partnership as we are discussing it now, not as it is determined by the Federal tax laws—in terms of the distributive shares of the partnership—and not be in violation of the code of conduct.

Mr. NELSON. That is correct.

Mr. STEVENS. Mr. President, I believe the Senator from Wisconsin has a very fair compromise to the proposal that I raised. We want to be certain that those who pursue their investment policy through partnership participation rather than stock ownership are treated no less fairly and no less harshly than the rule treats stock owners. Is that the intent of the Senator?

Mr. NELSON. That is correct. If a member owned 20 percent of the stock or 10 percent of the stock in a corporation, he or she is entitled to a dividend proportionate to the amount of stock owned by the member or by the staff member. In fact, I think it is probably correct that in most States one cannot receive more.

Mr. STEVENS. Normally, a dividend distribution would be on the basis of stock ownership. There could be a preferential distribution under some laws, but not under the laws of my State. In terms of the distributive share of a partnership and the income of a partnership, in the partnership law as I understand it, it could include past income that was added to the capital account that represents moneys that were invested by the partnership on which the partner had been taxed previously. That means that a distribution of moneys from the partnership may not necessarily be the current year's income. I want to make certain we understand and agree on that.

Mr. NELSON. If I understand what the Senator was saying, this amendment does not propose to interfere in any way with the pro rata distributive share of whatever asset they have that comes as a consequence of the profits of the partnership.

Mr. STEVENS. Partnership income is determined on an annual basis for internal revenue purposes. Partnership income in terms of distributive shares, really in terms of normal partnership accounting, would mean if they are distributing past year's income, they are really distributing a portion of the capital accounts, but it does, in fact, represent past income of the partnership.

Mr. NELSON. That is correct.

Mr. STEVENS. If we had a partnership which allowed all of its income to be put back into the activities of the partnership for 4 years and in the 5th year distributed all that each partner was entitled to, so long as it is on a pro rata basis of the capital accounts as it stands at the time of the distribution, we have no problem; is that correct?

Mr. NELSON. The principle running through the amendment really does not concern itself particularly about the capital accounts. It simply concerns itself with the limitation that may be paid to a member from profits accumulated as capital or current income which may not exceed the pro rata share, percentagewise, of investment in the partnership.

Mr. STEVENS. I believe we are in accord. The concept is a good one. In effect, the Senator is putting into my amendment the concept of pro rata return on capital invested in a partnership, which I think is fair and brings it into line with the concept of a pro rata share of the dividends based upon the capital invested in the corporation.

Is the Senator prepared to offer his amendment as a substitute for my amendment, or does he wish to have me modify my amendment? I would be happy to proceed in any way he desires.

UP AMENDMENT NO. 122

Mr. NELSON. I will offer this as a substitute amendment.

Mr. President, I send a substitute amendment to the desk.

Mr. STEVENS. Mr. President, I yield back the remainder of my time.

Mr. NELSON. I yield back the remainder of my time.

The PRESIDING OFFICER. The clerk will state the substitute amendment.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes an unprinted amendment No. 122 in the nature of a substitute to amendment No. 166.

The assistant legislative clerk proceeded to read the amendment.

The PRESIDING OFFICER. The amendment is not drafted as a substitute and is not in order.

Mr. STEVENS. Then I withdraw my amendment so we may consider the amendment of the Senator from Wisconsin.

Mr. NELSON. I offer the amendment, Mr. President.

The PRESIDING OFFICER. The amendment is withdrawn. The clerk will state the amendment offered by the Senator from Wisconsin.

The assistant legislative clerk read as follows:

On page 26, at lines 15 through 17, strike everything beginning with "distributive shares of partnership income" and ending with "income producing factor" and insert in lieu thereof the following:

Distributive shares of partnership income if the distributive share received represents not more than a *pro rata* return on the capital invested in the partnership and the services provided by the Senator or officer or employee are managerial or supervisory in nature, necessary to protect the interests in the partnership and do not consume significant amounts of time while the Senate is in session.

Mr. NELSON. Mr. President, I move adoption of the amendment.

Mr. STEVENS. I think that is a fair compromise, Mr. President. I support it and join in moving adoption of the amendment.

The PRESIDING OFFICER. Is all time yielded back?

Mr. NELSON. All my time is yielded back.

Mr. STEVENS. All my time is yielded back.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. NELSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The resolution is open to further amendment.

Mr. NELSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

REQUEST FOR COMMITTEE TO MEET DURING SENATE SESSION

Mr. ROBERT C. BYRD. Mr. President, the Secretary of Agriculture, Mr. Bergland, is appearing before the Committee on Agriculture, Nutrition, and Forestry at this time. The committee, under the Stevenson resolution, without further consideration, will have to adjourn its meeting within 3 minutes. In the hope that the committee can continue to hear Mr. Bergland until he has completed his presentation before the committee, as I understand it, I ask unanimous consent that the Committee on Agriculture be authorized to meet until the hour of 12:30 p.m. today, just to accommodate the Secretary of Agriculture.

The PRESIDING OFFICER. Is there objection?

Mr. STEVENS. Mr. President, reluctantly, I must object.

The PRESIDING OFFICER. The objection of the Senator from Alaska is heard.

The request is not agreed to.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees

of the U.S. Senate; and for other purposes.

UP AMENDMENT NO. 123

Mr. THURMOND. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Carolina (Mr. THURMOND) proposes unprinted amendment No. 123.

On page 5, line 13, delete the period and add the following: "unless, in an unusual case, a waiver is granted by the Select Committee."

On page 21, line 4, after "half sister", insert "fiance, fiancee,"

On page 22, line 4, delete the period and add the following: "unless, in an unusual case, a waiver is granted by the Select Committee."

On page 49, after line 13, insert the following: "(8) A brief description of a waiver granted under paragraph 2(c) of Rule XLII or paragraph (1) of Rule XLIII of the Standing Rules of the Senate, shall be made available upon request in the Ethics Committee Office with appropriate deletions to assure the privacy of the individual concerned."

Mr. THURMOND. Mr. President, the other day, in a floor colloquy, it was pointed out that the provisions of rule XLII, disclosure, and rule XLIII, gifts, are so restrictive as to cause potential hardships in some unusual situations.

The distinguished senior Senator from Nebraska (Mr. CURTIS) asked whether a staff member could accept an engagement ring valued in excess of $100 from her fiance if he were a lobbyist. Under a strict reading of paragraph 2 of rule XLIII, such a gift would be prohibited. Even if the fiance were not a lobbyist, section 2(A)(3)(C) would require the public disclosure of the identity of the source, a brief description, and the value of all gifts aggregating $100 or more from any one source in a calendar year. This, too, is unduly restrictive and potentially embarrassing.

Mr. President, I do not believe we want to be this restrictive and unreasonable in the code. I have a young lady in my office who is currently engaged to a lobbyist, and I am sure it would be embarrassing to her and unacceptable to her fiance, even if he were not a lobbyist, to publicly disclose such an intimate gift.

I have an amendment which leaves the current rules in force, but makes two changes. First, the definition of "relative," which is used to exempt certain gifts from the coverage of the code, would be expanded to cover a fiancee and fiance. Second, the amendment permits an individual to seek from the select committee a waiver to the gifts and disclosure sections in other circumstances, such as I have just described, which we have not anticipated and which could not give the appearance of impropriety. I believe this amendment is acceptable.

Mr. NELSON. Mr. President, I am prepared to accept the amendment and yield back the remainder of my time.

Mr. THURMOND. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Carolina.

The amendment was agreed to.

Mr. NELSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ALLEN. Mr. President, I wish to propound a question or two to the distinguished floor manager of the resolution, if I may.

The Senator from Alabama, prior to coming to the Senate, was a practicing attorney. Since coming to the Senate, I have continued to pay my local law licenses, though I have not engaged in the practice of law in any form, with the following exception.

On two occasions in the Supreme Court of the United States I have, on behalf of the State of Alabama and some of its political subdivisions, filed amicus curiae briefs with the Supreme Court without compensation.

Feeling it is my duty to represent the people of Alabama and our various governments there, I would like to make sure that if in the future I am called on by my State government or by any of its political subdivisions to assist in matters that they might have before the Supreme Court of the United States, it would be proper for me, or any other Senator similarly situated, to file amicus curiae briefs on behalf of our local governments with the Supreme Court of the United States without compensation.

Is that practice permitted under the code?

Mr. NELSON. I would say yes. Of course, the code could not and would not be intended to modify any statute which may place limitations upon Members and staff in appearances before certain regulatory agencies, or Federal courts.

In the case stated by the Senator, I remind him we did already amend the resolution to prohibit any practice of any profession as defined in the code.

We changed that provision and authorized practice of the professions with an earned income limit of 15 percent applied thereto, provided they were sole practitioners, not associated with a firm or partnership.

Mr. ALLEN. Yes.

Mr. NELSON. So it is clear that the practice of law is permitted. It is clear that the Members or staff may receive an earned income not to exceed 15 percent. Therefore, it is also in my mind perfectly clear that a Member or staff, barring any prohibition in any other statute, may appear in court.

Mr. ALLEN. Yes. I am talking about the Senator himself.

Mr. NELSON. And the Senator himself may appear as a lawyer without compensation in any of these circumstances not otherwise prohibited by statute.

Mr. ALLEN. Would that also permit the Senator on behalf of constituents to appear as an attorney without compensation before various Federal regulatory bodies?

Mr. NELSON. On that score, I would want to check the statute.

It is my belief that there is a statute regulating appearances by Members of the Congress and other Federal employees before certain types of agencies and bodies of the Federal Government. I believe there is a prohibition on appearing before regulatory agencies.

Mr. ALLEN. It is certainly all right with me. I have not had occasion to be asked to perform any such service, I am merely trying to establish some guidelines in this connection.

But the filing of amicus curiae briefs or appearing in court amicus curiae, I assume then as long as it is without compenation, directly or indirectly, that would be permitted.

Mr. NELSON. So far as the code is concerned, it would.

Mr. ALLEN. I thank the distinguished manager of the resolution.

AMENDMENT NO. 158, AS MODIFIED

Mr. HELMS. Mr. President, I call up amendment No. 158 as modified and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes amendment No. 158, as modified.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 24, after line 12, insert the following:

5(a) Notwithstanding the provisions of this rule, a Member, officer or employee of the Senate may participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization if such participation is not in violation of any law and if the Select Committee on Ethics has determined that participation in such program by Members, officers or employees of the Senate is in the interests of the Senate and the United States.

(b) Any Member who accepts an invitation to participate in any such program shall notify the Select Committee in writing of his acceptance. A Member shall also notify the Select Committee in writing whenever he has permitted any officer or employee whom he supervises (within the meaning of paragraph 12 of Rule XLV) to participate in any such program. Prior to the beginning of any such program, the Chairman of the Select Committee shall place in the Congressional Record a list of all individuals participating, where applicable the supervisors of such individuals, and the nature and itinerary of such program.

(c) No Member, officer or employee may accept funds in connection with participation in a program permitted under subparagraph (a) if such funds are not used for necessary food, lodging, transportation and related expenses of the Member, officer or employee.

Mr. HELMS. Mr. President, I am pleased to accept the suggestions of the distinguished Senator from Wisconsin in the hope that this amendment will give some guidelines to the Committee on Ethics in evaluating foreign travel paid for by foreign sources. As the distinguished Senator is aware, my amendment originally was concerned only with foreign travel paid for by a nongovern-

mental source when the source was a charitable or educational foundation or organization, and when the government of the country in question could certify that no substantial part of the funds involved came from official government funds.

It is the personal conviction of the senior Senator from North Carolina that Senators should minimize foreign travel at the taxpayers' expense, thus avoiding the questions that arise constantly in the minds of taxpayers who cannot afford such travel themselves, particularly after they have paid their taxes on April 15. It is my feeling that whenever we can save the U.S. taxpayers' money, we ought to do so. Therefore, it seems to the Senator from North Carolina that when an unimpeachable source, such as a foreign charitable and educational foundation, seeks to extend hospitality to this country in the name of international understanding, the values of foreign travel and saving U.S. taxpayers' money can be harmonized. This is why the original amendment of the Senator from North Carolina was limited to the question of private moneys, and avoided the question of governmental funds.

However, the distinguished Senator from Wisconsin has pointed out that we already have Public Law 94–350, providing for cultural exchanges, including exchanges of legislators and governmental leaders, and that Congress has already consented to allowing Federal employees to accept travel paid for by foreign governments when it is for an educational purpose. This is in the United States Code at 22 U.S.C. 2451–2. It is not, therefore, the intention of the Senator from North Carolina to attempt to forbid by Senate resolution what is permitted by law, and thus I accept Senator NELSON's suggestion as to the inclusion of governmental programs into my amendment, and it has been thus modified.

However, I should like to ask the distinguished Senator from Wisconsin some questions so that we can clarify the legislative intent behind the modified amendment.

Mr. President, this language says that any Senator, officer, or employee of the Senate may participate in travel paid for by a former government or organization if such participation "is not in violation of any law." I ask the distinguished Senator from Wisconsin whether it is not true that this is a reference to 22 U.S.C. 2451–2, which regulates acceptance of such travel by Federal employees.

Mr. NELSON. That is correct.

Mr. HELMS. This regulates, of course, the acceptance of such travel by Federal employees. In other words, no foreign travel paid for by foreign governments is permitted, except as Congress designates in law. Is that correct?

Mr. NELSON. That is my understanding.

Mr. HELMS. Is it not also true that this amendment permits travel paid for by private educational or charitable organizations if—and I stress the word "if"—approved by the Senate Committee on Ethics?

Mr. NELSON. That is correct.

Mr. HELMS. So it seems clear, therefore, that Federal law covers trips paid for by foreign governments; but it is the express intention of this amendment to permit trips paid for by private foreign educational, or charitable institutions, if approved by the Select Committee on Ethics.

Mr. NELSON. That is correct. If we look at the amendment of the distinguished Senator from North Carolina, I think it clarifies and improves the language in the resolution, and the manager of the bill is prepared to accept it.

Mr. HELMS. I thank the Senator.

So, in other words, trips paid for by private foreign educational and charitable organizations are governed by the decisions of the Ethics Committee, but do not fall within the purview of 22 U.S.C. 24151–2.

Mr. NELSON. That is correct.

Mr. HELMS. Let us go, then, to the next point, which is the guidelines laid down for the Select Committee on Ethics. The language of the amendment says that the select committee must determine that participation in such programs is "in the interests of the Senate and the United States." It is my hope that this will not be interpreted narrowly or in such a way as to support on a one-sided basis matters and interests which are open for debate in the Senate, or to prevent the exploration of minority viewpoints.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. HELMS. I yield gladly to my friend from South Carolina.

Mr. THURMOND. Mr. President, I see no objection to this amendment. In fact, I think it might be helpful.

Mr. HELMS. I thank the able Senator.

Mr. NELSON. Mr. President, this amendment, as I understand it, permits travel to be paid for by foreign charitable or educational organizations if that travel is approved by the Ethics Committee.

I would expect the Ethics Committee to apply the requirements in the Mansfield statement. The Ethics Committee might decide to alter those standards with respect to travel paid for by a foreign government—that is, paid for under existing law.

I yield back the remainder of my time.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. NELSON. I yield.

Mr. ALLEN. Mr. President, I hate to take issue with my distinguished friend from North Carolina. I believe I have supported all amendments he has offered thus far. But I really question the wisdom of this amendment. At the very time when Members of at least one House of Congress have been mentioned as having been beneficiaries of the largesse of certain foreign governments, operatives closely associated with foreign governments, I think it would ill-behoove us for any Senator to accept travel allowances and expense-paid tours from foreign foundations which in every case, I believe, have some sort of connection with a foreign government.

They are not offering their hospitality to Members of the Senate just because they like the Members of the Senate. There is some motive there that would cause them to offer these expense-paid trips.

I am not sure that the safeguard of the approval by the Ethics Committee would be sufficient, because it might be some time after the trip was made that the connection with the foreign government would be found out. I think we need to lean over backward to avoid the appearance of evil in this matter, I say to the distinguished Senator from North Carolina, who knows that I admire him very much.

I believe we can forego these foreign trips. I have had offers to go to certain countries in Eastern Asia on at least two occasions. Members of my staff have been invited. I have forbidden that. I have declined any such offers and have not allowed members of my staff to take such trips.

Let us not kid ourselves. They are not offering these expense-paid tours to Members of the Senate without reason. How many such offers would a former Senator receive? Not one.

I think we are making a bad mistake, and I urge the chairman of the ad hoc committee to consider this matter anew; because I think we are going down the primrose path here. I believe we should avoid this. If the effort to adopt the amendment is persisted in, I will call for the yeas and nays.

Mr. HELMS. Mr. President, as the able Senator from Alabama knows, the Senator from North Carolina never has taken a foreign trip paid for by Government funds—either U.S. Government funds or foreign government funds.

Mr. ALLEN. I know it.

Mr. HELMS. The financing of such trips by a foreign government is already permitted by law under certain conditions, and this amendment is intended to tighten the situation rather than to loosen it.

I would agree with the Senator except that I do think this is a worthy amendment, in that it requires the Ethics Committee to pass judgment before the fact of the trip.

Whatever is the will of the Senate suits me fine, but I submit the amendment with the intent and the hope that we can tighten up the situation rather than loosen it and also have some clarification of what the situation really is.

I appreciate the Senator's comments.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. HELMS. I yield, of course, to my friend from Alabama.

Mr. ALLEN. The amendment would give the stamp of approval by the Senate to a Senator accepting the foreign travel, the expense-paid trip, which could run to several thousand dollars, the only requirement being, I assume, that he would receive advance or subsequent approval of the Ethics Committee. Is that not right?

Mr. HELMS. Prior approval, I would emphasize.

Mr. ALLEN. But this does permit something and does put the stamp of approval on this practice—the approval by the Senate of engaging in and accepting trips that are paid for by foreign

foundations or associations in every case, I submit, where the foundation has some connection with the foreign government, or they would not be in this business.

I feel that it is an amendment that should not be adopted.

Mr. HELMS. Mr. President, I respect the Senator's views. The Senator from North Carolina takes no trips paid by the funds of any government and does not intend to take such trips. I merely want the situation clarified, and trips limited solely to those expressly approved in advance by the Ethics Committee. As matters now stand, no such prior approval is required—and, as my friend from Alabama has stated, questions have been raised in the other body about this sort of thing. This amendment is intended, therefore, to provide a discipline for the kind of situation mentioned by the Senator from Alabama. My original amendment was limted to trips paid by private charitable and educational foundations—foundations like our own which do not receive any Government funds. At the suggestion of the distinguished Senator from Wisconsin I broadened the amendment to conform the ethics code to what already exists in law in 22 U.S.C. 2451 and 2452, and to include prior approval by the Select Committee on Ethics. Thus the first part is not giving a new stamp of approval to foreign travel; it is a technical change conforming the ethics resolution to present law. And it further tightens the code by requiring specific prior approval by the select committee.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. HELMS. I yield.

Mr. ROBERT C. BYRD. Mr. President, I see some merit in the position that is taken by the Senator from Alabama. I should like to ask this question, however, of the Senator from North Carolina, who is the author of the amendment: As the Senator knows, for the past few years, the People's Republic of China, working through the White House, has extended invitations to Members of Congress in both houses to visit the People's Republic of China.

The People's Republic, through its own organization there—I do not recall, the name of the organization, but, obviously, it is under the aegis of the Government—pays the expenses inside China for the transportation of Members of Congress, for the hotel bills and meals, and so forth. The White House, through the Defense Department, provides transportation of these Members to China and return.

What impact on this relationship would the Senator's amendment have? The President of the United States, Mr. Carter, and the former President of the United States, Mr. Ford, feel and felt, respectively, that these visits by Members of Congress to the People's Republic are beneficial, that they help to keep the communications lines open between the two countries, and that they provide an opportunity for exchange of viewpoints on the part of Chinese officials and Members of the Congress of the United States.

I personally went on one of those trips at the invitation of President Ford, to China 2 years ago, and various other Members of this body and of the other body have likewise gone on such trips.

There will be such a trip during the Easter nonlegislative period, and there presumably will be another trip in August of this year.

What will be the impact, if any, of this amendment on the kind of activity I just described?

Mr. HELMS. No negative impact whatsoever, as was established in a colloquy earlier between the Senator from Wisconsin and the Senator from North Carolina. The ethics of such travel are already a matter of law, so it would have no effect whatsoever I will say to the distinguished Senator from West Virginia. It conforms the Ethics Code to the law, which already exists, permitting the kind of travel just described by the distinguished majority leader. Without this technical change we would be in the position of having the law saying yes, but the code saying no. In addition it sets up criteria similar to those set forth on this floor in 1974.

On July 16, 1974, the then distinguished majority leader, Mr. Mansfield, and the minority leader, Mr. Scott, engaged in a colloquy which attempted to define criteria for foreign travel which would establish when, and I am quoting, "participation is in the interest of the Senate and the Federal Government and the Nation." The two distinguished leaders set up five criteria to define when such participation is in the interest of the Senate and the Nation. These included:

First, their principal objective is educational;

Second, they serve to enhance the capacity of the Senate employee to perform his duties in the Senate and to serve the Government and people of the United States with greater understanding;

Third, knowledge of the program is not withheld from the public;

Fourth, the staff employee, in every instance, participates only with the full awareness and approval of his employing Senator, committee, or Senate officer; and

Fifth, reference in detail to the participation is inserted by the authorizing person in the CONGRESSIONAL RECORD.

Mr. ROBERT C. BYRD. Mr. President, does the Senator understand that to mean there would be no cost to the U.S. Government of such participation by the Senator?

Mr. HELMS. That is correct, unless it is an exchange program authorized by law.

Mr. ROBERT C. BYRD. No cost; that is correct. How does the Senator know that to be the case?

Mr. HELMS. Well. it depends on the nature of the trip. If the Senate sends him or her, of course there would be. This amendment also deals with trips financed by legitimate educational foundations of foreign countries.

Mr. ROBERT C. BYRD. In those instances the Mansfield-Scott position as enunciated by the distinguished Senator does not envision the U.S. Government bearing any portion of those costs of staff personnel who visit at the invitation of such foundation.

Mr. HELMS. That is correct.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. HELMS. Now, is it not the opinion of the distinguished Senator from Wisconsin that the criteria which Senators Mansfield and Scott developed for staff travel are appropriate also for travel by Senators and officers of the Senate?

Mr. NELSON. Yes.

Mr. HELMS. Moreover, the Senator from North Carolina points out that the third, fourth, and fifth criteria are explicitly provided for in paragraphs (B) and (C) of this amendment.

I believe that it is also appropriate that these criteria apply to both Government-financed mutual exchange programs under 22 U.S.C. 2451–2 and to programs paid for by nongovernmentally financed foreign charitable and educational organizations.

It is therefore, the intention of this amendment, specifically, to permit private travel programs which are financed by charitable and educational organizations if they meet the criteria outlined by Senators Mansfield and Scott on July 16, 1974, and even if there are no official funds of the foreign government involved.

Mr. President. I ask unanimous consent that the joint statement of those Senators on July 16, 1974, be printed at this point in the RECORD for reference.

There being no objection, the joint statement was ordered to be printed in the RECORD, as follows:

SENATE STAFF PARTICIPATION IN EDUCATIONAL EXCHANGE PROGRAMS

Mr. MANSFIELD. Mr. President, on behalf of the distinguished Republican leader, the Senator from Pennsylvania (Mr. HUGH SCOTT) and myself, I make the following joint statement:

Mr. President, this Nation has in operation a number of exchange programs and leadership grants which bring to the United States, among others, political leaders, parliamentarians, and government employees, and military personnel of many foreign governments. While these programs are financed at the expense of the Federal Government, they can hardly be regarded as U.S. gifts to the foreigners who participate in the programs. Certainly they are not improper. Their purpose is to promote better understanding and to improve relationships between ourselves and the governments of other nations. If these U.S.-sponsored programs are to continue to be effective and, most important, acceptable to others and to our own people—and it is our hope that they will—they must derive from the principle of reciprocity and mutuality. They can hardly be deemed highly desirable when foreign personnel come to this Nation and then frowned on when American personnel go abroad under similar arrangements.

It is against this background that there have come to our attention certain comments and informal opinions casting doubt on the propriety of staff personnel of the Senate participating in exchange programs which appear to be comparable with U.S. programs for bringing foreign officials and civil servants and military personnel and others to this country. Without passing judgment on any particular instance of Senate staff participation in any particular program, it seems to us that participation by Senate staff personnel is proper in programs which serve such purposes as the following:

First, their principal objective is educational;

Second, they serve to enhance the capacity of the Senate employee to perform his duties in the Senate and to serve the government and people of the United States with greater understanding;

Third, knowledge of the program is not withheld from the public;

Fourth, the staff employee, in every instance, participates only with the full awareness and approval of his employing Senator, committee, or Senate officer; and

Fifth, reference in detail to the participation is inserted by the authorizing person in the CONGRESSIONAL RECORD.

It would seem to us that when these criteria are met, participation is in the interest of the Senate and the Federal Government and the Nation.

If any rule changes are necessary to establish a procedure for Senate staff participation in these bona fide exchange programs, it is the responsibility of the Committee on Ethics to propose such changes, formally, and for the Senate to approve or disapprove them. In the absence of such changes, the five points listed above should be sufficient. In our judgment, to provide a framework for determining when participation in educational exchange programs is valid for Senate staff personnel. We are confident of the integrity and good sense of Senate employees participating on the basis of these criteria and of the Committees, Members, and officers who supervise them.

Mr. HELMS. Mr. President, I yield back the remainder of my time.

Mr. ALLEN. I call for the yeas and nays.

The PRESIDING OFFICER. Does the Senator from Wisconsin yield back his time?

Mr. NELSON. I yield back the remainder of my time.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

The PRESIDING OFFICER (Mr. ZORINSKY). Let us please have the Senate in order.

The legislative clerk resumed and concluded the call of the roll.

Mr. CRANSTON of California. I announce that the Senator from Missouri (Mr. EAGLETON), the Senator from Washington (Mr. MAGNUSON), the Senator from Arkansas (Mr. MCCLELLAN), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

I further announce that the Senator from Michigan (Mr. RIEGLE) and the Senator from Hawaii (Mr. INOUYE) are absent on official business.

I also announce that the Senator from Colorado (Mr. HASKELL) is absent attending the funeral of a friend.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) and the Senator from Washington (Mr. MAGNUSON) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), the Senator from Maryland (Mr. MATHIAS), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "yea."

The result was announced—yeas 79, nays 9, as follows:

[Rollcall Vote No. 89 Leg.]

YEAS—79

Abourezk	Gravel	Muskie
Anderson	Hansen	Nelson
Baker	Hart	Nunn
Bartlett	Hatch	Pearson
Bayh	Hathaway	Pell
Bellmon	Hayakawa	Percy
Bentsen	Heinz	Proxmire
Biden	Helms	Ribicoff
Brooke	Huddleston	Roth
Bumpers	Humphrey	Sarbanes
Burdick	Jackson	Sasser
Cannon	Javits	Schmitt
Case	Johnston	Schweiker
Chafee	Kennedy	Scott
Church	Laxalt	Stafford
Cranston	Leahy	Stevens
Culver	Long	Stevenson
Curtis	Lugar	Talmadge
Danforth	Matsunaga	Thurmond
DeConcini	McClure	Tower
Dole	McGovern	Wallop
Domenici	McIntyre	Weicker
Durkin	Melcher	Williams
Eastland	Metcalf	Young
Ford	Metzenbaum	Zorinsky
Garn	Morgan	
Glenn	Moynihan	

NAYS—9

Allen	Chiles	Sparkman
Byrd, Harry F., Jr.	Clark	Stone
Byrd, Robert C.	Hollings	
	Randolph	

NOT VOTING—12

Eagleton	Hatfield	McClellan
Goldwater	Inouye	Packwood
Griffin	Magnuson	Riegle
Haskell	Mathias	Stennis

So Mr. HELMS' amendment (No. 158) was agreed to.

UP AMENDMENT NO. 124

Mr. STEVENSON. Mr. President, I have a technical amendment at the desk, which I call up.

The PRESIDING OFFICER. The amendment will be stated.

Mr. STEVENSON. Mr. President, could we have some order in the Chamber?

The PRESIDENT OFFICER. The Senate will be in order. The clerk will state the amendment.

The second assistant legislative clerk read as follows:

The Senator from Illinois (Mr. STEVENSON) proposes an unprinted amendment numbered 124: On page 33, line 10, insert—

Mr. STEVENSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 33, line 10, insert a period after the word "Member" and strike the words "who is defeated for reelection or does not seek reelection."

Mr. HELMS. Mr. President, will the Senator yield for 1 minute?

Mr. STEVENSON. Yes, I yield 1 minute, without losing my right to the floor, to the Senator from North Carolina.

Mr. HELMS. Mr. President, I ask unanimous consent that I may move to reconsider the vote by which the previous amendment was agreed to.

Mr. SCOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS. I thank the Chair, and I thank the Senator from Illinois.

COMMITTEE MEETINGS

Mr. STEVENSON. Mr. President, I ask unanimous consent that the Subcommittee on Science, Technology, and Space of the Committee on Commerce, Science, and Transportation be authorized to meet on Tuesday, April 5, at 2 p.m. for the purpose of marking up the authorization bill for fiscal year 1978 for the National Aeronautics and Space Administration.

This request has been cleared with the minority.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENSON. I also ask unanimous consent that the Committee on Commerce, Science, and Transportation be permitted to meet at 2 p.m. on Thursday, April 7, to hear testimony on the nomination of Dr. Frank Press to be Director of the Office of Science and Technology Policies.

This request has also been cleared with the minority.

The PRESIDING OFFICER. Without objection, it is so ordered.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

UP AMENDMENT NO. 124

Mr. STEVENSON. Mr. President, this is a clarifying amendment. It makes it clear that no Member or former Member will be permitted by the Code to convert political funds in the future to his own personal uses. That was the intention of rule XLVI, section 2, of the committee's resolution, but it is not clear because that section, on the face of it, seems to limit the prohibition to Members who are defeated for reelection or do not seek reelection. This amendment would simply delete the reference to Members defeated for reelection or who do not seek reelection, to make it clear that the prohibition applies to all Members or former Members.

I have discussed the amendment with the distinguished chairman, and am hopeful that he will accept the amendment.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. STEVENSON. Yes. Mr. President, I yield to the Senator from Alabama for a question.

Mr. ALLEN. I am certainly going to support the amendment. I would like to know, from a practical point of view, would it be enforceable? In other words, the Federal election law would allow these funds to be converted to a Member's own use or a former Member's own use, and, actually, what jurisdiction would the Ethics Committee or the Senate, for that matter, have over a former Member who retires or is defeated and does not come back?

There is nothing requiring a former Member or Member to turn these funds over to anyone. They could lie dormant until such time as the Senator decided he wanted to convert them to his own use and pay a tax on them; but I wonder, really, from a practical point of view, is this amendment enforceable?

Mr. STEVENSON. The amendment is enforceable with respect to incumbent Members of the Senate.

Mr. ALLEN. I understand, yes; but what about former Members?

Mr. STEVENSON. The Senator is raising a very real problem, and it arises in many different contexts throughout this code of conduct. The fact of the matter is that with respect to former Members of the Senate, no matter what the offense, the Senate is without a remedy.

Mr. ALLEN. Yes.

Mr. STEVENSON. There is no way of enforcing the prohibition against Members who have left the Senate. So in that respect, this prohibition is largely hortatory. I hope there will not be any such occasions, in which the Ethics Committee is called upon to enforce a prohibition against former Members. If such an occasion did arise, the Ethics Committee would be without any means of enforcement.

Mr. ALLEN. As I say, I support the amendment but I was just trying to see if the Senator had any thought that it would be enforceable as to former Members.

Mr. STEVENSON. Mr. President, I am glad the Senator raised this question because it could come up in other contexts, too. If so, it will be a subject the Ethics Committee would have to consider.

It would be my expectation that in making determinations as to whether to investigate and follow through to the end complaints of misconduct involving former Members, the committee would take into consideration the fact that in such cases, even if an offense was proved, it could do nothing. It would be powerless to act. That, it seems to me, is a fact of life that the committee should consider.

If the offenses are serious, of course, they might violate the criminal laws and be referred to the Department of Justice. Where the investigation, even if it ends with culpability or a finding of culpability, can produce no disciplinary action, it seems to me the Ethics Committee should consider that and in such cases might want to conclude that any such investigation is an exercise in futility and should not be undertaken.

Mr. ALLEN. I believe that is very interesting.

I would like to inquire, in view of the Senator's hard work and expertise in this field—and I do commend him for the great contribution he has made in this area of committee reorganization and the question of ethics—though this may be slightly afield, if it became known, after a Senator left the Senate, that during his incumbency as Senator he had been guilty of impropriety, does the Senator feel that the Ethics Committee, and possibly the Senate, should indicate their disapproval and their condemnation of this action by the former Senator in protecting the good name and image of the Senate to show their disapproval of this, whether disciplinary action was possible or not?

Mr. STEVENSON. The answer is yes. It is difficult to generalize, but I certainly do not believe that a statute of limitations tolls or that a Member is excused of misconduct simply because he leaves the Senate. No. What the decision will be on a complaint alleging misconduct, as I indicated earlier, can be governed to some extent by a recognition in the Ethics Committee that it is incapable of disciplining the offender.

If the conclusion is reached, or the proof is there, and a former Member is guilty of an impropriety, no, I think the honor of the Senate and the duty of the Ethics Committee would demand a finding to that effect, though it is only hortatory, a reproval by the Ethics Committee in the first instance and by the Senate if, in its judgment, it felt that that was necessary.

Mr. ALLEN. Would he be given the same right to due process, so to speak, an incumbent Senator would have in stating his case before the Ethics Committee?

Mr. STEVENSON. Yes. I cannot conceive of any basis for making a distinction between the rights of human beings because they are or they are not then Members of the Senate. Regardless of their status, they are entitled to the same guarantees of due process.

Mr. ALLEN. I thank the Senator. I certainly agree with his responses to my question and I do support the amendment.

Mr. STEVENSON. Mr. President, I thank the distinguished Senator from Alabama for the opportunity to clarify several matters, and once again for his help on this difficult subject. I do thank him for his support of the amendment, which it is hoped the distinguished chairman will see fit to accept.

Mr. President, would the distinguished Senator from Wisconsin be prepared to accept this clarifying or technical amendment?

Mr. NELSON. Yes, the manager of the bill is satisfied with the clarification proposed in the amendment by the Senator from Illinois (Mr. STEVENSON). Mr. President, I am willing to accept the amendment, and I yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from Illinois yield back the remainder of his time?

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum and I ask unanimous consent that the time be charged against both sides on the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Has all time been yielded back?

Mr. STEVENSON. Mr. President, I yielded back the time I had.

Mr. NELSON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment was agreed to.

Mr. NELSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 121, AS MODIFIED

Mr. CURTIS. Mr. President, I send to the desk a modified version of amendment No. 121 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Nebraska (Mr. CURTIS) proposes an amendment numbered 121, as modified.

The amendment, as modified, is as follows:

On page 53, after line 19, insert the following:

"SEC. 310. Rule V of the Standing Rules of the Senate is amended by adding at the end thereof the following new paragraph:

"'4. (a) No debate, motion, or other transaction of business shall be in order during any session of the Senate unless at least twenty-five Senators are present and on the floor of the Senate.

"'(b) It shall be the duty of the Presiding Officer to maintain a continuous count of the number of Senators present on the floor of the Senate during sessions of the Senate. If, at any time, the number of Senators present is less than twenty-five, the Presiding Officer shall immediately suspend the proceedings of the Senate and such proceedings, shall not be resumed until at least twenty-five Senators are present.'"

On page 53, line 20, strike out "310" and insert "311".

The PRESIDING OFFICER. Is this the amendment on which there is to be 1 hour of debate?

Mr CURTIS. Mr. President, I have prepared a question and answer sheet which describes this amendment. The sheet has been placed on everyone's desk. I think I can save time in my explanation if I read it.

Question. What would this amendment do?

Answer. It would require 25 Senators to be on the floor at all times or no business could be transacted.

Question. Is this a reasonable rule?

Answer. Yes—rule 5 now provides, "No Senator shall absent himself from the service of the Senate without leave."

Question. What is the exact language of the Curtis amendment?

Answer. "No debate, motion, or other transaction of business shall be in order during any session of the Senate unless at least 25 Senators are present on the floor of the Senate.

"It shall be the duty of the Presiding Officer to maintain a continuous count of the number of Senators present on the floor of the Senate during sessions of the Senate. If, at any time, the number of Senators present is less than 25, the Presiding Officer shall immediately suspend

the proceedings of the Senate and such proceedings shall not be resumed until at least 25 Senators are present."

Question. Is the Curtis amendment practical?

Answer. Yes—at the present time the Senate cannot proceed without a Presiding Officer. It would mean that they could not proceed unless there were 25 Senators there. This would probably be worked out by the majority assuming the responsibility of getting 15 Senators on the floor and the minority getting 10.

Question. In what ways would the adoption of the Curtis amendment save time?

Answer. It would eliminate, to a large degree, a very wasteful practice of live quorums followed by votes to direct the Sergeant at Arms to cause the Members to be present. The present procedure is not effective because Senators respond and answer and then leave.

Question. What are the advantages of the Curtis amendment?

Answer. One of the purposes of a code of ethics is to increase the public respect for the Senate. The adoption of this rule will materially assist in achieving that. The presence of 25 Senators will practically assure that legislation which should not be passed will not be passed. It will mean that when a Senator has something to say there will be at least 25 Senators present to hear him. The views of the 25 Senators present would be beneficial to those Senators who could not be present for the debate when they arrive and seek guidance as to any particular vote.

Mr. President, very frankly, this would call for a restructuring of our programing here. But it can be done.

Just as a Presiding Officer suspends until there is order and just as we cannot start until there is a Presiding Officer here, everything would stop unless there are 25 Senators.

Let us consider it a moment. Any 25 Senators we would select, we would get a diversity of views, economic and political views among those 25.

They would hear what would happen. As other Senators who are busy in committee or tied up on something essential come in, there would be a group that have heard the debate to whom they could turn.

At the present time, very important matters are presented and there are only one or two, or five or six, Senators present. What happens? We are busy in committee, or otherwise officially tied up; we rush in here and ask some one individual, other than a Senator, what it is all about and how to vote.

I think we get good advice many times, but we do not get that diversity of opinion.

Here is another matter: Nothing should be brought up on the Senate floor unless it is important. This is not a kid's debating society. This is one of the highest legislative bodies in the world. We should not be debating and deciding things here unless they are important and worthy to be considered.

I say this in defense of myself and all my colleagues: When visitors come here and they see only a few Senators, they wonder what it is all about. Some of them understand; some go away with a very bad impression. The fact is that it does not mean that the Senators are not playing golf or that they are taking a nap in their office. Not at all. This Government has grown so big that Senators are scattered all over in their activities.

However, our present procedure is self-defeating. Someone comes here; he has worked hard on a proposal; he presents it. There is no one to listen. He says, "I'm going to ask for a live quorum." It takes a long, long time to get a live quorum, and perhaps they have to order the Sergeant at Arms to notify Senators. Do they end up getting a live quorum? No. The Senators are tied up with other things, so we come in and answer and leave.

After all that waste of time, we end up with very few Senators present to transact the business of our Republic.

Mr. President, how much time have I consumed?

The PRESIDING OFFICER. The Senator has used 8 minutes. He has 22 minutes remaining.

Mr. CURTIS. Mr. President, it will be argued that this is an impossible situation. It is not at all. Many groups and organizations do not start until a quorum is present, which is far more than 25 percent. How do we conduct our business? We go to a committee, and if there is not a quorum, they get busy on the telephone and secure a quorum. If at any time a quorum is not present, somebody can note it, and they cannot transact any business so far as reporting a bill is concerned.

I am convinced that the able leaders we have on both sides of the aisle can work out a program if this rule is adopted so that it works with ease.

Are we going to say to the country that we are incapable of so arranging our schedules so that we cannot have 25 Senators here, or are we going to say to the country that we do not think it is necessary?

This is another point I should like to make: This will greatly improve the debate in this body. It is discouraging for someone to work on a matter in presenting a bill or an amendment, or opposing it, and have no opportunity to present it to his colleagues.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. CURTIS. Mr. President, I reserve the remainder of my time.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished manager of the resolution yield me some time?

Mr. NELSON. Mr. President, I yield the leader whatever time he desires.

Mr. ROBERT C. BYRD. Mr. President, I commend the distinguished Senator from Nebraska on his objective. He seeks to have more Members on the floor at all times, especially with reference to matters that are being debated. So far as the objective is concerned, I can only compliment him and commend him.

So far as his amendment is concerned, however, I must say that it would be unworkable. It would impose an onerous burden on the joint leaders of the Senate. It would impose an onerous burden on the Presiding Officer of the Senate. It would not effectuate the expedition of business. It would, indeed, result in the slowing down of the business of the Senate to a considerable extent.

Moreover, I read from paragraph 4, page 1, of the Senator's amendment No. 121:

> No debate, motion, or other transaction of business shall be in order during any session of the Senate unless at least 25 Members are present on the floor of the Senate.

Mr. President, that is contrary to what the Constitution of the United States says. The Constitution of the United States, in article I—which deals with the legislative branch—section 5, says that with regard to each House, a majority of either House shall constitute a quorum to do business. The Constitution of the United States does not say that 25 Members of the Senate may transact business. The Constitution of the United States says that a majority of either House shall constitute a quorum to do business.

Yet, the amendment by the distinguished Senator from Nebraska would admit or sanction the right of the Senate to do business with only 25 Senators in attendance—without a quorum being present—and every Senator knows that that would fly in the face of the Constitution and is beyond the purview of the Senate to change by its rules.

Mr. CURTIS. Mr. President, will the Senator yield briefly for a question?

Mr. ROBERT C. BYRD. Yes, I am glad to yield.

Mr. CURTIS. Is it not true that at the present time, business is transacted and bills are passed not only when there is not a quorum here but when there may be five Members here? Is that not true?

Mr. ROBERT C. BYRD. The Senator is preeminently correct. But a quorum of the Senate is always assumed to be present, until the absence of a quorum is established. Under the Senate rule, any Senator may, at any time, suggest the absence of a quorum, upon which the Presiding Officer must immediately direct the clerk to call the roll.

Mr. CURTIS. This will not change that in the least.

Mr. ROBERT C. BYRD. It will not change that rule, but it would be unconstitutional to sanction the transaction of business with only 25 Senators required to be present.

Mr. CURTIS. Oh, no. I have heard everything. To require the Senators to be present would be unconstitutional.

Mr. ROBERT C. BYRD. I have not yielded to the Senator except for a question.

The PRESIDING OFFICER. The Senator from West Virginia has the floor.

Mr. ROBERT C. BYRD. Mr. President, the Constitution of the United States cannot be changed by the Senate by an amendment to this code of conduct resolution. The Senator knows that. He knows that his amendment would indeed admit or sanction the right of the Senate to do business without a quorum.

I read it again:

No debate, motion, or other transaction of business shall be in order during any session of the Senate unless at least 25 Senators are present on the floor of the Senate.

The amendment, by implication, says that debate, motions, or other transaction of business shall be in order during any session of the Senate if "at least 25 Members are present on the floor of the Senate." That clearly contravenes the Constitution of the United States. This kind of language, if we were to incorporate it into this code of conduct, could cause endless court cases contesting the legality of laws on the ground that a quorum was not present when such laws were pending and enacted.

Again, I commend my colleague. He has the best interests of the Senate at heart. He wants Members on the floor. But I say to him that this amendment not only would be unworkable; it would slow down the business of the Senate and would fly in the face of the Constitution. I hope that the Senator from Wisconsin will move to table the amendment.

In addition, it would put too much power in the hands of the Presiding Officer. He would constantly have to count the number of Senators in the Chamber. There goes one out the door; that leaves 24. There comes one in the door; that makes 25. There goes one out the door; that makes 24. Let us start, let us stop, let us start, let us stop.

Then someone would constantly be challenging the Presiding Officer's count. How do we know that he can count? He might count 25 and I might count 23. We would constantly have appeals from the rulings of the Chair, motions to table the appeals. I can see in this amendment a Pandora's box if I ever saw one. I say this with the greatest respect for my dear friend from Nebraska.

So, if the manager of the bill will in due time move to table the amendment, I will support the tabling motion.

Mr. NELSON. Mr. President, I might say about the amendment of the distinguished Senator from Nebraska that if a way could be designed in which the major issues or a major bill would finally be disposed of with an agreed time for debate, 2 to 4 hours, without Members reading speeches, and if the leadership or an appropriate group would decide which of those issues before us should be treated in that way, then to set aside the time and require a quorum might work.

I have thought of such a rule off and on. But I was here, as was the Senator from Nebraska, when we had 84 days of filibuster on the Civil Rights Act of 1964. To require 25 people to spend all day on the floor for 84 days would have been a tremendous waste of time.

I do not know about the constitutional question that was raised on quorums, but I do know that if you will whip open the Constitution and look at the eighth amendment you will see that there is a provision there that prohibits the imposition of cruel and unusual punishment, and if you required us to stay here and listen to all those speeches I think you would be in violation of the Constitution. [Laughter.]

Mr. President, I am prepared to yield back the remainder of my time.
